SOCi545
Program Implementation and Evaluation
Strategies for implementation. Review of various methods of evaluation with emphasis on measuring outcomes and assessing quality in community program development.

SOCi580
Seminar in Community Development Leadership
Topics include philosophical and spiritual foundations, profiles in leadership, strategic planning, grantsmanship, networking and interagency relations, managing volunteers, program evaluation.

SOCi698
Project
Open only to students in the MSA in Community Development.

Each degree offered by the Biology Department includes a common core curriculum and additional courses tailored to students’ special needs.

Highly motivated students may compete for the Biology Undergraduate Research Traineeship (BURT) program. For full details, consult the Biology Department.

Undergraduate Programs

BS: Biology
All biology majors must complete the following core and cognate courses:

Biology Core—24

Cognate Core—24 or 26

General Education Cognates
RELT340, PSYC101.

Students must complete the biology core, the cognate core, and the requirements for one of the emphases listed below.

Botany Emphasis—21
Upper-division biology courses; must include a botany course (BOT prefix) drawn from each of the environmental, morphologi-
cal, and functional groups of courses listed below. In addition, one zoological course (ZOOL prefix) must be included.

Zoology Emphasis—21
Upper-division biology courses; must include a zoology course (ZOOL prefix) drawn from each of the environmental, morphological, and functional groups of courses listed below. In addition, one botany course (BOT prefix) must be included.

Biomedical Emphasis—17
Must include ZOOL315, 464, 465, BIOL475; PHTH 417 and 427. BCHM421 must be included in the cognate core.

Molecular Biology Emphasis—15-16
Must include BIOL418, 445, 447, and two of the following four courses: BIOL475; BIOL444, 446; ZOOL315; BOT470 or ZOOL464. BCHM421 must be included in the cognate core.

Neurobiology Emphasis—17
Upper-division biology courses; must include a zoology course (ZOOL prefix) drawn from each of the environmental, morphological, and functional groups of courses listed below. In addition, ZOOL475 and either PSYC364 or 449 must be taken. BCHM442 must be included in the cognate core.

Special Emphasis—21
In situations where students are preparing for a specific job opportunity or a graduate or professional program, the special emphasis may be considered if other degree programs are not adequate. The credits must include one biology course each from the functional, morphological, and environmental courses listed below. Additional credits to reach a minimum of 21 are to be selected from courses in biology or other disciplines in consultation with a Biology Department advisor. Departmental approval must be received before the beginning of the spring semester of the student’s junior year.

Minor in Biology—22
BIOL165, 166, 449 and one course each from environmental, morphological, and functional biology electives.

SENIOR THESIS
A minimum of 3 credits of BIOL495 or HONS497. Biology majors may elect to complete a minimum of 3 credits of original research in a topic of mutual interest with a Biology Department staff member and present this original work in the form of a senior thesis. This research experience may be supported by a research scholarship.

Graduate Programs
The Biology Department offers courses leading to the Master of Science degree and also cooperates with the School of Education in offering courses leading to the Master of Arts in Teaching degree. Students are strongly urged to incorporate into their programs a summer of study at the Rosario Beach Marine Station at Anacortes, Washington. During the 8-week summer session, students may earn 6 to 8 credits.

MS: Biology
In addition to the general requirements for admission to and enrollment in graduate degree programs outlined in this bulletin on pp. 39-40, students must meet the following departmental requirements.

Admission Requirements
- A bachelor’s degree with major in biology or an approved, related discipline, including courses in cell/molecular biology, organismal physiology, developmental biology, genetics, and ecology.
- A minimum GPA of 3.00 (B) in the undergraduate major for admission to regular student status.
- Cognate sciences, including full-year courses in general chemistry, organic chemistry, and physics. Mathematics through calculus level is encouraged.

Degree Requirements
- The inclusion of BIOL550 or IDSC526, and BIOL681, 682.
- A written comprehensive examination completed before the third semester in residence.
- A thesis earning 6 credits.
- A final oral examination in defense of the thesis.
- A minimum of 30 credits of approved course work and thesis.

MAT: Biology
Designed to prepare students for teaching biology in secondary schools, this degree is offered through the School of Education. A minor or its equivalent in biology on the undergraduate level is a prerequisite. In consultation with the department chair or the graduate program director, a minimum of 12 (6 credits must be 500-level or above) credits from courses listed below may be applied toward this program.

Required courses are BIOL550 or IDSC526. For further information, see the School of Education section of this bulletin on p. 253.

Courses
See inside front cover for symbol code.

