Mission
The mission of the Andrews University Department of Nutrition & Wellness is to prepare dietetic, nutrition and fitness professionals for service in their church, society and the world, and to influence the community-at-large to affirm the Adventist lifestyle, including the vegetarian diet and the benefits of regular exercise and physical fitness.

Undergraduate Programs

BS in Dietetics (DPD Program)  (73)

General Education Requirements—43
See professional program requirements, p. 39, and note the following specific requirements:
- Religion: professional degree requirements
- Language/Communication: professional degree requirements
- History: professional degree requirements
- Fine Arts/Humanities: professional degree requirements
- Life/Physical Sciences: BIOL221, 222, 260; CHEM110, BCHM120
- Mathematics: professional degree requirements
- Computer Literacy: INFS120, or pass competency exam
- Service: FTES305
- Social Sciences: PSYC101, SOCI119
- Fitness Education: HLED120 and three additional courses from personal fitness, outdoor skills or team activity

Prerequisite Courses—35
ACCT121; BCHM120; BIOL221, 222, 260; CHEM110; FDNT118, 124, 230; PSYC101; and either BHSC220 or 235.

Cognate Requirements—6
BSAD355, 384

DPD Requirements—32
FDNT310, 351, 352, 421, 422, 431, 432, 448, 460, 485, 490, 498.

The Didactic Program in Dietetics (DPD) at Andrews University is currently accredited by the Commission on Accreditation for Dietetics Education of the American Dietetic Association, 120 S Riverside Plaza, Suite 2000, Chicago, IL 60606-6995, 312/899-5400.

Preparation for the Registration Exam
Andrews University offers two programs to prepare the student for the registration examination given by the Commission on Dietetic Registration of the American Dietetic Association (ADA).
- The DPD program, which meets the academic requirements for registration eligibility.
- The Dietetic Internship, a post-baccalaureate program, designed to meet the supervised practice requirements for registration eligibility.

The Dietetic Internship at Andrews University is currently accredited by the Commission on Accreditation for Dietetics Education of the American Dietetic Association, 120 S Riverside Plaza, Suite 2000, Chicago, IL 60606-6995, 312/899-5400.

The Didactic Program in Dietetics (DPD)

Admission Requirements
Prospective dietetics students apply to the director of the Didactic Program in Dietetics in their sophomore year for acceptance into phase 2 of the program by May 15 for the following autumn semester. Successful completion of the prerequisite courses listed below with a minimum cumulative GPA of 2.75, and a minimum overall GPA of 2.25 in the science and FDNT courses, is required for entry into phase 2 of the DPD program.

Continuation in the Dietetics Program requires a student having a cumulative GPA of at least 3.0 at the beginning of their junior year.

Transfer students who enter at the junior level will be admitted to the Dietetics Program if they have an overall GPA of 3.0 and a minimum GPA of 2.35 for their science and FDNT courses.

Degree Requirements
The DPD has two phases:
Phase 1—Pre-dietetics: Introductory pre-professional and General Education courses obtained at Andrews University or another accredited college or university.
Phase 2—Dietetics: Two years of study in clinical dietetics, food-service management, and community nutrition obtained on the Andrews University campus. Students must complete requirements for the professional Bachelor of Science in Dietetics degree. Students who complete the DPD requirements will be issued a DPD verification statement.

No grade below a C- is accepted for prerequisite and cognate courses (or below a C for dietetic courses). Students planning graduate study in nutrition or medical dietetics are recommended to take the following chemistry courses: CHEM131, 132; CHEM231, 232, 241, 242, 262; BCHM421, 422, 430.
At least 12½ semester hours are recommended for graduation. For BS requirements other than those listed above, refer to the General Education requirements listed on p. 40. Graduation is dependent upon the completion of all curriculum requirements with the maintenance of at least a 2.25 cumulative GPA in all dietetic and cognate courses. Graduates are provided with a Didactic Program in Dietetics Verification Statement, testifying to the fact that they have successfully completed the requirements for a BS degree in Dietetics. Students must successfully pass a comprehensive review exam in their senior year before they are eligible to receive a DPD verification form. Dietetics graduates are eligible to apply for an accredited Dietetic Internship program.

