Introduction to Andrews University

Andrews University was established over a century ago, in 1874, as Battle Creek College in Battle Creek, Michigan—a collegiate program that offered literature, languages, science and mathematics, training for teachers, and theology. Its founders, the visionaries of the young Seventh-day Adventist denomination, believed they should use every avenue to spread the gospel and serve the world, including higher education.

On the brink of a new century, seeking room for expansion and a fresh start, the school moved in 1901 to a beautiful site near the banks of the St. Joseph River in Berrien Springs and was renamed Emmanuel Missionary College. From woods and farmland on which faculty and students built three wooden frame buildings to hold their new school, the campus has grown to a property of 1,600 acres and a complex of academic buildings, residence halls and apartments, and service buildings.

The vision blossomed still further when, in 1959, the Seventh-day Adventist Theological Seminary and a school of graduate studies, together known as Potomac University and located in Washington, D.C., were moved to the campus of Emmanuel Missionary College. The following year the three entities united under one charter bearing the name Andrews University—with an integrated board of trustees, administration and faculty. The name honors John Nevins Andrews (1829–83), pioneer Adventist theologian and intellectual and the denomination’s first official missionary to serve outside North America.

In 1974, the undergraduate division of Andrews was organized into two colleges—the College of Arts and Sciences and the College of Technology. The School of Business Administration, which evolved from the Department of Business Administration, was established in 1980. In a similar move, the Department of Education became the School of Education in 1983. The present organizational structure of the School of Graduate Studies was adopted in 1987. In 1993, the Department of Architecture became the Division of Architecture, and in 2012 became a school. It is now the School of Architecture & Interior Design. In 2011, the School of Distance Education was formed to support distance education and educational programs offered at locations across North America and the world. Because of the many international partnerships, the school has been renamed as the School of Distance Education & International Partnerships. Also in 2012, five departments housed in the College of Arts and Sciences together became the School of Health Professions. All of the colleges and schools offer both undergraduate and graduate degrees, except for the Seventh-day Adventist Theological Seminary, which maintains graduate and professional programs only. The only Seventh-day Adventist doctoral research university, Andrews University is also a comprehensive institution of higher learning integrating an exemplary liberal arts and sciences core with six prestigious professional schools and a number of excellent graduate programs.

Rooted in a tradition of visionaries who saw what was possible and enriched by an international and diverse faculty and student body, Andrews University now offers a wealth of choices in degree and certificate programs to prepare its graduates for life in a complex, fast-changing world. The goal of this distinguished institution, however, remains the same—to provide excellent academic programs in an environment of faith and generous service to God and humankind.

Recognizing that students benefit from studying at an accredited institution, Andrews University is accredited by the Higher Learning Commission for programs through the doctoral level, as well as by the Adventist Accrediting Association of the General Conference of Seventh-day Adventists. Professional organizations have accredited specific degree programs of the University and other programs are moving toward accreditation. (Please see the complete listing of university accreditations, approvals, and memberships.)

The DPT program is also fully accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) to offer the doctoral degree in physical therapist education. On average, 100% of those who complete the DPT program pass the licensure exam and 100% of those who seek employment are employed within six weeks.

Please consult with the department chair if you have questions relating to this handbook or the Physical Therapy Department here at Andrews University.

Introduction to the Department of Physical Therapy

The first MSPT degree was approved by the University Board in 1983. Bill Habenicht was the first Department chair and program director of the PT program. The first MSPT class of this three-year program began in July of 1985. The MSPT was accredited in April of 1988, with the first cohort of 23 students graduating in June, 1988.

PT courses were originally taught in various classrooms on campus. In the Fall of 1988, the program moved into the remodeled PT Building, except for the Anatomy Lab, which remained in Halenz Hall in the Science Complex.

Daryl Stuart was hired from Loma Linda in the Fall of 1993 as program director to start the Masters of Physical Therapy (MPT) on the Dayton, Ohio, campus. This two-year program especially appealed to students who had already earned a Bachelor's degree. The first class graduated in 1996 with 39 students.

Wayne Perry was hired from Loma Linda in the Fall of 1994 to be the program director of the Masters of Science in Physical Therapy (MSPT) program on the Berrien Springs Campus.

Bill Habenicht resigned in 2002, and Wayne Perry and Daryl Stuart became co-chairs of the PT Department. In July of 2002, Daryl Stuart resigned, and Wayne Perry became the PT department chair. Around this same time, the university consolidated the MPT program in Dayton into the MSPT program in Berrien. In October of 2005, the last Dayton MPT class graduated, after graduating 365 students.

For three years, between 2001 and 2002, the department offered an Advanced Masters of PT (AMPT). A total of five students graduated from the AMPT program. The AMPT was the precursor to the current Postprofessional Program under the direction of Kathy Berglund.

In 2002, the PT Department followed the APTA recommendation that all PT programs transition curriculum to a Doctor of Physical Therapy degree (DPT). The process to upgrade from a Masters to a Doctoral program transitioned smoothly as the last MSPT cohort completed their requirements. The last MSPT class graduated in 2004 after graduating 568 students.

The new DPT three-year program accepted students with a Bachelor’s degree, but also accommodated students who had not yet earned a Bachelor's degree. These students follow a 3+3 curriculum: three years undergraduate-level courses to complete prerequisites (Freshman, Sophomore, and Junior years), plus three years in the professional phase of the program with upper division and graduate courses (Senior plus two years of graduate courses). Students without a Bachelor's degree earn a Bachelor of Health Science: Wellness after two semesters in the DPT program. The first cohort of DPT students started classes in 2002, with 12 students.

Also in 2002, the PT Department was able to remodel existing classroom space in the Johnson Gym building. This classroom was equipped with new electric hi/lo tables and is dedicated to the PT Department for the use of Postprofessional and Orthopedic courses. The PT Department gained valuable lab space in 2008, by remodeling warehouse space from our Custodial Department neighbors. The new space provides ample room for Neuro, Peds and General Medicine labs.

Wayne Perry retired in 2013. Kimberly Ferreira, then the director of clinical education, was hired as the new department chair.

The new Anatomy Lab opened in the Fall of 2014, after remodeling additional space from the Custodial Department Warehouse. This brings all PT labs under one roof and the management of one department, with 10 state-of-the-art cadaver stations for our current sized cohort of 40 students.

The PT Department currently offers the following degrees or programs:

• Entry-level degree (DPT) for college Juniors or graduate students
• * Transitional DPT (t-DPT) for PTs who have a Bachelor's or Master's degree in PT
• * Doctor of Science (DScPT) for PTs who desire an advanced terminal PT degree
• * Orthopedic Residency for graduates seeking to advance their professional preparation

* degrees offered through the PT Department's Postprofessional Program

From 2005-2015, 316 students have earned a Doctor of Physical Therapy from Andrews University.
1. MISSION, GOALS AND STANDARDS

1.1. Andrews University Mission
Andrews University, a distinctive Seventh-day Adventist Christian institution, transforms its students by educating them to seek knowledge and affirm faith in order to change the world. 2

Seek Knowledge as they
- Engage in intellectual discovery and inquiry
- Demonstrate the ability to think clearly and critically
- Communicate effectively
- Understand life, learning, and civic responsibility from a Christian point of view
- Demonstrate competence in their chosen disciplines and professions

Affirm Faith as they
- Develop a personal relationship with Jesus Christ
- Deepen their faith commitment and practice
- Demonstrate personal and moral integrity
- Embrace a balanced lifestyle, including time for intellectual, social, spiritual, and physical development
- Apply understanding of cultural differences in diverse environments

Change the World as they go forth to
- Engage in creative problem-solving and innovation
- Engage in generous service to meet human needs
- Apply collaborative leadership to foster growth and promote change
- Engage in activities consistent with the worldwide mission of the Seventh-day Adventist Church

1.2. School of Health Professions Mission
To provide excellence in education for health care professions that fosters collaboration, research, and service within a Christ-centered environment. 3

1.3. Department Vision Statement
Uniting Christianity with Healthcare Education.

1.4. Department Mission
To empower students who dream of becoming excellent physical therapists.

1.5. Department Core Values
Exemplify Christian values through:

Family Spirit
- Advocate for the vulnerable
- Maintain a safe environment
- Work together
- Take responsibility
- Be accountable
- Have fun

Servant Heart
- Live prayerfully
- Lead selflessly
- Listen deeply
- Display compassion
- Model humility
- Show respect

Inquisitive Mind
- Desire life-long learning
- Ask relevant questions
- Integrate knowledge into practice
- Remain contemporary
- Display intellectual courage
- Analyze, produce & apply evidence-based practice

1.6. Entry-Level DPT Statement of Philosophy
The Entry-Level Doctor of Physical Therapy program affirms the mission and values of Andrews University and the School of Health Professions in its desire to educate professionals for generous service to others with a faithful witness to Christ.

The Andrews University department of physical therapy is committed to excellence in Christian healthcare education by training individuals to become physical therapists that provide evidenced-based service throughout the continuum of care.

1.6.1. **The DPT Curriculum Plan Philosophy**

The student’s comprehensive liberal arts and sciences background provide a base for the DPT curriculum’s foundational and clinical sciences. This background will further help students integrate their knowledge into the classroom, clinical environments, and their community.

The DPT curriculum is designed to encourage collaborative attitudes while fostering independent learning. It begins with the foundation sciences and basic assessment and intervention skills and progresses to the more complex systems approach with specialty practice areas and research interwoven where appropriate. The curriculum culminates with the clinical education component. The DPT Program is sensitive to the interests and changing needs of practitioners, clients, families, caregivers, healthcare and educational systems, and to the society at large. This is especially essential within an uncertain healthcare environment, an increasingly accountable higher-education system, and an evolving body of physical therapy knowledge. Critical inquiry within the academic experience enhances the preparation for evidence-based practice as clinicians and contributes to the professional body of knowledge.

It is of utmost importance to instill within the learner the accessibility of the power of Christ. The accessibility of His power is important to utilize not only in their personal life but also within the delivery of care to the clients they serve. The program seeks to prepare the learner to discern the spiritual needs of their clients.

1.6.2. **The DPT Graduate Philosophy**

Graduates of the Entry-Level Doctor of Physical Therapy program should be knowledgeable, self-assured, adaptable, reflective, and service oriented. Through critical thinking, and evidence-based practice, graduates render independent judgments concerning patient/client needs; promote the health of the client; and enhance the professional, contextual, and collaborative foundations for practice.

The graduate must master the breadth and depth of knowledge in order to address patient needs throughout the life span. These may be manifested as acute or chronic dysfunction of movement due to disorders of the musculoskeletal, neuromuscular, cardiopulmonary, and integumentary systems. The graduate’s focus should be to decrease the deleterious effects of health impairments, functional limitations, and disability.

The role of the physical therapist is expanding within a changing healthcare system. Graduates must be prepared for all responsibilities and privileges of autonomous practice and be the practitioner of choice for clients with a physical therapy diagnosis. Graduates will provide culturally sensitive care distinguished by trust, respect, and an appreciation for individual differences.

The graduate must also be adaptable and prepared to participate in a broad spectrum of activities from health promotion through comprehensive rehabilitation while being sensitive to market niches and needs that will arise in the healthcare community.

Compassion should be a driving force in the graduate’s work. It is our desire that they follow the example of Christ. As He worked with those in need of physical healing, it states in Matthew 14:14: “He had compassion on them.” Specifically, He felt their hurt.

Entry-level doctor of physical therapy graduates have the requisite knowledge and skills to successfully pass the National Licensing Examination, be prepared for autonomous practice, and provide contemporary evidenced-based service throughout the continuum of care. They will be the practitioners of choice for
clients with a physical therapy diagnosis and provide culturally sensitive care distinguished by trust, respect and an appreciation for spirituality in healthcare.

1.7. **DPT Program Goals**

In order to achieve the Physical Therapy Department mission, the DPT program offers professional physical therapy education that:

1. Attracts students who are interested in pursuing a career in physical therapy within a Christian environment.
2. Empowers students to become primary health care providers ready for contemporary professional practice in a variety of settings.
3. Inspires servant leadership in the area of health promotion and advocacy.
5. Promotes professional behavior consistent with current ethical and legal standards.
6. Develops understanding and respect among individuals from a variety of ethnic, cultural and religious backgrounds.
7. Encourages compassion for the patient/client as a whole person, taking into account physical, mental, spiritual and social needs.
8. Prepares students to communicate effectively with patients/clients, colleagues, health care providers and other community members.
9. Contributes to the physical therapy profession through research and creative scholarship.
10. Facilitates faculty educational and professional development.

1.8. **DPT Faculty Goals**

In order to provide professional physical therapy education consistent with the program goals, the faculty will:

1. Integrate Christian values into the physical therapy classroom.
2. Connect to their profession through licensure and professional membership.
3. Hold a postprofessional degree at the doctoral level.
4. Cultivate contemporary knowledge/practice expertise in assigned teaching area.
5. Develop, review, and revise the physical therapy curriculum plan collectively.
6. Admit students into the DPT program who have an appropriate balance of prerequisite courses and the ability to successfully complete the DPT program and practice in the profession.
7. Maintain currency in instruction and teaching methods including course content, design and assessment methods.
8. Pursue an on-going scholarship agenda which culminates in the peer-reviewed dissemination of original contributions.
9. Serve the department, university, profession and/or community.
10. Model professional behavior.

1.9. **DPT Student Learning Outcomes**

In accordance with the Physical Therapy Department mission and program goals, DPT graduates will:

1. Model behavior which reflects Christian values, including an understanding of the role of prayer and faith in the complete healing process.
2. Demonstrate in-depth knowledge of the basic and clinical sciences relevant to physical therapy, both in their fundamental context and in its application within professional clinical practice.
3. Provide primary care to patients/clients within the scope of physical therapy practice.
4. Demonstrate entry-level competency in clinical skills necessary to perform a comprehensive physical therapy examination, and evaluation, establish a differential diagnosis, determine an appropriate prognosis, and establish intervention and/or prevention activities.
5. Understand and value the capabilities of other health care providers and determine the need for referral to those individuals.
6. Participate in practice management including delegation and supervision of support personnel, financial management, business planning, marketing and public relations activities.

7. Possess the critical inquiry skills necessary to evaluate professional knowledge and competencies in relation to evidence-informed physical therapy practice.

8. Demonstrate legal and ethical behavior consistent with professional standards.

9. Demonstrate sensitivity to individual and cultural differences when engaged in physical therapy practice.

10. Demonstrate professional behavior.

1.10. **Student Technical Standards of Performance**

The intent of the Doctor of Physical Therapy program is to graduate individuals who are prepared for all responsibilities and privileges of autonomous physical therapy practice. Therefore, at the request of the university, students may be required to obtain a criminal background check including fingerprinting or a drug and alcohol test while enrolled in the program, before entering a clinical facility or during a clinical experience. The results of the background check or drug and alcohol test may disqualify certain students from successfully completing the program, being eligible to sit for the National Physical Therapy Exam or practicing as a Physical Therapist in certain states.

To function as a physical therapist at entry-level, students must be able to complete, with reasonable accommodation as necessary, certain psychomotor, cognitive, communication and behavioral skills. If a student cannot demonstrate these skills, it is the responsibility of the student to request appropriate accommodation. The university will provide reasonable accommodation as long as it does not fundamentally alter the nature of the program and does not impose undue hardship such as would cause significant expense or be disruptive to the educational process.

The student must be able to perform at least the following skills safely and reliably while in the DPT program:

**1.10.1. Psychomotor Skills:**

1. Attend lecture, lab and travel to clinical locations, move within rooms as needed for changing groups, partners and workstations.

2. Physically maneuver in required clinical settings, to accomplish assigned tasks.

3. Move quickly in an emergency situation to protect the patient (e.g. from falling).

4. Maneuver another person’s body parts to effectively perform evaluation techniques.

5. Manipulate common tools used for screening tests of the cranial nerves, sensation, range of motion, blood pressure, e.g., cotton balls, safety pins, goniometers, Q-tips, sphygmomanometer.

6. Safely and effectively guide, facilitate, inhibit, and resist movement and motor patterns through physical facilitation and inhibition techniques (including ability to give time urgent verbal feedback).

7. Move or lift another person’s body in transfers, gait, positioning, exercise, and mobilization techniques (lifting weights between 10-100+ pounds).

8. Manipulate evaluation and treatment equipment safely, and accurately apply to clients.

9. Manipulate bolsters, pillows, plinths, mats, gait assistive devices, and other supports or chairs to aid in positioning, moving, or treating a patient effectively (lifting, pushing/pulling weights between 10-100lbs).

10. Competently perform and supervise cardiopulmonary resuscitation (CPR) using guidelines issued by the American Heart Association or the American Red Cross.

11. Legibly record thoughts in English for written assignments and tests.
12. Legibly record/document evaluations, patient care notes, referrals, etc. in standard medical charts in hospital/clinical settings in a timely manner and consistent with the acceptable norms of clinical settings.

13. Detect changes in an individual's muscle tone, skin quality, joint play, kinesthesia, and temperature to gather accurate objective evaluative information in a timely manner and sense that individual's response to environmental changes and treatment.

14. Safely apply and adjust the dials or controls of therapeutic modalities.

15. Safely and effectively position hands and apply mobilization techniques.

16. Use a telephone.

17. Read written and illustrated material in the English language, in the form of lecture handouts, textbooks, literature and patient charts.

18. Observe active demonstrations in the classroom.

19. See training videos, projected slides/overheads, X-ray pictures, and notes written on a blackboard/whiteboard.

20. Receive visual information from clients, e.g., movement, posture, body mechanics, and gait necessary for comparison to normal standard for purposes of evaluation of movement dysfunctions.

21. Receive visual information from the treatment environment (e.g., dials on modalities and monitors, assistive devices, furniture, flooring, structures, etc.).

22. Receive visual clues as to the patient's tolerance of the intervention procedures. These may include facial grimaces, muscle twitching, withdrawal etc.

23. Hear lectures and discussion in an academic and clinical setting.

24. Distinguish between normal and abnormal lung and heart sounds using a stethoscope.

1.10.2. Cognitive Skills

1. Receive, interpret, remember, reproduce and use information in the cognitive, psychomotor, and affective domains of learning to solve problems, evaluate work, and generate new ways of processing or categorizing similar information listed in course objectives.

2. Perform a physical therapy examination of a client's posture and movement including analysis of physiological, biomechanical, behavioral, and environmental factors in a timely manner, consistent with the acceptable norms of clinical settings.

3. Use examination data to formulate a physical therapy evaluation and execute a plan of physical therapy management in a timely manner, appropriate to the problems identified consistent with acceptable norms of clinical settings.

4. Reassess and revise plans as needed for effective and efficient management of physical therapy problems, in a timely manner and consistent with the acceptable norms of clinical settings.

1.10.3. Communication Skills

1. Effectively communicate information and safety concerns with other students, teachers, clients, peers, staff and personnel by asking questions, giving information, explaining conditions and procedures, or teaching home programs. These all need to be done in a timely manner and within the acceptable norms of academic and clinical settings.

2. Receive and interpret written communication in both academic and clinical settings in a timely manner.

3. Receive and send verbal communication in life threatening situations in a timely manner within the acceptable norms of clinical settings.

4. Physical Therapy education presents exceptional challenges in the volume and breadth of required reading and the necessity to impart information to others. Students must be able to communicate quickly, effectively and efficiently in oral and written English with all members of the health care team.
1.10.4. Behavioral Skills
1. Maintain general good health and self-care in order to not jeopardize the health and safety of self and individuals with whom one interacts in the academic and clinical settings.
2. Arrange transportation and living accommodations to foster timely reporting to the classroom and clinical assignments.
3. Demonstrate appropriate affective behaviors and mental attitudes in order not to jeopardize the emotional, physical, mental, and behavioral safety of clients and other individuals with whom one interacts in the academic and clinical settings and to be in compliance with the ethical standards of the American Physical Therapy Association.
4. Sustain the mental and emotional rigors of a demanding educational program in physical therapy which includes academic and clinical components that occur within set time constraints, and often concurrently.
5. Demonstrate professional behaviors and a commitment to learning as outlined in Section 3.

1.11. Clinical Objectives
1.11.1. Part I
A. The pre-Clinical education sessions will:
1. Provide the intern with a review of the Clinical Education Handbook including the instruction in the policies and procedures necessary for successful completion of the clinical experience.
2. Provide review of instruction in the use of the APTA Clinical Performance Instrument (CPI), the Professional Behaviors Assessment Tool and the PT Student Evaluation Form for immediate personal use and in future use as a clinical instructor.
3. Provide the intern with review of available internship sites and instructions on the process of choosing clinical internship sites for Internships I-IV.
4. Provide the intern with instruction on necessary skills to be a successful student in the clinical environment, including but not limited to effective communication skills, interpersonal relationships and Professional Behaviors.

B. The post-clinical individual conference session will:
5. Provide a forum for the intern to verbally reflect, with the DCE, on the clinical experience and discuss future expectations for clinical education experiences.

1.11.2. Part II
A. The following objectives 1-18 are taken from the CPI and are broadly written to cover a variety of clinical settings. Please refer to each specific course outline (found in the appendix) for detailed explanations
1. Practice in a safe manner that minimizes risk to patient, self, and others.
2. Demonstrate professional behavior in all situations.
3. Practice in a manner consistent with established legal and professional standards and ethical guidelines.
4. Communicate in ways that are congruent with situational needs.
5. Adapt delivery of physical therapy services with consideration for patients’ differences, values, preferences and needs.
7. Apply the current knowledge, theory, clinical judgment, and the patient’s values and perspective in patient management.
8. Determine with each patient encounter the patient’s need for further examination or consultation by a physical therapist or referral to another health care professional.
9. Perform a physical therapy patient examination using evidenced-based tests and measures.
10. Evaluate data from the patient examination (history, systems review, and tests and measures) to make clinical judgments.
11. Determine a diagnosis and prognosis that guides future patient management.
12. Establish a physical therapy plan of care that is safe, effective, patient-centered, and evidence-based.
13. Perform physical therapy interventions in a competent manner.
14. Educate others (patients, caregivers, staff, students, other health care providers, business and industry representatives, school systems) using relevant and effective teaching methods.
15. Produce quality documentation in a timely manner to support the delivery of physical therapy services.
16. Collect and analyze data from selected outcome measures in a manner that supports accurate analysis of individual patient and group outcomes.
17. Participates in the financial management (budgeting, billing and reimbursement, time space, equipment, marketing, public relations) of the physical therapy service consistent with regulatory, legal and facility guidelines.
18. Directs and supervises personnel to meet patient’s goals and expected outcomes according to legal standards and ethical guidelines.

B. The following objectives reflect the goal of professional growth through reflection and feedback and the preparation of interns to serve as future Clinical Instructors.

