

EndNote[®] 7 Tips

Creating Bibliographies

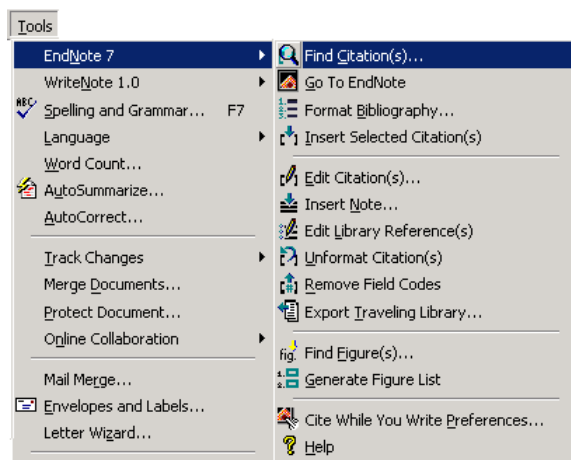

In this section, you will learn how to do the following:

- Locate and insert an EndNote citation into your paper.
- Format your paper using EndNote's Instant Formatting feature.
- Add new references to your paper and let EndNote update the in-text citations and bibliography instantly.

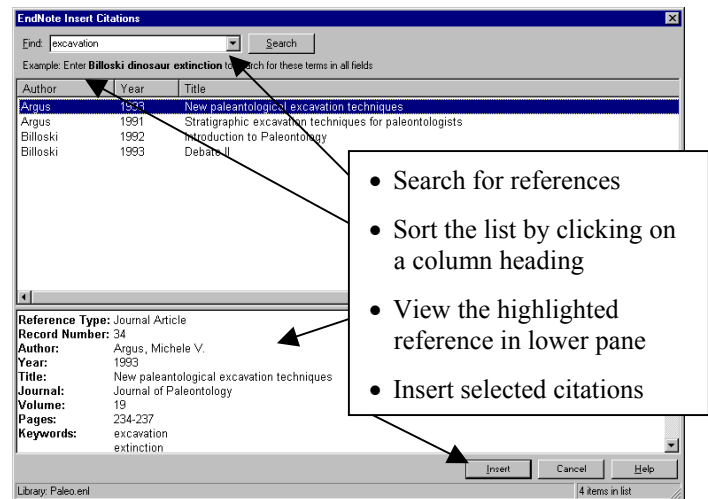

EndNote's Cite While You Write technology allows users of Macintosh Microsoft Word X or Windows Microsoft Word 97, 2000, and XP to format papers in one step within the word processor. If you use WordPerfect for Windows, EndNote can create bibliographies in a few additional steps using the EndNote Add-in. Please consult the EndNote manual or contact ISI ResearchSoft for details.

EndNote inserts commands on the Microsoft Word *Tools* menu to give you direct access to your references while writing. *Find Citation(s)* and *Format Bibliography* are the main functions on this menu. Begin a New Paper in Microsoft Word

For this example, open Microsoft Word and start a new empty document. Type "Bibliographies are easier than ever with EndNote's Instant Formatting." You are now ready to insert a citation at this location in the paper. From the *Tools* menu in

Microsoft Word, select *EndNote 7*, then *Find Citation(s)*.

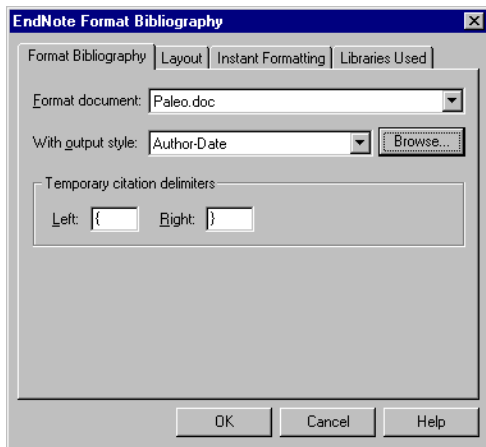

An EndNote Insert Citations dialog box appears like this one.

In the upper left corner of this dialog box, next to *Search* type the keyword "excavation" then click the *Search* button or press *Enter*. Highlight the record "Billoski, 1992" and click *Insert* or press *Enter*. This citation is inserted and formatted in the output style selected in EndNote 7.

Type the next sentence, "Simply select the references you would like in your bibliography and EndNote does the rest." This time, type "{paleo}" and watch the instant retrieval results appear on your screen. A *Matching Reference* dialog box, similar to the one above, appears so you can select one or more references to insert when multiple choices exist. Highlight the record "Hall, 1999" and click *Insert* or press *Enter*. This citation is inserted and formatted in the output style selected in EndNote 7.

Change Bibliography Format in Microsoft Word

From the *Tools* menu in Microsoft Word, select *EndNote 7* then *Format Bibliography*. The dialog box below appears:

Change the output style with the drop-down list on the *Format Bibliography* tab.

Use the *Layout* tab to adjust your bibliography's attributes.

Enable or disable EndNote's Instant Formatting feature by clicking on the *Instant Formatting* tab.

The *Libraries Used* tab tells you which EndNote libraries were used to format this paper.

Click on the pull down menu next to *With output style* and select *Numbered* from this list, then click *OK*. Watch EndNote reformat your in-text citations and bibliography.

Customize a Favorites List of Output Styles in EndNote

Switch to EndNote to select a new output style from over 1000 predefined styles. From the *Edit* menu in EndNote, select *Output Styles* then *Open Style Manager*. Your *Output Style Manager* opens and you see a dialog box similar to the one below:

View a preview of the output style by highlighting the output style in the upper pane and changing *Style Info* to *Style Preview* in the drop-down list.

Use the *Find* button to quickly locate the output style you want by name or discipline.

Click the *Unmark All* button to unmark the currently selected output styles.

Mark your favorite output styles by clicking the check box to the left of the style name. Your favorite output styles list is now accessible in EndNote and Microsoft Word. Close this dialog box and switch back to Microsoft Word to create a bibliography with a newly-selected output style.

For more information see the EndNote manual chapter *Cite While You Write in Microsoft Word*.