GENERAL

BIOL100
Human Biology
A survey of the structure and function of the human body, for those not requiring the depth offered in BIOL111, 112. Meets the natural science elective course requirement. Two lectures, one lab per week. Does not apply to a major or minor.
Biol 111, 112, 113  $ (4, 3, 1)
Anatomy and Physiology I, II, III
Biol 111 and 112 includes cell biology, functional anatomy and control of each organ system of the human. Biol 111 weekly: 3 lectures and 1 lab; Biol 112 weekly: 2 lectures and 1 lab; Biol 113 weekly: 1 lecture and 1 lab, includes more detailed anatomy. Biol 111 is a prerequisite for Biol 112. Biol 112 or consent of the instructor is the prerequisite for Biol 113. Does not apply to a major or minor. Biol 111: Fall; Biol 112: Spring; Biol 113: Spring.

Biol 208  $ (4)
Principles of Environmental Science
Study of basic ecological principles as applied to human activities. Discussions deal with contemporary environmental issues. Lab includes field trips, guest speakers, and experiments. Meets General Education science requirements for non-science majors and applies toward the environmental science major and certain state educational certification requirements. Weekly: 3 lectures and 1 lab. Fall

Biol 260  $ (4)
General Microbiology
Includes history, morphology, classification, control, growth, transmission, and pathogenicity of selected bacteria, viruses, rickettsia, fungi, and parasites. Covers the nature of host defenses against pathogens, including the acquisition of specific immunity and immune disorders. Weekly: 3 lectures and two 1/2 hour labs. Does not apply to a major or minor. Spring

Biol 330  $ (3)
History of Earth and Life
Survey of fundamental concepts of geology and paleontology with application to a study of the history of the earth and of life. Consideration is given to interactions of religious, philosophical, and geological ideas, within a biblical world view. Weekly: 2 lectures and 1 lab. Does not apply to major or minor. Fall

REQUIRED CORE

Biol 165, 166  $ (5, 5 or 4, 4)
Foundations of Biology
Provides a firm foundation for students majoring or minoring in the biological sciences. Weekly: 5 lectures and one 3-hour lab. Ten credits when offered during the academic year; 8 credits when offered at the Marine Biological Station during the summer. Biol 165: Fall; Biol 166: Spring

Biol 348  $ (3)
General Ecology
Ecological principles as applied to individual, population, community, and ecosystem levels of organization. Labs feature the characterization of ecological systems using standard field and lab techniques. Weekly: 2 lectures and 1 lab. Prerequisites: Biol 165, 166 or 208. Fall

Biol 371  $ (3)
Genetics, Cellular and Molecular Biology I
Mechanisms of heredity are considered in light of classical population and molecular genetics. Labs feature experience in Drosophila genetics, chromosome analysis, statistical techniques, and recombinant DNA technology. Prerequisite: Biol 166, and completion of or simultaneous enrollment in Chem 131. Fall

Biol 372  $ (3)
Genetics, Cellular and Molecular Biology II
Information from molecular biology, biochemistry, biophysics, physical chemistry, and electron microscopy are integrated to present the cell as a functional unit. Labs provide experience in the collection and analysis of quantitative data about cells. Prerequisite: Biol 166, and completion of or simultaneous enrollment in Chem 132. Spring

Biol 449  $ (3)
Historical and Philosophical Biology
Examination of biological, paleontological, and geological concepts central to the study of historical events in biological systems. Considers the interactions of data, theories, and extra scientific concepts in historical biology, within the particular context of a biblical world view. Weekly: 2 lectures and 1 lab. Prerequisite: Biol 166. Spring

Biol 451, 452
Questions in Biology: Analysis, Evaluation and Answers
Lectures, discussions, and individual work centered around asking and answering important questions in the life sciences: research in biology, discussions on important issues in origins; discussions on major topics in bioethics. Attendance at monthly research seminars required. Open to senior Biology majors. Biol 451: Fall; Biol 452: Spring

ELECTIVES
(Elective courses offered at the Marine Biological Station may be included under these electives.)

Group A: Environmental Biology

Biol 208  $ (4)
Principles of Environmental Science
Study of basic ecological principles as applied to human activities. Discussions deal with contemporary environmental issues. Lab includes field trips, guest speakers, and experiments. Meets General Education science requirements for non-science majors and applies toward the environmental science major and certain state educational certification requirements. Weekly: 3 lectures and 1 lab. Fall

Biol 479  (3.5)
Marine Ecology (offered only at Marine Station)
A study of interspecific, intraspecific, and community relationships demonstrated by marine organisms. Summer

Biol 487  $ (3)
Biogeography
The distribution of plants and animals in relation to their environment, including consideration of major biogeographic regions of the world and the role of distribution in adaptive change and diversification of life in the past and present. Weekly: 2 lectures and 1 conference period. Spring (odd years)

Bot 450  $ (3)
Medical Botany
Designed as an interface between botany, medicine, anthropology and pharmacology to define the impact plants have with the remedial, harmful or psychoactive health of humans. Weekly: 3 lectures & 1 lab. Prerequisites: Biol 112. Spring