19. Evaluate personal clinical performance using the CPI.
20. Evaluate personal professional behaviors using the Professional Behaviors Assessment Tool.
21. Evaluate clinical education experience using the PT Student Evaluation Form.
22. Please see each specific course outline for the required level on the Professional Behaviors Assessment Tool as verified by the clinical instructor, by completion of the clinical education experience

See appendix for Practicum & Internship Forms and course outlines.
2. OPERATIONS

2.1. Faculty & Staff

Below are the professors and support staff the PT Department:

Department Chair and DPT
Program Director:
Kim Ferreira, PT, PhD
  Associate Professor
  (269) 471-6033

Director of Clinical Education:
William Scott, PT, MSPT
  Assistant Professor
  (269) 471-6034

Orthopedic Coordinator:
Greg Almeter, MSPT, OCS, DScPT
  Associate Professor
  (269) 471-6552

Foundation Science Coordinator:
Ryan T. Orrison, PT, MSPT, OCS
  Assistant Professor
  (269) 471-3206

Behavioral Science Coordinator:
Caryn F. Pierce, PT, MSPT, JSCC, BCSI, MTC
  Assistant Professor
  (269) 471-6302

Research Coordinator:
Sozina Katuli, MPH, DrPH
  Professor
  (269) 471-3588

Clinical Science Coordinator:
Betty Oakley, MSPT, DHSc
  Associate Professor
  (269) 471-6301

Neurology Coordinator:
Lee Olson, MPT, DC
  Associate Professor
  (269) 471-6491

Postprofessional Operations Coordinator & Advisor
Stefanie Marschner, MA
  (269) 471-6305
2.2. Clinical Faculty
Clinical faculty supervise students while they are on clinical rotations in various clinical facilities. This usually occurs using a 1:1 model with one student to one clinical instructor (CI) or a 2:1 model with two students to one CI. Occasionally, a student will have two CIs during a rotation. This Clinical Education Handbook details the responsibilities of the CI and the center coordinator of clinical education (CCCE). The final grade issued for performance during a clinical rotation is determined by the DCE, in consultation with the CCCE, the CI, and the student.

2.3. Rights and Privileges of Clinical Faculty
Andrews University department of Physical Therapy recognizes the clinicians who provide clinical experience for students:
1. The Center Coordinator of Clinical Education, if acceptable to the university will be appointed by the university to an adjunct faculty position with the title Adjunct Clinical Instructor in Physical Therapy. See current AU Bulletin for a complete listing.
2. Visits to the university by clinical faculty are encouraged. These visits may include use of the libraries, pool, other facilities, and attendance at continuing education courses or physical therapy courses.
3. Many of the continuing education courses and special seminars offered at the Department of Physical Therapy are advertised to the clinical faculty and are made available at no charge or at a reduced fee.
4. A Clinical Education Day may be offered to the clinical faculty at two year intervals. This day may be cosponsored by other physical therapy educational programs in the geographic area in order to provide an outstanding presenter on a topic of interest to clinical educators.
5. The APTA Credentialed Clinical Instructor Program may be sponsored by the university and offered to clinical faculty (who are members of the APTA) without charge.
6. Resources are available by mail to the clinical faculty. These include the video from the University of Minnesota, “The Art of Clinical Instruction” as well as chapters from “Training programs for Clinical Instructors”, from Health Directions.
7. The Western Michigan Clinical Educators Forum and Detroit Area Clinical Educators Forums meet regularly throughout the year and offer instructional meetings and support to clinical faculty. These forums combine to make up the Michigan Physical Therapy Association SIG-CE.
8. With the MPTA SIG-CE an Outstanding Clinical Instructor Award is offered each year to the outstanding clinical instructor(s) nominated by students. This award is offered only to clinicians in the state of Michigan but Andrews University Department of Physical Therapy also recognizes those nominated who are out-of-state. The MPTA SIG-CE also awards an Outstanding Center Coordinator of Clinical Education Award.

2.4. Individual Rights and Safety
Safety, the right to privacy, confidentiality and informed consent apply to any individual involved with the Physical Therapy educational process, including, but not limited to: students, faculty, staff, visitors to the program, human subjects for classroom demonstration or research, and clients interacting with students at clinical facilities.

2.5. General Complaint Procedure
Any person with a complaint or concern about the Physical Therapy Department or one of its policies, programs, faculty, staff or students will be asked to submit their concern in writing. Persons with a verbal complaint/concern should be asked to submit their issues in writing to the department chairperson or to the dean of the School of Health Professions. For the DPT program, if the nature of the concern falls into the possibility of a formal complaint to the programs accrediting body, contact the APTA’s Department of Accreditation to discuss the nature of the complaint and to determine what procedures should be taken. This department can be reached by fax at 703-684-7343 or email at accreditation@apta.org.
2.6. **Student Rights and Responsibilities**

All Physical Therapy students are considered to be full members of the academic community. As such, students have rights and responsibilities which are discussed in detail in the Andrews University Student Handbook, which is available online: [https://www.andrews.edu/services/studentlife/handbook](https://www.andrews.edu/services/studentlife/handbook). These rights include a right to learn; to be free from discrimination or harassment; to discuss, inquire and express; to petition; to have access to and privacy in educational records; to associate with others and to appeal/grievance.

2.7. **Risk Situations**

If a situation shows a potential personal risk to the student (or her unborn child, if applicable) the department chair (or DCE if clinic-related) will review known potential risk with the student (and CCCE if applicable).

2.7.1. **Dropping Out**

If the student chooses to drop out of the program until the situation clears, the Academic Policies and Procedures section of this handbook will be followed for exiting and reentering the program (the Physical Therapy Faculty Council reviews these situations). A statement from the student's physician will be necessary to document the reasons.

2.7.2. **Informed Consent**

Having been informed of the potential risk, if the student chooses to continue in regular standing in the program they will:

1. Furnish a statement from the student's physician (signed by the physician). This document will indicate the physician's recommendation(s) with any noted comments or limitations.
2. Provide a signed Informed Consent Form (the signature of the spouse may also be required if pregnancy is involved). This may be required for each academic semester or clinical experience and is obtained from the administrative assistant or DCE.
3. If a student is aware that they have been exposed to an infectious disease, for which they have not been immunized, they will share this information immediately with the department chair (or the DCE if the student is in the clinic). The student may be asked to take a test at the student's expense to ascertain if they are a potential carrier of the disease. It may be necessary for the student to withdraw from the program and arrange makeup time. A clinical experience may require rescheduling. A rescheduled or added clinical experience may result in a delayed graduation.
4. **Any change noted by a student in their physical condition which has the potential of influencing their skills or judgments or endangering the safety or well-being of themselves, their unborn child, or their clients must be reported to the DCE or the department chair immediately.**

2.8. **Student Problem Resolution**

Several things should be noted:

1. All problems should be resolved at the lowest administrative level possible. If a solution is not attained at any particular level, the next level should be sought. The first contact should be with your faculty advisor if academic or DCE if clinical related. If possible, the advisor should follow through the various progressive administrative steps with the student until the solution is attained. Should the student not be comfortable with their first contact, they may go to the next higher level for assistance. This person will then follow through with the student.
2. If the student feels that the problem has not been dealt with fairly up to and through the vice president level, they should seek the assistance of the
3. A petition form may be required. The petition will require approval at the various respective levels prior to the final solution.

4. If a student is dismissed from the PT program and believes there were extenuating circumstances that override policy, they may appeal a dismissal decision to the SHP dean.

2.9. **Student Clinical Grievance Procedure**
Students who feel they have a legitimate grievance concerning a grade or treatment in a particular setting may appeal to the clinical instructor or DCE. If a satisfactory solution to the problem cannot be reached, students then take their complaint to their academic advisor, department chair, the dean of the School of Health Professions, the ombudsman, the vice president for academic administration, and the president in that order. The department chair may request a written confirmation of each concern before appropriate follow through is made. It is then the student’s responsibility to provide the requesting party with written verification of their concern.

2.10. **Clinical Instructor Grievance Procedure**
The clinical instructor who may feel they have a grievance concerning a student should first attempt to address the concern with the student and if the situation remains unresolved should then consult with the CCCE and the DCE. If a satisfactory solution cannot be reached the complaint should be taken to the faculty council, department chair, dean of the School of Health Professions as outlined above. If the clinical
instructor has a grievance concerning the Physical Therapy Department they should first address the concern with the DCE and then with the Department Chair.

2.11. **Discrimination and Harassment (Including Sexual Harassment)**
Students should contact their faculty advisor, department chair, SHP dean, or vice president for student affairs, in that order, unless one of the above is suspect in which case start with the one higher up (see University Student Handbook for more specific information).

2.12. **Documented Disability**
In the event a student has a documented disability, this information must be disclosed to the DCE who will disclose the information to the clinical facility prior to assignment to the clinical site. Reasonable accommodations will be made for the student in the clinical setting.

2.13. **Right to Ombudsperson**
The Office of the Ombudspersons is a confidential, independent and neutral dispute resolution service for the university community. As such, it facilitates understanding, communication and resolution of conflict among students, faculty and staff. The office serves as an impartial and confidential means of facilitating dialogue between parties on campus and as a means, apart from formal grievance procedures, of resolving differences. The office was established as part of the university's Christian commitment to foster a courteous and considerate climate conducive to productivity and well-being for the university community.  

2.14. **Use of Protected Information**
Information collected from students, lab subjects, patients/clients or from research subjects is considered confidential information, and protected by applicable Health and Human Services laws (available through: [http://www.os.dhhs.gov/](http://www.os.dhhs.gov/)). As such, the information can only be used for purposes other than direct health care, upon written informed consent from the patient/client or designated official. Use of the information should still protect the right to anonymity, when possible, and be used for educational purposes, either in the classroom or to other professionals. If images are requested, a separate consent form must be obtained, prior to obtaining and using such images.

2.15. **Human Subjects**
Policies regarding patient/client rights within the clinical setting are established by that institution, and should allow clients the right to refuse to participate in clinical education.

Policies and procedures for the use of human subjects in research is under the oversight of the Andrews University Institutional Review Board (IRB). Prior to research with human subjects, a research proposal and application must be submitted to the IRB, in keeping with federal guidelines. Subject information is confidential and must be properly protected.

Policies regarding the use of information from the clinical setting, such as intervention protocols and forms, are dictated by that institution. Students should ask their CI if they wish to duplicate or use any information from the clinic and follow policy and procedure established by that institution.

2.16. **HIPAA**
All students are instructed in the importance of complying with all relevant state and federal confidentiality laws, including the Health Insurance Portability and Accountability Act (HIPAA). In addition, the university provides students with training in the requirements of the privacy and security provisions of HIPAA and advises them of the importance of complying with the clinical site’s policies and procedures relative to HIPAA. Students are required to successfully pass (85% or greater) a written test over the HIPAA information.

---

4 AU Working Policy 2:166
2.17. **Drug-Free Workplace**
Andrews University is committed to an environment of learning that supports the fullest possible human development. To achieve this goal, the university holds that a drug-free lifestyle is essential and maintains policies that seek an alcohol-, tobacco-, and drug-free campus environment. 5

2.18. **Personal Injury Procedure**
If the need arises to seek medical attention for any non-clinical education program illness, it is the student’s responsibility to arrange for all medical costs. The university provides professional liability coverage for injuries occurring during a clinical education program required activity.

If you are injured while practicing at an Andrews University clinical assignment, please use the following procedure:

1. **Seek medical treatment if:**
   a. You have had contact with blood or body fluids to an open wound, to mucous membranes, or during an invasive exposure,
   b. Your on-site supervisor or campus instructor/coordinate asks you to seek medical evaluation/treatment,
   c. You feel that medical evaluation/treatment is needed,
   d. You have been injured, i.e. fall, sprain, over-stretch, fracture, etc.

2. **Report the incident** to your on-site supervisor. Use the incident report form required by your clinical site AND the Andrews University incident report.

3. **Report the incident** to the DCE

4. **Follow any instructions given** by your on-site supervisor and by the DCE.
   Each student is responsible to take the university’s incident report form to the clinical site. One is provided in the appendix.

2.19. **Universal Precautions**
Universal precautions, as defined by Centers for Disease Control (CDC), are a set of precautions designed to prevent transmission of human immunodeficiency virus (HIV), hepatitis B virus (HBV), and other blood-borne pathogens when providing first aid or health care. Under universal precautions, blood and certain body fluids of all clients are considered potentially infectious for HIV, HBV and other blood-borne pathogens. All faculty, staff and students are expected to follow universal precautions, as identified by the CDC.

**GLOVING, GOWNING, MASKING, AND OTHER PROTECTIVE BARRIERS AS PART OF UNIVERSAL PRECAUTIONS**
All health care workers should routinely use appropriate barrier precautions to prevent skin and mucous membrane exposure during contact with any client's blood or body fluids that require universal precautions.

Gloves should be worn:
- for touching blood and body fluids requiring universal precautions, mucous membranes, or non-intact skin of all clients, and
- for handling items or surfaces soiled with blood or body fluids to which universal precautions apply.

Gloves should be changed after contact with each patient. Hands and other skin surfaces should be washed immediately or as soon as patient safety permits if contaminated with blood or body fluids requiring universal precautions. Hands should be washed immediately after gloves are removed. Gloves should reduce the incidence of blood contamination of hands during phlebotomy, but they cannot prevent penetrating injuries caused by needles or other sharp instruments. Institutions that judge routine gloving for all phlebotomies is not necessary should periodically reevaluate their policy.

---

5 AU Working Policy 2:153
Gloves should always be available to health care workers who wish to use them for phlebotomy. In addition, the following general guidelines apply:

1. Use gloves for performing phlebotomy when the health care worker has cuts, scratches, or other breaks in his/her skin.
2. Use gloves in situations where the health care worker judges that hand contamination with blood may occur, e.g., when performing phlebotomy on an uncooperative patient.
3. Use gloves for performing finger and/or heel sticks on infants and children.
4. Use gloves when persons are receiving training in phlebotomy.

The Center for Devices and Radiological Health, Food and Drug Administration (FDA), has responsibility for regulating the medical glove industry. For more information about selection of gloves, call FDA at 301-443-8913.

Masks and protective eyewear or face shields should be worn by health care workers to prevent exposure of mucous membranes of the mouth, nose, and eyes during procedures that are likely to generate droplets of blood or body fluids requiring universal precautions. Gowns or aprons should be worn during procedures that are likely to generate splashes of blood or body fluids requiring universal precautions.

All health care workers should take precautions to prevent injuries caused by needles, scalpels, and other sharp instruments or devices during procedures; when cleaning used instruments; during disposal of used needles; and when handling sharp instruments after procedures. To prevent needle-stick injuries, needles should not be recapped by hand, purposely bent or broken by hand, removed from disposable syringes, or otherwise manipulated by hand. After they are used, disposable syringes and needles, scalpel blades, and other sharp items should be placed in puncture-resistant containers for disposal. The puncture-resistant containers should be located as close as practical to the use area. All reusable needles should be placed in a puncture-resistant container for transport to the reprocessing area.

General infection control practices should further minimize the already minute risk for salivary transmission of HIV. These infection control practices include the use of gloves for digital examination of mucous membranes and endotracheal suctioning, hand washing after exposure to saliva, and minimizing the need for emergency mouth-to-mouth resuscitation by making mouthpieces and other ventilation devices available for use in areas where the need for resuscitation is predictable.

Although universal precautions do not apply to human breast milk, gloves may be worn by health care workers in situations where exposures to breast milk might be frequent, e.g., in breast milk banking.
3. ACADEMICS

3.1. Policies and Procedures Review
Policies and procedures, as presented in the PT Department Policies and Procedures Manual, the student handbooks, the Associated Faculty Handbook or the Clinical Education Handbook will be reviewed on an annual basis.

3.2. Accreditation Standards
The DPT program will be administered in a manner consistent with accreditation policies and procedures, including: reports of graduation rates, performance on state licensing examinations, and employment rates; and submission of reports or materials required by CAPTE. The chair or the his/her designee is responsible for writing and submitting such reports or materials within the required timeframe.

3.3. DPT Course Description Outline
The course description outline provides an abbreviated course description for each of the required courses in the DPT program. This description is meant to provide a better understanding of each course offered in the program. A copy is included in the back of this handbook.

3.4. Registration Procedures
Before the close of each semester the operations assistant will inform and orient each student to the specific registration procedures and time schedules to follow for registration for the successive semester.

3.5. Professional Expectations
All Physical Therapy program faculty are committed to the concept of adult learning where instructors serve as facilitators of the process of learning. Within this environment the student holds the ultimate responsibility to determine the quality of his/her educational experience.

To assist students’ growth in these behaviors, all are regularly assessed, generally at program entry, at the end of each semester, and at program completion. In addition, behaviors may be assessed and reported on when students have engaged in specific instances of unprofessional behavior.

3.5.1. Professional Behaviors
The Professional Behaviors document is the result of the University of Wisconsin—Madison PT education program and May W., Kotney L., and Iglarsh A. The Professional Behaviors reflect the intent of assessing professional behaviors which are deemed critical for professional growth and development in PT education and practice. These behaviors with their criteria are as follows:

1. Critical Thinking – The ability to question logically; identify, generate and evaluate elements of logical argument; recognize and differentiate facts, appropriate or faulty inferences, and assumptions; and distinguish relevant from irrelevant information. The ability to appropriately utilize, analyze, and critically evaluate scientific evidence to develop a logical argument, and to identify and determine the impact of bias on the decision making process.

2. Communication – The ability to communicate effectively (i.e. verbal, non-verbal, reading, writing, and listening) for varied audiences and purposes.

3. Problem Solving – The ability to recognize and define problems, analyze data, develop and implement solutions, and evaluate outcomes.

4. Interpersonal Skills – The ability to interact effectively with patients, families, colleagues, other health care professionals, and the community in a culturally aware manner.
5. Responsibility – The ability to be accountable for the outcomes of personal and professional actions and to follow through on commitments that encompass the profession within the scope of work, community and social responsibilities.

6. Professionalism – The ability to exhibit appropriate professional conduct and to represent the profession effectively while promoting the growth/development of the Physical Therapy profession.

7. Use of Constructive Feedback – The ability to seek out and identify quality sources of feedback, reflect on and integrate the feedback, and provide meaningful feedback to others.

8. Effective Use of Time and Resources – The ability to manage time and resources effectively to obtain the maximum possible benefit.

9. Stress Management – The ability to identify sources of stress and to develop and implement effective coping behaviors; this applies for interactions for: self, patient/clients and their families, members of the health care team and in work/life scenarios.

10. Commitment to Learning – The ability to self-direct learning to include the identification of needs and sources of learning; and to continually seek and apply new knowledge, behaviors, and skills.

Students will be oriented to the 10 Professional Behaviors during DPT program orientation and PTH415 and will be made aware that they will be assessed on these behaviors multiple times throughout the program.

Each student is expected to demonstrate professional behavior and a commitment to learning. This will include, but not be limited to, punctuality and preparedness for each class session, and timely completion of assignments. Students are expected to participate in class discussions in a manner that demonstrates respect for their instructor, fellow classmates, and the department. Students also represent the DPT program, Andrews University and Christ outside the PT building and therefore are still held to the professional expectations policy, particularly #2 and #4-6. This also applies to social media communications like Facebook, Twitter, Snap chat, yik-yak, etc.

Students who do not meet these standards are notified in writing. If this behavior continues, the student will be required to meet with their advisor to submit a corrective plan of remediation which must be approved by the Physical Therapy Faculty Council in order to continue in the physical therapy program. If the remediation plan is not followed, the student will disqualify themselves from continuing in the DPT program. Under certain circumstances, the Physical Therapy Faculty Council may deem certain student infractions as serious enough to warrant immediate dismissal from the program.

Please see Appendix for Professional Behavior Contact Policy sample form.
G:\COMMON\Forms\Professional Behavior Contact Policy.pdf.

3.5.2. Department Core Values
The department core values shape the culture of the PT Department and the way in which we meet our mission to empower students to become excellent physical therapists. These core values and mission align with the SHP and university missions. The faculty, staff and students are expected to exemplify Christian values through their family spirit, servant’s heart, and inquiring mind. Our desire is for continual growth in our core values, therefore, faculty are
encouraged to address any behavior that falls outside of these specific expectations.  

3.6. Glossary of Terms  

3.6.1. Director of Clinical Education (DCE)  
Individual who is responsible for managing and coordinating the clinical education program at the academic institution, including facilitating clinical site and clinical faculty development. This person also is responsible for coordinating student placements, communicating with clinical educators about the academic program and student performance, and maintaining current information on clinical sites.

3.6.2. Center Coordinator of Clinical Education (CCCE)  
Individual who administers, manages, and coordinates CI assignments and learning activities for students during their clinical education experiences. In addition, this person determines the readiness of persons to serve as clinical instructors for students, supervises clinical instructors in the delivery of clinical education experiences, communicates with the academic program regarding student performance, and provides essential information about the clinical education program to physical therapy programs.

3.6.3. Clinical Education  
That portion of a physical therapy program that is conducted in the health care environment rather than in the academic environment.

3.6.4. Clinical Education Agreement  
A legal contract that is negotiated between academic institutions and clinical sites that specifies each party's roles, responsibilities, and liabilities relative to student clinical education.

3.6.5. Clinical Education Experiences  
That aspect of the curriculum in which students' learning occurs directly as a function of being immersed within physical therapy practice. These experiences comprise all of the formal and practical "real-life" learning experiences provided for students to apply classroom knowledge, skills, and professional behaviors in the clinical environment. These experiences would be further described by those of short and long duration (e.g., part-time and full-time experiences, internships that are most often a full-time, post-graduation experience for a period of one year), and those that vary how learning experiences are provided (e.g., rotations on different units within the same practice setting, rotations between different practice settings within the same health care system) to include comprehensive care of patients/clients across the lifespan and related activities.

3.6.6. Clinical Education Faculty  
Includes all individuals who participate in providing student clinical education experiences in the practice environment, including CIs and CCCEs. It is an expectation that the clinical faculty be familiar with the DPT clinical course objectives as they apply to their particular clinical setting and that each clinical faculty has the knowledge and teaching skill necessary to be an effective teacher.

---

6 See AU PT department vision, mission, core values, and philosophy in Section 1  
3.6.7. **Clinical Education Site**
The physical therapy practice environment in which clinical education occurs; that aspect of the clinical education experience that is managed and delivered exclusively within the physical therapy practice environment.

3.6.8. **Clinical Instructor (CI)**
Individual(s) at the clinical site who directly instructs and supervises students during their clinical learning experiences. These individuals are responsible for facilitating clinical learning experiences and assessing students’ performance in cognitive, psychomotor, and affective domains as related to entry-level clinical practice and academic and clinical performance expectations. An effective CI is able to build an appropriate relationship with the student and is able to accurately assess and document student performance.

3.6.9. **Entry Level**
The initial point of entry into the practice of physical therapy, characterized by successful completion of an accredited professional education program and the acquisition of a license to practice physical therapy. Also, a level of practice characterized by little or no experience as a licensed, practicing physical therapist.

3.7. **Guidelines for Clinical Education**
Between 1989 and 1994 two APTA Task Forces on Clinical Education (1989-1991 and 1992-1994), in concert with clinical educators throughout the nation dedicated their energies towards the development and refinement of voluntary guidelines for clinical education. Approximately 2500 clinical educators provided substantial feedback on these documents through consortia, academic programs, or individual responses directly to the Task Force on Clinical Education or through testimony given at a total of five hearings held in San Francisco, Denver, and Virginia in 1992. The culmination of these efforts was evidenced of three documents: *Guidelines for Clinical Education Sites*, *Guidelines for Clinical Education Instructors (CIs)*, and *Guidelines for Center Coordinators of Clinical Education (CCCEs)*. These guidelines were adopted by the APTA Board of Directors in November 1992, endorsed by the APTA House of Delegates on June 13, 1993, and revised in 2004.

