Mission
The program in Biology is centered in the study of life within the context of a Seventh-day Adventist Christian worldview. Perception of the Creator through His creation, the ethical use of individual gifts in caring for creation and personal balance through self-understanding are encouraged.

Accordingly, students in Biology are challenged through thoughtful, inquisitive study:
• to understand life’s basic processes through scholarship and research,
• to understand their place in the scheme of creation,
• to grow in analytical and creative abilities,
• to prepare for skilled, productive service in biological, medical and related disciplines, and
• to find through Spirit-centered study and service, greater personal integrity and a strengthened faith commitment.

Each degree offered by the Department of Biology includes a common core curriculum and additional courses tailored to students’ special needs.
Highly motivated students may compete for the Biology Undergraduate Research Traineeship (BURT) program. For full details, consult the Biology Department.
Undergraduate Programs

BS: Biology
All biology majors must complete the following core and cognate courses:

Biology Core—24

Cognate Core—24 or 26
- CHEM131, 132, 231, 232, 241, 242; PHYS141 & 142 or 241/271 & 242/272

General Education Cognates
- RELT340, PSYC101 or PSYC180. Students taking the Honors Core do not need RELT340.

Students must complete the biology core, the cognate core, and the requirements for one of the emphases listed on the following page.

Botany Emphasis—18
Upper-division biology courses; must include a botany course (BOT prefix) drawn from each of the environmental, morphological, and functional groups of courses listed below. In addition, one zoological course (ZOOL prefix) must be included.

Zoology Emphasis—18
Upper-division biology courses; must include a zoology course (ZOOL prefix) drawn from each of the environmental, morphological, and functional groups of courses listed below. In addition, one botany course (BOT prefix) must be included.

Biomedical Emphasis—13–14
Must include four of the following: ZOOL315, 464, 465, BIOL475; or PHTH417, 427. BCHM421 must be included in the cognate core.

Molecular Biology Emphasis—12–13
Must include BIOL418, 419, 445, 447, and one of the following four courses: BIOL475; BIOL444, 446; ZOOL315; BOT470 or ZOOL464. BCHM421 and either PSYC364 or 449 must be taken. BCHM422 must be included in the cognate core.

Neurobiology Emphasis—14
Upper-division biology courses; must include a zoology course (ZOOL prefix) drawn from each of the environmental, morphological, and functional groups of courses listed below. In addition, ZOOL475 and either PSYC364 or 449 must be taken. BCHM422 must be included in the cognate core.

Special Emphasis—18
In situations where students are preparing for a specific job opportunity or a graduate or professional program, the special emphasis may be considered if other degree programs are not adequate. The credits must include one biology course each from the functional, morphological, and environmental courses listed below. Additional credits to reach a minimum of 18 are to be selected from courses in biology or other disciplines in consultation with a Department of Biology advisor. Departmental approval must be received before the beginning of the spring semester of the student’s junior year.

Behavior/Mathematics Emphasis—28
See p. 122.

Neuroscience Emphasis—26
See p. 121.

Minor in Biology
BIOL165, 166, 449 and one course each from environmental, morphological, and functional biology electives.

Minor in Environmental Sciences
Suggested electives chosen in consultation with the advisor include: BHSC450, BIOL479, 487, BOT468, 475, CHEM340, GEOG240, PLSC425, ZOOL454, 458, 459, 484

Senior Thesis
A minimum of 3 credits of BIOL495 or HONS497. Biology majors may elect to complete a minimum of 3 credits of original research in a topic of mutual interest with a Department of Biology staff member and present this original work in the form of a senior thesis. This research experience may be supported by a research scholarship.

Graduate Programs
The Department of Biology offers courses leading to the Master of Science degree and also cooperates with the School of Education in offering courses leading to the Master of Arts in Teaching degree. Students are strongly urged to incorporate into their programs a summer of study at the Rosario Beach Marine Station at Anacortes, Washington. During the 8-week summer session, students may earn 6 to 8 credits.

The Department of Biology collaborates in offering the MS: Mathematics and Science with the departments of Mathematics, Chemistry, and Physics. See the program description under Mathematics and Science, p. 171.

MS: Biology
In addition to the general requirements for admission to and enrollment in graduate degree programs outlined in this bulletin on pp. 47–56, students must meet the following departmental requirements.

