HORT359 $ Alt (3)

Greenhouse Environment and Construction

Controlling the plant environment to enhance plant growth and optimal development through temperature, humidity, light, nutrients, sanitation and carbon dioxide levels. Structures, coverings and mechanical systems used are explored to produce the most cost-effective horticultural crops. Weekly: 2 hours lecture and a 3-hour lab. Fall

HORT360 $ Alt (3)

Arboriculture

Care of shade and ornamental trees living under environmental stress of urbanization, their legal protection and value. Includes tree anatomy and physiology, soils, nutrition and water relationships, transplanting, disease and insect control, mechanical injury and pruning to develop a healthy tree. Weekly: 2 lectures and a 3-hour lab. Fall

HORT365 $ Alt (3)

Urban Landscape Design

Designing landscapes to meet the environmental challenges and conditions of urban spaces. Circulation patterns for conducting business, aesthetic and functional aspects of design for corporate/institutional, governmental agencies and municipal areas. Weekly: 2 lectures and a 3-hour lab. Recommended: HORT135. Spring

HORT375 Alt (3)

Landscape Estimating

An introduction to the estimating process for landscape design, construction and maintenance work. Various schedules and forms are used to assign costs of equipment, plants, hardscape materials, labor and overhead. The many variables from project to project are explored and then formulas are applied to arrive at making landscape installations an efficient and profitable business. Spring

HORT378 Alt (4)

Integrated Pest/Disease Management

Study of significant diseases and pests of agricultural and horticultural plant materials, including life cycles and influence of environmental conditions; determination of effective control methods for crop, ornamental and turfgrass production. Spring

HORT429 $ Alt (3)

Computer Landscape Design

Principles and practices of computer-aided landscape design, including creating scale perimeter plot plans, using drawing tools, plant/site relationships, and graphic imaging leading to a computer-generated landscape drawing. Laboratory emphasizes skill development and proficiency in integrating software and hardware to create CAD-generated landscape designs. Prior landscape drawing course work is recommended. Spring

HORT448 $ Alt (4)

Advanced Landscape Design and Graphics

Landscape design concepts relating to the more challenging problems of residential design. Field application of grading relating to contours, specifications, exploring deck design, planting combinations, and exercises in graphics and rendering for presentations. Weekly: 3 lectures and a 3-hour lab. Recommended: HORT135. Spring

Academic Programs

Bachelor of Fine Arts: 72–75
- Multimedia Arts
- Photography (Commercial or Fine Art)
- Video Production
- Web Design
- Associate of Fine Arts: Digital Media 38–40
- Minors
  - Digital Media
  - Photography

Other BFA Options at Andrews University
- Art Direction/Advertising
- Pre-Art Therapy
- Fine Art
- Graphic Design

Upper Division Requirement

By the end of the sophomore year students need to complete 16 hours in their respective major. They must also submit a portfolio of their work to the department, along with a formal application to the program they are pursuing. The review is a time when faculty evaluates student progress by examining the technical and creative abilities. Students must present their portfolios to the faculty, discuss goals, and intelligently defend their work.

Applications and portfolios are reviewed by the department during the month of May, and applicants are notified no later than
June 30 of acceptance into the program. For graduation students must have a cumulative GPA of 2.75 in their major.

Core requirements for all majors under BFA—36–39

Art History (Choose 4 courses from this list)—12 credits
ARCH390; ARTH236, 235, 440; JOUR455; PHTO210, 300

Studio Core—12–13 credits
ART104, 207; DGME130; PHTO115 or 116

Foundation Courses (Choose 4 additional courses from this list)—12–14 credits
ART105, 106, 107, 214*; DGME175*, 215; MKTG310*; VDEO130*
*Prerequisite course

CHOOSE A MAJOR FROM:

Multimedia Arts
The multimedia arts degree major prepares students to produce corporate interactive marketing and advertising materials. Students learn to creatively produce and integrate multiple promotion products such as interactive DVDs, and interactive CD-ROMs for commercial and corporate applications.

Major in Multimedia Arts—36
COMM405; DGME185, 225, 347; MDIA390, 495; MKTG368; VDEO210, 390 plus 7 upper division credits of electives chosen in consultation with an advisor from Art Direction/Advertising, or Communication, Digital Media, Fine Art, Graphic Design, Photography, Video Production.

Photography
Photography fosters creativity in the production of visual images. The subject of these images and the method used to create them is the focus of this study. The emphases encompass elements of digital, commercial, and fine art imaging, focusing on individual creativity and photo-journalism. Students may choose a Commercial or Fine Arts direction in consultation with advisor.

Major in Photography—36
DGME130, 495; PHTO115 or 116; MDIA275-002 or PHTO200; PHTO220, 285

Video Production
Students learn to design and integrate digital video and 3-D animation to produce creative advertising, documentary, promotional products, and TV graphics.

