PERSONAL STATEMENT:

Music is such an important part of school and student development because it provides an outlet of creative collaboration and gives students the opportunity to share their skills through performance. I was inspired by the music program in my high school which gave me the opportunity to expand my music skills with my peers.

After graduating high school in 2020 I attended Joliet Junior College and completed my Associates of Arts in Music by May 2022. I transferred to Andrews University in Fall 2022 and I will be finishing my Bachelor of Arts in Music Education by December 2025. My experience in the Music Ed program here at Andrews has helped me to grow as an educator and my passion for teaching has flourished.

My recent experience substitute teaching for the Niles School District has given me a great opportunity to apply the information and guide the students toward success. I was given the opportunity by the choral director of Ring Lardner Middle School, Niles High School, and Eastside Connections to take over for the last month of school since she went on maternity leave. I conducted their final spring concert for both middle and high school, the Baccalaureate ceremony, and graduation performance. Working with the middle and high schoolers gave me great insight on the aspects of teaching I am doing well at and what I can improve.

As I head into this last semester of school, I am excited to get more opportunities to work with different students and develop as an effective teacher. I hope I can use the information to help me build a choral program that creates motivated students who enjoy making and sharing music.