Students are expected to complete a professional development portfolio during the DPD program outlining their goals and accomplishments, including 200 hours of professional dietetic experience. A verification form for completion of the DPD program will not be issued until the professional development portfolio has been satisfactorily completed by the student.

After completion of the BS course work for the DPD, an eight month Dietetic Internship must be completed by a dietetic student for registration eligibility.

Dietetic Internship
Students need to apply for the dietetic internship program. A minimum cumulative GPA of 3.0 and DPD (Didactic program of Dietetics) GPA of 3.2 is recommended for admission into the program.

This supervised practice provides experiences in three main areas of dietetics—community nutrition, clinical nutrition, and food-service management. The Dietetic Internship is available at several hospitals affiliated with Andrews University. Successful completion of this intensive eight-month supervised practice permits a student to write the national registration exam in dietetics. Students who successfully complete the internship will be issued a verification statement.

Upon passing the registry exam, graduates receive formal recognition as Registered Dietitians (RD). This status is maintained by participating in continuing professional education activities approved by the ADA. With advanced study or experience, the dietitian may qualify as a specialist in clinical dietetics, food-service management, nutrition education, or research.

BS: Health & Fitness

Required Courses—43
FDNT230, 448, 460 (1), 498, HLED120, 210, 380, 445, 480, FTES116, 210, 214, 305, 355, 465, two additional FTES activity courses (1 credit each) selected in consultation with your advisor, PSYC210, FTES495 (4)

Required Cognates—25
BIOL221, 222, 223, BSAD355, COMM320, MKTG310, PSYC319, 471, SOCI415
For students planning to do the MS in Nutrition & Wellness, it is recommended that they also take CHEM110 and BCHM120.

ACE Certification
This degree offers the option for certification from the American Council on Exercise (ACE) in the following areas: Certified Personal Trainer, Group Fitness Instructor, Lifestyle & Weight Management Consultant, and Advanced Health & Fitness Specialist. The exams for these certifications will be held on the Andrews University campus.

Bachelor of Health Science in Wellness (64)

Required Courses—30
FDNT230, 310, 448, 460 (1), HLED120, 210, 380, 445, 480, FTES210, 214, 305, 355

Required Cognates—34
BIOL221, 222, CHEM110, BCHM120, PHYSI41, 142, CLSC110, FTES465, STAT285, PSYC301

General Education Requirements
See professional program requirements, p. 39, and note the following specific requirements:

Religion: one religion course per academic year of attendance in a Seventh-day Adventist college or university. Maximum of three courses prior to entering program.

Language/Communication: professional degree requirements

History: professional degree requirements

Fine Arts/Humanities: professional degree requirements

Life/Physical Sciences:

Life Science:
- A full sequence of anatomy and physiology or general biology with labs.
- An upper division science course(s) related to human physiology or human biology.

Physical Science:
Option 1: A full sequence of general physics with labs as required for physics majors or pre-med students plus any two chemistry courses with labs; or
Option 2: A full sequence of general chemistry with labs as required for chemistry majors or pre-med students plus any two physics courses with labs.

Mathematics: A basic statistics or research methods course

Computer Literacy: An approved computer course which includes word processing, or pass a college-level competency exam of equivalent skills

Service: FTES355

Social Sciences:
Psychology—An introductory psychology course.

Human Development—A course which covers physical, social, and psychological development beginning with conception

Fitness Education: recommend Andrews freshmen take HLED120 and one additional course from personal fitness, outdoor skills or team activity. Non-Andrews students take two from the three categories above.

Medical Terminology: A course in basic medical terminology. May be taken by distance learning.

Electives: To fulfill the 12½ credits needed to graduate at least 15 in upper division courses required, some suggestions include business courses, ethics, cultural and diversity courses, arts and humanities, nutrition and fitness courses.