The publication, *Clinical Education Guidelines and Self-Assessments* may be obtained from the APTA, Division of Education by telephoning (800) 999 2782 ext. 3203. The Guidelines for Clinical Education Sites are available online at:

[http://www.apta.org/AM/Template.cfm?Section=Clinical&Template=/MembersOnly.cfm&ContentID=21123](http://www.apta.org/AM/Template.cfm?Section=Clinical&Template=/MembersOnly.cfm&ContentID=21123)

The intent of these voluntary guidelines is to provide academic and clinical educators with direction and guidance in the development and enhancement of clinical education sites, and physical therapist and physical therapist assistant CIs and CCCEs. The documents reflect the nature of current practice and also represent the future ideals of physical therapy clinical education. The guidelines were designed to encourage and direct clinical education in a diversity of settings ranging from single to multiple clinicians, public or private clinical education sites, and clinical education sites housed within a building or a patients’ home.

It is an expectation of the DPT program that each clinical instructor be familiar with the DPT clinical course objectives as they apply to their particular clinical setting and that each has the clinical knowledge and teaching skill necessary to be an effective teacher. An effective clinical instructor is able to build an appropriate relationship with the student and is able to accurately assess and document student performance. The program expects that the clinical instructors (CIs) will have a minimum of one year of clinical experience and will demonstrate clinical competence in the area of practice in which they are providing clinical instruction. The responsibilities of the clinical faculty include the provision of clinical education learning experiences which are planned, organized...
and administered by qualified staff in accordance with mutually agreed upon educational objectives and guidelines.

3.8. **Clinical Facility Requirements**
All students are expected to meet certain requirements prior to attending any clinical assignment. These requirements include completion of previous coursework, a standard physical, CPR, OSHA and HIPPA certification, TB tests, Hepatitis B vaccination (or a signed waiver), influenza vaccine, and proof of personal health insurance. Students are also expected to meet any additional “special requirements” specifically requested by their clinical practicum or internship facility. These may include further health services such as additional TB tests, immunizations, titters, x-rays, HIV testing, hepatitis B vaccinations (if waiver not accepted), or other medical screenings and treatments, criminal background checks, drug testing (urine or blood), finger printing, character references, etc. It is the responsibility of the student to obtain and pay for requirements not provided by the DPT program prior to the first day of the clinical experience.

3.9. **Health Examinations**
Students will have a current Medical Evaluation Form and documentation of Hepatitis B vaccination. The Medical Evaluation Form will include a physical examination, appropriate vaccinations, and clearance from TB (TB skin test or chest x-ray). The Health Form is to be updated on a yearly basis. The student will retain the original for use during clinical rotations and a copy is kept on file in the Department of Physical Therapy office. Some clinical sites will require additional health-related testing (e.g. HIV or drug). If such testing is positive the student may not be able to complete the clinical experience.

The Department of Physical Therapy will schedule and pay for the standard yearly physical and TB skin test provided by University Medical Specialties, Inc. If the student misses the scheduled appointment or chooses to have it done by another physician the student will use the form provided by the department and is responsible for the cost. If the student fails to return to University Medical Specialties, Inc. at the required time to read the TB test the student is responsible for the cost of retest.

If a student is known to have a positive TB skin test they may omit the skin test and proceed with a chest x-ray. The department will cover the cost of one chest x-ray only.

Payment for further tests, immunizations, titters, x-rays, Hepatitis B vaccinations, or other medical treatments is the responsibility of the student.

It is the student's responsibility to search out information on facility health test requirements from the DCE, clinical education assistant, or from information provided, prior to the selection of the clinical site for a practicum or internship. Payment for any additional health tests, etc. required by a clinical site is the responsibility of the student.

3.10. **Cardiopulmonary Resuscitation**
Current professional CPR certification is required prior to each clinical experience, and a copy of the certificate is to be kept on file in the Department of Physical Therapy office.

An opportunity for certification is scheduled and paid for by the Department of Physical Therapy. Students may make their own arrangements at their own expense. The student must then provide the Department of Physical Therapy a current certificate at least one week prior to any clinical experience so that a copy may be kept on file. In the event the student loses his/her CPR card, it is the student’s responsibility to replace the CPR card at the student’s expense.

3.11. **Background Checks, Fingerprinting and Drug Testing**
Students may be required to have a background check, drug test and or fingerprint check prior to internships at the request of the facility. It is the responsibility of the student to obtain the appropriate background check, drug test and or fingerprint check as required by the facility. This information is available on the special
requirements list, Clinical Site Information Form (CSIF) and or by contacting the facility CCCE.

3.12. Name Tags
Nametags are to be worn during all clinical education experiences. One nametag is supplied free of cost to each student. Nametags for replacement or name changes are at the student’s expense. It is the responsibility of the student to contact Plant Services for a replacement name tag.

3.13. Student Photographs
Photos are included in the student information packet, which is mailed to the clinical facilities to schedule each clinical experience. An opportunity for having the photo taken is scheduled and funded by the Department of Physical Therapy.

3.14. Clinical Site Selection
All clinical assignments will be made by the director of clinical education (DCE) or a designate. Because of the limited number of facilities available, assignments cannot be made on the basis of the student’s family/marital status or personal preference. Although the department makes an effort to accommodate the student’s preference, the student agrees to accept the clinical assignments made by the department at any of the affiliated facilities, whether local or out of state.

Clinical experiences (clinical slots) are arranged for each student from 6 to 12 months prior to the scheduled assignment. Once the arrangements become finalized they are considered the same as a firm contract, and no changes will be allowed. If the assigned clinical site should become unable to provide the clinical experience the DCE will obtain an alternate placement for the student.

3.14.1. Student Input
Andrews University maintains Clinical Internship Agreements with a variety of clinical facilities. Files with information about these clinical sites are available for student review. These files are the Clinical Site Information Forms (CSIF) or “blue files” located in the resource library.

A student who knows of a clinical site that is interested in establishing a clinical internship should give the information to the DCE by the assigned deadline, which will be at least 6 months in advance of the selection of the internship sites. The information should be provided by the student to the DCE using the Clinical Experience Special Request form. A deadline for special requests will be given and noted in the class schedule.

Under no circumstance is a student, parent, family member or friend of a student to contact the facility director, center coordinator of clinical education (CCCE), clinical instructor (CI) or other staff in any facility on behalf of Andrews University for any reason without specific permission of the DCE. All communication to request placement for a clinical course must be done by the DCE. A student will not be placed in a facility if there is evidence that any person other than the DCE has contacted the facility to request clinical placement.

3.14.2. Choosing the Site for Clinical Experiences
1. In March of each year the DCE mails out the following year’s clinical request letters called the “Slot Form.” Offered slots are returned to the university and compiled into the database to track placements.
2. A list of possible sites will be available for students prior to each selection period.
3. The Clinical Site Information Form (CSIF) is also available in the resource room for student review, as well as in the PT computers in the file titled “CSIF,” which is located in the “Student Lab” folder.
4. Students should use the following guidelines when selecting clinical sites:
   a. Each student should seek a variety of clinical experiences and should complete only one rotation at any one site.
   b. Each student is required to complete an internship in each of the following settings: outpatient orthopedics, inpatient, and a neurology setting.
   c. Unless unusual circumstances exist, students will not be assigned to an internship site where they are actively employed, or be assigned to a clinical instructor who has supervised them in a previous employment situation. A student should not have their final internship at a facility where they have a commitment of employment.
   d. Students will not be assigned to more than one rotation at a new internship site (that is, a site recently established that has not had an affiliating Andrews University student previously).
   e. Students are not to contact an internship site until they have been assigned to that site, have been given specific permission by the DCE, or the clinical site has contacted them.

5. By the set deadline, students will enter their preferred clinical sites into the computer.
   a. The computer program randomly assigns the sites according to the student’s preferences.
   b. The DCE will hold a clinical education meeting to instruct students in the process of entering preferences and to review the available clinical slots.

6. When a student has recommended a site as described above (Section 3.14.1 Student Input) that student may receive priority for assignment to that site.

7. Special Requests: A student may submit a special request for a specific facility on the Special Request form, found in the Appendix, by the deadline which is set by the DCE. A special request is for a new facility, an inactive facility or an active facility which only accepts special requests and does not give clinical slots annually. Only two special requests per student during their time in the DPT program will be accepted; of those two requests, only one can be for an outpatient orthopedic facility. To make a Special Request, the student must not be on academic probation or have any documented professional behavior issues. If a students’ GPA is below 3.5 the Special Request must be approved by the Clinical Education Committee. The DCE reserves the right to override this policy. All special requests for Internship I&II will be submitted by November 1 (If November first falls on a Saturday or Sunday the requests shall be due the following Monday). All special requests for Internship III&IV will be submitted by March 1 (If March 1 falls on a Saturday or Sunday the requests shall be due the following Monday).

3.15. **Clinical Site Information Form (CSIF)**
Students should familiarize themselves with the contents of the Clinical Site Information Form (CSIF). The CSIF (aka blue files) are forms completed by the CCCE of the facility. They include, but are not limited to, information about the site including type of setting, PT load, staffing, special requirements and housing. The CCCEs are now able to complete the CSIF online but this is a new option. So the CSIF may be found online, in the G: drive and/or the blue files in the resource room.

After assignment to a clinical site, but at least four weeks prior to beginning the rotation, students must contact the Center Coordinator of Clinical Education (CCCE) to finalize details of the rotation. The CCCE contact information can be found in the Clinical Site Information Form (CSIF) or from the clinical education assistant or DCE. If assistance
with housing is offered, arrangements should be made with the CCCE soon after the clinical sites are assigned.

3.16. **Clinical Education Goals and Experience Form**
At least two weeks prior to beginning an internship, students will complete the Clinical Education Student Goals and Experience Form and email, fax, or mail it to the CCCE and/or CI at the clinical site.

3.17. **Clinical Conferences**
Individual pre- and post-clinical conferences are to be scheduled with the DCE. A sign-up sheet will be made available prior to conferences. Grades are normally assigned following post-clinical conferences. It may be necessary to assign a (DG) deferred grade until post-clinical conferences are complete and clinical paperwork is reviewed.

3.18. **Pre-Clinical Education Exam**
The DCE will review the Clinical Education Handbook with the class as part of orientation to Clinical Education. It is the students’ responsibility to know the content of the handbook. A Clinical Education Exam covering the handbook and any other items designated by the DCE will be given prior to the Practicum and Internship I. Each student must score at least a 95% on the exam prior to beginning the clinical experience. A student scoring less than 95% on the exam must retake the exam until a 95% is achieved. The content of the re-take is at the discretion of the DCE.

3.19. **Confidential Student Information**
Students will take a health information form to each clinical facility which documents their medical history and current health findings. Information regarding academic performance or previous clinical experiences is not shared with the facility by the program without consent from the student.
4. INSTRUCTION

4.1. Clinical Absences

Clinical education is an integral component of Physical Therapy education and students are expected to attend all clinical experiences as arranged. It is at the discretion of the clinical instructor to decide when excused absences may be permitted, not to exceed 5% of total clinical time, and it is the responsibility of the student to abide by this decision. If there is a question regarding this, the director of clinical education (DCE) may be contacted. If it is necessary to be absent it is the student's responsibility to notify the CI. For an absence of more than one day per rotation, the student must also notify the DCE. Excused absences should be attempted to be made-up if possible at the clinical site.

To allow for travel time to the next clinical site when there is a distance of over 500 miles, the clinical experience will be completed on Thursday rather than Friday. This applies to all clinical experiences except Internship II (I2), as Christmas break follows the end of I2

4.1.1. Excused Clinical Absences

1. Illness or injury (up to 5% of total clinical time) provided the student notifies the clinical supervisor.
   a. Any illness or injury requiring an absence of more than two days must be in written order by a physician.
   b. When participating in clinical experiences, students must consider the health of those with whom they come in contact. If the student has an illness that may be a threat to the health of the patients or staff, he/she should not participate in the clinical experience for that day.
   c. A student who has to wear a cast or has another condition which does not allow participation in physical therapy will consult with the DCE, who will attempt to reschedule the experience. Observation does not replace practice.

2. Emergencies. If there is a death or other serious problem in the immediate family, the situation should be discussed with the clinical instructor. The CI can then determine if time off is excused.

3. While attendance at professional meetings is encouraged as part of the professionalization process, students should be performing satisfactorily in the clinic before being excused for conferences.

4. There will be NO “allowed” absences or “days off” in the clinical program.

5. In the event that a student finds it necessary to be absent for reasons other than illness, injury, or an emergency situation, and the CI and CCCE approve of this absence, he/she will make arrangements for make-up time with the clinical instructor and CCCE.

4.1.2. Unexcused Clinical Absences

Unexcused absences are absences of which the clinical supervisor or director of clinical education (DCE) have not been notified, do not meet the "excused absences" criteria, or absences which result in incomplete or unacceptable performance at a clinical facility. All unexcused absences require make-up time, which may extend beyond the original clinical dates, and in some cases course failure may result.

4.2. Evaluation of Student Performance

Students are evaluated formally at the midterm and final using the Clinical Performance Instrument (CPI), Professional Behaviors, and the Physical Therapy Student Evaluation (PTSE). The CI will complete a midterm and final CPI, and the student will complete a self-assessment on the CPI and Professional Behaviors. The PTSE gives the student the opportunity to evaluate their CI and the experience. Prior to the beginning of clinical experiences, the DCE will teach students the evaluation procedures. The course syllabi contains the requirements for successful completion of each experience.
In the event that a student is experiencing problems during his/her internship, the student should first discuss the problem with his/her CI. If an agreement cannot be reached regarding a resolution to the problem the matter should be discussed with the CCCE and the DCE.

Site Visits:
- During each clinical experience the DCE or another faculty member or the Department Clinical Education Committee will contact the clinical setting at least once by telephone and/or in person.
- An attempt will be made by the DCE to visit each student during at least one of his or her clinical internships.

4.3. **Clinical Performance Instrument (CPI)**
The CPI designed by the APTA is utilized by the CI and student at midterm and final to evaluate the student’s clinical performance. The student will also fill out their self-assessment at midterm and final using the online version. Students must pass the CPI training post-assessment with at least 70% prior to using the CPI.

4.4. **Physical Therapist Student Evaluation (PTSE)**
The student will assess the clinical experience and the clinical instruction prior to the completion of the internship. Informal meetings with the CI should be used to voice any student concern regarding the clinical experience to allow for appropriate changes to be made if necessary.

The assessment is to be reviewed with the CI at **midterm** and prior to or on the last day of the internship during the **final** conference. The Physical Therapist Student Evaluation is a paper document not online and should be returned to the DCE along with the other required evaluation forms.

The report will be filed and will be available to future students. It is important to be honest and as objective as possible when completing the facility evaluation. One student’s input may enhance another’s experience (note hard copy to return and also review with the CI).

4.5. **Professional Behaviors Self-Assessment**
This is utilized by the student as a form of self-assessment of professional behaviors while in the clinical setting (note hard copy to return and also review with the CI).

4.6. **Return of the Evaluation Forms**
All evaluation forms (PTSE, Professional Behaviors) are to be returned to the DCE **within one week** of completion of each clinical experience. If students are returning directly to the university they may hand deliver the forms in a sealed envelope.

**Students are responsible for returning appropriate forms to the DCE.** Be aware of the forms that are to be returned and remind your CI. Failure to return appropriate forms will result in an unsatisfactory (U) grade. A postage paid envelope is provided in the student packet which is sent to the site prior to the students’ arrival.

4.7. **Satisfactory Clinical Performance**
Thirty-nine to forty weeks of clinical experience are included in the physical therapy program. There is one four-week practicum, two eight-week internships, one nine to ten-week internship and one ten-week internship. The student must satisfactorily complete each clinical experience prior to enrolling in the next clinical assignment.

Final grades for the clinical experiences are **satisfactory (S)** or **unsatisfactory (U)**. Grades are assigned by the director of clinical education (DCE) after reviewing the recommendation of the clinical instructor. For the Clinical Practicum and Clinical Internships I, II, and III students will receive a deferred grade (DG). The (DG) will be changed to (S) or (U) as appropriate. Following Internship IV, the return of all completed
records must be expedited in preparation for graduation. In the event all required coursework is not completed the (DG) will default to (U) which may result in "points" equal to the semester credit for the course.

For satisfactory completion of each clinical experience:
1. The evaluation and reports of the clinical instructor reflect an acceptable level of clinical performance. See course outline.
2. The student completes assignments at the facility to which he/she has been assigned.
3. All required records are completed and received by the DCE, Department of Physical Therapy, and Andrews University.

4.8. Unsatisfactory Clinical Performance
The following may result in dismissal from and/or unsatisfactory completion of a clinical experience:
1. Unexcused absences
2. Excused absences in excess of 10% of the total clinical time
3. Unethical and/or unprofessional conduct
4. Misconduct resulting in possible danger to a patient
5. Failure to meet course objectives

If a student fails to complete a clinical experience the DCE will consult with the clinical instructor and evaluate the student’s progress. Any or all of the following may be required as determined by the DCE and/or the PT Clinical Education Committee and may result in a delay of graduation.
6. Make-up time for absences or tardiness.
7. Additional clinical time in the same or a different facility (at the discretion of the DCE) to improve skills to meet course objectives and/or enhance professional and ethical standards. Rescheduling of clinical experiences is dependent on the availability of an appropriate clinical facility.
8. Additional didactic work to be completed prior to a further clinical experience.
9. Dismissal from the Doctor of Physical Therapy Program.

If a student has not performed satisfactorily during Internships I or II, it may be possible to attempt remediation of the problem areas during the following spring semester. If this is successful, the student may continue with Internship III and IV.

Unsatisfactory performance on the final internship will require remediation beyond the scheduled completion time and will delay graduation.

The Physical Therapy Clinical Education Committee will meet to decide what actions will be taken. Options include:
10. Advising the student to seek additional help to deal with specific problems that may be interfering with performance.
11. Arrange for more didactic work to be completed prior to additional clinical experience. Satisfactory completion of this specific assignment will be necessary for a final (fifth) clinical internship to be assigned.
12. Arrangements by the director of clinical education (DCE) for a final (fifth) clinical experience directed towards problem areas.
13. Dismissal from the Physical Therapy program.

If a student does not achieve entry level in all areas of the final evaluation of their final (fifth) clinical internship the student will be dismissed from the Physical Therapy program.
4.9. Interruption of Clinical Experiences

If a student is unable to complete clinical internships in a sequential order due to illness, injury, pregnancy, personal problems, etc., the following steps will be taken:

1. The student (or representative) will notify the DCE and the CI. If the student or representative is unable to notify the CI, the DCE will do so.
2. In case of illness, injury, or pregnancy, the student’s physician should notify the DCE in writing of the student’s ability/ inability to complete the internship.
3. In case of personal problems, the student should document, in writing, the extent of the problem. If the student is receiving counseling, a letter from the counselor may also be necessary.
4. With Department of Physical Therapy Clinical Education Committee approval, the student may continue to take classroom courses even though he/she is unable to participate in clinical experiences.
5. It is the student’s responsibility to meet with the DCE to discuss a schedule for future completion of the clinical education experience as soon as possible.
6. The DCE will arrange for the completion of the clinical education experience. If this is not possible, the Physical Therapy Clinical Education Committee will meet to discuss the situation and make alternate plans for completing the clinical experience.
7. If there is an interruption of more than eight months between the time the student finishes his/her classroom course work and the start of the clinical education experiences, the student will be required to demonstrate competency of didactic work and/or retake courses. This decision shall be made by the Department of Physical Therapy Clinical Education Committee.
8. Before resuming his/her clinical internships, the student will provide the university with a written statement from the physician, counselor, etc., stating that in his/her opinion, the student is able to resume the clinical internship experience. If the reason for interruption of the internship is personal, the student will submit the written statement in his/her own behalf.
5. STUDENT EXPERIENCE

5.1. PT Student Dress Policy

Student attire for lectures and general school activities is expected to follow the conservative standard as outlined in the Andrews University Student Handbook https://www.andrews.edu/services/studentlife/handbook.

As representatives of Andrews University and members of the physical therapy profession, students within clinical facilities are required to be well-groomed and to dress in a professional manner. The following guidelines should be observed in the clinic unless the facility has provided students with a dress code more suitable for that particular setting.

1. The standard clinical uniform is a white lab jacket worn over slacks or khakis (not jeans) unless otherwise stipulated in the clinical facility dress code. In most clinics the Andrews University Physical Therapy polo shirt is acceptable (no other logos).
2. No shorts, capris, gauchos, T-shirts, sweatshirts, or sheer tops should be worn at any time.
3. At no time should the midriff or bust/waist line be exposed.
4. Andrews University student nametags must be worn during clinical education. Some facilities also provide a nametag which students are expected to use.
5. Shoes are to be sturdy with non-skid soles and heels. For safety, sandals and open-toed shoes are not to be worn. Athletic shoes are not acceptable unless specifically allowed by the facility.
6. Hairstyles must meet clinical standards. Hair must be neat, clean, well-groomed and socially acceptable in a professional physical therapy setting. Long hair should be fastened with hair fasteners. Men should keep facial hair neatly trimmed (able to be covered with a face mask).
7. Personal cleanliness and hygiene are to be maintained at all times. Perfume, colognes or aftershave lotions should be used with caution as they may be an irritant to patients.
8. Nails need to be trimmed, not extending past the end of fingertips. Colored finger nail polish is not permitted.
9. Accessories, including jewelry should reflect professional clinical standards in harmony with the conservative standard of dress outlined in the Andrews University student handbook. "Examples of jewelry and accessories that are not appropriate at Andrews University are ornamental rings and bracelets; necklaces and chains; ear, tongue, nose and eyebrow rings. Modest symbols of marital commitment, such as wedding and engagement rings, are acceptable." Also broaches, if worn, should be small and unobtrusive.
10. To reflect professional clinical standards in harmony with the conservative standard of dress outlined in the Andrews University student handbook, tattoos, of any nature and size, should be covered with clothing or tattoo cover-up while students are in the clinical setting.
11. Cell phones are not to be carried or used in patient care areas, and should remain in a silenced mode in all other areas of a facility.

5.2. Conduct in the Clinical Setting

At all times the student is expected to:

1. Be aware of, and follow, the rules and regulations of the Department of Physical Therapy and/or the clinical setting (e.g. working hours, billing procedures, dress code, preparation of treatment area, etc.).
2. Comply with the ethical standards of the APTA, Andrews University and the clinical facility.
3. Conduct himself/herself in a professional manner in regard to both patients and staff.
4. Respect the integrity and rights of all persons.

---

Noncompliance with any of the above will be taken into account in the student's evaluation. Noncompliance can result in dismissal from the internship, an unsatisfactory grade and/or dismissal from the physical therapy program.

While at the clinical facility, it is the student's responsibility to complete all assignments as requested by the CCCE and/or the CI including, but not limited to, readings, in-service presentations, notes, home programs, etc. Failure to do so may result in an unsatisfactory grade for the clinical experience.

Students will familiarize themselves with all policies and procedures of the clinical facility. This includes, but is not limited to those policies and procedures dealing with scheduling, billing, note-writing, transportation of patients, discharge of patients, use of abbreviations and medical terminology, referrals to other disciplines within and outside of the facility, evaluation and treatment protocol. Students have been educated in universal precautions and OSHA guidelines and are expected to comply with each specific clinical setting's policy.

Tardiness is not an acceptable practice in clinical education; make-up time will be required; in extreme cases failure may result. It is the student's responsibility to call the clinical instructor (CI) if they will arrive more than five minutes late.

5.3. **Health Insurance**
Students are required to have proof of personal health insurance prior to commencing clinical education. The documentation must provide proof of continual coverage for at least one year at a time. This insurance is available through Andrews University at the student's expense.

