**Revive Vespers**

Join us for another Friday Vespers this week for a powerful message on Righteousness by Faith presented by Akeem James. In his message entitled, “We Would Serve the Egyptians,” Akeem, a student at the seminary, will be looking at the parallels between the deliverance of the Israelites out of Egypt and our spiritual journey as Christians. We know that we are spiritual Israel, but what if the “spiritual Egypt” is still very real in our lives? Why are we wondering in this wilderness so long? Why do we want to go back to Egypt of sin? The answer lays in Jesus our Passover. Join us and be blessed as we dig into God's word on this all important
question!
Place: Biology Amphitheater
Time: Friday, February 14 @ 7:30pm.

Campus Ministries Closed
While all of the Senior CM Staff are away from Monday - Wednesday, February 10-12, 2014 for The One Project, we will be closing the Campus Ministries Office for official office hours. We will open the office again for office business on Thursday, February 13, 2014.
Dr. Peter Lyons, is an Assistant Professor in the Department of Biology at Andrews University. He received his B.S. in Biochemistry at Atlantic Union College and went on to Dalhousie University in Canada PhD in Biochemistry from. He subsequently did postdoctoral work at both Dalhousie University and Albert Einstein College of Medicine in New York. Before coming to Andrews, Lyons taught for one year at Manhattan College, New York.

His research has been in yeast genetics, cell biology, and biochemistry, although most has revolved around the role of metallocarboxypeptidases in human health and disease. His model organism of choice is the zebrafish, which can be easily manipulated and observed as it develops. Combining biochemical studies with cell biology and zebrafish development provides an excellent model for seeing the full picture of how these enzymes work.

Lyons has received funding from NSERC (Canada), NIH, and the Grass Foundation. He has published in a variety of journals including Biochemistry, J. Biol. Chem., Human Mutation and Current Protocols in Protein Science.

Student Gardens Partner with Health Department
If the people can’t get to the farm, bring the farm to the people.
That’s the philosophy behind a new partnership between the Berrien County Health Department and Andrews University’s student garden to operate a mobile farmers’ market this year.
Garth Woodruff, an Andrews horticulture instructor who oversees the garden project, said it is unbelievable that there are people in Berrien County who can’t get freshly grown produce.
“It is shocking to me that in this county, where 90 percent of the land is used for agriculture, where you can’t find better vegetable growing land in the region, and probably the United States, you would have food deserts in areas such as Berrien Springs, Benton Harbor and Niles,” Woodruff said.

Faculty Member Wins International Competition
The Jonas Center for Nursing Excellence, Khan Academy, and the American Association of Colleges of Nursing are pleased to announce that 14 individuals have been selected to join a select group of educators working to transform how health education is delivered across disciplines around the globe. The partnering organizations launched an international competition last fall to generate interest among health profession students, faculty, and practitioners in creating innovative healthcare tutorials with videos and exercises, which will be made available for free through the Khan Academy website. This content will support graduates of nursing programs in preparation for the NCLEX-RN exam.
The competition received almost 100 submissions from individuals around the world, emerging from over 60 hospitals and academic institutions. Competition submissions represented the disciplines of medicine, nursing, pharmacy, dentistry, public health, and graduate studies in biological science. The competition winners include Leslie Samuel, physical therapy instructor at Andrews University, among others.

BENTON HARBOR - If the people can't get to the farm, bring the farm to the people.

That's the philosophy behind a new partnership between the Berrien County Health Department and Andrews University's student garden to operate a mobile farmers' market this year.

Garth Woodruff, an Andrews horticulture instructor who oversees the garden project, said it is unbelievable that there are people in Berrien County who can't get freshly grown produce.

"It is shocking to me that in this county, where 90 percent of the land is used for agriculture, where you can't find better vegetable growing land in the region, and probably the United States, you would have food deserts in areas such as Berrien Springs, Benton Harbor and Niles," Woodruff said.

Food deserts describe places where residents do not live near stores that sell fresh food. This lack of access is linked to numerous health conditions, including obesity. Berrien County has one of Michigan's highest obesity rates.

The Berrien County Health Department has tried to close that food gap by managing the Benton Harbor farmers market. Andrews' students sell the fruits, vegetables and herbs they grow at their own seasonal market, and through Consumer-Supported Agriculture subscriptions, in which consumers sign up for a portion of the annual yield.

Woodruff has been interested in the possibility of a mobile market for several years, but has been unable to get the effort on the road.