ACE Certification
This degree offers the option for certification from the American Council on Exercise (ACE) in the following areas: Certified Personal Trainer, Group Fitness Instructor, Lifestyle & Weight Management Consultant, and Advanced Health & Fitness Specialist. The exams for these certifications will be held on-campus.
BS: Nutrition Science
BCHM421; BIOL165, 166; CHEM131, 132, 211, 232, 241, 242;
FDNT230, 310, 448, 460, 485, 495; ZOOL465; 6 credits chosen
from FDNT124, 421, 422, 431, 469, 476; and 8 elective credits
selected from chemistry, biology, nutrition, and physics in
consultation with the program advisor.

The BS in Nutrition Science is recommended for pre-medical
students wishing to have a nutrition and health promotion
emphasis as they prepare for medical school. However, this BS
does not prepare students for dietetics registration eligibility.

Minor in Health
FDNT230, 240, HLED120, 210, 445, FTES214, plus 8 credits
selected from HLED, FDNT or other health-related courses
approved by the program director.

Minor in Nutrition and Wellness
Must include FDNT124, 230, 310, 448, 460, HLED120 plus 6 credits
selected from the Department of Nutrition and Wellness approved
by the director of the Dietetics program.

Minor in Fitness Education
BIOL221, 223, FTES210, 214, 305, 355, 465, FDNT230

Fitness & Exercise Courses
Each class includes both a fitness component as well as skills
instruction. The goals of the fitness & exercise courses are:
1. To aid individuals in the development of Christlike attitudes
and conduct in recreational activities, and to promote learning
opportunities for cooperative teamwork.
2. To promote the development of physical fitness and physical
skills that will continue throughout life and enhance the
quality of one's life.
3. To provide a variety of physical activities designed to meet the
needs and desires of a diverse student population.

ACE Certification
Students taking the Minor in Fitness Education have the option
of sitting for the Personal Trainer or Group Fitness Instructor
Certification that is offered through the American Council on
Exercise (ACE). The tests will be offered on-campus.

Graduate Program
MS: Nutrition and Wellness
Admission Requirements
Applicants for the MS: Human Nutrition must have completed
undergraduate credits in nutrition, and approved cognates as follows.
1. Two nutrition courses (equivalent to FDNT230 and one
advanced course).
2. Survey courses in chemistry with labs, including inorganic,
organic, and biological (equivalent to CHEM110 and
BCHM120).
3. Human physiology (equivalent to BIOL222).
4. Statistics (equivalent to STAT285).

• Applicants with deficiencies may be admitted provisionally,
but they must take courses in addition to those in the degree
program to meet deficiencies.

Degree Requirements
In addition to the general academic requirements for graduate
degrees outlined on p. 47, the following departmental
requirements should be noted:
• A minimum of 32 semester credits
• The core of 20 nutrition credits including FDNT448, 498, 2
credits of FDNT545, 565, 2 credits of FDNT586 and 2 credits of
FDNT680, MKTG500, PETH465.
• FDNT670
• One of the following: CHMN547 Ministry of Healing (2),
NRSG510 Christian Ministry (2) or any other graduate religion
course approved by the department.
• Students electing to do a thesis must complete 6 credits of
FDNT699; students electing a non-thesis option must complete
3 credits of FDNT698.
• Students who present a signed verification statement outlining
their successful completion of an undergraduate dietetics
program may apply to do a Dietetic Internship as part of their
MS in Nutrition and Wellness. Students accepted into this
non-thesis program must register for 4 credits of FDNT594 in
the fall semester and 4 credits in the spring semester, in the
place of FDNT698. The Dietetic Internship is available only to
students seeking registration eligibility, not to students with an
RD. Successful completion of this intensive 8-month supervised
practice qualifies students to write the national registration
exam in dietetics.
• Electives are to be selected in consultation with the graduate
advisor from graduate course offerings in nutrition, health,
education, communication, behavioral science, business, and
marketing.

