ing in poverty, both locally and internationally. Development will be presented as the building of social capital in our communities that enables them to function at a higher and more efficient level. Building on the core Christian principles that emphasize development, this course will provide students with a better understanding of community, while applying basic development concepts to local and international realities.

SOCI530 (2)
Community Needs Assessment & Capacity Mapping
Introduction to various methods for assessing community needs and mapping community capacity to address those needs.

SOCI535 (2)
Program Planning, Budgeting & Grantsmanship
Building on assessment and capacity mapping, the related topics of program planning, budgeting and grant-writing are presented. Hands-on experience is sought, linking classroom instruction and real community situations.

SOCI545 (2)
Program Implementation and Evaluation
Strategies for implementation. Review of various methods of evaluation with emphasis on measuring outcomes and assessing quality in community program development.

SOCI550/350 (2)
Introduction to Social Policy
Develops basic knowledge and skills for policy analysis, formulation and critical challenge within local and international contexts. Examines the determining factors affecting public policy in the United States as compared with other systems. Provides framework for analysis of social problems and policies, as they impact development and practice in human services.

SOCI580 (1-2)
Seminar in Community Development Leadership
Topics include philosophical and spiritual foundations, profiles in leadership, strategic planning, grantsmanship, networking and interagency relations, managing volunteers, program evaluation.

SOCI698 (1-3)
Project
Open only to students in the MSA in Community Development.

BEHAVIORAL NEUROSCIENCE

Price Hall, Room 216, Nethery Hall, Room 123

Behavioral Neuroscience is a new interdisciplinary program at Andrews University that is based in Behavioral Science, Biology and Mathematics. It has been established with the support of an approximately one-half million dollar grant from the National Science Foundation. Its purpose is to provide new opportunities for undergraduates to prepare for exciting careers in the fascinating, rapidly growing scientific fields which involve the study of the brain and its control of behavior. Students will be involved in hands-on, laboratory experiences, using the latest equipment as well as class work which will emphasize neuronal function, processing by the brain and the latest understanding of topics such as perception, memory, cognition, sensory input, the basis for mental and emotional disorders, drug addiction and other topics. Research with a faculty mentor is an integral part of the program and is supported by student scholarships provided by the National Science Foundation grant. Students who enter this Behavioral Neuroscience program will complete a common core of classes and choose one of three emphases outlined below to complete a BS degree in either Biology or Psychology.

Undergraduate Programs

Behavioral Neuroscience Core—38–40 + 3 Gen. Ed.
General Education: PSYC180–3
BIOL165, 166, ZOOL475, CHEM131, 132
CHEM231, 232, 241, 242 or PHYS141, 142 or PHYS241, 242, 271, 272
PSYC364, 445, 449
BS: Biology  
Neuroscience Emphasis—26  
BIOL372, 372, 449, 495 (2 cr), ZOOL465, 484, three upper division electives from Biology, Psychology or BCHM422  
Behavior/Mathematics Emphasis—28  
BIOL371, 372, 449, 495 (2 cr), ZOOL484, MATH141, 142, 426, STAT340  

BS: Psychology  
Behavioral Neuroscience—24 + 3 Gen. Ed.  
General Education—PSYC101  
PSYC433, 434, 460, 465, four upper division electives from Biology, Mathematics or Psychology  

BIOLOGY

Each degree offered by the Biology Department includes a common core curriculum and additional courses tailored to students’ special needs.  
Highly motivated students may compete for the Biology Undergraduate Research Traineeship (BURT) program. For full details, consult the Biology Department.  

Undergraduate Programs  
BS: Biology  
All biology majors must complete the following core and cognate courses:  
Biology Core—24  
Cognate Core—24 or 26  
CHEM131, 132, 231, 232, 241, 242; PHYS141 & 142 or 241/271 & 242/272  
General Education Cognates  
RELT340, PSYC101. Students taking the Honors Core do not need RELT340.  
Students must complete the biology core, the cognate core, and the requirements for one of the emphases listed on the following page.
