BACCALAUREATE DEGREE CORE REQUIREMENTS
The BSET and BT core requirements are as follows:

**BSET—24**
ENGR120, ELCT141, 142, MECT121, MECT235, INDT450, ENGT310, or ENGT396 or GTEC395 or INDT315

**BT—8**
ENGR370, INDT310, AGRI395 or GTEC395 or INDT315 or AVIA395

### General Courses (Credits)

See inside front cover for symbol code.

**GTEC110**
*Freshman Seminar*
College success and life enrichment skills. Included are an introduction to the resources of the university, principles of critical thinking, and Christian values clarification.

**GTEC115**
*College Seminar*
See description under GTEC110. Repeatable.

**GTEC298**
*Prior Learning Assessment*
Prior Learning Assessment (PLA) is a process which validates learning experiences occurring outside traditional college/university academic programs. A portfolio of evidence for demonstrating experience and competency justifies and determines the amount of credit granted. Repeatable with different topics.

**GTEC395**
*Cooperative Work Experience*
Supervised (by the dean or his appointee) on-the-job work experience with a cooperating industry. A minimum of 120 hours of work is required per credit. The student must submit a report of the cooperative work experience as specified by the instructor. Repeatable to 6 credits. Graded S/U. Prerequisites: an associate degree in technology or equivalent and permission of the dean. Students must apply and be accepted one semester in advance of their planned Cooperative Education experiences.

**GTEC498**
*Prior Learning Assessment*
See description under GTEC298. Total Prior Learning Assessment credits (GTEC298 and 498) may not exceed 32 credits.

Students may choose program emphases (or a combination of them) in such areas as flight, maintenance and business.
Programs

If any of the degree programs do not meet the needs of the student, an individualized major is available as described on the previous page.

BT: Aviation Technology

Students taking the Bachelor of Technology degree may:
(1) combine areas to meet specific career goals (see options that follow) or
(2) limit their specialization to a single area—flight or maintenance.

Major* 60-82
Degree core 8
General Education requirements 39-42
General electives 17-0
Total credits for degree 124-129

*Majors
Flight
Flight—27-29 credits
Flight electives—18-16 credits
Aviation electives—15 credits
Flight and Business
Flight—27-29 credits
Aviation electives—12-10 credits
Business—21 credits minimum
Flight and Maintenance
Flight—27-29 credits
Maintenance—52 credits
Maintenance
Maintenance—52 credits
Flight/Aviation electives—8 credits
Maintenance and Business
Maintenance—52 credits
Business—21 credits minimum

AT: Aviation Technology

Students may earn an Associate of Technology degree by taking courses beyond those required for the certificate in either the flight or maintenance area. The additional courses give students a broader General Education base, prepare them better to perform the activities acquired by the certificate program, and facilitate study for an advanced degree.

Major* 40-52
General Education requirements 16-22
General electives 6-0
Total credits for degree 62-74

*Majors
Flight
Flight—27-29 credits
Aviation electives—13-11 credits
Maintenance
Maintenance—52 credits

Minor in Aviation Technology

Requirements: A minimum of 25 or 32 credits in flight or maintenance, respectively.

Students earn a minor in Aviation Technology by completing one of the following:

A Commercial Pilot certificate and instrument rating are required.

Maintenance (32 credits): Complete either the Airframe or Powerplant License.

FAA Certification

FAA-Approved Instruction. The Department of Aeronautical Technology operates a Flight School as well as an Airframe and Powerplant Maintenance Technician School approved by the FAA under Title 14 CFR, Part 141* and Part 147, respectively.

* Private curriculum only

FAA Flight Certification Programs. Students may take flight instruction to qualify for several levels of certification. Students wishing only to take the content courses necessary for the specific flying expertise can take just the flight area courses as outlined under the respective certification requirements.

FLIGHT AREA COURSES

Private Pilot Certificate, Commercial Pilot Certificate, Instrument Rating, and either Flight Instructor’s Certificate or Multi-Engine Rating are required for any degree.

Required Courses—60
A student may take any of the above courses under FAA Part 61 with the permission of the Chief Flight Instructor.

Aeronautical Technology electives are to be chosen in consultation with an advisor.

No more than 50% of the flight credits to be counted toward a major or minor in Aeronautical Technology may be taken as credit by examination.