FDNT188
The Profession of Dietetics
A discussion of the dietetics profession and the role of the
dietitian within the health-care team. Ethical concerns in the
practice of dietetics. Spring

FDNT124
Food Science
Chemical and physical properties of foods that affect food
handling, preparation, and preservation. Lab procedures apply
the principles studied to the preparation of foods. Weekly: two
lectures and a 3-hour lab. Fall

FDNT230
Nutrition
A study of the basic principles of nutrition science, the biochemical
functions of various nutrients, the changes in physiological needs
with age, and the relationship between nutrition and health.
Students needing life science general education credit must also
register for the lab, FDNT240. Three lectures per week. Fall, Spring

FDNT230
Nutrition
AU/GU course—see content above.
FDNT240 Nutrition Laboratory
Discovering principles of nutrition science in the laboratory. A weekly 3-hour lab. Required for those students needing life science general education credit. Fall, Spring

FDNT310 Nutrition in the Life Cycle
Study of the nutritional needs of the healthy person throughout the life cycle. The influence of socioeconomic, cultural, and psychological factors on food and nutritional behavior. Prerequisites: FDNT230. Fall

FDNT351 Food Service Management I
Introduction to the systems approach and application of the functions of management to foodservice systems. Principles of menu development, food production, service, delivery, procurement, sanitation, safety, and equipment selection in food service organizations. Weekly: 3 hours lecture and up to 4 hours lab. Prerequisites: FDNT126; BIOL260; MATH145 or equivalent. Fall—Offered alternate years

FDNT352 Food Service Management II
Application of management functions and principles to foodservice organizations. Specific attention to marketing processes, CQI, and integration of foodservice subsystems. Includes the management of human, material, spatial, and financial resources in environmentally responsible ways. Weekly: 2 hours lecture and up to 4 hours lab. Prerequisites: FDNT351; BSAD355. Spring—Offered alternate years

FDNT340 Topics in___
Selected topics in nutrition. Repeatable with different topics.

FDNT440 Nutrition and Wellness
The dietary factors associated with the major chronic diseases of Western society. The use of plant-based diets in health promotion and disease prevention. Discussion of herbal therapies. Prerequisite: FDNT230. Fall

FDNT460 Seminar
Review of contemporary issues and/or current literature in nutrition. Repeatable to 3 credits. Spring

FDNT469 International Nutrition
A study of world food production, supply, storage, and marketing. Causes and symptoms of nutritional deficiencies in the developing world. Diseases of the affluent. Effects of nutritional deprivation on health and productivity. Effects of social and cultural factors in nutrition. Fall

FDNT476 Nutrition and Aging
Physiological changes in aging. Food-selection patterns, nutritional needs, nutritional disorders, and chronic diseases. Prerequisite: FDNT230. Fall

FDNT478 Study Tour:
Travel to destinations relevant to individual programs of study. Classes will be selected from department(s) offerings. Fee may be required.

FDNT485 Nutrition and Metabolism
Study of the nutrients and their functions within the living cell and the complex organism. Discussion of the major metabolic pathways. Prerequisites: BCHM120, FDNT230. Spring

FDNT495 Independent Study/Readings
Repeatable to 4 credits in independent study and 4 credits in readings on nutrition and dietetics. Consent of instructor required.

FDNT497 Internship
Supervised field experience in an approved health institution or health promotion program for a total of 200 hours. Application of knowledge and competencies learned in the health program.
FDNT498  
Research Methods  
A study of research methodology, survey methods, and applied statistics as they relate to dietetics. Fall  

FDNT540  
Maternal and Child Nutrition  
Role of nutrition in human growth and development, with emphasis on prenatal period, infancy, childhood, and adolescence.  

