The study of history examines humanity through time. It contributes to both social and individual identity and expands awareness beyond the confines of time and place. Analysis of the philosophy of government and international relations enhances one's comprehension of citizenship and membership in the community of nations. The Department of History and Political Science promotes such study within the framework of a Christian world view. In addition to the quest for truth, this perspective emphasizes both individual and corporate responsibility for service to humanity.

The department’s General Education courses and majors and minors provide a basic component of liberal arts education.

Public or applied history refers to careers in history-related fields other than teaching. The major areas include museum management, archival management, and historic preservation, as well as the production of historical programs for the media. A master’s degree in a public or applied history program or certification upon completion of certain graduate courses is needed prior to employment.

The Department of History and Political Science recommends curricula which combine a major in history with a second major or minor and electives, providing an advantageous undergraduate basis for a public history career. Curriculum recommendations are available from the department chair.

GRADUATE PROGRAMS

The Department of History and Political Science, in cooperation with the School of Education, offers the Master of Arts in Teaching (MAT) degree.

MAT: History
The degree prepares students for teaching history and government in secondary schools and is offered through the School of Education. Candidates must have passed basic undergraduate survey courses in World Civilizations and United States History. Graduate courses should be elected to include a variety of period, topical, and geographic-area courses. A minimum of 6 credits elected in these areas must be at the 500 level.