Major in Video Production—36
ENGL467, JOUR230, MDIA390, VDEO216, 320, 340, 390, plus 15 credits of electives, chosen in consultation with advisor, from Art and Design, Business, Photography, Communication, Journalism, Marketing, Multimedia Arts, Video, 3-D Modeling, 3-D Animation.

Web Design
The Web Design major focuses on principles of aesthetics, content, delivery, user interface, web animation, screen design, and multimedia for the creation of web pages.

Major in Web Design—36
ART214, 414; BSAD355; DGME250, 335, 350; JOUR465; MDIA390 plus 7 credits of electives, chosen in consultation with advisor, from Digital Media, Computer Science, Video Production, Graphic Design, or Communication.

Associate of Fine Arts: Digital Media—38–40

Sequence of Two-Year and Four-Year Programs
The Department of Digital Media and Photography plans programs using the "ladder concept," allowing students to complete as much education as desired before entering the workforce. Two- and four-year programs are available. Students completing the two-year program may go directly into a four-year program in the same area without the loss of credits. The ladder concept allows students to reach the educational goals that best fit their specific needs.

Core requirements for AFA in Digital Media—18–20
Art History (Choose 2 courses from this list)—6 credits
ARCH390; ARTH235, 236, 440; JOUR455, PHTO210, 300

Studio Core—6 credits
ART207, DGME130

Foundation Courses (Choose 3 additional courses from this list)—6–8 credits
ART105, 106, 107, 214; DGME175*, 215; MKTG310*; PHTO115 or 116; VDEO130*
*Prerequisite class

Major—20
DGME185, 225, 250; MDIA495, VDEO210, plus 3 credits of electives in related area.

MINORS
A minor can be a powerful complement to a main career focus. Minors are designed with flexibility to accommodate students’ major(s).

Digital Media—20
DGME130, 175, plus 13 credits of electives, chosen in consultation with advisor, from Art Direction/Advertising, Communication, Digital Media, Fine Art, Graphic Design, Photography, Video Production.

Photography—20
DGME175; PHTO115 or 116; MDIA275-002 or PHTO200; PHTO220, 285

OTHER BFA OPTIONS AT ANDREWS UNIVERSITY

Art Direction/Advertising
(See Department of Communication, p. 121)

Pre-Art Therapy
(See Department of Art & Design, p. 91)

Fine Art
(See Department of Art & Design, p. 91)
INDIVIDUALIZED PROGRAMS OF STUDY
For students who have career goals or special interests in areas other than those listed above. The special individualized program is available in the following degrees: Bachelor of Science, Bachelor of Technology, and Associate of Technology. The student, with the assistance of his or her advisor, prepares a proposed program of study (examples are available). The program must then be approved by a department faculty and the College of Technology Academic Policies and Curricula Committee.

COURSES
See inside front cover for symbol code.

DIGITAL MEDIA & PHOTOGRAPHY

DGME130 Introduction to Digital Media
An introductory survey of the discipline of digital media. Students are introduced to electronic publishing, basic printing principles, sound digitizing, vector and raster graphics, interactive multimedia, image acquisition and output, web publishing and e-mail. Understanding the Macintosh computer is also covered. Lab required. Fall, Spring

DGME165 Principles of Print Production
A study of the publishing and screen graphics industries including prepress concepts, color science, digital printing, textile printing, digital image capture and color management. Also covers more traditional methods in design, layout, text and page composition, film assembly, imposition, and many different printing techniques to produce images on a substrate. Some business will be explored. Open to all students. Fall

DGME175 Digital Imaging
A study of raster graphic fundamentals as they apply to scanned images. Emphasis on image manipulation, restoration, tonal enhancement, on-screen graphics, and image acquisition and output. Visual and procedural problems relating to digital imaging will be covered, along with techniques of aesthetic and efficient image enhancement. Prerequisites: DGME130 with a C or better; and ART207. PHTo115 recommended. Lab required. Fall, Spring

DGME185 Desktop Publishing I
Students learn to produce publications on desktop computers, including: brochures, magazine covers, corporate stationery, book covers, etc. Course topics incorporate: effective page layout, basic color theory, monitor calibration, gray balance, tone compression, GCR and UCR, digital proofing, image acquisition, and final output. Applications of color theories and color separation are stressed. Lab required. Prerequisite: DGME175. Fall

DGME215 Digital Sound
An introduction to digital sound acquisition, manipulation and storage techniques. Students learn fundamentals of sound terminology, audio digitizing and nonlinear editing. Students will then apply this knowledge to various video, interactive and web applications. Lab required. Prerequisite: DGME130. Fall, Spring