FDNT545  
Nutrition and Wellness Programs  
Development of nutrition and wellness programs for community groups emphasizing health promotion. Includes participation in community assessment, program planning, implementation, and evaluation of a program. Prerequisite: FDNT448. (2–4)  

FDNT555  
Advanced Human Nutrition I  
Functions and nutritional metabolism of simple and complex carbohydrates, lipids, amino acids, and proteins. Public health applications. Prerequisite: A course in biochemistry. Fall (3)  

FDNT556  
Advanced Human Nutrition II  
Functions and nutritional metabolism and interactions of fat-soluble and water-soluble vitamins, minerals, and trace minerals. Public health applications. Prerequisite: A course in biochemistry. Spring (3)  

FDNT565  
Current Issues in Nutrition and Wellness  
Discussion of current issues in nutrition, food safety, public health, and wellness. Prerequisite: FDNT230. Spring (3)  

FDNT570  
Maternal and Child Health  
Preventive health care and conditions necessary for mother and child well-being in developing countries. Community-based interventions for child survival. Management of maternal and child health programs. (3)  

FDNT585  
Topics in _________  
Selected topics in the areas of nutrition and wellness. Repeatable to 6 credits. (1–4)  

FDNT586  
Professional Experience  
Opportunities for unique supervised practical experiences in various organizations to introduce the student to the role of a professional. A maximum of 4 credits per semester can be taken. Repeatable to 8 credits. (1–4)  

FDNT594  
Dietetic Internship  
The internship is equivalent to a full-time load. It involves 35-40 hours per week of supervised practice. Open only to students seeking registration eligibility with the Commission on Dietetic Registration of the American Dietetic Association. Fall, Spring $ (0, 4)  

FDNT600  
Research Design  
Criteria for the organization, analysis, and reporting of research in nutrition. Preparation of a proposal for a master's thesis or project. Prerequisite: FDNT498 or equivalent. Spring (1)  

FDNT648  
Workshop  
(1–4)  

FDNT650  
Project Continuation  
Student may register for this title while clearing deferred grade (DG) and/or incomplete (I) courses with advisor approval only. Registration for this title indicates full-time status. $ (0)  

FDNT655  
Program Continuation  
Students may register for this non-credit continuation course to maintain active status. For additional information on active status, please refer to p. 47 in the bulletin. Registration does not indicate full-time status. $ (0)  

FDNT660  
Thesis Continuation  
Student may register for this title while clearing deferred grade (DG) and/or incomplete (I) courses with advisor approval only. Registration for this title indicates full-time status. $ (0)  

FDNT665  
Preparation for Comprehensive Exams  
Advisor approval required. Registration for this title indicates full-time status. $ (0)  

FDNT670  
Comprehensive Exam  
(0)  

FDNT680  
Research Seminar  
Individual reports and discussion of recent research data. Repeatable to 4 credits. Consent of instructor required. (1–4)  

FDNT690  
Independent Study  
Individual study and/or research. Consent of instructor required. Repeatable to 6 credits. (1–6)  

FDNT698  
Research Project  
(3)  

FDNT699  
Master's Thesis  
Repeatable to 6 credits. (3–6)  

Health Education Courses  
HLED120  
Fit for Life  
A balanced up-to-date coverage of all critical areas of wellness including physical fitness, nutrition, weight management and stress, as well as the principles of health according to the Bible and Ellen G. White will be studied. Practical tools will be given to help adopt and model healthier lifestyles. $ (1)
HLED210 (3)  
**Philosophy of Health**  
The Biblical basis of health. A study of the historical development and basis of the health message in the Seventh-day Adventist Church. The role of health promotion in current society.

HLED380 (3)  
**Natural Therapies**  
The study of simple natural therapeutic remedies, including massage, hydrotherapy and herbal therapies.

HLED445 (2)  
**Consumer Health**  
An analysis of the various fads in society today, and the methods and techniques used by promoters of healthcare products and services. A study of ways in which consumers are vulnerable to certain health claims and scams, and the protection provided to the consumer by governmental agencies.

HLED480 (3)  
**Wellness Programs**  
Learning the steps of needs assessment of a community, planning a program, conducting a health promotion program while utilizing the resources of the community, and the program evaluation. Two lectures per week and a third hour each week.

**Fitness & Exercise Courses**

**Personal Fitness**

FTES116  
**Weight Control**  
Study of the factors involved in weight loss and health improvement using a combination of concepts and applications in physical fitness, healthy nutrition and self-control. Cardiovascular, strength and flexibility exercises will be introduced and practiced throughout this course.