The health department's proposal fit in with the university's mission of community service for students, Woodruff said, as well as their dedication to reaching the public.

Funding will come from the health department, through a grant from Gov. Rick Snyder's 4x4 initiative to promote a healthy lifestyle.

The mobile market will be on the road four days a week, making eight to 10 regular stops.

Nicki Britten, the health department's director of community health planning, said likely stops include Benton Harbor, Benton Township, Buchanan, Niles and Niles Township.

The Southwest Michigan Planning Commission will help target neighborhoods where the need for fresh food is greatest, Britten said.

The market will be geared to serve low-income residents with limited access to fresh food. Produce will be sold at 10 percent above wholesale prices. The market has applied to be able to accept Bridge cards used by residents receiving food assistance.
"I'm glad we're serving a large part of the county. We know it's not enough, but we're trying to do more," Britten recently reported to the Board of Health.

There is a lot of bounty to share. Last year, the Andrews' garden produced around 30 tons of produce, not counting its apple crop, Woodruff said.

The university maintains 10 acres for vegetables, three acres of Gala apples, four acres of peaches, along with patches for raspberries and blackberries, and three greenhouses.

What are some of the barriers to getting healthier food to low-income residents?

"Some of it is cost, some of it is time," Woodruff suggested. "People work hard at their jobs, with probably low wages. They come home tired, and you don't feel like chopping vegetables."

Few people are advocating the benefits of buying local food, he added, noting that even a lot of food pantries distribute processed, packaged goods.

Another part of the effort is education, Woodruff said. The market is working with Lakeland HealthCare to include cooking demonstrations to introduce buyers to new foods and quick and easy recipes. The student garden website, augardens.com, also posts recipes.

The health department has applied for a grant from the Conservation Fund to provide cooking demonstrations at the Benton Harbor market.

Along with promoting a healthier diet for residents, the garden operation has many benefits for students, Woodruff said.

About 20 students participate throughout the growing season, and another 30 volunteer to work 10 hours on the farm during the semester.

With the farm stand and the CSA operation, the students gain the experience of running a business, and earn money for tuition, Woodruff said. Internships also are available.

They get to work outside and take some of the vegetables home, he added.

In a blog entry, Woodruff tells of students going out to the fields before dawn to pick and sort the produce, and the happy chaos in the warehouse as the food is packed and shipped out.

"The smells, sounds, sights, touches and even tastes of 101 minutes in that place were more positive and energizing than anyone could describe and it truly took my breath away," Woodruff wrote.

Death of Former Student

We in the Andrews community are grieving this week as we learn of the death of former student Steaven Lichtenwalter. Please feel free to leave messages of condolences or share memories you have of Steaven in the comments below. Death of Leona Running

Live streaming of Dr. Running’s funeral will be available at [www.andrews.edu/livestream](http://www.andrews.edu/livestream) at the time of her funeral, 2 p.m., Thursday, Jan. 30.

Viewing will take place at Alfred Funeral Home, 212 W Main Street, Berrien Springs, on Wednesday, Jan. 29, from 6–8 p.m. The funeral is at Pioneer Memorial Church on Thursday, Jan. 30, at 2 p.m. Internment will take place at Rose Hill Cemetery in Berrien Springs immediately following the service. Please remember her extended family and friends as they grieve.

Niels-Erik Andreasen, president of Andrews University, shared the following statement: “During her long and productive life Dr. Running broke new ground in the University and in the Seventh-day Adventist Church. She was the first female professor at the Seventh-day Adventist Theological Seminary in Takoma Park, Md., and later here at Andrews. She was the first Adventist woman to earn a doctorate in Ancient Near Eastern Studies (Johns Hopkins University), with a specialization in ancient Syriac texts. She overcame the grief of losing her husband early in life and built her exemplary academic and professional calling. Following her retirement she continued to share her linguistic skill with graduate students (Syriac, Egyptian, Akkadian, Hebrew, Aramaic, and almost any other language these students cared to learn). And she served the University with her editorial talents, improving a great many of its publications over the years... She was an inspiration to many and an example to us all.”

Jiri Moskala, dean of the Andrews University Seventh-day Adventist Theological Seminary, says: “Dr. Running holds a special place in the hearts of her Old Testament and Seminary colleagues and former students, who greatly appreciated her mentoring during their Seminary years. She was the first woman professor at the SDA Theological Seminary and was indeed a woman of remarkable skills and influence... We praise the Lord..."
