

Measure 4 (Initial and Advanced): Ability of completers to be hired.

Initial Level

The TPP had 100% employment with 2020-2021 completers. All nine completers (9/9) are employed. The candidates earned both state certification as well as the Seventh-day Adventist certification allowing them to teach in either the SDA educational or the public system. Of the nine completers in 2020-2021, seven of the nine (7/9) completers are teaching in the SDA educational system and two out of nine (2/9) completers are teaching in the public school system. A broader view of the survey reveals eighty-one percent (13/16) of completers who responded to the 2022 survey of initial program completers from the years 2018-2020 are employed as P-12 teachers.

Advanced Level

Educational Leadership

90% (7/8) of EDAL completers in the data cycle for 2020-2021 were immediately employed upon graduation as educational leaders.

School Psychology

100% (2 of 2) of 2020- 2021 School Psychology completers are immediately employed in the field of School Psychology. To the credit of our program, both 2020-21 completers were offered employment positions at the sites where their internships were completed. This suggests that employers recognize the value our completers bring to the field of School Psychology.