FTES131  
**Pilates**  
The student will learn the Pilates technique and the health benefits of Pilates, in addition to regular exercise and weight training.

FTES132  
**Cardio Kick**  
The student will participate in a high-intensity, cardio workout utilizing kickboxing techniques and aerobic movements. In addition, the student will learn abdominal exercises and whole body strengthening exercises.

FTES135  
**Self-Defense**  
The purpose of this class is to provide the student with the appropriate level of knowledge and skills in self-defense. As a result of the class the student will improve his/her general physical fitness and skill performance. Principles, techniques and safe practices of self-defense will be taught.

FTES140  
**Aqua Aerobics**  
This course is designed to use water resistance and rhythmic movements for both low and non-weight bearing improvements in cardiovascular fitness, muscle strength and endurance as well as flexibility.

FTES150  
**Swimming**  
Designated for multilevel instruction. Three basic levels are incorporated into the class based on a swimming pretest: beginners, intermediate and advanced. No swimming ability necessary. Repeatable.

FTES210  
**Personal Fitness Plan**  
A study of basic-fitness concepts and principles in conjunction with a personalized exercise program for physical fitness. Short readings are required weekly.

FTES214  
**Weight Training and Conditioning**  
A study of the basic principles in strength training and conditioning for men and women as well as the application of different methods of muscular strength and endurance training.

FTES215  
**Acrobatics**  
Learning and performance of the fundamental skills of tumbling and balancing.

FTES300  
**Lifeguarding**  
Instruction in accident prevention, aquatic facility supervision, and water-rescue techniques. Successful completion results in American Red Cross Lifeguard Training certification. Current first aid and CPR certification included. Prerequisite: Ability to swim 500 yards in 10 minutes or less.

FTES350  
**Water Safety Instructor**  
Instruction in techniques for teaching American Red Cross swimming courses. Current CPR certification required. Swimming pretest required.

FTES389  
**WSI Internship**  
Students who have a current American Red Cross Water Safety Instructor's Certification or equivalent can take advantage of this opportunity. Participants will teach and organize a class of students for the Learn-To-Swim program. Teachers will be expected to provide lesson plans and teach all the required lessons. S/U.

**Outdoor Skills**

FTES120  
**Scuba**  
An entry-level course in scuba diving. Includes instruction in the buddy system, dive planning, donning and removing equipment in the water, alternate air sources, buddy breathing, entries, communication and navigation. Swimming pretest required. YMCA certification. Additional fees apply. Spring

FTES125  
**Canoeing**  
Emphasis on precise canoe handling through paddle control. Based on traditional strokes. Practice conducted on local lakes and rivers. One all-day canoe trip or two half-day canoe trips are required. Fall
FTES126 $ (1)
Cycling
A study of the various types of cycling, cycling techniques and the proper maintenance of a bicycle.

FTES127 $ (1)
Rock Climbing
A safe introductory course that includes learning climbing skills, essential climbing knots, proper equipment and safety, and self-rescue.

FTES176 $ (1)
Cross-Country Skiing & Winter Camping
Instruction in cross-country skiing technique, conditioning, equipment, winter camping skills and winter safety.

FTES275 $ (1)
Outdoor Trips-N-Treks:
One- to two-week trips beyond the normally offered activity courses: Biking, Backpacking, Skiing. Repeatable in different areas. Instructor's permission required. Consult the current class schedule for activities offered each year. Normally involves out-of-state destinations when school is not in regular session.

FTES278 $ (0)
Study Tour:
Travel to destinations relevant to individual programs of study. Classes will be selected from department(s) offerings. Fee may be required.

FTES330 $ (1)
Wilderness Living
Instruction in camping and survival techniques, open fire cooking, orienteering, backpacking, wilderness first aid, edible wild plants and tracking. Students supply their own equipment. One weekend trip required.

Team Activity

FTES106 $ (1)
Beginning Basketball
Instruction in the fundamental skills of shooting, passing, ball-handling, man-to-man defensive play, basic rules, offensive strategy, basic rules and team play.