MAINTENANCE AREA COURSES

FAA Maintenance Certificates. Students may earn the following FAA-approved certificates from the department’s Aviation Maintenance Technician School:

Airframe
Powerplant
Airframe and Powerplant

Maintenance students must obtain both the FAA Airframe or Powerplant license for any degree.

Required Courses—52

Courses

See inside front cover for symbol code.

AVIATION FLIGHT

AFLT104 (1-4)
Introduction to Aviation
Acquaints students with the history and opportunities in aviation, such as mission flying, flight instruction, aircraft maintenance, avionics, sales, safety, and aerodynamics of flight. Non-majors receive one free hour dual instruction per credit hour enrolled.

Fall, Spring
AFLT115
Private Pilot Ground School
Ground training to prepare students for the FAA private pilot airplane knowledge test. Topics include aerodynamics, weight and balance, Federal Aviation Regulations, navigation, meteorology, aircraft systems, and performance. Fall, Spring, Summer

AFLT116
Private Pilot Flight Training I
Flight and ground training to prepare a student through post solo flight. Fall, Spring, Summer

AFLT117
Private Pilot Flight Training II
Flight and ground training to prepare a student for cross-country flying and for the FAA private pilot airplane practical test. Fall, Spring, Summer

AFLT215
Instrument Pilot Ground School
Ground training to prepare the student for the FAA instrument rating airplane knowledge test. Topics include Federal Aviation Regulations, meteorology, instrument flight charts, flight planning, instrument approaches, use of navigation equipment, and FAA publications relating to instrument flight. Fall, Spring, Summer

AFLT216
Instrument Pilot Flight Training I
Instrument flight training from basic attitude flight through holding patterns. Fall, Spring, Summer

AFLT217
Instrument Pilot Flight Training II
Instrument flight training from instrument approaches, instrument cross-country flight and preparation for the FAA instrument rating airplane practical test. Fall, Spring, Summer

AFLT305
Commercial Pilot Ground School
Ground training to prepare the student for the FAA commercial-pilot airplane knowledge test. Topics include advanced navigation, FAR Parts 61, 91, and 135 for air taxi, complex aircraft systems, weight and balance, and performance charts. Fall, Spring, Summer

AFLT306
Commercial Pilot Flight Training
Flight training and solo-flight practice to prepare the student for the FAA commercial-pilot airplane practical test. Repeatable to 4 credits. Fall, Spring, Summer

AFLT307
Multi-Engine Flight Training
Flight and ground training to prepare the student for the multi-engine airplane practical test. Fall, Spring, Summer

AFLT315
Aircraft Systems for Pilots
The study of aircraft systems and engines, propellers and governors; the fuel, electrical, hydraulic, pneumatic, and de-icing systems, flight controls, weight and balance, and aircraft-instrument systems. Fall

AFLT330
Crew Resource Management
Study of the effective use of resources available to the crew to achieve safe and efficient flight operations. Areas include human factors, communication, conflict resolution, leadership, teamwork, and situational awareness as applied to flight operations. Spring

AFLT455
Flight Instructor Ground School
Ground training to prepare the student for the FAA flight instructor airplane knowledge test. Topics include techniques of teaching, analysis of maneuvers, and lesson planning. Fall, Spring, Summer

AFLT456
Flight Instructor Flight Training
Flight and ground training to prepare the student for the FAA flight instructor airplane practical test. Topics include the performance, teaching, and analysis of flight maneuvers required for the private and commercial airplane pilot. Fall, Spring, Summer

AFLT464
Basic and Advanced Ground Instructor
Prepares the student for the FAA basic and advanced ground instructor knowledge test. Topics include techniques of teaching aerodynamics, aircraft performance, aircraft systems, weight and balance, meteorology, navigation, and regulations. Fall, Spring, Summer

AFLT465
Instrument Flight Instructor Ground School
Prepares the student for the FAA instrument flight instructor knowledge test. Topics include techniques of teaching instrument flight, analysis of instrument maneuvers, instrument approaches, enroute operations, regulations, and lesson planning. Fall, Spring, Summer