DGME225 Digital Vector Graphics
A study of digital vector graphic imaging emphasizing graphic production for print, digital multimedia, and web publishing. Lab required. Prerequisite: DGME130 or equivalent. Fall

DGME250 Web Publishing
Exploration of the design, storage, retrieval, and delivery of electronic information using text and graphic images. Emphasis on publishing via the Web, kiosks, HTML authoring, and digital formats. Effective organization and planning of data for delivery, efficient design, and ethics are examined. Lab required. Prerequisite: DGME130 or INFS110. Fall, Spring

DGME305 Desktop Publishing II
An advanced study of desktop publishing principles including: grid based layout, typographic applications, layout techniques for printing and web publications, effective electronic file preparation, preflighting, and tips for consistent color reproduction. Lab required. Prerequisite: DGME185. Spring

DGME335 Web Animation
A course of study designed to develop the skills necessary for producing effective animation for the Web. Lab required. Prerequisites: ART104; DGME130 or equivalent. Fall, Spring

DGME350 Web Publishing II
Advanced study of current web development technologies with emphasis in Java scripting, animation, site quality and efficiency. The class also stresses meeting customer needs, and new methods of web development. Lab required. Prerequisite: DGME250. Fall, Spring

GRPH345 Advanced Screen Graphics
An in-depth study on making process, simulated process, index and spot separations for screen printing. Other decorating methods will be explored such as transfers, foil, athletic numbering, glow-in-the-dark, puff and UV. Non-textile applications will also be explored such as decorating substrates like plastics (binders, CDs, etc.) and glass (simulated etch, etc.) and many other substrates. Prerequisite: DGME165. Spring

MDIA194/494 Project Course/Independent Study
Development of a skill or independent study in a given area by working independently under the supervision of an instructor. Repeatable to 12 credits. Prerequisite: Permission of instructor. Fall, Spring

MDIA390 Internship
On-the-job internship experience for students seeking industrial experience which cannot be simulated in a classroom setting. A range of 120–150 clock hours of work are required for each credit. Selected in consultation with the advisor. May be repeated.

MDIA275/485 Topics in:
Repeatable in various areas.
MDIA495
Portfolio Development in:
Helps students develop a traditional or digital portfolio for employment or continuing educational purposes. Emphasis in direction, development, and refinement of the individual portfolio. Repeatable to 4 credits. Prerequisites: minimum of 30 credits in a major and permission of the instructor. Fall

MDIA597
Independent Study
Individual study or research under the direction of an instructor. Repeatable to 6 credits. Prerequisite: Permission of department chair.

PHTO115 $ (4)
Introduction to Photography
Basic introduction to the principles of the camera and darkroom techniques with consideration toward composition, psychological, and aesthetic attitudes in black-and-white photography. Lab required. Fall, Spring

PHTO116 $ (3)
Introduction to Digital Photography
Students are introduced to photography through the use of digital tools. Digital SLRs and Quadtone printers are used to explore the technical and aesthetic issues involved in the process of making images. Consideration will be given to digital workflow, managing data, and creating visually appealing photographs. Lab required. Fall, Spring

PHTO200 $ (4)
Advanced Photography I
Develops the art of photographic perception and use of photography as a visual language. Emphasizes craftsmanship and awareness of tools available, as well as aesthetics, and the art of seeing creatively. Developing skills beyond introductory camera usage is emphasized. Lab required. Prerequisite: PHTO115. Fall, Spring

PHTO210 (3)
History of Photography
Historical study of significant contributors in the development of photography, and their influence on art and society. Fall, Spring

PHTO220 $ (4)
Color Photography I
Designed to acquaint students with color materials, their handling and exposure. Aesthetic and communicative aspects of color photography are stressed in producing visually effective color transparencies. Lab required. Prerequisite: PHTO115 or by permission of instructor. Fall

PHTO285 $ (4)
Studio
Study of lighting techniques in standard-equipped studio, emphasizing portraiture, commercial illustration, and experimental techniques in black-and-white and color mediums. Lab required. Prerequisite: PHTO200. Spring

PHTO300 (3)
Media Ethics
An exploration and discussion of the media and its effect on society, covering such issues as body image, violence, politics, etc. Students study how to recognize the way moral values of media professionals influence themselves and society. Spring

PHTO320 $ (4)
Color Photography II
An image-oriented course, drawing on the student background in the use of color comprehension, photographic technical and aesthetic understanding, and working knowledge of emulsion and digital photography. Information in this class is for the sole purpose of comprehensive color image. Lab required. Prerequisites: DGME175; PHTO220. Fall

PHTO365 $ (4)
Advanced Digital Imaging
In-depth manipulation using leading industry software, emphasizing high quality image acquisition and output. Students learn to produce duotones, create raster graphic collages, perform critical image enhancement, create custom palettes, and alpha channels for image compositing. Repeatable to 8 credits. Lab required. Prerequisites: ART207; DGME175 (with a B- or better); PHTO115. Fall, Spring