5.4. **Student Expenses**
Room and board, and transportation to and from clinical experiences are the student's responsibility, and clinical rotations will not be arranged to accommodate these needs. While some facilities offer incentives to students this cannot be expected. It is the student's responsibility to find alternative housing if, in their opinion, the facility-provided housing is not acceptable.

5.5. **Registration and Financial Clearance**
Students must be registered and financially cleared prior to starting any clinical rotation. Registration for classes is completed by the operations assistant as part of the block registration process and therefore students may be registered for classes prior to financial clearance. All students must financially clear themselves for classes through Registration Central by the financial clearance deadline (usually the first or second day of classes/clinicals) to remain registered for classes. Due to the nature of the clinical schedule and geographic location of some clinical internships, students may be required to complete financial clearance via the Andrews University website. It is highly recommended that students complete financial clearance as soon as registration for the following semester is open. **Note:** Students not financially cleared by the university deadline will be dropped from classes and asked to leave the clinic until the student is financially cleared and re-registered.

Clinical Education Agreement

CLINICAL EDUCATION AGREEMENT

This Agreement is entered into by and between Andrews University, a Michigan nonprofit educational corporation with its main campus in Berrien Springs, Michigan (the “University”), and

__________________________
(Facility Name)

__________________________
(Facility Address)

of

the “Facility”).

Whereas, the University is conducting physical therapy educational programs that require clinical education facilities for the purpose of providing clinical experience to its students; and

Whereas, the Facility recognizes the need for, and desires to aid in, the education of health care professionals, and is willing to make its facilities available to the University’s physical therapy students for such purposes;

Now, Therefore, in consideration of the mutual covenants contained herein, the parties agree as follows:

I. MUTUAL RESPONSIBILITIES

1. Establish in advance the number of students who will participate in the clinical education program and the length of the respective clinical experiences.

2. Appoint the appropriate representatives to be responsible for the clinical education program. The University shall appoint a clinical coordinator and the Facility shall appoint a clinical supervisor. These individuals shall be called Director of Clinical Education (DCE) and Center Coordinator of Clinical Education (CCCE), respectively. Each party will supply the other party with the name of this person along with the person’s professional and academic credentials for approval by the other party. Each party shall notify the other in writing of any change of the person appointed.

3. Each student assigned to the Facility is required to comply with the policies and procedures of the Facility, including but not limited to policies on confidentiality of patient information. The Facility reserves the right to refuse access to and/or remove from its clinical areas any student who does not meet the Facility’s standards or follow the Facility’s policies. No action will be taken by the Facility until the matter has been discussed with the DCE, unless the student’s behavior or presence poses an immediate or substantial threat to the effective delivery of health care services to patients of the Facility.

4. Each party will remain responsible for the acts of their respective employees and agents.

5. Each party promptly will notify the other party if one party becomes aware of a claim asserted by any person which arises out of, or appears to arise out of, this Agreement or any activity carried out under this Agreement.

6. University students and faculty are not the agents, representatives or employees of the Facility and will not represent themselves as such.

7. The parties will not unlawfully discriminate on the basis of race, color, religion, national origin, age, sex, height, weight, disability, marital status, past military service, or any other protected characteristic regarding the educational or clinical experience of the student.

8. The University agrees to indemnify and save harmless the Facility and its agents and employees from any liability or damages the Facility may suffer as a result of claims, costs, or judgments, including reasonable attorney’s fees, against it arising out of acts or omissions of the University in the operation of the clinical education program covered by this Agreement. The Facility agrees to indemnify and save harmless the University and its agents and employees from any liability or damages the University may
suffer as result of claims, costs, or judgments, including reasonable attorneys fees, against it arising out of acts or omissions of the Facility in the operation of the clinical education program covered by this Agreement.

9. The University may develop letter agreements, as necessary, with the Facility to formalize operational details of the clinical education program. These letter agreements, if any, shall be approved with the same formalities as this Agreement.

10. Each party shall carry professional liability or self-insurance with minimum limits of liability of $1 million/$3 million for suits and claims that may be asserted for any professional liability claim arising out of any service rendered pursuant to this Agreement. Each party shall, upon request, furnish the other party with evidence of such coverage.

11. Students will be responsible for all personal expenses including meals, lodging, and transportation unless voluntarily provided by the Facility.

12. Modification of any term or provision of this Agreement will not be effective unless in writing with the same degree of formality as this Agreement. The failure of either party to insist upon strict performance of any of the provisions of this Agreement shall not constitute a waiver of that provision and the Agreement shall remain in effect.

II. RESPONSIBILITIES OF THE FACILITY

In addition to other provisions in this Agreement, the Facility specifically agrees as follows:

1. To provide clinical education learning experiences which are planned, organized, and administered by qualified staff in accordance with mutually agreed upon educational objectives and guidelines.

2. The Facility shall at all times remain responsible for patients and patient care.

3. The Facility shall maintain administrative and professional supervision of University students sofar as their presence effects the operation of the Facility and the direct or indirect care of the Facility’s patients.

4. To prepare written objectives or guidelines for structuring the clinical education program. A copy of these objectives or guidelines will be available for review by the DCE.

5. To permit, upon reasonable request, the University or its accrediting agency to inspect the Facility and its services and records which pertain to the clinical education program.

6. To provide or otherwise arrange for emergency medical care for students at the student’s expense.

7. To provide reasonable classroom, conference, storage, dressing, and locker room space for students.

8. To evaluate the student(s) according to the guidelines provided by the University and to utilize the evaluation standards and forms furnished by the University.

9. To accept the University’s student clinical attitude guidelines and to inform the University of the Facility’s standards and policies regarding dress and appearance.

III. RESPONSIBILITIES OF THE UNIVERSITY

In addition to other provisions in this Agreement, the University specifically agrees as follows:

1. To assign to the Facility only those students who have satisfactorily completed the prerequisite portions of the curriculum.

2. To direct the students to comply with the rules and regulations of the Facility.

3. To provide assurance to the Facility that each student accepted for the clinical education program will have had a physical examination within the last year. This examination will include a Tuberculin test and immunizations for MMR, tetanus, and Hepatitis B. The Facility reserves the right to restrict the clinical activity of students who evidence symptoms of communicable infections.
4. To provide evidence of professional liability insurance coverage for all of its students, employees, and agents in the Facility in connection with the clinical education program of the University's students.

5. To assure and provide evidence that the student(s) possess health insurance either through the University or an individual policy.

6. To require students to hold current C.P.R. certification.

7. To direct the students to comply with the local and state department of health rules and regulations, regulations of the Health Facilities Accreditation Program, applicable requirements of the Health Insurance Accountability and Portability Act, and all regulatory agencies pertinent to services provided.

IV. TERM AND TERMINATION

This Agreement will be effective as of the date signed by both parties and will continue in effect until terminated by either party. Either party may terminate the Agreement upon ninety (90) days written notice to the other party. The notice required by this clause shall be sent by certified or registered mail.

If the termination date occurs while a student of the University has not completed his or her clinical learning experience at the Facility, the student shall be permitted to complete the scheduled clinical learning experience, and the University and the Facility shall cooperate to accomplish this goal.

IN WITNESS WHEREOF, the parties have executed this Agreement and warrant that they are officially authorized to so execute for their respective parties to this Agreement.

Clinical Internship Request Form (Slot Request)

2016 Clinical Internship Request Form

Please complete this form and return it by April 30th by email to cristinaw@andrews.edu or print and fax to (269) 471-2866. Also, please provide us with your updated CSIF at this time via e-mail or through CSIF web https://csifweb.amsapps.com. If you have any questions about any of these placements, please contact Bill Scott MSPT, DCE scottw@andrews.edu or Cristina Wilson at (269) 471-6551 or 1-800-827-2878

Name of Facility:  
Address:  City:  State:  Zip:
Email:  Phone:  Fax:

Please select the placement(s) that you will be able to accommodate and complete the corresponding information. If you select “Other” for the Type, please explain in the comments section. If you are unable to take students at this time, please check the none available box.

Please check one:  □ Reserved Slot (This slot will be reserved for Andrews University Physical Therapy Interns)  
□ First Come First Serve (This slot will be given to the first school to contact us for internship placement)

Department of Physical Therapy Requirements: Students will have a current Health Form and documentation of Hep B vaccination or waiver prior to each clinical experience. This will include a physical examination, appropriate vaccinations, and clearance from TB. (TB skin test or chest x-ray). The PT department will cover the cost of the physical and TB testing. Some sites will require additional health related testing (e.g. HIV or drug). Payment for further tests, immunizations, titer, x-rays, Hep B vaccinations or other medical treatments are the students’ responsibility.

| Instructor(s): | Bill Scott PT, MSPT  
Director of Clinical Education  
scottw@andrews.edu |
| Office Location: | Physical Therapy Building, Room 142 |
| Telephone No.: | (269) 471-6034 Office |
| Description of Teaching Methods and Learning Experiences: | Clinical Education Orientation Sessions  
Individual Pre and Post Clinical Conferences  
Clinical Practicum  
Hands-on learning experiences under the supervision of a clinical instructor.  
MOODLE web based interactive discussions.  
Independent Study  
Reflection. |
| Professional Expectations: | In keeping with the "Professional Expectations" guidelines in your DPT Student Handbook and the professional behavior that all members of a health care team uphold, each student enrolled in this course is expected to act in a respectful and professional manner. This includes, but is not limited to, being punctual and prepared for every class or clinical session; respecting one’s colleagues and the instructor during discussions; working independently of others when asked to do so; working in a positive and productive manner with others on group projects; respecting oneself by presenting one’s own ideas and opinions in a positive and thoughtful manner that demands the attention and respect of others; being committed to a positive learning experience. |
| Academic Integrity: | Students are expected to exhibit academic honesty in keeping with the policy outlined in the University Bulletin. In addition, the student is expected to comply with ethical and scientific standards, as recognized by the AMA and the US Office of Human Subjects Protection and the US Office of Research Integrity. The consequences of academic dishonesty will be determined by the DCE and Clinical Instructor, and may be brought to |
the PT Faculty Council, with consequences ranging from failure for that assignment to dismissal from the program. A record of the infraction will be placed in the student’s PT file.

Course Procedures: See Student Clinical Education Handbook for guidelines, including the attendance policy.

1. 4 weeks full-time clinical experience.
2. By midterm the student will submit to the DCE, via Learninghub dropbox, a reflection on the clinical experience. Reflections will be approximately 1/2 -1 page and may be in SOAP format. The DCE will acknowledge receipt of the reflection via feedback in MOODLE.
3. Completion of APTA Core Values Self-Assessment document.
4. See Student Clinical Education Handbook for comprehensive guidelines concerning Health Form, insurance, CPR, attire, attendance, etc.
5. Students are responsible for any additional "special requirements" such as criminal background checks. See "Special Requirements List" posted on the Clinical Education Bulletin Board.

Grading Policy: Grading Rubric: Satisfactory/Unsatisfactory

Methods of Student Evaluation: Students are formally evaluated by the Clinical Instructor (CI) a minimum of one time, during the midterm and final points of the clinical experience. Satisfactory Completion of PTH 680 requires:

1. Completion of all pre-practicum clinical education requirements including, but not limited to, Student Information Form, required medical testing and Student Experience and Goal Sheet. Student Experience and Goal Sheet is to be emailed, mailed or faxed by the student to the facility at least two (2) weeks prior to commencing the practicum.

2. Completion of a self-evaluation using the Clinical Performance Instrument (CPI) at midterm and final.

3. The CPI is used by the Clinical Instructor (CI) to assess student performance, and also by the student for self-assessment. All Criteria (1-18) are to be addressed on this practicum. Satisfactory performance is demonstrated by receiving a score of at least Advanced Beginner on all 5 RED FLAG criteria (1-4,7) and at least Advanced Beginner on a minimum of 25% of the remaining criteria by the final evaluation.

4. Completion of Self-Assessment on Professional Behaviors: satisfactory performance on all of the Professional Behaviors as demonstrated by a rating of at least "Beginning Level" on all Professional Behaviors as verified by CI both at midterm and final.

5. Completion and submission of a midterm reflection via MOODLE.

6. Completion of Physical Therapist Student Assessment: Part B and Section 2.

7. Completion of assignments required by the facility.

8. Follow all policies and procedures for the clinical practicum as outlined in the Entry Level DPT Student Clinical Education Handbook including but not limited to, performing safely, responsibly, professionally, legally, and ethically.

9. Return of all records, completed and signed, within one week of the conclusion of the clinical experience. All documents should be reviewed by the CI and signed where indicated prior to the end date of the clinical.

10. Attendance at an individual Post Clinical Conference.

Grades are satisfactory (S) or unsatisfactory (U), and are assigned by the DCE after
reviewing the completed requirements and recommendations of the clinical instructor.

Course Objectives:  

Part I  
A. The Pre-Practicum clinical education sessions will:
1. Provide the intern with the Student Clinical Education Handbook including instruction in the policies and procedures necessary for successful completion of the Practicum.
2. Provide instruction in the use of the APTA Clinical Performance Instrument (CPI), the Professional Behaviors Assessment Tool, and the PT Student Evaluation Form for immediate personal use and in future use as a clinical instructor.
3. Develop an awareness of clinical instructional skills including effective communication with patients, patient's family/caregiver, clinical instructor and support staff.

B. The Post-Practicum individual conference session will:
1. Provide a forum for the intern to verbally reflect, with the DCE, on the Practicum experience and discuss future expectations for the clinical education Internships.

Part II  
A. The following objectives 1-18 are taken from the CPI and are broadly written to cover a variety of clinical settings. Upon completion of PTH680 Clinical Practicum the student will consistently demonstrate beginning to advanced beginner skills in the following performance criteria with supervision. Supervision is defined as needing intermittent verbal cueing or physical assistance from the clinical instructor; the presence of the instructor in the immediate vicinity is necessary (New England Consortium).
1. Practice in a safe manner that minimizes risk to patient, self, and others.
2. Demonstrate professional behavior in all situations.
3. Practice in a manner consistent with established legal and professional standards and ethical guidelines.
4. Communicate in ways that are congruent with situational needs.
5. Adapt delivery of physical therapy services with consideration for patients' differences, values, preferences and needs.
7. Apply the current knowledge, theory, clinical judgment, and the patient's values and perspective in patient management.
8. Determine with each patient encounter the patient's need for further examination or consultation by a physical therapist or referral to another health care professional.
9. Perform a physical therapy patient examination using evidenced-based tests and measures.
10. Evaluate data from the patient examination (history, systems review, and tests and measures) to make clinical judgments.
11. Determine a diagnosis and prognosis that guides future patient management.
12. Establish a physical therapy plan of care that is safe, effective, patient-centered, and evidence-based.
13. Perform physical therapy interventions in a competent manner.
14. Educate others (patients, caregivers, staff, students, other health care providers, business and industry representatives, school systems) using relevant and effective teaching methods.
15. Produce quality documentation in a timely manner to support the delivery of physical therapy services.
16. Collect and analyze data from selected outcome measures in a manner that supports accurate analysis of individual patient and group outcomes.
17. Participates in the financial management (budgeting, billing and reimbursement, time space, equipment, marketing, public relations) of the physical therapy service consistent with regulatory, legal and facility guidelines.

18. Directs and supervises personnel to meet patient's goals and expected outcomes according to legal standards and ethical guidelines.

B. The following objectives reflect the goal of professional growth through reflection and feedback. Upon completion of PTH680 Clinical Practicum the student will:
1. Evaluate personal core values using the APTA Professionalism in Physical Therapy: Core Values Self-Assessment Document
2. Discuss via MOODLE the APTA Online- Professionalism Module 1 – Introduction to Professionalism
3. Evaluate personal clinical performance using the CPI.
4. Evaluate personal professional behaviors using the Professional Behaviors Assessment Tool.
5. Evaluate clinical education experience using the PT Student Evaluation Form.
6. Demonstrate 'Beginning Level Behavioral Criteria' on the Professional Behaviors Assessment Tool as verified by the Clinical Instructor, by completion of the clinical education experience.

Outline of Content:
Pre-Internship Clinical Education Sessions including individual Pre Clinical Conferences. Supervised clinical experiences with a variety of patients. Individual experiences will vary according to the clinical facility assigned. Individual Post Clinical Conferences.

Accommodations:
Any student with a documented disability who needs reasonable accommodations in order to meet the requirements of this course must see the course instructor, DCE, prior to assignment to the clinical site. Requests for accommodation during the course will require documentation that the basis for the accommodation is of recent origin.

Emergency Protocols:
Andrews University takes the safety of its student seriously. Signs identifying emergency protocol are posted throughout buildings. Instructors will provide guidance and direction to students in the classroom in the event of an emergency affecting that specific location. It is important that you follow these instructions and stay with your instructor during any evacuation or sheltering emergency. While off campus students are to follow emergency protocols established by the clinical site.
PTH881 Internship I Course Syllabus

ANDREWS UNIVERSITY
DEPARTMENT OF PHYSICAL THERAPY

COURSE SYLLABUS

Course Number and Title: PTH881 Clinical Internship I

Course Description: Advanced full-time clinical experience, Internship I (eight weeks) in a variety of professional practice settings. Each student is required to complete an Internship in an outpatient orthopedic, inpatient, and a neurology setting. Thirty-six to forty hours/week. May be repeated.

Course Prerequisites: Satisfactory completion of previous coursework in the DPT program. Physical Therapy Faculty recommendation. Attendance to and completion of orientation exercises for all pre-internship clinical education sessions conducted during earlier and current semesters is required for participation in the Clinical Internship. Successful completion, at least 95% of the clinical education exam (see handbook 6.13)

Semester and Year: Fall 2015

Department Offering Course: Physical Therapy

Credit Hours: PTH881 = 4 Credits

Course Clock Hours Per Semester (lecture / lab hours): 36-40 hours per week as agreed upon by the DCE and clinical faculty. Monday to Friday for 8 weeks

Instructor(s): Bill Scott PT, MSPT
Director of Clinical Education
scotttw@andrews.edu

Office Location: Physical Therapy Building, Room 142

Telephone No.: (269) 471-6034 Office
(231) 342-0401 Cell

Description of Teaching Methods and Learning Experiences:
Clinical Education Orientation Sessions
Individual Pre and Post Clinical Conferences
Hands-on learning experiences under the supervision of a clinical instructor.
Learning Hub web based interactive discussions.
Independent Study.
Reflection.

Professional Expectations: In keeping with the “Professional Expectations” guidelines in your DPT Student Handbook and the professional behavior that all members of a health care team uphold, each student enrolled in this course is expected to act in a respectful and professional manner. This includes, but is not limited to, being punctual and prepared for every class or clinical session; respecting one’s colleagues and the instructor during discussions; working independently of others when asked to do so; working in a positive and productive manner with others on group projects; respecting oneself by presenting one’s own ideas and opinions in a positive and thoughtful manner that demands the attention and respect of others; being committed to a positive learning experience.

Academic Integrity: The academic community at Andrews University strives to foster an atmosphere in which honesty is the expected norm on campus. Toward that end, the university has established a modified honor code that shares responsibility among students, faculty, and administrators. While the intent of the code is redemptive, violations are taken seriously. Violations of the honor code in any department on campus are reported and records of...
the type and number of offenses are maintained. Persons involved in a violation of a serious nature, in more than one violation, or who dispute a charge or sanction will appear before an Integrity Panel with the mandate to resolve the issue. The University Bulletin outlines the specifics of honor code policy and all students are urged to read that policy section carefully. http://www.andrews.edu/academics/academic_integrity.html

Students are expected to exhibit academic honesty in keeping with the policy outlined in the University Bulletin. In addition, the student is expected to comply with ethical and scientific standards, as recognized by the AMA and the US Office of Human Subjects Protection and the US Office of Research Integrity. The consequences of academic dishonesty will be determined by the DCE and Clinical Instructor, and may be brought to the PT Faculty Council, with consequences ranging from failure for that assignment to dismissal from the program. A record of the infraction will be placed in the student’s PT file.

Course Procedures: See Student Clinical Education Handbook for guidelines, including attendance policy.

Additional Course Requirements (if any):

1. 8 weeks full-time clinical experience.
2. Midterm reflection to be submitted by the student only if they receive less than Advanced Beginner on the midterm CPI, on any category, as scored by the CI. Reflections will be approximately 1 page and must be in SOAP format including goals which address areas in which the student was scored less than Advanced Beginner. This must be submitted via Learning Hub Midterm dropbox within 1 week of completion of midterm CPI. The DCE will acknowledge receipt of the reflection.
3. See Student Clinical Education Handbook for comprehensive guidelines concerning Health Form, insurance, CPR, attire, attendance, etc.
4. Students are responsible for any additional “special requirements” such as criminal background checks. See “Special Requirements List” posted on the Clinical Education Bulletin Board.

Grading Policy:

Grading Rubric: Satisfactory/Unsatisfactory

Methods of Student Evaluation: Students are formally evaluated by the Clinical Instructor (CI) a minimum of two times, during the midterm and final points of the clinical experience. Satisfactory Completion of PTH 881 requires:

1. Completion of all pre-internship clinical education requirements including, but not limited to, Student Information Form, required medical testing and Student Experience and Goal Sheet. Student Experience and Goal Sheet is to be emailed, mailed or faxed by the student to the facility at least two (2) weeks prior to commencing the practicum.

2. Completion of a self evaluation using the Clinical Performance Instrument (CPI) at midterm and final.

3. The CPI is used by the Clinical Instructor (CI) to assess student performance, and also by the student for self assessment. All Criteria (1-18) are to be addressed on this Internship. Satisfactory performance is demonstrated by receiving a score of at least Intermediate on all 5 RED FLAG criteria (1-4,7) and at least Intermediate on a minimum of 50% of the remaining criteria by the final evaluation. The remaining 50% must be at least Advanced Beginner.

4. Completion of Self-Assessment on Professional Behaviors; satisfactory performance on all of the Professional Behaviors as demonstrated by a rating of at least “Beginning Level Behavioral Criteria” on the table and Beginning Level on the VAS final assessment on all Professional Behaviors as verified by CI.

5. Completion and submission of a midterm reflection, as required (see additional course requirements #2), via Learning Hub.
6. Completion of Physical Therapist Student Assessment Part B and Section 2.

7. Completion of assignments required by the facility.

8. Follow all policies and procedures for the clinical practicum as outlined in the Entry Level DPT Student Clinical Education Handbook including but not limited to, performing safely, responsibly and professionally, legally, and ethically.

9. Return of all records, completed and signed, within one week of the conclusion of the clinical experience. All documents should be reviewed by the CI and signed where indicated prior to the end date of the clinical.

10. Attendance at an individual Post Clinical Conference

Grades are satisfactory (S) or unsatisfactory (U), and are assigned by the DCE after reviewing the completed requirements and recommendations of the clinical instructor.

Required Textbook & Recommended Readings:

- Student Clinical Education Syllabus
- Other readings as determined by the clinical faculty.

Course Objectives:

Part I

A. The Pre-Internship clinical education sessions will:
   1. Provide the intern with a review of the Student Clinical Education Handbook including instruction in the policies and procedures necessary for successful completion of the Internship.
   2. Provide review of instruction in the use of the APTA Clinical Performance Instrument (CPI), the Professional Behaviors Assessment Tool, and the PT Student Evaluation Form for immediate personal use and in future use as a clinical instructor.
   3. Provide the intern with review of available internship sites and instructions on the process of choosing clinical internship sites for Internship I-V.
   4. Provide the intern with instruction on maximizing the clinical experience.