AFLT466
Instrument Flight Instructor Flight Training
Flight and ground training to prepare the student for the FAA instrument flight instructor airplane practical test. Topics include the performance, teaching, and analysis of attitude instruments, instrument approaches, and enroute operations. Fall, Spring, Summer

AFLT467
Multi-Engine Flight Instructor
Flight and ground training to prepare the student for the FAA multi-engine airplane flight instructor practical test. Topics include the performance, teaching, and analysis of maneuvers and procedures for the multi-engine airplane. Fall, Spring, Summer

AFLT469
Instrument Ground Instructor
Prepares the student for the FAA instrument ground instructor knowledge test. Topics include the techniques of teaching advanced weather theory, weather reports and forecasts, instrument procedures and regulations, approaches, and enroute operations. Fall, Spring, Summer

AFLT474
Techniques of Mission Flying
Develops special piloting skills required in remote undeveloped bush operations. Topics include piloting, dead reckoning, GPS navigation, low-level operations, terrain flying, mountain passes and canyons, cargo drops, short fields, uphill and downhill operations on primitive airstrips, maximum performance techniques, and precision airplane control. Fall, Spring, Summer
AVFL485  
*Airline Transport Pilot Ground School*  
Prepares the student for the FAA airline transport pilot knowledge test. Topics include air-carrier or air-taxi regulations, high altitude weather, advanced weight and balance, and the performance and special problems in large airplane operations. *Fall, Spring, Summer*

AVFL486  
*Airline Transport Pilot Flight Training*  
Flight and ground training to prepare the student for the FAA airline transport pilot airplane practical test. Topics include instrument procedures, in-flight maneuvers, take-offs, landings, advanced airplane systems, and emergency procedures. *Fall, Spring, Summer*

**AERONAUTICAL TECHNOLOGY**

AVIA275/476  
*Topics in Aviation*  
Repeatable with different topics in aviation. *Arranged*

AVIA295  
*Cooperative Work Experience*  
Work experience with an aviation organization or airline. A minimum of 120 hours of work required per credit. Graded S/U. Prerequisite: Permission of department. *Arranged*

AVIA296/495  
*Independent Study*  
Enables students to pursue topics in aviation not offered in other scheduled courses. Prerequisite: Permission of the department. Repeatable to 4 credits. *Arranged*

AVIA395  
*Practicum*  
Lab or on-the-job experience to build skills in a specific area of aviation technology. Prerequisite: Permission of department. Repeatable to 6 credits. *Arranged*

**AVIATION MAINTENANCE**

AVMT108  
*Applied Science for Aerospace Technicians*  
APPLIES THE SCIENCE OF MATHEMATICS AND PHYSICS TO THE AERODYNAMICS OF FLIGHT, MAINTENANCE, WEIGHT AND BALANCE AND VARIOUS MAINTENANCE PROBLEMS THAT THE AIRCRAFT MAINTENANCE TECHNICIAN COULD ENCOUNTER. INCLUDES THE STUDY AND USE OF DRAWINGS AND BASIC GROUND OPERATIONS. *Fall*

AVMT114  
*Aircraft Basic Electricity*  
A STUDY OF THE FUNDAMENTAL BASICS OF ELECTRICITY AND ELECTRONICS; INCLUDING ELECTRICAL DIAGRAMS, CALCULATIONS, SOURCES OF ELECTRICAL POWER, DIRECT AND ALTERNATING CURRENT, AIRCRAFT STORAGE BATTERIES, CAPACITANCE AND INDUCTANCE, BINARY CODE AND THE BASICS OF SOLID STATE LOGIC. *Fall*

AVMT116  
*Federal Regulations, Publications, Forms and Records*  
STUDY OF THE FEDERAL REGULATIONS AND MANUFACTURER PUBLICATIONS AS THEY APPLY TO AIRCRAFT DESIGN, MAINTENANCE, INSPECTIONS, FORMS AND RECORDS, AND THE CERTIFICATION AND PRIVILEGES/LIMITATIONS OF THE AVIATION MAINTENANCE TECHNICIANS. *Fall*

AVMT120  
*Materials and Processes for Aircraft Structures*  
Includes hand and power tool usage, aircraft hardware and materials, precision measurements, corrosion control, non-destructive testing, and fluid lines and fittings. *Fall*

