

# Reciprocal Teaching

Students are grouped by pairs. Both students read the same material. Then one student acts as the teacher and does the following:

1. Clarifies hard parts
2. Asks several high level questions
3. Summarizes the paragraph
4. Predicts what will be in the next segment

*Both read the next segment. Then the other student acts as the teacher and follows the above four steps.*

Proceed through the reading as indicated.