FTES107 $ (1)
Beginning Volleyball
Instruction in the basic skills of serving, setting, passing and spiking, and the basic instruction on rules, and 2-, 3-, 4-, and 6-person team play.

FTES109 $ (1)
Beginning Softball
Instruction in the fundamental skills of throwing, catching, base running, batting and fielding of ground and fly balls. Position play, game situation drills, scrimmages and rules are covered. Student must supply own glove.

FTES114 $ (1)
Soccer
Learning the fundamental skills of ball control, passing, blocking and shooting goals. Indoor or outdoor games depending upon the season and weather.

FTES115 $ (1)
Disc Sports
Development of basic skills for "Disc Sports" like disc golf and ultimate frisbee. Students will learn the basic strokes, rules and techniques to allow them to be proficient in these lifetime activities.

FTES118 $ (1)
Badminton
Analysis and practice of basic strokes, singles and doubles play, strategy and rule interpretations.

FTES119 $ (1)
Tennis
Instruction in the fundamental skills of ground strokes, serving, volleying, team play, basic strategy and rules. Students must supply their own racquet and balls. Spring

FTES128 $ (1)
Golf
Study of the basic techniques of the golf swing. An introduction to the game, rules and etiquette of golf. Students must supply their own equipment. Additional lab fees required. Spring

FTES129 $ (1)
Beginning Racquetball
Introduction to basic strokes, singles and doubles play, strategy and rule interpretations. Students must supply their own racquet, balls and eyeguards.

FTES130 $ (1)
Special Activities
Special areas beyond normally offered courses: Cardinal Athletics, personalized fitness activities, horseback riding. Repeatable in different areas. Consult the current class schedule for activities offered each year.

FTES144 $ (1)
Floor Hockey
Introduction to the game, including team composition, rules and fundamental skills.

FTES206 $ (1)
Intermediate Basketball
Analysis of and drills in fundamental skills, offensive and defensive strategies. Emphasis is given to team play.

FTES207 $ (1)
Intermediate Volleyball
Instruction in advanced team play, offensive and defensive strategies. Game scrimmages will help to perfect fundamental skills.

FTES209 $ (1)
Intermediate Softball
Instruction in team play, cutoffs, relays, and offensive and defensive strategies. Game scrimmages use the pitching machine. Students supply own glove.

FTES229 $ (1)
Intermediate Racquetball
Perfection of fundamental skills and strategy.
Exercise Physiology

Study of the body’s physiological response to exercise. Prerequisites: BIOL221, 222 or equivalent. Three lectures per week plus a 3-hour lab. Spring

Independent Study/Reading/Research/Project

Independent Study: Directed study in an area of interest resulting in a formal term paper.
Independent Readings: Weekly meetings with the instructor for individual assignments and reports.
Independent Research: Design and execution of an experiment or causal-comparative research.
Independent Project: Practical or creative experience or project in consultation with instructor. Permission required from the instructor and department chair. Thirty hours of involvement required for each credit. Contract of proposed activity required. Repeatable to 4 credits in each area. Fall, Spring

Mission

In accordance with the Seventh-day Adventist Church, Andrews University, and the College of Arts and Sciences, the mission of the Department of Physical Therapy is to provide a quality physical therapist education within a cooperative learning environment that promotes Christian values. The physical therapy department provides resources and encourages faculty to continue their educational, professional, and spiritual growth. The physical therapy faculty delivers, within a Christ-centered environment, the knowledge base and clinical skills that will prepare students for contemporary physical therapy practice. Physical therapy graduates will serve Christ as evidenced by their ministering to the needs of others through the delivery of effective professional healthcare. The physical therapy department faculty and graduates comprise a Christian network that is balanced in the development of the spiritual, mental, physical, and social life of its members.

Physical therapy is a health profession dedicated to evaluating, treating, and preventing physical injury and disease. Physical therapists design and implement the necessary therapeutic interventions to promote fitness, health and improve the quality of life in patients. They also become active in consultation, education and research. Physical therapists work closely with their client’s family, physician, and other members of the medical team to help their client return to their home environment and resume activities and relationships of normal daily living.