Admission Requirements
- A bachelor’s degree with major in biology or an approved, related discipline, including courses in cell/molecular biology, organismal physiology, developmental biology, genetics, and ecology.
- A minimum GPA of 3.00 (B) in the undergraduate major for admission to regular student status.
- Cognate sciences, including full-year courses in general chemistry, organic chemistry, and physics. Mathematics through calculus level is encouraged.

Degree Requirements
- The inclusion of BIOL550 or MSCS526, and BIOL670, 681, 682.
- A written comprehensive examination (BIOL670) completed before the third semester in residence.
- A thesis earning 6 credits.
• A final oral examination in defense of the thesis.
• A minimum of 30 credits of approved course work and thesis.

MAT: Biology
Designed to prepare students for teaching biology in secondary schools, this degree is offered through the School of Education. A minor or its equivalent in biology on the undergraduate level is a prerequisite. In consultation with the department chair or the graduate program director, a minimum of 12 (6 credits must be 500-level or above) credits from courses listed below may be applied toward this program.

Required courses are BIOL550 or MSCI526. For further information, see the School of Education section of this bulletin on p. 287.

BIOL100 Human Biology
This course is designed to provide students with a basic understanding of the structure and function of the human body. Emphasis is placed on the practical application of principles learned in the areas of nutrition, anatomy and physiology. Meets the life science general education requirement. Weekly: 3 lectures and 1 lab. Spring

BIOL111, 112, 113 Anatomy and Physiology I, II, III
BIOL111 and 112 includes cell biology, functional anatomy and control of each organ system of the human. BIOL111 Weekly: 3 lectures and 1 lab; BIOL112 Weekly: 2 lectures and 1 lab; BIOL113 Weekly: 1 lecture and 1 lab, includes more detailed anatomy. BIOL111 is a prerequisite for BIOL112. BIOL112 or consent of the instructor is the prerequisite for BIOL113. Does not apply to a major or minor. BIOL111: Fall; BIOL112: Spring; BIOL113. Spring.

BIOL208 Principles of Environmental Science
Study of basic ecological principles as applied to human activities. Discussions deal with contemporary environmental issues. Lab includes field trips, guest speakers, and experiments. Meets the life science general education requirement and applies toward the environmental science major and certain state educational certification requirements. Weekly: 3 lectures and 1 lab. Fall, Spring

BIOL260 General Microbiology
Includes history, morphology, classification, control, growth, transmission, and pathogenicity of selected bacteria, viruses, rickettsia, fungi, and parasites. Covers the nature of host defenses against pathogens, including the acquisition of specific immunity and immune disorders. Weekly: 3 lectures and two 1½ hour labs. Does not apply on major or minor. Fall

BIOL300 History of Earth and Life
Survey of fundamental concepts of geology and paleontology with application to a study of the history of the earth and of life.

Consideration is given to interactions of religious, philosophical, and geological ideas, within a biblical world view. Meets the life science general education requirement. Weekly: 2 lectures and 1 lab. Does not apply to a major or minor. Spring

BIOL165, 166 Foundations of Biology
Provides a firm foundation for students majoring or minoring in the biological sciences. Weekly: 5 lectures and one 3-hour lab. Ten credits when awarded during the academic year; 8 credits when awarded at the Marine Biological Station during the summer. BIOL165: Fall; BIOL166: Spring

BIOL348 General Ecology
Ecological principles as applied to individual, population, community, and ecosystem levels of organization. Labs feature the characterization of ecological systems using standard field and lab techniques. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL165, 166 or 208. Fall

BIOL371 Genetics, Cellular and Molecular Biology I
Mechanisms of heredity are considered in light of classical population and molecular genetics. Labs feature experience in Drosophila genetics, chromosome analysis, statistical techniques, and recombinant DNA technology. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166, and completion of or simultaneous enrollment in CHEM131. Fall

BIOL372 Genetics, Cellular and Molecular Biology II
Information from molecular biology, biochemistry, biophysics, physical chemistry, and electron microscopy are integrated to present the cell as a functional unit. Labs provide experience in the collection and analysis of quantitative data about cells. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166, and completion of or simultaneous enrollment in CHEM132. Spring

BIOL449 Historical and Philosophical Biology
Examination of biological, paleontological, and geological concepts central to the study of historical events in biological systems. Considers the interactions of data, theories, and extra scientific concepts in historical biology, within the particular context of a biblical world view. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. Spring