B. The Post-Internship individual conference session will:
   1. Provide a forum for the intern to verbally reflect, with the DCE, on the Internship experience and discuss future expectations for the clinical education Internships.

Part II

A. The following objectives 1-18 are taken from the CPI and are broadly written to cover a variety of clinical settings. Upon completion of PTH881 Clinical Internship I, the student will consistently demonstrate satisfactory performance according to above Grading Policy #3. Intermediate performance is defined as: A student who requires clinical supervision less than 50% of the time managing patients with simple conditions and 75% of the time managing patients with complex conditions. The student is proficient in simple tasks and is developing the ability to consistently perform skilled examinations, interventions and clinical reasoning. The student is capable of maintaining 50% of a full-time physical therapist’s caseload. The degree of supervision and guidance required may vary with the complexity of the patient, environment or type of clinical setting; even in the student’s final internship.

   1. Practice in a safe manner that minimizes risk to patient, self, and others. (SLO 1.2.6.8)
   2. Demonstrate professional behavior in all situations. (SLO 1.2.3.4.8)
   3. Practice in a manner consistent with established legal and professional standards and ethical guidelines. (SLO 1.8.9)
   4. Communicate in ways that are congruent with situational needs. (SLO 4)
   5. Adapt delivery of physical therapy services with consideration for patients’ differences, values, preferences and needs. (SLO 9)
   6. Participate in self-assessment to improve clinical and professional performance. (SLO 3.6)
7. Apply the current knowledge, theory, clinical judgment, and the patient's values and perspective in patient management. (SLO 1, 5, 10)
8. Determine if each patient encounter the patient's need for further examination or consultation by a physical therapist or referral to another health care professional. (SLO 6)
9. Perform a physical therapy patient examination using evidenced-based tests and measures. (SLO 1, 4, 5)
10. Evaluate data from the patient examination (history, systems review, and tests and measures) to make clinical judgments. (SLO 1, 3, 6)
11. Determine a diagnosis and prognosis that guides future patient management. (SLO 5)
12. Establish a physical therapy plan of care that is safe, effective, patient-centered, and evidence-based. (SLO 3, 5)
13. Perform physical therapy interventions in a competent manner. (SLO 1, 2, 5, 8)
14. Educate others (patients, caregivers, staff, students, other health care providers, business and industry representatives, school systems) using relevant and effective teaching methods. (SLO 7)
15. Produce quality documentation in a timely manner to support the delivery of physical therapy services. (SLO 4, 8)
16. Collect and analyze data from selected outcome measures in a manner that supports accurate analysis of individual patient and group outcomes. (SLO 3)
17. Participates in the financial management (budgeting, billing and reimbursement, time space, equipment, marketing, public relations) of the physical therapy service consistent with regulatory, legal and facility guidelines. (SLO 3, 7, 8)
18. Directs and supervises personnel to meet patient's goals and expected outcomes according to legal standards and ethical guidelines. (SLO 7, 8)

B. The following objectives reflect the goal of professional growth through reflection and feedback and the preparation of interns to serve as future Clinical Instructors. Upon completion of PTH881 Clinical Internship I the student will:
1. Evaluate personal clinical performance using the CPI.
2. Evaluate personal professional behaviors using the Professional Behaviors Assessment Tool.
3. Evaluate clinical education experience using the PT Student Evaluation Form.
4. Demonstrate “Developing Level Behavioral Criteria” on the Professional Behaviors Assessment Tool as verified by the Clinical Instructor, by completion of the clinical education experience.

Accommodations: Any student with a documented disability who needs reasonable accommodations in order to meet the requirements of this course must see the course instructor, DCE, prior to assignment to the clinical site. Requests for accommodation during the course will require documentation that the basis for the accommodation is of recent origin.

Outline of Content: Pre-Internship Clinical Education Sessions including individual Pre Clinical Conferences. Supervised clinical experiences with a variety of patients. Individual experiences will vary according to the clinical facility assigned. Individual Post Clinical Conferences.
PTH882 Internship II Course Syllabus

THE ANDREW UNIVERSITY
DEPARTMENT OF PHYSICAL THERAPY

COURSE SYLLABUS

Course Number and Title: PTH882 Clinical Internship II

3. See Student Clinical Education Handbook for comprehensive guidelines concerning Health Form, insurance, CPR, attire, attendance, etc.
4. Students are responsible for any additional "special requirements" such as criminal background checks. See “Special Requirements List” posted on the Clinical Education Bulletin Board.

Grading Policy:

Grading Rubric: Satisfactory/Unsatisfactory

Methods of Student Evaluation: Students are formally evaluated by the Clinical Instructor (CI) a minimum of two times; during the midterm and final points of the clinical experience. Satisfactory Completion of PTH 582 requires:

1. Completion of all pre-internship clinical education requirements including, but not limited to, Student Information Form, required medical testing and Student Experience and Goal Sheet. Student Experience and Goal Sheet is to be emailed, mailed or faxed by the student to the facility at least two (2) weeks prior to commencing the practicum.

2. Completion of a self evaluation using the Clinical Performance Instrument (CPI) at midterm and final.

3. The CPI is used by the Clinical Instructor (CI) to assess student performance, and also by the student for self assessment. All Criteria (1-18) are to be addressed on this Internship. Satisfactory performance is demonstrated by receiving a score of at least Intermediate on all 5 RED FLAG criteria (1-4, 7) and at least Intermediate on all remaining criteria by the final evaluation.

4. Completion of Self-Assessment on Professional Behaviors; satisfactory performance on all of the Professional Behaviors as demonstrated by a rating of at least "Beginning Level Behavioral Criteria" on the table and Beginning Level on the VAS final assessment on all Professional Behaviors as verified by CI.

5. Completion and submission of a midterm reflection, as required (see additional course requirements #2), via MOODLE.

6. Completion of Physical Therapist Student Assessment; Part B and Section 2.

7. Completion of assignments required by the facility.

8. Follow all policies and procedures for the clinical practicum as outlined in the Entry Level DPT Student Clinical Education Handbook including but not limited to, performing safely, responsibly, professionally, legally, and ethically.

9. Return of all records, completed and signed, within one week of the conclusion of the clinical experience. All documents should be reviewed by the CI and signed where indicated prior to the end date of the clinical.

10. Attendance at an individual Post Clinical Conference
Grades are satisfactory (S) or unsatisfactory (U), and are assigned by the DCE after reviewing the completed requirements and recommendations of the clinical instructor.

Course Objectives:

Part I
A. The Pre-Internship clinical education sessions will:
   1. Provide the intern with a review of the Student Clinical Education Handbook including instruction in the policies and procedures necessary for successful completion of the Internship.
   2. Provide review of instruction in the use of the APTA Clinical Performance Instrument (CPI), the Professional Behaviors Assessment Tool, and the PT Student Evaluation Form for immediate personal use and in future use as a clinical instructor.
   3. Provide the intern with instruction on maximizing the clinical experience.

B. The Post-Internship individual conference session will:
   1. Provide a forum for the intern to verbally reflect, with the DCE, on the Internship experience and discuss future expectations for the clinical education Internships.

Part II
A. The following objectives 1-18 are taken from the CPI and are broadly written to cover a variety of clinical settings. Upon completion of PTH882 Clinical Internship I the student will consistently demonstrate satisfactory performance according to above Grading Policy #3. Intermediate performance is defined as: A student who requires clinical supervision less than 50% of the time managing patients with simple conditions and 75% of the time managing patients with complex conditions. The student is proficient in simple tasks and is developing the ability to consistently perform skilled examinations, interventions and clinical reasoning. The student is capable of maintaining 50% of a full-time physical therapist’s caseload. The degree of supervision and guidance required may vary with the complexity of the patient, environment or type of clinical setting; even in the student’s final internship.

1. Practice in a safe manner that minimizes risk to patient, self, and others. (SLO 1,2,6,8)
2. Demonstrate professional behavior in all situations. (SLO 1,2,3,4,8)
3. Practice in a manner consistent with established legal and professional standards and ethical guidelines. (SLO 1,8,9)
4. Communicate in ways that are congruent with situational needs. (SLO 4)
5. Adapt delivery of physical therapy services with consideration for patients’ differences, values, preferences and needs. (SLO 9)
6. Participate in self-assessment to improve clinical and professional performance. (SLO 3,6)
7. Apply the current knowledge, theory, clinical judgment, and the patient’s values and perspective in patient management. (SLO 1,5,10)
8. Determine with each patient encounter the patient's need for further examination or consultation by a physical therapist or referral to another health care professional. (SLO 6)
9. Perform a physical therapy patient examination using evidenced-based tests and measures. (SLO 1,4,5)
10. Evaluate data from the patient examination (history, systems review, and tests and measures) to make clinical judgments. (SLO 1,3,5,6)
11. Determine a diagnosis and prognosis that guides future patient management. (SLO 5)
12. Establish a physical therapy plan of care that is safe, effective, patient-centered, and evidence-based. (SLO 3,5)
13. Perform physical therapy interventions in a competent manner. (SLO 1,2,5,8)
14. Educate others (patients, caregivers, staff, students, other health care providers, businesses and industry representatives, school systems) using relevant and effective teaching methods. (SLO 7)
15. Produce quality documentation in a timely manner to support the delivery of physical therapy services. (SLO 4,8)
16. Collect and analyze data from selected outcome measures in a manner that supports accurate analysis of individual patient and group outcomes. (SLO 3)
17. Participates in the financial management (budgeting, billing and reimbursement, time space, equipment, marketing, public relations) of the physical therapy service consistent with regulatory, legal and facility guidelines. (SLO 3,7,8)
18. Directs and supervises personnel to meet patient's goals and expected outcomes according to legal standards and ethical guidelines. (SLO 7,8)

B. The following objectives reflect the goal of professional growth through reflection and feedback and the preparation of interns to serve as future Clinical Instructors. Upon completion of PTH882 Clinical Internship II the student will:
1. Evaluate personal clinical performance using the CPI.
2. Evaluate personal professional behaviors using the Professional Behaviors Assessment Tool.
3. Evaluate clinical education experience using the PT Student Evaluation Form.
4. Demonstrate "Developing Level Behavioral Criteria" with progression toward "Entry Level" on the Professional Behaviors Assessment Tool as verified by the Clinical Instructor, by completion of the clinical education experience.

Accommodations: Any student with a documented disability who needs reasonable accommodations in order to meet the requirements of this course must see the course instructor, ACCE, prior to assignment to the clinical site. Requests for accommodation during the course will require documentation that the basis for the accommodation is of recent origin.

Outline of Content: Pre-Internship Clinical Education Sessions including individual Pre Clinical Conferences. Supervised clinical experiences with a variety of patients. Individual experiences will vary according to the clinical facility assigned. Individual Post Clinical Conferences.
PTH883 Internship III Course Syllabus

ANDREWS UNIVERSITY
DEPARTMENT OF PHYSICAL THERAPY

COURSE SYLLABUS

Course Number and Title: PTH883 Clinical Internship III

Course Description: Advanced full-time clinical experience, Internship III (nine weeks) in a variety of professional practice settings. Each student is required to complete an Internship in an outpatient orthopedic, inpatient, and a neurology setting. Thirty-six to forty hours/week. May be repeated.

Course Prerequisites: Satisfactory completion of previous coursework in the DPT program. Physical Therapy Faculty recommendation. Attendance to and completion of orientation exercises for all pre-internship clinical education sessions conducted during earlier and current semesters is required for participation in the Clinical Internship.

Semester and Year: Spring 2016

Department Offering Course: Physical Therapy

Credit Hours: PTH883 = 5 Credits

Course Clock Hours Per Semester (lecture/ lab hours): 36-40 hours per week as agreed upon by the ACCE and clinical faculty. Monday to Friday for 9 weeks

Instructor(s): Bill Scott PT, MSPT
Director of Clinical Education
scottw@andrews.edu

Office Location: Physical Therapy Building, Room 142

Description of Teaching Methods and Learning Experiences:
Clinical Education Orientation Sessions.
Individual Pre and Post Clinical Conferences.
Hands-on learning experiences under the supervision of a clinical instructor.
LEARNING HUB web based interactive discussions.
Independent Study. Reflection.

Professional Expectations: In keeping with the "Professional Expectations" guidelines in your DPT Student Handbook and the professional behavior that all members of a health care team uphold, each student enrolled in this course is expected to act in a respectful and professional manner. This includes, but is not limited to, being punctual and prepared for every class or clinical session; respecting one’s colleagues and the instructor during discussions; working independently of others when asked to do so; working in a positive and productive manner with others on group projects, respecting oneself by presenting one’s own ideas and opinions in a positive and thoughtful manner that demands the attention and respect of others; being committed to a positive learning experience.

Academic Integrity: The academic community at Andrews University strives to foster an atmosphere in which honesty is the expected norm on campus. Toward that end, the university has established a modified honor code that shares responsibility among students, faculty, and administrators. While the intent of the code is redemptive, violations are taken seriously. Violations of the honor code in any department on campus are reported and records of the type and number of offenses are maintained. Persons involved in a violation of a serious nature, in more than one violation, or who dispute a charge or sanction will appear before an Integrity Panel with the mandate to resolve the issue. The
University Bulletin outlines the specifics of honor code policy and all students are urged to read that policy section carefully.

http://www.andrews.edu/academics/academic_integrity.html

Students are expected to exhibit academic honesty in keeping with the policy outlined in the University Bulletin. In addition, the student is expected to comply with ethical and scientific standards, as recognized by the AMA and the US Office of Human Subjects Protection and the US Office of Research Integrity. The consequences of academic dishonesty will be determined by the ACCE and Clinical Instructor, and may be brought to the PT Faculty Council, with consequences ranging from failure for that assignment to dismissal from the program. A record of the infraction will be placed in the student’s PT file.

Course Procedures: See Student Clinical Education Handbook for guidelines, including the attendance policy.

Additional Course Requirements (if any):

1. 9 weeks full-time clinical experience.

2. Midterm reflection- to be submitted by the student only if they receive less than Intermediate on the mid-term CPI, on any category, as scored by the CI. Reflections will be approximately 1 page and must be in SOAP format including goals which address areas in which the student was scored less than Intermediate. This must be submitted via LEARNING HUB Midterm dropbox within 1 week of completion of mid-term CPI. The ACCE will acknowledge receipt of the reflection.

3. See Student Clinical Education Handbook for comprehensive guidelines concerning Health Form, insurance, CPR, attire, attendance, etc.

4. Students are responsible for any additional “special requirements” such as criminal background checks. See “Special Requirements List” posted on the Clinical Education Bulletin Board.

Grading Policy:

Grading Rubric: Satisfactory/Unsatisfactory

Methods of Student Evaluation: Students are formally evaluated by the Clinical Instructor (CI) a minimum of two times; during the midterm and final points of the clinical experience. Satisfactory Completion of PTH 883 requires:

1. Completion of all pre-internship clinical education requirements including, but not limited to, Student Information Form, required medical testing and Student Experience and Goal Sheet. Student Experience and Goal Sheet is to be emailed, mailed or faxed by the student to the facility at least two (2) weeks prior to commencing the practicum.

2. Completion of a self-evaluation using the Clinical Performance Instrument (CPI) at midterm and final.

3. The CPI is used by the Clinical Instructor (CI) to assess student performance, and also by the student for self-assessment. All Criteria (1-18) are to be addressed on this Internship. Satisfactory performance is demonstrated by receiving a score of at least Advanced Intermediate on all 5 RED FLAG criteria (1-4.7) and at least Advanced Intermediate on a minimum of 75% of the remaining criteria by the final evaluation. The remaining 25% must be at least Intermediate.

4. Completion of Self-Assessment on Professional Behaviors: satisfactory performance on all of the Professional Behaviors as demonstrated by a rating of at least “Entry Level Behavioral Criteria” on the table and Entry Level on the VAS final assessment on all Professional Behaviors as verified by CI.

5. Completion and submission of a midterm reflection, as required (see additional course requirements #2), via LEARNING HUB.

6. Completion of Physical Therapist Student Assessment Part B and Section 2.

7. Completion of assignments required by the facility.
8. Follow all policies and procedures for the clinical practicum as outlined in the *Entry Level DPT Student Clinical Education Handbook* including but not limited to, performing safely, responsibly, professionally, legally, and ethically.

9. Return of all records, completed and signed, within one week of the conclusion of the clinical experience. All documents should be reviewed by the CI and signed where indicated prior to the end date of the clinical.

10. Attendance at an individual Post Clinical Conference

Grades are satisfactory (S) or unsatisfactory (U), and are assigned by the ACCE after reviewing the completed requirements and recommendations of the clinical instructor.

**Required Textbook & Recommended Readings:**

*Student Clinical Education Syllabus*

Other readings as determined by the clinical faculty.

**Course Objectives:**

**Part I**

A. The Pre-Internship clinical education sessions will:

1. Provide the intern with a review of the *Student Clinical Education Handbook* including instruction in the policies and procedures necessary for successful completion of the Internship.

2. Provide review of instruction in the use of the APTA Clinical Performance Instrument (CPI), the Generic Abilities Assessment Tool, and the PT Student Evaluation Form for immediate personal use and in future use as a clinical instructor.

B. The Post-Internship individual conference session will:

1. Provide a forum for the intern to verbally reflect, with the ACCE, on the Internship experience and discuss future expectations for the clinical education Internships.

**Part II**

A. The following objectives 1-18 are taken from the CPI and are broadly written to cover a variety of clinical settings. Upon completion of PTH883 Clinical Internship III the student will consistently demonstrate satisfactory performance according to above Grading Policy #3. **Advanced Intermediate** performance is defined as: A student who requires clinical supervision less than 25% of the time managing new patients or patients with complex conditions and is independent managing patients with simple conditions. The student is consistently proficient and skilled in simple tasks and requires only occasional cueing for skilled examinations, interventions and clinical reasoning. The student is capable of maintaining 75% of a full-time physical therapist’s caseload. The degree of supervision and guidance required may vary with the complexity of the patient, environment or type of clinical setting; even in the student’s final internship.

1. Practice in a safe manner that minimizes risk to patient, self, and others. (SLO 1,2,6,8)

2. Demonstrate professional behavior in all situations. (SLO 1,2,3,4,8)

3. Practice in a manner consistent with established legal and professional standards and ethical guidelines. (SLO 1,8,9)

4. Communicate in ways that are congruent with situational needs. (SLO 4)

5. Adapt delivery of physical therapy services with consideration for patients’ differences, values, preferences and needs. (SLO 9)

6. Participate in self-assessment to improve clinical and professional performance. (SLO 3,6)

7. Apply the current knowledge, theory, clinical judgment, and the patient’s values and perspective in patient management. (SLO 1,5,10)

8. Determine with each patient encounter the patient’s need for further examination or consultation by a physical therapist or referral to another health care...
professional. (SLO 6)
9. Perform a physical therapy patient examination using evidenced-based tests and measures. (SLO 1,4,5)
10. Evaluate data from the patient examination (history, systems review, and tests and measures) to make clinical judgments. (SLO 1,3,5,6)
11. Determine a diagnosis and prognosis that guides future patient management. (SLO 6)
12. Establish a physical therapy plan of care that is safe, effective, patient-centered, and evidence-based. (SLO 3,5)
13. Perform physical therapy interventions in a competent manner. (SLO 1,2,5,8)
14. Educate others (patients, caregivers, staff, students, other health care providers, business and industry representatives, school systems) using relevant and effective teaching methods. (SLO 7)
15. Produce quality documentation in a timely manner to support the delivery of physical therapy services. (SLO 4,8)
16. Collect and analyze data from selected outcome measures in a manner that supports accurate analysis of individual patient and group outcomes. (SLO 3)
17. Participates in the financial management (budgeting, billing and reimbursement, time space, equipment, marketing, public relations) of the physical therapy service consistent with regulatory, legal and facility guidelines. (SLO 3,7,8)
18. Directs and supervises personnel to meet patient’s goals and expected outcomes according to legal standards and ethical guidelines. (SLO 7,8)

B. The following objectives reflect the goal of professional growth through reflection and feedback and the preparation of interns to serve as future Clinical Instructors. Upon completion of PTH683 Clinical Internship III the student will:
1. Evaluate personal clinical performance using the CPI.
2. Evaluate personal professional behaviors using the Generic Abilities Assessment Tool.
3. Evaluate clinical education experience using the PT Student Evaluation Form.
4. Demonstrate “Developing Level Behavioral Criteria” with significant progression toward “Entry Level” on the table and at least 90% of Entry Level on the VAS on all generic abilities as verified by CI by completion of the clinical education experience.

Accommodations: Any student with a documented disability who needs reasonable accommodations in order to meet the requirements of this course must see the course instructor, ACCE, prior to assignment to the clinical site. Requests for accommodation during the course will require documentation that the basis for the accommodation is of recent origin.

Outline of Content: Pre-Internship Clinical Education Sessions including individual Pre Clinical Conferences. Supervised clinical experiences with a variety of patients. Individual experiences will vary according to the clinical facility assigned.
Individual Post Clinical Conferences.
PTH884 Internship IV Course Syllabus
ANDREWS UNIVERSITY
DEPARTMENT OF PHYSICAL THERAPY

COURSE SYLLABUS

Course Number and Title: PTH884 Clinical Internship IV

Course Description: Advanced full-time clinical experience, Internship IV (ten weeks) in a variety of professional practice settings. Each student is required to complete an Internship in an outpatient orthopedic, inpatient, and a neurology setting. Thirty-six to forty hours/week. May be repeated.

Course Prerequisites: Satisfactory completion of previous coursework in the DPT program. Physical Therapy Faculty recommendation. Attendance to and completion of orientation exercises for all pre-internship clinical education sessions conducted during earlier and current semesters is required for participation in the Clinical Internship.

Semester and Year: Summer 2016

Department Offering Course: Physical Therapy

Credit Hours: PTH884 = 5 Credits

Course Clock Hours Per Semester (lecture/lab hours): 36-40 hours per week as agreed upon by the DCE and clinical faculty. Monday to Friday for 10 weeks

Instructor(s): Bill Scott PT, MSPT
Director of Clinical Education
scottw@andrews.edu

Office Location: Physical Therapy Building, Room 142

Telephone No.: Office(269) 471-6034 Cell (231) 342-0401

Professional Expectations: In keeping with the “Professional Expectations” guidelines in your DPT Student Handbook and the professional behavior that all members of a health care team uphold, each student enrolled in this course is expected to act in a respectful and professional manner. This includes, but is not limited to, being punctual and prepared for every class or clinical session; respecting one’s colleagues and the instructor during discussions; working independently of others when asked to do so; working in a positive and productive manner with others on group projects; respecting oneself by presenting one’s own ideas and opinions in a positive and thoughtful manner that demands the attention and respect of others; being committed to a positive learning experience.

Academic Integrity: Students are expected to exhibit academic honesty in keeping with the policy outlined in the University Bulletin. In addition, the student is expected to comply with ethical and scientific standards, as recognized by the AMA and the US Office of Human Subjects Protection and the US Office of Research Integrity. The consequences of academic dishonesty will be determined by the DCE/DCE and Clinical Instructor, and may be brought to the PT Faculty Council, with consequences ranging from failure for that assignment to dismissal from the program. A record of the infraction will be placed in the student’s PT file.
Course Procedures: See Student Clinical Education Handbook for guidelines, including attendance policy.