Bot 468  (3.5)
Marine Botany (offered only at Marine Station)
A systematic study of marine plants found in Puget Sound, with a survey of marine plants from other areas. Summer

Bot 475  (4)
Biodiversity of Vascular Plants
A taxonomic and morphological study of vascular plants
emphasizing the plants found in the Great Lakes area. Field trips. Weekly: 3 lectures and 1 lab. Open to non-science majors. Fall

ZOOL454 $ (3-4)
Vertebrate Zoology
Covers the various specialties of vertebrate biology, including herpetology, ornithology, and mammalogy. Repeatable in the different specialized areas. Open to non-science majors. Weekly: 2 lectures and 1-2 labs. Vertebrate Zoology: Mammalogy (Fall, even years) and Vertebrate Zoology: Ornithology (Spring, even years) both qualify as “S” courses for General Education Service Learning.

ZOOL458 (3.5)
Marine Invertebrates (offered only at Marine Station)
Biology of invertebrates studied in the marine environment of Puget Sound. A survey of the various phyla is conducted by studying the living animals in the field, and by tide pool observation, dredging, and scuba diving. A project on a specific group or species is required. Summer

ZOOL459 $ (3-4)
Entomology
Study of the fundamental aspects of insect biology. Weekly: 2 lectures and 1-2 labs. As scheduled Group B: Morphological Biology

BIOL428 $ (3)
Paleobiology
Covers various specialties including History of Life; Vertebrate Paleontology; Paleobiology of Dinosaurs. Origins, history, adaptations, diversity, and paleoecology of ancient organisms as documented by the fossil record. Repeatable in different areas. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166. Fall (odd years)

BOT430 $ (3)
Plant Anatomy
A study of cell and tissue structure and organ development in vascular plants. Weekly: 2 lectures and 1 lab. As scheduled

ZOO315 $ (3)
Animal Development
A study of the cellular and tissue-level events that result in the development of integrated organisms. Vertebrate development is emphasized in the lab using frog and chick models. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. Spring

ZOO316 (1)
Human Embryology
Acquaints students with the process of human development and embryology. Prerequisite: BIOL166. Prior or concurrent registration with ZOO315 recommended. Weekly: 1 lecture. Spring

ZOO465 $ (3)
Histology
Microscopic anatomy, cytology, ultrastructure of tissues and organ systems are correlated with function. Emphasis on normal tissues of vertebrates. Weekly: 2 lectures and 1 lab. Spring

Group C: Functional Biology

BIOL418 $ (2)
Immunology
Topics include organs and cells of the immune system, antigens, immunoglobulins, the MHC, antibody diversity, tolerance and memory, complement, cell mediated immunity, regulation, hypersensitivity, autoimmune diseases, transplantation, and tumor immunology. Weekly: 2 lectures. Prerequisites: BIOL166. Spring

BIOL419 $ (1)
Immunology Lab
A theoretical and practical study of techniques used in modern immunology. Includes immunoserological methods; isolation and detection of immunoglobulin molecules in immune serum by SDS-PAGE, western blotting, and immunofluorescence antibody (IFA) methods; enzyme-linked immunosorbant assay (ELISA), in vitro phagocytosis. Weekly: 1 lab. Pre- or corequisite: BIOL418. Spring

BIOL445 $ (3)
Molecular Genetics
An advanced consideration of the structure, function, and manipulation of nucleic acids and application of molecular information in other disciplines. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL371. Spring

BOT470 (3)
Plant Physiology
Study of plant functions including water relations, metabolic pathways, growth regulators, and photomorphogenesis. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166; CHEM131. As scheduled

ZOOL464 (4)
System Physiology
Functional processes used by animals in adjusting to their external environment and controlling their internal environment. Labs involve the firsthand analysis of selected aspects of the major functional systems. Weekly: 3 lectures and 1 lab. Prerequisite: BIOL166, CHEM131. Fall

ZOOL484 $ (3)
Animal Behavior
Behavior of animals including considerations of social interactions, learning processes, instinct, motivation, experimental methods, and the analysis of behavior patterns characteristic of various species. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. As scheduled Group D: Other Electives

BIOL444 (1)
Electron Microscopy in Biological Investigations
The theory, functions, and use of the transmission and scanning electron microscopes. Weekly: 1 lecture. Spring (odd years)

BIOL446 (2)
Electron Microscopy Laboratory
Lab preparation of tissues for transmission and scanning electron microscopy with hands-on experience with the ultramicrotome and both T.E.M. and S.E.M. instruments. Acceptable photographs with interpretations required with lab reports on appropriate research projects. Prerequisite: Prior or concurrent registration in BIOL444. Spring (odd years)