AVMT204  
*Alternating Current Electrical Systems*  
Practical study of aircraft electrical systems, including installation practices, repair, troubleshooting, service, and inspections. *Spring*

AVMT206  
*Powerplant Electrical Systems*  
A study of engine ignition and engine electrical systems (starter, generators, alternators, auxiliary electrical power units and their control circuits, engine instruments, and engine fire protection-suppression systems). *Spring*

AVMT210  
*Aircraft Systems*  
An in-depth study into the inspection, repair, checking, servicing and troubleshooting of the following aircraft systems; ice-and-rain detection, cabin atmosphere (pressurization, heating, cooling, and oxygen), position warning systems, navigation and communication systems, and aircraft instruments and their use in troubleshooting of aircraft systems. *Spring*

AVMT220  
*Aircraft Fuels and Fuel Systems*  
A study of the various types and handling of fuels used in aircraft. Includes a study of aircraft fuel systems, fuel metering methods and the inspection, checking, servicing, troubleshooting, repair and overhaul of fuel systems and their components, and fire detection and protection. *Spring*

AVMT226  
*Engine Fuel Metering Systems*  
A study of the engine side of the fuel systems (firewall forward). Includes an in-depth study of fuel-metering devices used on aircraft engines (carburetors, pressure carburetors, direct and continuous fuel-injection systems). Service, maintenance, repair and troubleshooting of each different system type is covered in detail. *Spring*

AVMT228  
*Maintenance: General, Airframe, or Powerplant Review*  
A review of all subjects from a selected curriculum. A minimum of five examinations per curriculum area is required. Prerequisites: All applicable curriculum subjects must have been completed. *Fall, Spring*

AVMT237  
*Airframe, Pneumatic, and Landing Gear Systems*  
Operation and maintenance of aircraft hydraulic systems, pneumatic systems, landing-gear systems, and the inspection, checking, servicing, trouble-shooting, and repair of these systems and system components. *Spring*

AVMT304  
*Aircraft Metal Structures*  
A study and application of the processes used in the fabrication and repair of aircraft metal structures. Welding theory and practice with emphasis on weld-quality identification. Riveted, aircraft, aluminum, sheet-metal structures including the fabrication and repair of such structures. *Fall*
AVMT306
Aircraft Non-metal Structures
A study of wood and fabric as used in the construction of aircraft and a study of the methods, tooling, inspection, processes, and repair of composite aircraft structures. Includes the application, identification, and functions of aircraft protective finishes. Spring

AVMT308
Aircraft Assembly, Rigging and Inspections
Study of the nomenclature and design features of both fixed-wing and rotor-wing aircraft and the assembly, alignment of aircraft structures, and rigging and balancing of control system. A detailed inspection of the entire aircraft or rotorcraft is covered as it applies to the airframe 100-hour and other required inspection. Spring

AVMT310
Gas Turbine Engines
Principles and theory of jet-engine propulsion, design, types of, and associated systems. Maintenance, overhaul, installation-removal, repair, trimming, and troubleshooting of turbine engines. Fall

AVMT314
Aircraft Propellers and Engine Inspections
Theory and limited work on propellers, both wood and metal. Encompasses fixed, adjustable, controllable, feathering, reversible, and the control of the latter by mechanical, hydromatic, or electrical control systems. The inspection practice of performing the 100-hour inspection on aircraft engines and propellers. Spring

AVMT316
Reciprocating Engine Systems and Overhaul
A study of reciprocating engine theory, overhaul methods, and practices and the installation of reciprocating engines. Also includes a study of the following engine systems: exhaust, cooling, induction, and lubrication. Spring

Programs

Bachelor of Science. The BS degree prepares individuals to pursue advanced degrees for careers in teaching or research. Students may major in agriculture, animal science or horticulture with a minor to complement their intended purpose.

Bachelor of Technology. The BT degree is a career specialist’s degree. Graduates are prepared for supervisory and management positions in production agriculture, horticulture, or the ornamental horticulture industry.

Associate of Technology. The two-year AT degree programs provide students with adequate skills and working knowledge to apply for entry-level positions in their area of specialization.

BS: Agriculture
Major requirements—40
AGRI118, 206, 300, 304, 308, 405; ANSI114; HORT105, plus 15 major elective credits chosen in consultation with advisor.