Additional Course Requirements (if any):
1. 10 weeks full-time clinical experience.
2. Midterm reflection- to be submitted by the student only if they receive less than Advanced Intermediate on the midterm CPI, on any category, as scored by the CI. Reflections will be approximately 1 page and must be in SOAP format including goals which address areas in which the student was scored less than Advanced Intermediate. This must be submitted via MOODLE Midterm dropbox with in 1 week of completion of midterm CPI. The DCE will acknowledge receipt of the reflection.
3. See Student Clinical Education Handbook for guidelines concerning Health Form, insurance, CPR, attire, attendance, etc.
4. See site requirements for any additional requirements such as criminal background check.

Grading Policy:

Grading Rubric: Satisfactory/Unsatisfactory

Methods of Student Evaluation: Students are formally evaluated by the Clinical Instructor (CI) a minimum of two times, during the midterm and final points of the clinical experience. Satisfactory Completion of PTH 884 requires:

1. Completion of all pre-internship clinical education requirements including, but not limited to, Student Information Form, required medical testing and Student Experience and Goal Sheet. Student Experience and Goal Sheet is to be emailed, mailed or faxed by the student to the facility at least two (2) weeks prior to commencing the practicum.

2. Completion of a self-evaluation using the Clinical Performance Instrument (CPI) at midterm and final.

3. The CPI is used by the Clinical Instructor (CI) to assess student performance, and also by the student for self-assessment. All Criteria (1-18) are to be addressed on this Internship. Satisfactory performance is demonstrated by receiving a score of at least Entry Level on all 18 criteria by the final evaluation.

4. Completion of Self-Assessment on Professional Behaviors; satisfactory performance on all of the Professional Behaviors as demonstrated by a rating of at least “Entry Level Behavioral Criteria” on the table and Entry Level on the VAS final assessment on all Professional Behaviors as verified by CI.

5. Completion and submission of a midterm reflection, as required (see additional course requirements #2), via MOODLE.

6. Completion of Physical Therapist Student Assessment: Part B and Section 2.

7. Completion of assignments required by the facility.

8. Follow all policies and procedures for the clinical practicum as outlined in the Entry Level DPT Student Clinical Education Handbook including but not limited to, performing safely, responsibly, professionally, legally, and ethically.

9. Return of all records, completed and signed, within one week of the conclusion of the clinical experience. All documents should be reviewed by the CI and signed where indicated prior to the end date of the clinical.

10. Attendance at an individual Post Clinical Conference

Grades are satisfactory (S) or unsatisfactory (U), and are assigned by the DCE after reviewing the completed requirements and recommendations of the clinical instructor.
Course Objectives:

Part I

A. The Pre-Internship clinical education sessions will:
   1. Provide the intern with a review of the Student Clinical Education Handbook including instruction in the policies and procedures necessary for successful completion of the Internship.
   2. Provide review of instruction in the use of the APTA Clinical Performance Instrument (CPI), the Professional Behaviors Assessment Tool, and the PT Student Evaluation Form for immediate personal use and in future use as a clinical instructor.

B. The Post-Internship individual conference session will:
   1. Provide a forum for the intern to verbally reflect, with the DGE, on the Internship experience and discuss future expectations for the clinical education Internships.

Part II

A. The following objectives 1-18 are taken from the CPI and are broadly written to cover a variety of clinical settings. Upon completion of FTHS84 Clinical Internship IV the student will consistently demonstrate satisfactory performance according to above grading Policy #3. Entry-Level performance is defined as: A student who is capable of functioning without guidance or clinical supervision managing patients with simple or complex conditions. The student is consistently proficient and skilled in simple and complex tasks for skilled examinations, interventions and clinical reasoning. The student is capable of maintaining 100% of a full-time physical therapist's caseload in a cost effective manner needing only to consult with others in unfamiliar or ambiguous situations. The degree of supervision and guidance required may vary with the complexity of the patient, environment or type of clinical setting, even in the student's final internship. To perform at Entry-Level also requires consistency and efficiency in providing quality patient care.

1. Practice in a safe manner that minimizes risk to patient, self, and others. (SLO 1,2,6,8)
2. Demonstrate professional behavior in all situations. (SLO 1,2,3,4,8)
3. Practice in a manner consistent with established legal and professional standards and ethical guidelines. (SLO 1,8,9)
4. Communicate in ways that are congruent with situational needs. (SLO 4)
5. Adapt delivery of physical therapy services with consideration for patients' differences, values, preferences and needs. (SLO 9)
6. Participate in self-assessment to improve clinical and professional performance. (SLO 3,6)
7. Apply the current knowledge, theory, clinical judgment, and the patient's values and perspective in patient management. (SLO 1,5,10)
8. Determine with each patient encounter the patient's need for further examination or consultation by a physical therapist or referral to another health care professional. (SLO 0)
9. Perform a physical therapy patient examination using evidenced-based tests and measures. (SLO 1,4,5)
10. Evaluate data from the patient examination (history, systems review, and tests and measures) to make clinical judgments. (SLO 1,3,5,6)
11. Determine a diagnosis and prognosis that guides future patient management. (SLO 5)
12. Establish a physical therapy plan of care that is safe, effective, patient-centered, and evidence-based. (SLO 3,5)
13. Perform physical therapy interventions in a competent manner. (SLO 1,2,5,8)
14. Educate others (patients, caregivers, staff, students, other health care providers, business and industry representatives, school systems) using relevant and effective teaching methods. (SLO 7)
15. Produce quality documentation in a timely manner to support the delivery of
physical therapy services. (SLO 4.8)

16. Collect and analyze data from selected outcome measures in a manner that supports accurate analysis of individual patient and group outcomes. (SLO 3)

17. Participates in the financial management (budgeting, billing and reimbursement, time space, equipment, marketing, public relations) of the physical therapy service consistent with regulatory, legal and facility guidelines. (SLO 3,7,8)

18. Directs and supervises personnel to meet patient's goals and expected outcomes according to legal standards and ethical guidelines. (SLO 7,8)

B. The following objectives reflect the goal of professional growth through reflection and feedback and the preparation of interns to serve as future Clinical Instructors. Upon completion of PTH884 Clinical Internship IV the student will:

1. Evaluate personal clinical performance using the CPI.
2. Evaluate personal professional behaviors using the Professional Behaviors Assessment Tool.
3. Evaluate clinical education experience using the PT Student Evaluation Form.
4. Demonstrate “Entry Level Behavioral Criteria” on the table and Entry Level on the VAS final assessment on all Professional Behaviors as verified by CI.

Accommodations: Any student with a documented disability who needs reasonable accommodations in order to meet the requirements of this course must see the course instructor, DCE, prior to assignment to the clinical site. Requests for accommodation during the course will require documentation that the basis for the accommodation is of recent origin.

Outline of Content: Pre-Internship Clinical Education Sessions including individual Pre Clinical Conferences. Supervised clinical experiences with a variety of patients. Individual experiences will vary according to the clinical facility assigned. Individual Post Clinical Conferences.
Clinical Internship Instructions

ANDREWS UNIVERSITY
DEPARTMENT OF PHYSICAL THERAPY

Clinical Practicum and Internships I, II, III, IV

Instructions for the use of the Clinical Education Forms

1. Clinical Internship Objectives. The general objectives follow the Physical Therapy Clinical Performance Instrument (CPI) which is used to evaluate the student. Please see enclosed syllabus for performance expectations.

2. Physical Therapy Clinical Performance Instrument (CPI) see page. The CPI is used both at midterm and final. The CPI is accessed online and used to assess the student’s performance. The student completes a self-assessment online as well. The CPI is completed before student & CI come together for the midterm and the final conferences. The student and CI must click the “sign-off” box in their individual online CPI to be able to review the CPIs together. It is very important that the student and CI attempt to summarize the areas of greatest strength and those areas needing improvement so that growth in these areas can occur. By each person contributing to the evaluation, it becomes a learning experience for the student.

3. Physical Therapist Student Evaluation. The student will review this form at midterm and complete the appropriate portions at midterm and final by the end of the clinical. The first page is signed by both the CI and the student. It is required that the Clinical Instructor and/or the CCCE discuss the comments with the student.

4. Professional Behaviors Assessment Form. The student is expected to be aware of the ten abilities and definitions listed on this form, thereby assessing their skills in the clinic. Students will record their performance at midterm and final by highlighting all criteria listed on pages 2 and 3 of the Professional Behaviors Assessment Form that pertains to their performance in the clinic; students at the final will assess where they fall on the scale between “beginning level” and “entry level” on page 4. Please see enclosed syllabus for performance expectations. The student and their CI will review and both sign the Professional Behaviors Assessment Form.

5. Information Release Form. To be completed by the student and kept by the clinical facility.

6. Returning the Forms. The following forms are to be signed by both the CI and the student and returned to the DCE within one week of completion for Practicum, Internship I, II and III. All four forms require both the CI and Student’s signatures.

    Physical Therapist Student Evaluation
    Professional Behaviors Assessment Form
    The CPI is not necessary to send as the DCE is able to access it online.

The following forms are to be returned to the DCE by noon on the Tuesday prior to graduation for Internship IV.

    Physical Therapist Student Evaluation
    Professional Behaviors Assessment Form
    Outstanding Clinical Instructor Nomination (Optional)

When students are returning directly to the university, they may hand deliver the forms in a sealed envelope. Otherwise, the forms can be sent via the mail or faxed. All forms should be addressed to:

Physical Therapist Student Evaluation
PART A: CI Assessment & Signatures

General Information
Student Name ____________________________________________
Academic Institution ______________________________________
Name of Clinical Education Site ____________________________
Address ___________________________ City __________ State ______
Clinical Experience Number_________________________ Clinical Experience Dates ________________

I have reviewed information contained in this physical therapist student evaluation of the clinical education experience and of clinical instruction. I recognize that the information below is being collected to facilitate accreditation requirements. I understand that my personal information will not be available to students in the academic program files.

1. Based on your recent experience as a Clinical Instructor, how would you rate this affiliation? (circle one)
   Exceptional  Above average  Average  Fair  Poor

2. In general, how well has the Andrews University DPT program prepared students for this setting?
   ______________________________________________________________________

3. In general, how do the Andrews University DPT student’s academic preparations compare to that of students at the same level from other programs?
   ______________________________________________________________________

Primary CI’s Name ________________________________________ Date ____________________________

Primary CI’s Signature
Entry-level PT degree earned ____________________________
Highest degree earned _______ Degree area ____________
Years experience as a CI ____________________________
Years experience as a clinician _______________________
Areas of expertise __________________________________
Clinical Certification, specify area
APTA Credentialed CI ______ Yes ______ No
Other CI Credential _______ State ______ Yes ______ No
Other professional organization memberships

Additional CI’s Name ______________________________________ Date ____________________________

Additional CI’s Signature
Entry-level PT degree earned ____________________________
Highest degree earned _______ Degree area ____________
Years experience as a CI ____________________________
Years experience as a clinician _______________________
Areas of expertise __________________________________

Student Name ____________________________________________ Date ____________________________

Student Signature ____________________________
PART B: Student Assessment

SECTION 1: PT STUDENT ASSESSMENT OF THE CLINICAL EXPERIENCE

Student Name: ____________________________

Information found in Section 1 may be available to program faculty and students to familiarize them with the learning experiences at this clinical facility.

1. Name of Clinical Education Site __________________________________________

   Address ____________________________ City ____________________________ State ________

2. Clinical Experience Number: ____________

3. Type of Clinical Experience/Rotation (check all that are relevant)

   □ Acute Care/Inpatient Hospital Facility    □ Private Practice
   □ Ambulatory Care/Outpatient      □ Rehabilitation/Sub-acute Rehabilitation
   □ ECF/Nursing Home/SNF      □ School/Preschool Program
   □ Federal/State/County Health      □ Wellness/Prevention/Fitness Program
   □ Industrial Rehabilitation Facility □ Other ____________________________

Orientation

4. Did you receive information from the clinical facility prior to your arrival?       ____________ Yes ____________ No

5. Did the orientation provide you with an awareness of the information and resources that you would need for the experience? ____________ Yes ____________ No

6. What else could have been provided during the orientation? ____________________________

________________________________________

Patient/Client Management and the Practice Environment

For questions 7, 8, and 9, use the following 4-point rating scale:

1 = Never         2 = Rarely         3 = Occasionally       4 = Often

7. During this clinical experience, describe the frequency of time spent in each of the following areas. Rate all items in the shaded columns using the 4-point scale.

<table>
<thead>
<tr>
<th>Case Mix by System</th>
<th>Rating</th>
<th>Lifespan</th>
<th>Rating</th>
<th>Continuum of Care</th>
<th>Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Musculoskeletal</td>
<td></td>
<td>0-12 years</td>
<td></td>
<td>Critical care, ICU, Acute</td>

What suggestions, relative to the items in question #9, could you offer to improve the environment for professional practice and growth?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

Clinical Experience

What other students were at this clinical facility during your clinical experience? (check all that apply):

___ Physical therapist students
___ Physical therapist assistant students
___ Students from other disciplines or service departments (Please specify ________)

Identify the ratio of students to CIs for your clinical experience:

___ 1 student to 1 CI
___ 1 student to greater than 1 CI
___ 1 CI to greater than 1 student; Describe

How did the clinical supervision ratio in Question #12 influence your learning experience? ______

________________________________________________________________________

________________________________________________________________________

In addition to patient/client management, what other learning experiences did you participate in during this clinical experience? (check all that apply)

___ Attended in-services/educational programs
___ Presented an in-service
___ Attended special clinics
___ Attended team meetings/conferences/grand rounds
___ Directed and supervised physical therapist assistants and other support personnel
___ Observed surgery
___ Participated in administrative and business management
___ Participated in collaborative treatment with other disciplines to provide patient/client care (please specify disciplines)
___ Participated in opportunities to provide consultation
___ Participated in service learning
___ Participated in wellness/health promotion/screening programs
___ Performed systematic data collection as part of an investigative study
___ Other; Please specify ________
15. Please provide any logistical suggestions for this location that may be helpful to students in the future. Include costs, names of resources, food, parking, etc. 

Overall Summary Appraisal

16. Overall, how would you assess this clinical experience? (Check only one)
   
   ____ Excellent clinical learning experience; would not hesitate to recommend this clinical education site to another student.
   ____ Time well spent; would recommend this clinical education site to another student.
   ____ Some good learning experiences; student program needs further development.
   ____ Student clinical education program is not adequately developed at this time.

17. What specific qualities or skills do you believe a physical therapist student should have to function successfully at this clinical education site?

18. If, during this clinical education experience, you were exposed to content not included in your previous physical therapist academic preparation, describe these subject areas not addressed.

19. What suggestions would you offer to future physical therapist students to improve this clinical education experience?

20. What do you believe were the strengths of your physical therapist academic preparation and/or coursework for this clinical experience?

21. What curricular suggestions do you have that would have prepared you better for this clinical experience?

G:\ADMISSION & MARKETING\Handbooks\2016 CEH 9.0.docx
SECTION 2: PT STUDENT ASSESSMENT OF CLINICAL INSTRUCTION

Information found in this section is to be shared between the student and the clinical instructor(s) at midterm and final evaluations. Additional copies of Section 2 should be made when there are multiple CIs supervising the student. Information contained in Section 2 is confidential and will not be shared by the academic program with other students.

Assessment of Clinical Instruction

22. Using the scale (1-5) below, rate how clinical instruction was provided during this clinical experience at both midterm and final evaluations (shaded columns).

   1 = Strongly Disagree   2 = Disagree   3 = Neutral   4 = Agree   5 = Strongly Agree

<table>
<thead>
<tr>
<th>Provision of Clinical Instruction</th>
<th>Midterm</th>
<th>Final</th>
</tr>

<tr>
<td>Time was available with the CI to discuss patient/client management.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The CI served as a positive role model in physical therapy practice.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The CI skillfully used the clinical environment for planned and unplanned learning experiences.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The CI integrated knowledge of various learning styles into student clinical teaching.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The CI made the formal evaluation process constructive.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The CI encouraged the student to self-assess.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

23. Was your CI(s) evaluation of your level of performance in agreement with your self-assessment?

   Midterm Evaluation  _____ Yes   _____ No   Final Evaluation  _____ Yes   _____ No
24. If there were inconsistencies, how were they discussed and managed?
Midterm Evaluation

Final Evaluation

25. What did your Cl(s) do well to contribute to your learning?
Midterm Evaluation

Final Evaluation

26. What, if anything, could your Cl(s) and/or other staff have done differently to contribute to your learning?
Midterm Evaluation

Final Evaluation

Thank you for sharing and discussing candid feedback with your Cl(s) so that any necessary midcourse corrections can be made to modify and further enhance your learning experience.
Behaviors Definitions

**Professional Behaviors for the 21st Century**

**Definitions of Behavioral Criteria Levels**

**Beginning Level** – behaviors consistent with a learner in the beginning of the professional phase of physical therapy education and before the first significant internship

**Intermediate Level** – behaviors consistent with a learner after the first significant internship

**Entry Level** – behaviors consistent with a learner who has completed all didactic work and is able to independently manage a caseload with consultation as needed from clinical instructors, co-workers and other health care professionals

**Post-Entry Level** – behaviors consistent with an autonomous practitioner beyond entry level

**Background Information**

In 1991 the faculty of the University of Wisconsin-Madison, Physical Therapy Educational Program identified the original Physical Therapy - Specific Generic Abilities. Since that time these abilities have been used by academic programs to facilitate the development, measurement and assessment of professional behaviors of students during both the didactic and clinical phases of the programs of study.

Since the initial study was conducted, the profession of Physical Therapy and the curricula of the educational programs have undergone significant changes that mirror the changes in healthcare and the academy. These changes include managed care, expansion in the scope of physical therapist practice, increased patient direct access to physical therapists, evidenced-based practice, clinical specialization in physical therapy and the American Physical Therapy Association’s Vision 2020 supporting doctors of physical therapy.

Today’s physical therapy practitioner functions on a more autonomous level in the delivery of patient care which places a higher demand for professional development on the new graduates of the physical therapy educational programs. Most recently (2008-2009), the research team of Warren May, PT, MPH, Laurie Konney PT, DPT, MS and Z. Annette Iglarsh, PT, PhD, MBA completed a research project that built on the work of other researchers to analyze the PT-Specific Generic Abilities in relation to the changing landscape of physical therapist practice and in relation to generational differences of the “Millennial” or “Y” Generation (born 1980-2000). These are the graduates of the classes of 2004 and beyond who will shape clinical practice in the 21st century.

The research project was twofold and consisted of 1) a research survey which identified and rank ordered professional behaviors expected of the newly licensed physical therapist upon employment (2008); and 2) 10 small work groups that took the 10 identified behaviors (statistically determined) and wrote/revised behavior definitions, behavioral criteria and placement within developmental levels (Beginning, Intermediate, Entry Level and Post Entry Level) (2009). Interestingly the 10 statistically significant behaviors identified were identical to the original 10 Generic Abilities, however, the rank orders of the behaviors changed. Participants in the research survey included Center Coordinators of Clinical Education (CCCE’s) and Clinical Instructors (CI’s) from all regions of the United States. Participants in the small work groups included Directors of Clinical Education (DCE’s), Academic Faculty, CCCE’s and CI’s from all regions of the United States.

This resulting document, **Professional Behaviors**, is the culmination of this research project. The definitions of each professional behavior have been revised along with the behavioral criteria for each developmental level. The ‘developing level’ was changed to the ‘intermediate level’ and the title of the document has been changed from Generic Abilities to Professional Behaviors. The title of this important document was changed to differentiate it from the original Generic Abilities and to better reflect the intent of assessing professional behaviors deemed critical for professional growth and development in physical therapy education and practice.

**Preamble**
In addition to a core of cognitive knowledge and psychomotor skills, it has been recognized by educators and practicing professionals that a repertoire of behaviors is required for success in any given profession (Alverno College Faculty, Assessment at Alverno, 1979). The identified repertoire of behaviors that constitute professional behavior reflect the values of any given profession and, at the same time, cross disciplinary lines (May et. al., 1991). Visualizing cognitive knowledge, psychomotor skills, and a repertoire of behaviors as the legs of a three-legged stool serves to emphasize the importance of each. Remove one leg and the stool loses its stability and makes it very difficult to support professional growth, development, and ultimately, professional success. (May et. al., Opportunity Favors the Prepared: A Guide to Facilitating the Development of Professional Behavior, 2002)

The intent of the Professional Behaviors Assessment Tool is to identify and describe the repertoire of professional behaviors deemed necessary for success in the practice of physical therapy. This Professional Behaviors Assessment Tool is intended to represent and be applied to student growth and development in the classroom and the clinic. It also contains behavioral criteria for the practicing clinician. Each Professional Behavior is defined and then broken down into developmental levels with each level containing behavioral criteria that describe behaviors that represent possession of the Professional Behavior they represent. Each developmental level builds on the previous level such that the tool represents growth over time in physical therapy education and practice.

It is critical that students, academic and clinical faculty utilize the Professional Behaviors Assessment Tool in the context of physical therapy and not life experiences. For example, a learner may possess strong communication skills in the context of student life and work situations, however, may be in the process of developing their physical therapy communication skills, those necessary to be successful as a professional in a greater health care context. One does not necessarily translate to the other, and thus must be used in the appropriate context to be effective.

Opportunities to reflect on each Professional Behavior through self assessment, and through peer and instructor assessment is critical for progress toward entry level performance in the classroom and clinic. A learner does not need to possess each behavioral criteria identified at each level within the tool, however, should demonstrate, and be able to provide examples of the majority in order to move from one level to the next. Likewise, the behavioral criteria are examples of behaviors one might demonstrate, however, are not exhaustive. Academic and clinical facilities may decide to add or delete behavioral criteria based on the needs of their specific setting. Formal opportunities to reflect and discuss with an academic and/or clinical instructor is key to the tool’s use, and ultimately professional growth of the learner. The Professional Behaviors Assessment Tool allows the learner to build and strengthen their third leg with skills in the affective domain to augment the cognitive and psychomotor domains.
Professional Behaviors Assessment Form

Professional Behaviors Assessment
Physical Therapy Program
Andrews University – Berrien Springs, MI

Student Name _____________________________ Internship Facility _____________________________
Clinical Instructor ___________________________ Clinical Dates _____________________________

Directions:
1. Read the description of each Professional Behavior.
2. Become familiar with the behavioral criteria described in each of the levels.
3. Self assess your performance continually, relative to the Professional Behaviors, using the behavioral criteria.
4. At midterm and at the end of the internship, complete this form.
   a) Using a Highlighter Pen, highlight all criteria that describes behaviors you demonstrate in Beginning (column 1), Intermediate (column 2), Entry Level (column 3) or Post-Entry Level Professional Behaviors.
   b) Identify the level within which you predominately function.
   c) Document specific examples of when you demonstrated behaviors from the highest level highlighted. Please use different color pens to denote midterm vs. final.
   d) For each Professional Behavior, list the areas in which you wish to improve. Please use different color pens to denote midterm vs. final.
5. Share your self assessment with your clinical instructor, specifically seeking his/her feedback.
6. Have your CI sign that they have read and discussed your self assessment; sign and return to the DCE.

**Professional Behaviors were developed by Warren May, Laurie Kontney and Annette Iglarsh (2010) as an update to the Generic Abilities.**
1. **Critical Thinking** - The ability to question logically, identify, generate and evaluate elements of logical argument; recognize and differentiate facts, appropriate or faulty inferences, and assumptions; and distinguish relevant from irrelevant information. The ability to appropriately utilize, analyze, and critically evaluate scientific evidence to develop a logical argument, and to identify and determine the impact of bias on the decision making process.