PHTO385 $ (4)
Advanced Studio
An individual approach to an advanced level of studio photography. Students choose a concentration in the following areas: Portraiture, People/Fashion, Still-Life, Advertising/Illustration, and Location Photography. This course is designed specifically to learn visual concepts and solve visual problems of the commercial photo industry. Repeatable to 12 credits. Lab required. Prerequisite: PHTO285. Fall, Spring

PHTO400 $ (4)
Digital Photographic Processes
This class explores methods of digital photographic manipulation while emulating traditional technique. A high level of photographic output and the art of seeing will be stressed. Digital capture, processing RAW files and fine manipulation of the digital file will also be highlighted. Lab required. Prerequisites: PHTO220, 365. Fall

PHTO410 $ (4)
Advanced Photography II
A course designed for the advanced photographer to investigate personal potential in visual exploration, experimentation, and technical excellence. Discussion involves expanding personal vision and exploring new techniques to achieve goals. Repeatable to 8 credits. Prerequisite: PHTO285. Spring

PHTO425 (4)
Travel Photography
Designed to be done in conjunction with on-location photography, and provides a background in the specific needs related to travel. Photographing people and their land in foreign environments is emphasized. Unique materials and equipment are discussed as they relate to travel photography. Repeatable to 8 credits. Prerequisite: PHTO115.

VDEO130 $ (2–3)
Introduction to Video
An introductory course in videography emphasizing the terminology, aesthetics, and methods of video production. PHTO115 recommended. Lab required. Fall

VDEO210 $ (3)
Digital Video Editing
An introductory class covering the fundamental techniques and concepts of nonlinear editing. Students explore the process of video editing from conceptualization to final output. Emphasis on sequencing and continuity, use of visual effects, color correction,
audio editing, media management, narration and industry terminology. Lab required. Prerequisites: DGME175, VDEO130. Fall

VDEO320 $ (3)
Video Compositing
An introductory course covering the essential components in video compositing. Students learn how to create innovative visual effects and motion graphics for video. Emphasis on text animation, keyframing, masks, alpha channels, 3-D compositing, rendering, application integration, advanced visual and artistic effects. Lab required. Prerequisites: DGME215, VDEO210.

VDEO340 $ (3)
Video Shooting
An advanced study in digital video, exploring professional level cameras, lighting, sound and other equipment necessary to make good video, aesthetic issues of creating visual and audio stories, and developing skills and knowledge beyond an introductory level. Lab required. Prerequisites: ART214; JOUR230; VDEO130, 210. Spring

VDEO360 $ (4)
3-D Imaging
A study of basic 3-D modeling principles and techniques. Students learn 3-D modeling terminology and how to create 3-dimensional models using polygonal, nurbs, and subdivision techniques. Students also learn basic lighting and surfacing. Lab required. Prerequisites: ART104; DGME175. Fall

VDEO370 $ (4)
3-D Animation
A study of 3-D animation techniques implementing key frame, forward and inverse kinematics, dynamics, lighting, paint effects, rendering and more. Lab required. Prerequisites: DGME215; VDEO210, 360. Spring

VDEO390 $ (3)
DVD Authoring/Design
A course emphasizing production of interactive DVD-Video, DVD authoring, work flow, storyboarding, navigation, menu design, bit budgeting, video and audio encoding, DVD video navigational structures, web linking, proofing, pre-mastering, and recording to DVD-R. Lab required. Prerequisite: DGME347. Spring

VDEO465 $ (3)
Video Documentary
Study and application of documentary storytelling techniques. Students will explore the technical and creative use of digital video cameras in documentary filmmaking. Emphasis on interview techniques, story selection and structure. One lab required. Prerequisites: VDEO130, 210, 340. Fall

UNDERGRADUATE PROGRAMS

COMPUTING

Two emphases are available in Computing—Computer Science and Software Systems.

Computer Science focuses on a study of computing as well as on its role in an application area. Areas of interest include artificial intelligence, compilers, computer architectures, computer graphics, computer networks, operating systems, program development, and analytical theory. A degree in computing with the Computer Science emphasis prepares students for graduate study, employment in computer systems/networks, administration/development, software development/maintenance, and for careers in education.

Software Systems is an applied study of computing, focusing on the development and maintenance of software in an application area. A minor in an application area is included as part of the degree. Typical minors might include one of the sciences, behavioral science, or business. Supervised “real-world” projects are a requirement for this degree. A degree in Computing with the Software Systems emphasis prepares students for employment in developing and maintaining commercial applications and for graduate studies in applied computing such as software engineering.
