

Technology Available

Desire2Learn(D2L) - Learning Management System that allows teachers to communicate with students, post grades, receive assignments electronically, do online quizzing/testing, post course documents, etc.

Lockdown Browser - works in conjunction with D2L. Locks down the computer to only allow students to take a online quiz/exam without having access to any of their other programs or notes on the computer.

Respondus - software available for in the lab use to quickly create quizzes/exam for D2L using a word, pdf, or excel file.

eClickers - use clickers to get immediate feed back from students.

eEvaluations - end of the semester student opinion teaching evaluations are available in an online format.

Photoshop - software available in the lab for creating photographs and documents for courses.

Dreamweaver - software available in the lab for creating personal webpages.
