

How to obtain the PS3 system's MAC address.

All devices that connect to the Internet, including PlayStation 3, contain a network adapter. Each network adapter has a unique code to identify it, known as a MAC address.

Follow these instructions to obtain the PS3 system's MAC address.

1. Select Settings on the PS3 Home Menu.
2. Navigate down and select [System Settings].
3. Select [System Information]. Here you will find your MAC address. Be sure to note down the entire code, including colons.