BIOL451, 452 Questions in Biology: Analysis, Evaluation and Answers
Lectures, discussions, and individual work centered around asking and answering important questions in the life sciences: research in biology, discussions on important issues in origins; discussions on major topics in bioethics. Attendance at monthly research seminars required. Open to senior Biology majors. Weekly: 1 lecture. BIOL451: Fall; BIOL452: Spring

BIOL478 Biology Study Tour:
Travel to selected areas of biological interest combined with lectures, directed readings, projects and assignments. The amount of credit and the geographic area are designated at the time a
study tour is announced. A maximum of 6 credits may be applied to a graduate or undergraduate degree in biology.

Electives
(Elective courses offered at the Marine Biological Station may be included under these electives.)

**Group A: Environmental Biology**

**BIOL208**

*Principles of Environmental Science*
Study of basic ecological principles as applied to human activities. Discussions deal with contemporary environmental issues. Lab includes field trips, guest speakers, and experiments. Meets General Education science requirements for non-science majors and applies toward the environmental science major and certain state educational certification requirements. Weekly: 3 lectures and 1 lab. *Fall, Spring*

**BIOL479**

*Marine Ecology (offered only at Marine Station)*
A study of interspecific, intraspecific, and community relationships demonstrated by marine organisms. *Summer*

**BOT450**

*Medical Botany*
Designed as an interface between botany, medicine, anthropology and pharmacology to define the impact plants have with the remedial, harmful or psychoactive health of humans. Weekly: 3 lectures & 1 lab. Prerequisites: BIOL112. *Spring (odd years)*

**BOT468**

*Marine Botany (offered only at Marine Station)*
A systematic study of marine plants found in Puget Sound, with a survey of marine plants from other areas. *Summer*

**BOT475**

*Biodiversity of Vascular Plants*
A taxonomic and morphological study of vascular plants emphasizing the plants found in the Great Lakes area. Field trips. Weekly: 3 lectures and 1 lab. Open to non-science majors. *Fall*

**ZOO454**

*Vertebrate Zoology*
Covers the various specialties of vertebrate biology, including herpetology, ornithology, and mammalogy. Repeatable in the different specialized areas. Open to non-science majors. Weekly: 2 lectures and 1 or 2 labs. *Vertebrate Zoology: Mammalogy (Fall, even years) and Vertebrate Zoology: Ornithology (Spring, even years)* both qualify as “S” courses for General Education Service Learning.

**ZOO458**

*Marine Invertebrates (offered only at Marine Station)*
Biology of invertebrates studied in the marine environment of Puget Sound. A survey of the various phyla is conducted by studying the living animals in the field, and by tide pool observation, dredging, and scuba diving. A project on a specific group or species is required. *Summer*

**ZOO459**

*Entomology*  ♦ $ (3–4)
Study of the fundamental aspects of insect biology. Weekly: 2 lectures and 12 labs. *As scheduled*

**Group B: Morphological Biology**

**BIOL248**

*Paleobiology*  ♦ $ (3)
Covers various specialities including History of Life; Vertebrate Paleontology; Paleobiology of Dinosaurs. Origins, history, adaptations, diversity, and paleoecology of ancient organisms as documented by the fossil record. Repeatable in different areas. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166. *Fall (odd years)*

**BOT430**

*Plant Anatomy*  ♦ $ (3)
A study of cell and tissue structure and organ development in vascular plants. Weekly: 2 lectures and 1 lab. *As scheduled*

**ZOO315**

*Animal Development*  $ (3)
A study of the cellular and tissue-level events that result in the development of integrated organisms. Vertebrate development is emphasized in the lab using frog and chick models. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. *Spring (1)*

**ZOO316**

*Histology*  ♦ $ (3)
Microscopic anatomy, cytology, ultrastructure of tissues and organ systems are correlated with function. Emphasis on normal tissues of vertebrates. Weekly: 2 lectures and 1 lab. *Spring*

**Group C: Functional Biology**

**BIOL18**

*Immunology*  ♦ (2)
Topics include organs and cells of the immune system, antigens, immunoglobulins, the MHC, antibody diversity, tolerance and memory, complement, cell mediated immunity, regulation, hypersensitivity, autoimmune diseases, transplantation, and tumor immunology. Weekly: 2 lectures. Prerequisites: BIOL166. *Spring*