<table>
<thead>
<tr>
<th>Beginning Level:</th>
<th>Intermediate Level:</th>
<th>Entry Level:</th>
<th>Post-Entry Level:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Raises relevant questions</td>
<td>Feels challenged to examine ideas</td>
<td>Distinguishes relevant from irrelevant patient data</td>
<td>Develops new knowledge through research, professional writing and/or professional presentations</td>
</tr>
<tr>
<td>Considers all available information</td>
<td>Critically analyzes the literature and applies it to patient management</td>
<td>Readily formulates and critiques alternative hypotheses and ideas</td>
<td>Thoroughly critiques hypotheses and ideas often crossing disciplines in thought process</td>
</tr>
<tr>
<td>Articulates ideas</td>
<td>Utilizes didactic knowledge, research evidence, and clinical experience to formulate new ideas</td>
<td>Infers applicability of information across populations</td>
<td>Weighs information value based on source and level of evidence</td>
</tr>
<tr>
<td>Understands the scientific method</td>
<td>Seeks alternative ideas</td>
<td>Exhibits openness to contradictory ideas</td>
<td>Identifies complex patterns of associations</td>
</tr>
<tr>
<td>States the results of scientific literature but has not developed the consistent ability to critically appraise findings (i.e. methodology and conclusion)</td>
<td>Formulates alternative hypotheses</td>
<td>Identifies appropriate measures and determines effectiveness of applied solutions efficiently</td>
<td>Distinguishes when to think intuitively vs. analytically</td>
</tr>
<tr>
<td>Recognizes holes in knowledge base</td>
<td>Critiques hypotheses and ideas at a level consistent with knowledge base</td>
<td>Justifies solutions selected</td>
<td>Recognizes own biases and suspends judgmental thinking</td>
</tr>
<tr>
<td>Demonstrates acceptance of limited knowledge and experience in knowledge base</td>
<td>Acknowledges presence of contradictions</td>
<td></td>
<td>Challenges others to think critically</td>
</tr>
</tbody>
</table>

I function predominantly in the **beginning/intermediate/entry/post entry** level.

**Examples of behaviors to support my self assessment:**

**Regarding this Professional Behavior, I would like to improve in the following ways:**
### Communication

The ability to communicate effectively (i.e. verbal, non-verbal, reading, writing, and listening) for varied audiences and purposes.

<table>
<thead>
<tr>
<th><strong>Beginning Level:</strong></th>
<th><strong>Intermediate Level:</strong></th>
<th><strong>Entry Level:</strong></th>
<th><strong>Post Entry Level:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Demonstrates understanding of the English language (verbal and written): uses correct grammar, accurate spelling and expression, legible handwriting</td>
<td>• Utilizes and modifies communication (verbal, non-verbal, written and electronic) to meet the needs of different audiences</td>
<td>• Demonstrates the ability to maintain appropriate control of the communication exchange with individuals and groups</td>
<td>• Adapts messages to address needs, expectations, and prior knowledge of the audience to maximize learning</td>
</tr>
<tr>
<td>• Recognizes impact of non-verbal communication in self and others</td>
<td>• Restates, reflects and clarifies message(s)</td>
<td>• Presents persuasive and explanatory verbal, written or electronic messages with logical organization and sequencing</td>
<td>• Effectively delivers messages capable of influencing patients, the community and society</td>
</tr>
<tr>
<td>• Recognizes the verbal and non-verbal characteristics that portray confidence</td>
<td>• Communicates collaboratively with both individuals and groups</td>
<td>• Maintains open and constructive communication</td>
<td>• Provides education locally, regionally and/or nationally</td>
</tr>
<tr>
<td>• Utilizes electronic communication appropriately</td>
<td>• Collects necessary information from all pertinent individuals in the patient/client management process</td>
<td>• Utilizes communication technology effectively and efficiently</td>
<td>• Mediates conflict</td>
</tr>
</tbody>
</table>

I function predominantly in the **beginning/intermediate/entry/post entry** level.

Examples of behaviors to support my self assessment:

Regarding this Professional Behavior, I would like to improve in the following ways:
3. **Problem Solving** – The ability to recognize and define problems, analyze data, develop and implement solutions, and evaluate outcomes.

<table>
<thead>
<tr>
<th><strong>Beginning Level:</strong></th>
<th><strong>Intermediate Level:</strong></th>
<th><strong>Entry Level:</strong></th>
<th><strong>Post Entry Level:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Recognizes problems</td>
<td>Prioritizes problems</td>
<td>Independently locates, prioritizes and uses resources to solve problems</td>
<td>Weighs advantages and disadvantages of a solution to a problem</td>
</tr>
<tr>
<td>States problems clearly</td>
<td>Identifies contributors to problems</td>
<td>Accepts responsibility for implementing solutions</td>
<td>Participates in outcome studies</td>
</tr>
<tr>
<td>Describes known solutions to problems</td>
<td>Consults with others to clarify problems</td>
<td>Implements solutions</td>
<td>Participates in formal quality assessment in work environment</td>
</tr>
<tr>
<td>Identifies resources needed to develop solutions</td>
<td>Appropriately seeks input or guidance</td>
<td>Reassesses solutions</td>
<td>Seeks solutions to community health-related problems</td>
</tr>
<tr>
<td>Uses technology to search for and locate resources</td>
<td>Prioritizes resources (analysis and critique of resources)</td>
<td>Evaluates outcomes</td>
<td>Considers second and third order effects of solutions chosen</td>
</tr>
</tbody>
</table>
| Identifies possible solutions and probable outcomes | Considers consequences of possible solutions | Modifies solutions based on the outcome and current evidence |}

I function predominantly in the **beginning/intermediate/entry/post entry level**.

Examples of behaviors to support my self assessment:

Regarding this Professional Behavior, I would like to improve in the following ways:
4. **Interpersonal Skills** – The ability to interact effectively with patients, families, colleagues, other health care professionals, and the community in a culturally aware manner.

<table>
<thead>
<tr>
<th><strong>Beginning Level:</strong></th>
<th><strong>Intermediate Level:</strong></th>
<th><strong>Entry Level:</strong></th>
<th><strong>Post Entry Level:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Maintains professional demeanor in all interactions</td>
<td>Recognizes the non-verbal communication and emotions that others bring to professional interactions</td>
<td>Demonstrates active listening skills and reflects back to original concern to determine course of action</td>
<td>Establishes mentor relationships</td>
</tr>
<tr>
<td>Demonstrates interest in patients as individuals</td>
<td>Establishes trust</td>
<td>Responds effectively to unexpected situations</td>
<td>Recognizes the impact that non-verbal communication and the emotions of self and others have during interactions and demonstrates the ability to modify the behaviors of self and others during the interaction</td>
</tr>
<tr>
<td>Communicates with others in a respectful and confident manner</td>
<td>Seeks to gain input from others</td>
<td>Demonstrates ability to build partnerships</td>
<td></td>
</tr>
<tr>
<td>Respects differences in personality, lifestyle and learning styles during interactions with all persons</td>
<td>Respects role of others</td>
<td>Applies conflict management strategies when dealing with challenging interactions</td>
<td></td>
</tr>
<tr>
<td>Maintains confidentiality in all interactions</td>
<td>Accommodates differences in learning styles as appropriate</td>
<td>Recognizes the impact of non-verbal communication and emotional responses during interactions and modifies own behaviors based on them</td>
<td></td>
</tr>
<tr>
<td>Recognizes the emotions and bias that one brings to all professional interactions</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

I function predominantly in the **beginning/intermediate/entry/post entry** level.

Examples of behaviors to support my self assessment:

... 

Regarding this Professional Behavior, I would like to improve in the following ways:
5. **Responsibility** – The ability to be accountable for the outcomes of personal and professional actions and to follow through on commitments that encompass the profession within the scope of work, community and social responsibilities.

<table>
<thead>
<tr>
<th>Beginning Level:</th>
<th>Intermediate Level:</th>
<th>Entry Level:</th>
<th>Post Entry Level:</th>
</tr>
</thead>
</table>
| • Demonstrates punctuality  
• Provides a safe and secure environment for patients  
• Assumes responsibility for actions  
• Follows through on commitments  
• Articulates limitations and readiness to learn  
• Abides by all policies of academic program and clinical facility | • Displays awareness of and sensitivity to diverse populations  
• Completes projects without prompting  
• Delegates tasks as needed  
• Collaborates with team members, patients and families  
• Provides evidence-based patient care | • Educates patients as consumers of health care services  
• Encourages patient accountability  
• Directs patients to other health care professionals as needed  
• Acts as a patient advocate  
• Promotes evidence-based practice in health care settings  
• Accepts responsibility for implementing solutions  
• Demonstrates accountability for all decisions and behaviors in academic and clinical settings | • Recognizes role as a leader  
• Encourages and displays leadership  
• Facilitates program development and modification  
• Promotes clinical training for students and coworkers  
• Monitors and adapts to changes in the health care system  
• Promotes service to the community |

I function predominantly in the **beginning/intermediate/entry/post entry** level.

Examples of behaviors to support my self assessment:

Regarding this Professional Behavior, I would like to improve in the following ways:
6. **Professionalism** – The ability to exhibit appropriate professional conduct and to represent the profession effectively while promoting the growth/development of the Physical Therapy profession.

<table>
<thead>
<tr>
<th><strong>Beginning Level:</strong></th>
<th><strong>Intermediate Level:</strong></th>
<th><strong>Entry Level:</strong></th>
<th><strong>Post Entry Level:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Abides by all aspects of the academic program honor code and the APTA Code of Ethics</td>
<td>Identifies positive professional role models within the academic and clinical settings</td>
<td>Demonstrates understanding of scope of practice as evidenced by treatment of patients within scope of practice, referring to other healthcare professionals as necessary</td>
<td>Actively promotes and advocates for the profession</td>
</tr>
<tr>
<td>Demonstrates awareness of state licensure regulations</td>
<td>Acts on moral commitment during all academic and clinical activities</td>
<td>Provides patient/family centered care at all times as evidenced by provision of patient/family education, seeking patient input and informed consent for all aspects of care and maintenance of patient dignity</td>
<td>Pursues leadership roles</td>
</tr>
<tr>
<td>Projects professional image</td>
<td>Identifies when the input of classmates, co-workers and other healthcare professionals will result in optimal outcome and acts accordingly to attain such input and share decision making</td>
<td>Seeks excellence in professional practice by participation in professional organizations and attendance at sessions or participation in activities that further education/professional development</td>
<td>Supports research</td>
</tr>
<tr>
<td>Attends professional meetings</td>
<td>Discusses societal expectations of the profession</td>
<td>Utilizes evidence to guide clinical decision making and the provision of patient care, following guidelines for best practices</td>
<td>Participates in program development</td>
</tr>
<tr>
<td>Demonstrates cultural/generational awareness, ethical values, respect, and continuous regard for all classmates, academic and clinical faculty/staff, patients, families, and other healthcare providers</td>
<td></td>
<td>Discusses role of physical therapy within the healthcare system and in population health</td>
<td>Participates in education of the community</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Demonstrates leadership in collaboration with both individuals and groups</td>
<td>Demonstrates the ability to practice effectively in multiple settings</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Acts as a clinical instructor</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Advocates for the patient, the community and society</td>
</tr>
</tbody>
</table>

I function predominantly in the **beginning/intermediate/entry/post entry** level.
Examples of behaviors that support my self assessment:

Regarding this Professional Behavior, I would like to improve in the following ways:
7. **Use of Constructive Feedback** – The ability to seek out and identify quality sources of feedback, reflect on and integrate the feedback, and provide meaningful feedback to others.

<table>
<thead>
<tr>
<th>Beginning Level:</th>
<th>Intermediate Level:</th>
<th>Entry Level:</th>
<th>Post Entry Level:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Demonstrates active listening skills</td>
<td>- Critiques own performance accurately</td>
<td>- Independently engages in a continual process of self evaluation of skills, knowledge and abilities</td>
<td>- Engages in non-judgmental, constructive problem-solving discussions</td>
</tr>
<tr>
<td>- Assesses own performance</td>
<td>- Responds effectively to constructive feedback</td>
<td>- Seeks feedback from patients/clients and peers/mentors</td>
<td>- Acts as conduit for feedback between multiple sources</td>
</tr>
<tr>
<td>- Actively seeks feedback from appropriate sources</td>
<td>- Utilizes feedback when establishing professional and patient related goals</td>
<td>- Seeks feedback from a variety of sources to include students/supervisees/peers/mentors</td>
<td>- Seeks feedback from a variety of sources to include students/supervisees/peers/mentors</td>
</tr>
<tr>
<td>- Demonstrates receptive behavior and positive attitude toward feedback</td>
<td>- Develops and implements a plan of action in response to feedback</td>
<td>- Readsily integrates feedback provided from a variety of sources to improve skills, knowledge and abilities</td>
<td>- Utilizes feedback when analyzing and updating professional goals</td>
</tr>
<tr>
<td>- Incorporates specific feedback into behaviors</td>
<td>- Provides constructive and timely feedback</td>
<td>- Uses multiple approaches when responding to feedback</td>
<td>-</td>
</tr>
<tr>
<td>- Maintains two-way communication without defensiveness</td>
<td></td>
<td>- Reconciles differences with sensitivity</td>
<td>-</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Modifies feedback given to patients/clients according to their learning styles</td>
<td></td>
</tr>
</tbody>
</table>

I function predominantly in the **beginning/intermediate/entry/post entry level**

Examples of behaviors to support my self-assessment:

Regarding this Professional Behavior, I would like to improve in the following ways:
8. **Effective Use of Time and Resources** – The ability to manage time and resources effectively to obtain the maximum possible benefit.

<table>
<thead>
<tr>
<th><strong>Beginning Level:</strong></th>
<th><strong>Intermediate Level:</strong></th>
<th><strong>Entry Level:</strong></th>
<th><strong>Post Entry Level:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Comes prepared for the day’s activities/responsibilities</td>
<td>Utilizes effective methods of searching for evidence for practice decisions</td>
<td>Uses current best evidence</td>
<td>Advances profession by contributing to the body of knowledge (outcomes, case studies, etc)</td>
</tr>
<tr>
<td>Identifies resource limitations (i.e. information, time, experience)</td>
<td>Recognizes own resource contributions</td>
<td>Collaborates with members of the team to maximize the impact of treatment available</td>
<td>Applies best evidence considering available resources and constraints</td>
</tr>
<tr>
<td>Determines when and how much help/assistance is needed</td>
<td>Shares knowledge and collaborates with staff to utilize best current evidence</td>
<td>Has the ability to set boundaries, negotiate, compromise, and set realistic expectations</td>
<td>Organizes and prioritizes effectively</td>
</tr>
<tr>
<td>Accesses current evidence in a timely manner</td>
<td>Discusses and implements strategies for meeting productivity standards</td>
<td>Gathers data and effectively interprets and assimilates the data to determine plan of care</td>
<td>Prioritizes multiple demands and situations that arise on a given day</td>
</tr>
<tr>
<td>Verbalizes productivity standards and identifies barriers to meeting productivity standards</td>
<td>Identifies need for and seeks referrals to other disciplines</td>
<td>Utilizes community resources in discharge planning</td>
<td>Mentors peers and supervises in increasing productivity and/or effectiveness without decrement in quality of care</td>
</tr>
<tr>
<td>Self-identifies and initiates learning opportunities during unscheduled time</td>
<td></td>
<td>Adjusts plans, schedule etc. as patient needs and circumstances dictate</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Meets productivity standards of facility while providing quality care and completing non-productive work activities</td>
<td></td>
</tr>
</tbody>
</table>

I function predominantly in the **beginning/intermediate/entry/post entry level**.

Examples of behaviors to support my self assessment:

Regarding this Professional Behavior, I would like to improve in the following ways:
9. **Stress Management** – The ability to identify sources of stress and to develop and implement effective coping behaviors; this applies for interactions for: self, patient/clients and their families, members of the health care team and in work/life scenarios.

<table>
<thead>
<tr>
<th>Beginning Level:</th>
<th>Intermediate Level:</th>
<th>Entry Level:</th>
<th>Post Entry Level:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recognizes own stressors</td>
<td>Actively employs stress management techniques</td>
<td>Demonstrates appropriate affective responses in all situations</td>
<td>Recognizes when problems are unsolvable</td>
</tr>
<tr>
<td>Recognizes distress or problems in others</td>
<td>Reconciles inconsistencies in the educational process</td>
<td>Responds calmly to urgent situations with reflection and debriefing as needed</td>
<td>Assists others in recognizing and managing stressors</td>
</tr>
<tr>
<td>Seeks assistance as needed</td>
<td>Maintains balance between professional and personal life</td>
<td>Prioritizes multiple commitments</td>
<td>Demonstrates preventative approach to stress management</td>
</tr>
<tr>
<td>Maintains professional demeanor in all situations</td>
<td>Accepts constructive feedback and clarifies expectations</td>
<td>Reconciles inconsistencies within professional, personal and work/life environments</td>
<td>Establishes support networks for self and others</td>
</tr>
<tr>
<td></td>
<td>Establishes outlets to cope with stressors</td>
<td>Demonstrates ability to defuse potential stressors with self and others</td>
<td>Offers solutions to the reduction of stress</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Models work/life balance through health/wellness behaviors in professional and personal life</td>
</tr>
</tbody>
</table>

I function predominantly in the **beginning/intermediate/entry/post entry** level.

Examples of behaviors to support my self-assessment:

- 

Regarding this Professional Behavior, I would like to improve in the following ways:
10. **Commitment to Learning** – The ability to self direct learning to include the identification of needs and sources of learning; and to continually seek and apply new knowledge, behaviors, and skills.

<table>
<thead>
<tr>
<th><strong>Beginning Level:</strong></th>
<th><strong>Intermediate Level:</strong></th>
<th><strong>Entry Level:</strong></th>
<th><strong>Post Entry Level:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Prioritizes information needs</td>
<td>Researches and studies areas where own knowledge base is lacking in order to augment learning and practice</td>
<td>Respectfully questions conventional wisdom</td>
<td>Acts as a mentor not only to other PT's, but to other health professionals</td>
</tr>
<tr>
<td>Analyzes and subdivides large questions into components</td>
<td>Applies new information and re-evaluates performance</td>
<td>Formulates and re-evaluates position based on available evidence</td>
<td>Utilizes mentors who have knowledge available to them</td>
</tr>
<tr>
<td>Identifies own learning needs based on previous experiences</td>
<td>Accepts that there may be more than one answer to a problem</td>
<td>Demonstrates confidence in sharing new knowledge with all staff levels</td>
<td>Continues to seek and review relevant literature</td>
</tr>
<tr>
<td>Welcomes and/or seeks new learning opportunities</td>
<td>Recognizes the need to and is able to verify solutions to problems</td>
<td>Modifies programs and treatments based on newly-learned skills and considerations</td>
<td>Works towards clinical specialty certifications</td>
</tr>
<tr>
<td>Seeks out professional literature</td>
<td>Reads articles critically and understands limits of application to professional practice</td>
<td>Consults with other health professionals and physical therapists for treatment ideas</td>
<td>Seeks specialty training</td>
</tr>
<tr>
<td>Plans and presents an in-service, research or cases studies</td>
<td></td>
<td></td>
<td>Is committed to understanding the PT's role in the health care environment today (i.e. wellness clinics, massage therapy, holistic medicine)</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Pursues participation in clinical education as an educational opportunity</td>
</tr>
</tbody>
</table>

I function predominantly in the **beginning/intermediate/entry/post entry level**

Examples of behaviors to support my self assessment:

Regarding this Professional Behavior, I would like to improve in the following ways:
**Professional Development Plan:**

Based on my self-assessment of my Professional Behaviors and the areas I have identified for improvement, I am setting the following goals:

To accomplish these goals, I will take the following **specific** actions:

---

By my signature below, I indicate that I have completed this self-assessment and sought feedback from my CI regarding my self-assessment.

Student Signature: ____________________________ Date: ________________

CI feedback/suggestions.

Information Release Form

ANDREWS UNIVERSITY
Department of Physical Therapy

Information Release Form

Statement:

I, ____________________________, (Do / Do Not) give my consent for the evaluation material from my clinical internship with this institution to be shared with those people seeking references for job placement. Any other use of this information must have my written approval.

Signed: ____________________________  Date: ______________

Clinical Site: __________________________________________

CI/CCCE please note:
  ▪ Please retain a copy of this form at the facility and return the original to the university.
  ▪ A copy of this signed form may be required by the ACCE/Andrews University when information release is requested in the future.
  ▪ Due to the protected nature of a student’s academic records the CPI is “closed” once the clinical experience is completed. Once the course is closed only the ACCE and student have access to the student’s CPI. Access to the CPI, by the CI/CCCE/Clinical site, will require completion of this written consent form.
INSTRUCTIONS: Use this form to keep a weekly record of your Clinical Practicum experience. It will provide an individual reference and will assist in the planning of future Internships. Each day record the number of times that you have performed a procedure, the number of hours of observation, and the number of patients treated. At the end of each week, record the totals on this form. After the completion of the Practicum, transfer the information from this form to your master record.

Student's Record of the Clinical Education Experience Information – Internship III&IV

ANDREWS UNIVERSITY
DOCTORATE OF PHYSICAL THERAPY – BERRIEN SPRINGS
STUDENT'S RECORD OF THE CLINICAL EDUCATION EXPERIENCE

STUDENT NAME ________________________________

PTH883 Clinical Internship III
PTH884 Clinical Internship IV

INSTRUCTIONS: Use this form to keep a weekly record of your Clinical Internship experience. It will provide an individual reference and will assist in tracking your progression. Each day record the number of times that you have performed a procedure, the number of hours of observation, and the number of patients treated. At the end of each week, record the totals on this form. After the completion of the Internship, transfer the information from this form to your master record.

Clinical Site Information Form (CSIF)

CLINICAL SITE INFORMATION FORM (CSIF)

APTA Department of Physical Therapy Education

Revised January 2006

INTRODUCTION:

The primary purpose of the Clinical Site Information Form (CSIF) is for Physical Therapist (PT) and Physical Therapist Assistant (PTA) academic programs to collect information from clinical education sites to:
- Facilitate clinical site selection,
- Assist in student placements,
- Assess the learning experiences and clinical practice opportunities available to students; and
- Provide assistance with completion of documentation required for accreditation.

The CSIF is divided into two sections:
- Part I: Information for Academic Programs (pages 4-16)
  - Information About the Clinical Site (pages 4-6)
  - Information About the Clinical Teaching Faculty (pages 7-10)
  - Information About the Physical Therapy Service (pages 10-12)
  - Information About the Clinical Education Experience (pages 13-16)
- Part II: Information for Students (pages 17-20)

Duplication of requested information is kept to a minimum except when separation of Part I and Part II of the CSIF would omit critical information needed by both students and the academic program. The CSIF is also designed using a check-off format wherever possible to reduce the amount of time required for completion.
DIRECTIONS FOR COMPLETION:

To complete the CSIF go to APTA's website at under “Education Programs,” click on “Clinical” and choose “Clinical Site Information Form.” This document is available as a Word document.

1. **Save the CSIF on your computer** before entering your facility's information. The title should be the clinical site’s zip code, clinical site’s name, and the date (eg, 90210BevHillsRehab10-26-2005). Using this format for titling the document allows the users to quickly identify the facility and most recent version of the CSIF from a folder. Saving the document will preserve the original copy on the disk or hard drive, allowing for ease in updating the document as changes in the clinical site information occurs.

