Humphrey Ch. 5a - slide 1

 Popular Estimating Methods: Fuzzy Logic (cf. Humphrey, 1995, p. 103-105)
Roughly judge how predicted size compares with historical data.
Historical data is divided into topical categories and subgroups based on size. You need a large amount of historical data for this.
Look at examples on p. 103-105. (Note: log₁₀(LOC) is used to create equally-sized ranges.)