**BIOL19**

*Immunology Lab*  ♦ $ (1)
A theoretical and practical study of techniques used in modern immunology. Includes immunoserological methods; isolation and detection of immunoglobin molecules in immune serum by SDS-PAGE, western blotting, and immunofluorescence antibody (IFA) methods; enzyme-linked immunosorbant assay (ELISA), in vitro phagocytosis. Weekly: 1 lab. Pre- or corequisite: BIOL418. *Spring*
BIOL445  Molecular Genetics
An advanced consideration of the structure, function, and manipulation of nucleic acids and application of molecular information in other disciplines. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL371. Spring

BOT470  Plant Physiology
Study of plant functions including water relations, metabolic pathways, growth regulators, and photomorphogenesis. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166; CHEM131. As scheduled

ZOOL464  Systems Physiology
Functional processes used by animals in adjusting to their external environment and controlling their internal environment. Labs involve the firsthand analysis of selected aspects of the major functional systems. Weekly: 3 lectures and 1 lab. Prerequisite: BIOL166, CHEM131. Fall

ZOOL468  Systems Physiology: Organismal Maintenance
Functional processes that control an animal’s internal environment. This course is the same as ZOOL464 but excludes the material on the nervous system. Students who have taken Neurobiology begin the course later in the semester. Weekly: 3 lectures and 1 lab. Prerequisite: BIOL166. Spring (odd years)

Group D: Other Electives

BIOL444  Electron Microscopy in Biological Investigations
The theory, functions, and use of the transmission and scanning electron microscopes. Weekly: 1 lecture. Spring (odd years)

BIOL446  Electron Microscopy Laboratory
Lab preparation of tissues for transmission and scanning electron microscopy with hands-on experience with the ultramicrotome and both T.E.M. and S.E.M. instruments. Acceptable photographs with interpretations required with lab reports on appropriate research projects. Weekly: 2 labs. Prerequisite: Prior or concurrent registration in BIOL444. Spring (odd years)

BIOL447  Tissue Culture
Study of theory, application, and techniques useful for propagating tissues in the research laboratory. Topics include sterile techniques, nutrition, media preparation, establishment and maintenance of primary and secondary cultures, enumeration, and analysis. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. Pre- or corequisite: CHEM231. Spring (even years)

BIOL450  Neuropsychopharmacology
A study of the mechanisms of actions of psychotropic agents and how they affect human perception and behavior. Emphasis is placed on the organization and function of the nervous system and the molecular and biochemical basis of drugs used to treat behavioral and clinical disorders. Weekly: 2 lectures and one 3-hour lab. Prerequisites: PSYC101 or 180; BIOL111,112 or BIOL165, 166. Spring

BIOL475  Biology of Bacteria
Study of the properties of bacteria that illustrate their function and relationship to other living systems. Topics include structure and function, classification, and interaction with the environment. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166. Organic Chemistry background recommended. Fall

ZOOL425  Parasitology
Emphasis on better known parasites of humans and animals. Attention given to ecological factors concerned with host-parasite contact, pathogenicity and pathology, and treatment and effect on parasitized populations. Weekly: 2 lectures and 1 lab. Prerequisites: BIOL166. Fall

ZOOL475  Neurobiology
The neural basis of behavior, with some emphasis on the human nervous system, including cellular and molecular approaches to neuron function, development of neurons and circuits, and neuro-endocrine mechanisms. Labs develop skills in electrophysiology and neuroanatomy. Weekly: 2 lectures and 1 lab. Prerequisite: BIOL166. Fall

Research and Specialized Studies

BIOLA05  Topics in__________
Investigates various specialties of biology. Repeatable in different areas. Fall, Spring, Summer

BIOL495  Independent Readings/Research
Independent readings or research in biology under the direction of the instructor. Consent of instructor required. Fall, Spring, Summer

Graduate

BIOL516  Behavior of Marine Organisms
(offered only at Marine Station)
Study of inter- and intra-specific behavior of marine animals and their behavioral response to the physical environment. Involves lab experience, field observation, and a research project. Instructor’s permission required. Summer

BIOL550  Issues in Origins and Speciation
A comparative survey of the assumptions, attitudes, methods, and conclusions of science and religion in the handling of data. Attention is given to current scientific data and their relationship to an understanding of earth history and the present diversity of life. Weekly: 2 lectures. Spring