2. **Complete the CSIF thoroughly and accurately.** Use the tab key or arrow keys to move to the desired blank space. The form is comprised of a series of tables to enable use of the tab key for quicker data entry. Use the Comment section to provide additional information as needed. If you need additional space please attach a separate sheet of paper.

3. **Save the completed CSIF.**
4. **E-mail** the completed CSIF to each academic program with whom the clinic affiliates (accepts students).
5. In addition, to develop and maintain an accurate and comprehensive **national database** of clinical education sites, e-mail a copy of the completed CSIF to the Department of Physical Therapy Education at angelabovd@apta.org.
6. **Update the CSIF on an annual basis** to assist in maintaining accurate and relevant information about your physical therapy service for academic programs, students, and the national database.

What should I do if my physical therapy service is associated with multiple satellite sites that also provide clinical learning experiences?

If your physical therapy service is associated with multiple satellite sites that offer a variety of clinical learning experiences, such as an acute care hospital that also provides clinical rotations at associated sports medicine and long-term care facilities, provide information regarding the primary clinical site for the clinical experience on page 4. Complete page 4, to provide essential information on all additional clinical sites or satellites associated with the primary clinical site. Please note that if the satellite site(s) offering a clinical experience differs from the primary clinical site, a separate CSIF must be completed for each satellite site. Additionally, if any of the satellite sites have a different CCCE, an abbreviated resume must be completed for each individual serving as CCCE.

What should I do if specific items are not applicable to my clinical site or I need to further clarify a response?

If specific items on the CSIF do not apply to your clinical education site at the time you are completing the form, please leave the item(s) blank. Provide additional information and/or comments in the Comment box associated with the item.

### Indicate which of the following are required by your facility prior to the clinical education experience:

- [ ] Proof of student health clearance
- [ ] Criminal background check
- [ ] Child clearance
- [ ] Drug screening
- [ ] First Aid and CPR
- [ ] HIPAA education
- [ ] OSHA education
- [ ] Other: Please list

Initial Date

Revision Date
**Information About Multi-Center Facilities**

If your health care system or practice has multiple sites or clinical centers, complete the following table(s) for each of the sites. Where information is the same as the primary clinical site, indicate “SAME.” If more than three sites, copy, and paste additional sections of this table before entering the requested information. Note that you must complete an abbreviated resume for each CCCE.

<table>
<thead>
<tr>
<th>Name of Clinical Site</th>
<th>Street Address</th>
<th>City</th>
<th>State</th>
<th>Zip</th>

### Clinical Site Accreditation/Ownership

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>Date of Last Accreditation/Certification</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Is your clinical site certified/accredited? If no, go to #3.  
If yes, has your clinical site been certified/accredited by:

- [ ] JCAHO
- [ ] CARF
- [ ] Government Agency (eg. CORF, PTIP, rehab agency, state, etc.)
- [ ] Other

Which of the following best describes the ownership category for your clinical site? (check all that apply)

- [ ] Corporate/Privately Owned
- [ ] Government Agency
- [ ] Hospital/Medical Center Owned
- [ ] Nonprofit Agency
- [ ] Physician/Physician Group Owned
- [ ] PT Owned
- [ ] PT/PTA Owned
- [ ] Other (please specify)

### Clinical Site Primary Classification

To complete this section, please:

A. Place the number 1 (1) beside the category that best describes how your facility functions the majority (≥ 50%) of the time. Click on the drop down box to the left to select the number 1.

B. Next, if appropriate, check (v) up to four additional categories that describe the other clinical centers associated with your facility.

| [ ] Acute Care/Inpatient Hospital Facility | [ ] Industrial/Occupational Health Facility | [ ] School/Preschool Program |
| [ ] Ambulatory Care/Outpatient | [ ] Multiple Level Medical Center | [ ] Wellness/Prevention/Fitness Program |
| [ ] ECF/Nursing Home/SNF | [ ] Private Practice | [ ] Other: Specify |

Clinical Instructors

What criteria do you use to select clinical instructors? (Mark (X) all that apply):

- APTA Clinical Instructor Credentialing  
- Career ladder opportunity  
- Certification/training course  
- Clinical competence  
- Delegated in job description  
- Demonstrated strength in clinical teaching

- No criteria
- Other (not APTA) clinical instructor credentialing
- Therapist initiative/volunteer
- Years of experience: Number:  
- Other (please specify):  

How are clinical instructors trained? (Mark (X) all that apply)

- 1:1 individual training (CCCE CI)  
- Academic for-credit coursework  
- APTA Clinical Instructor Education and Credentialing Program  
- Clinical center inservices  
- Continuing education by academic program

- Continuing education by consortia
- No training
- Other (not APTA) clinical instructor credentialing program
- Professional continuing education (e.g., chapter, CEU course)
- Other (please specify):  

Information About the Physical Therapy Service

Number of Inpatient Beds

For clinical sites with inpatient care, please provide the number of beds available in each of the subcategories listed below. (If this does not apply to your facility, please skip and move to the next table.)

- Acute care  
- Intensive care  
- Step down  
- Subacute/transitional care unit  
- Extended care

- Psychiatric center  
- Rehabilitation center  
- Other specialty centers: Specify  
- Total Number of Beds

Number of Patients/ Clients

Estimate the average number of patient/client visits per day:

<table>
<thead>
<tr>
<th>INPATIENT</th>

</tr>
</tbody>
</table>

### Patient/Client Diagnoses

1. Indicate the frequency of time typically spent with patients/clients in the primary diagnostic groups (bolded) using the key below:

   1 = (0%)  2 = (1-25%)  3 = (26-50%)  4 = (51-75%)  5 = (76-100%)

2. Check (%) those patient/client diagnostic sub-categories available to the student.

Click on the gray bar under rating to select from the drop down box.

In appreciation...

Many thanks for your time and cooperation in completing the CSIF and continuing to serve the physical therapy profession as clinical mentors and role models. Your contributions to learners’ professional growth and development ensure that patients/clients today and tomorrow receive high-quality patient/client care services.
Clinical Performance Instrument Form (CPI)

Getting Started With the APTA Learning Center
For PT CPI Course Participants

APTA Members/Current or Former APTA Customers

1. Login to www.apta.org
   - Enter your username and password and select "click here to continue."
     (http://www.apta.org/APTALogin.aspx)
   - Under http://www.apta.org/myAPTA make note of the email address
     associated with your apta.org account you will need to use the same address
     to verify your training completion in PT CPI Web.

2. Important! It is essential that you do not purchase or register for courses in the
   APTA Learning Center using more than one account number. If you’ve forgotten
   your password or were at one time an APTA member, click here to have it
   emailed to you OR contact 800/999-2782, ext 3395 for assistance.

3. Set up your computer
   - Enable pop-ups for http://www.apta.org and
     http://learningcenter.apta.org. (Make sure pop-ups are enabled both in
     your Internet browser and in your Google/Yahoo/AOL toolbar, if installed.
     Learn how: http://learningcenter.apta.org/obt.aspx#q1).

4. "Purchase" the free PT CPI online course
   - To access the PT CPI online course, go to:
     http://learningcenter.apta.org/free_membercourses.aspx
     this is the "Free Member" course catalog, accessible from the public course catalog
     in the APTA Learning Center, then "purchase" the free course through the online
     shopping cart.

5. Take the PT CPI online course
   - After purchasing the course, go to My Courses
     http://learningcenter.apta.org/My_Courses.aspx within the APTA Learning
     Center.

6. Print CEU certificate
   - Claim credit and print your 0.2 CEU certificate through My Courses
     http://learningcenter.apta.org/My_Courses.aspx at the APTA Learning Center.

New Customers/Never Been an APTA Member

1. Create an account at www.apta.org
   - Register at apta.org: http://www.apta.org/APTALogin.aspx. Complete the
     required information and write down your username and password.
   - Please make a note of the e-mail address you use when completing this
     registration information as you will need to use the same email address to
     verify your training completion in PT CPI Web.

2. Set up your computer
   - Enable pop-ups for http://www.apta.org and
     http://learningcenter.apta.org. (Make sure pop-ups are enabled both in
     your Internet browser and in your Google/Yahoo/AOL toolbar, if installed.
     Learn how: http://learningcenter.apta.org/obt.aspx#q1).

   Important! You are now ready to purchase the free online course.

3. "Purchase" the free PT CPI online course
   - To access the PT CPI online course, go to:
     http://learningcenter.apta.org/free_membercourses.aspx (this is the "Free
     Member" course catalog, accessible from the public course catalog)
     in the APTA Learning Center, then "purchase" the free course through the online
     shopping cart.

4. Take the PT CPI online course
   - After purchasing the course, go to My Courses
     http://learningcenter.apta.org/My_Courses.aspx within the APTA Learning
     Center.

5. Print CEU certificate
   - Claim credit and print your 0.2 CEU certificate through My Courses
     http://learningcenter.apta.org/My_Courses.aspx at the APTA Learning Center.

6. Access the PT CPI Web site
   - To access PT CPI Web 2.0, please click: https://cpi2.amsapps.com.
     The academic program with whom you affiliate can provide you with your
     username (the email address provided to them). If you do not have a
     password, you will need to use the ‘I forgot or do not have a password’ link to
     establish a password. The password to login to PT CPI Web 2.0 is NOT the
     same as the password used to login to the APTA Web site.

G:\ADMISSION & MARKETING\Handbooks\2016 CEH 9.0.docx
DPT Course Descriptions

All course work (lectures and laboratories) scheduled for each semester must be successfully completed prior to advancing to the next semester.

PTH400
Anatomy
A comprehensive study of human anatomy with emphasis on the nervous, skeletal, muscle, and circulatory systems. Introduction to basic embryology and its relation to anatomy and the clinical sciences concludes the course. Provides a solid morphological basis for a synthesis of anatomy, physiology, and the physical therapy clinical sciences. Co requisite: PTH410.

PTH410
Anatomy Lab
Dissection and identification of structures in the cadaver supplemented with the study of charts, models, prospected materials and radiographs are utilized to identify anatomical landmarks and configurations. Co requisite: PTH400.

PTH415
PT Assessment Skills
Introduction to assessment principles and examination skills utilized in all areas of physical therapy. The PT Guide to Physical Therapy Practice is referenced for the basic skills required in the assessment, intervention and documentation guidelines. Co requisite: PTH425.

PTH416
Pathokinesiology
The study of human movement including an introduction to the basic concepts of biomechanics with an emphasis on human joint/muscle structures and function, advancing to analysis of body mechanics, normal gait analysis, and pathological movement analysis. Joint abnormalities will be identified using radiographs, related to the resultant movement dysfunction. Prerequisites: PTH400 and 410. Co requisite: PTH426.

PTH418
General Medicine
Clinical techniques applied to the examination, evaluation, treatment, and discharge planning of patients in general medical and acute-care. Emphasis on physical therapy intervention with relevant factors, management of pain and physical complications during medical treatment, and examination and treatment of special populations including wound and burn care. Co requisite: PTH428.

PTH420
Therapeutic Interventions
Basic principles, physiologic effects, indications and contraindications, application and usage of equipment, and intervention rationale for hydrotherapy, thermal agents, wound care, massage, electrotherapy and mechanotherapy (traction) and other therapeutic interventions. Co requisite: PTH430.

PTH425
PT Assessment Skills Laboratory
Basic examination skills including surface palpation of specific underlying muscle and bone structures, joint motion (goniometry), manual procedures for testing muscle strength, sensation, vital signs, limb girth and volumetric measurement will be practiced. Clinical application in basic physical therapy care procedures will be introduced. Co requisite: PTH415.

PTH426
Pathokinesiology Laboratory
Biomechanical and observational analysis of normal and abnormal human movement. Integration of basic examination skills with gait and movement analysis. Prerequisites: PTH400 and 410. Co requisites: PTH416.
PTH428  
General Medicine Laboratory  
Practice in assessment modified for the acute-care environment. Applications include home-and work-  
place evaluation for architectural barriers, functional evaluation tools, casting, and modification of  
treatment for acute care including goal setting and professional note writing. Co requisite: PTH418.

PTH430  
Therapeutic Interventions Lab  
Supervised practicum includes patient positioning and application of the therapy to obtain desired  
physiological response. Techniques of hydrotherapy, thermal agents, wound care, and massage, as well  
as specific electrotherapy and mechanotherapy treatments and assessment of physiological responses  
to those treatments. Co requisite: PTH420.

PTH440  
Pathophysiology I  
Sequence studying disease processes affecting major body systems and the resulting anatomical and  
pathophysiological changes. Clinical presentations and pharmacological treatment of patients with those  
disease processes are presented, as well as diagnostic tests and laboratory values used to identify  
pathological conditions. Prerequisites: PTH400 and 410.

PTH445  
Neuroscience  
Basic anatomy and functions of the central and peripheral nervous systems and their related structures.  
Pathways of the central and peripheral nervous systems are examined along with a detailed study of  
each of the 12 pairs of cranial nerves. Prerequisites: PTH400 and 410.  
Co requisite: PTH455.

PTH450  
Neurology of Motor Control  
An introduction to the function and interaction of the primary areas of the nervous system involved in  
controlling human movement, including the cortex, spinal cord, peripheral receptor system, basal  
ganglia, cerebellum, and the vestibular systems. Students are introduced to terminology and concepts  
associated with both normal function and pathology in these areas.

PTH455  
Neuroscience Laboratory  
Study of the prossected central and peripheral nervous tissues, models, and charts. Imaging will be used  
to compare normal to abnormal CNS presentation. Prerequisites: PTH400 and 410.  
Co requisite: PTH445.

PTH457  
Orthopedic Medicine  
Medical lectures covering selected topics in orthopedics, including common orthopedic diseases and the  
use of diagnostic testing and imaging in the orthopedic field.

PTH460  
Topics in Comparative Religion  
This course surveys the major religious traditions of the world. Study includes an overview of origins;  
major philosophical and theological underpinnings; typical aspects of worship and ethics; and major  
social, cultural, and political influences. Study is done from a consciously Christian framework.

PTH540  
Pathophysiology II  
Sequence studying disease processes affecting major body systems and the resulting anatomical and  
pathophysiological changes. Clinical presentations and pharmacological treatment of patients with those  
disease processes considered, as well as diagnostic tests and laboratory values used to identify  
pathological conditions. Prerequisites: PTH400 and 410.
PTH601
Orthopedics I  
Almeter
Presentation of fundamental physical therapy knowledge in the assessment and intervention of a patient with both acute and chronic conditions of the extremities. Screening of the cervical and lumbar spine prior to tests is covered, progressing to complete assessment and treatment of extremity joint pathologies. Diagnostic tests and results pertinent to the orthopedic patient are related to a physical therapy differential diagnosis. Co requisite: PTH611.

PTH602
Orthopedics II  
Jasheway
A continuation of the presentation of information regarding orthopedic pathology of the spine with emphasis on treatment techniques for the different pathologies from a physician and physical therapist's perspective. A decision making model focusing on a differential diagnosis is incorporated throughout the course. Co requisite: PTH612.

PTH610
Therapeutic Exercise  
Pierce
Examines the systemic responses to exercise as related to both an acute nature and in response to training. Specific pathological conditions are discussed in relation to exercise testing and prescription, and a clinical decision making process is presented for working with additional pathological conditions. Co requisite: PTH620.

PTH611
Orthopedics I Laboratory  
Almeter
Clinical application and practice in the special techniques to assess and treat acute and chronic orthopedic pathologies of the extremities and spine. Co requisite: PTH601.

PTH612
Orthopedics II Laboratory  
Jasheway
Designed for practice of the special techniques required in the assessment of intervention of acute and chronic orthopedic pathologies of the cervical, thoracic, and lumbar spine. Co requisite: PTH602.

PTH616
Scholarly Inquiry and Dissemination  
Katuli
Introduction to the principles and practice of research including: research and null hypothesis, research questions, research design, research ethics and IRB protocol, sampling, validity and reliability, methodology, hypothesis testing and critical evaluation of physical therapy literature. Knowledge of the concepts needed for writing a graduate research proposal is interwoven throughout this course to prepare students for the Capstone Project.

PTH617
Scholarly Inquiry and Dissemination  
Katuli
Application of the principles and practice of research, including designs, IRB, ethics, hypothesis testing and critical evaluation of clinical literature as they relate to preparation of the Capstone Research Project. Preparation and development of a graduate research proposal is interwoven throughout this course.

PTH620
Therapeutic Exercise Laboratory  
Pierce
Practical demonstration and experience with responses to exercise, testing procedures, and exercise prescription, focusing on activities appropriate for clinical situations. Tests and interventions noted in the PT Guide to Practice are highlighted. Co requisite: PTH610.

PTH622
Research Statistics  
Katuli
Fundamental procedures in collecting, summarizing, presenting, analyzing, and interpreting statistical data. Statistical tests applied to medical specialties. Prerequisite: Co requisite: PTH632.
Lectures covering selected topics in cardiopulmonary medicine, focusing on clinical presentation, diagnostic tests, and medical and physical therapy interventions. Co requisite: PTH635.

Practice in the computation of statistical data using appropriate formulas. Practical applications of techniques in research and statistical computations including probability, normal distribution, Chi Square, correlations, and linear regressions. Co requisite: PTH622.

Emphasis on physical therapy assessment and intervention with cardiac and pulmonary patients. Practice of relevant techniques, such as stress testing, percussion, pulmonary function tests and breathing techniques, as well as other techniques identified in the Physical Therapy Guide to Practice. Co requisite: PTH625.

Practice of the physical therapy techniques required in the application of orthotic and prosthetic devices. Special attention given to gait and function. Selected topics such as wheelchair modifications, miscellaneous ortho-rehab apparatus, and other assistive/adaptive devices included. Co requisite: PTH627.

An overview of embryologic development, followed by normal infant/child development to 5 years of age with an emphasis on motor development. Identification of assessment techniques for infants and children with normal and abnormal development. Description of various pediatric pathologies encountered in physical therapy with appropriate corresponding assessment and treatment approaches. Co requisite: PTH650.

A study of the organizational structures, operations, and financing of healthcare delivery institutions and an examination of the organization and interrelationship of their professional and support elements. Application of current health care management strategies and theory are related to the acute-care facility and independent practice.

A discussion of spiritual values from a Christian perspective, how faith and spirituality facilitate the healing process, and how these can be incorporated into patient care. Attention will be given to discerning and addressing the spiritual needs of patients/clients, family members, and ancillary medical staff in a professional environment.

Analysis of the decision-making process, with special focus on clinical guidelines, Physical Therapy Guide to Practice, and differential diagnosis. Differential diagnosis is addressed through comparison of systemic signs and symptoms, as well as appropriate diagnostic tests which may indicate involvement of a problem outside of the scope of PT practice.
PTH650
Pediatrics Lab Pawielks
Practice of physical therapy assessment of the infant/child that address different developmental domains. Practice in the special techniques required in assessment and treatment of pediatric patients diagnosed with selected pathologies. Introduces current treatment approaches, such as Neurodevelopmental Treatment (NDT), with their effects on treatment goals. Co requisite: PTH640.

PTH651
Neurology I Olson
Review of basic neurophysiological mechanisms specific to nervous system dysfunction, related to clinical concepts in treatment of conditions affecting the nervous system, such as spinal cord injury, head injury, stroke, and selected peripheral pathologies. Emphasis on comparing and contrasting facilitation techniques. Co requisite: PTH661.

PTH652
Neurology II Olson
Continuation of Neurology I, focusing on assessment of and intervention in selected neurologic conditions. Common treatment techniques are compared, with rationale for use of each. Co-requisite: PTH662.

PTH661
Neurology I Laboratory Olson
Clinical application, rehabilitation practice, and techniques applied to nervous system dysfunction. Intervention techniques for conditions affecting the nervous system, such as spinal cord injury, head injury, stroke, and selected peripheral pathologies. Co requisite: PTH651.

PTH662
Neurology II Laboratory Olson
Clinical application, rehabilitation practice, and techniques applied to basic physiological and neurophysiological mechanisms specific to nervous system dysfunction. Focus on techniques appropriate for use with neurologic patients and evaluation of patient response to treatment. Prerequisite: PTH662. Co requisite: PTH652.

PTH680
Clinical Practicum Scott
Practice of the knowledge and skills developed in the classroom and laboratory in a patient-care setting. This practicum consists of 4 weeks full-time physical therapy experience in clinical facilities affiliated with the university. Repeatable.

PTH711
Clinical Reasoning I Almeter
A course intended to enhance the skills associated with clinical reasoning within the Physical Therapy setting. It will address the thought process that enter into every aspect of patient care in the practice of physical therapy, from the history to the physical exam; the differential diagnosis to the development of the prognosis; the plan of intervention to the eventual discharge. Corequisite: PTH721

PTH721
Clinical Reasoning I Laboratory Almeter
A continuation of PTH721 Clinical Reasoning I. Labs are designed to reinforce specific skills (evaluative or therapeutic) applicable to each lecture topic. Corequisite: PTH711

PTH712
Clinical Reasoning II Olson
A continuation of PTH711 Clinical Reasoning I. Prerequisite: PTH711 Corequisite: PTH722

PTH722
Clinical Reasoning II Olson
A continuation of PTH712 Clinical Reasoning I Laboratory. Prerequisite: PTH712 Corequisite: PTH721
PTH726
Geriatrics
Study of the unique characteristics of the geriatric patient, especially the physiological, psychological and social aspects, related to special needs in the physical therapy assessment, plan of care, and intervention.

PTH728
Christian Finance Seminar
This course emphasizes the principles of Christian stewardship in everyday life. It addresses stewardship not only as it relates to finances but also to other human resources such as time, and talent. It will also address the elements of personal and family budgeting and investing.

PTH736
Psychosocial Issues in Healthcare
An introduction to psychosocial responses to illness and disability, especially the interpersonal relationships between the therapist, the family and the patient. Common psychiatric disorders are discussed along with their clinical diagnosis, treatment regimes, projected outcomes and methods for handling these responses in clinical situations.

PTH 743
Teaching, Learning and Leadership in Physical Therapy
An exploration of the role of the physical therapist in teaching, learning and leadership in the classroom, clinical setting and community. Examination and application of education theory and skills. Analysis and application of prevention, health promotion, wellness and fitness for individuals, groups and communities. Identification of personal strengths and preferred leadership styles, and applications of personal and interpersonal principles of leadership. Synthesis of the role of Physical Therapist's in teaching, learning and leadership through design and integration of a community assessment and prevention of disability service project.

PTH765
Ethical & Legal Issues in Healthcare
Contemporary ethical issues are examined, including the relationships among peers, superiors, subordinates, institutions, clients, and patients. Illustrations include actual cases related to Christian biblical principles.

PTH768
Professional Compendium
Summarization of previous or added learning experiences relative to contemporary issues in physical therapy. An overview of the new graduate’s role and responsibility to his/her patients and their families, employer, and community in the expanding physical therapy profession.

PTH770
Oral Comprehensive Examination

PTH799
Research Project (topic)
Provides students with guidelines and supervision for data collection, analysis, thesis preparation and oral presentation. To be repeated to 3 credits.

PTH870
Written Comprehensive Examination

PTH880
PT Seminar
Preparation of a personal portfolio, assessment of the clinical experiences and preparation for professional licensure.
Clinical Internship I, II, III, IV

Advanced full-time clinical experience (8-10 weeks each) in a variety of professional practice settings. One of the internships must be in outpatient orthopedics, inpatient, and a neurology setting. Thirty-six to forty hours per week. May be repeated.