BIOL447 (3)
Tissue Culture
Study of theory, application, and techniques useful for propagating tissues in the research laboratory. Topics include sterile techniques, nutrition, media preparation, establishment and maintenance of primary and secondary cultures, enumeration, and analysis.
Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. Pre- or corequisite: CHEM231. Spring (even years)

**BIOL475**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. Organic Chemistry background recommended.*

**Biology of Bacteria**

Study of the properties of bacteria that illustrate their function and relationship to other living systems. Topics include structure and function, classification, and interaction with the environment. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166. Organic Chemistry background recommended. Fall

**ZOOLO425**

*Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166.*

**Parasitology**

Emphasis on better known parasites of humans and animals. Attention given to ecological factors concerned with host-parasite contact, pathogenicity and pathology, and treatment and effect on parasitized populations. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166. Fall

**ZOOLO475**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Neurobiology**

The neural basis of behavior, with some emphasis on the human nervous system, including cellular and molecular approaches to neuron function, development of neurons and circuits, and neuroendocrine mechanisms. Labs develop skills in electrophysiology and neuroanatomy. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. Fall

**RESEARCH AND SPECIALIZED STUDIES**

**BIOL405**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Topics in _________**

Investigates various specialties of biology. Repeatable in different areas. Fall, Spring, Summer

**BIOL495**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Independent Readings/Research**

Independent readings or research in biology under the direction of the instructor. Consent of instructor required. Fall, Spring, Summer

**GRADUATE**

**BIOL516**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Behavior of Marine Organisms**

(of offered only at Marine Station)

Study of inter- and intra-specific behavior of marine animals and their behavioral response to the physical environment. Involves lab experience, field observation, and a research project. Instructor’s permission required. Summer

**BIOL550**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Issues in Origins and Speciation**

A comparative survey of the assumptions, attitudes, methods, and conclusions of science and religion in the handling of data. Attention is given to current scientific data and their relationship to an understanding of earth history and the present diversity of life. Spring

**BOT515**

*Weekly: 2 lectures and 1 lab. Prerequisite: BOT470.*

**Plant Cell Biology**

Functional activities of plant tissues provide the basis for this study of the ultrastructure of a variety of plant cell types. Attention is given to the cytoskeleton and other organelles involved in plant cell morphogenesis. Weekly: 2 lectures and 1 lab. Prerequisite: BOT470. As scheduled

**BOT525**

*Weekly: 2 lectures and 1 lab. Prerequisite: BOT470.*

**Molecular Laboratory Techniques**

Acquaints students with modern lab techniques of molecular biology. The manipulation and study of nucleic acids and proteins using model systems involving plant-microbe interactions. Fall (even years)

**BOT530**

*Weekly: 2 lectures and 1 lab. Prerequisite: BOT475.*

**Advanced Systematic Botany**

Literature and philosophy of plant classification, processes of speciation in higher plants, sources and interpretation of data, biosystematic methods, and plant nomenclature. Weekly: 2 lectures and 1 lab. As scheduled

**ZOOLO500**

*Weekly: 2 lectures and 1 lab. Prerequisite: ZOOLO425.*

**Protozoology**

Protozoa, including morphology, physiology, systematics, ecology, reproduction, and host-parasite relationships; emphasis on the parasitic protozoa, but free-living forms also considered; current problems encountered in protozoan research and methods of studying protozoa. Weekly: 2 lectures and 1 lab. Prerequisite: ZOOLO425. As scheduled

**ZOOLO520**

*Weekly: 2 lectures and 1 lab. Prerequisite: ZOOLO475.*

**Molecular and Developmental Neurobiology**

A seminar course that deals in depth with current and relevant issues in the areas of molecular and developmental neurobiology. Offered alternate years. As scheduled

**ZOOLO565**

*Weekly: 2 lectures and 1 lab/problem session. As scheduled*

**Environmental Physiology**

Study of the physiological responses of animals to their environments. Topics include environmental periodicities and biological clocks, thermal budgets, water balances, and adaptations to extreme environments. Weekly: 2 lectures and 1 lab/problem session. As scheduled

**BIOL590**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Topics in _________**

Investigates various specialties of biology. Repeatable in different areas. As scheduled

**BIOL648**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Workshop**

**BIOL681, 682**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Research Methods and Biology Seminar**

An introduction to graduate studies in biology, the nature and methods of science, and principles of research ethics. During second-semester reports are made by each student to the group on topics from current literature and on specific problems in biology. Participation once per week for 2 semesters is required. BIOL681: Fall; BIOL682: Spring

**BIOL697**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Research in Biology**

Repeatable to 4 credits. Arranged

**BIOL699**

*Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166.*

**Master’s Thesis**

Repeatable to 6 credits. Arranged
