Greetings!

George Hope and I just finished a new video of a number of guests who went through the September, 17, 2011 cleansing session at BellaVita Lifestyle Center. George and I agree that many people are waking up to the value of cleansing and detoxifying the body to reverse and heal disease. We often get criticized because we believe in simple cleansing methods to eliminate toxins and impurities from the liver, kidneys, colon, skin, lungs, lymph, and blood. Now you can see and hear for yourselves from the people who came who were barely able to walk, some were depressed, one with MS, and others with migraines. You cannot argue with results!

Perhaps the most amazing testimony is you will
watch is from Terrie who came with MS and walked in with two walking sticks. Hear how she rode a bike for 12 miles and walked 4 miles with restored balance and tons of energy in only nine days! Hear Alice tell her testimony on how she could barely walk into BellaVita on day one, taking lots of medications, and walked a mile in only a few days with all pain and medication gone! Jenny, George’s sister, gives a powerful testimony on how she healed from many multiple symptoms, everything from candida to depression.

Brenda, a Raw Chef from Living Light Culinary School in Fort Bragg came to this session to assist Charmaine with the raw meals. Brenda gives the opening testimony on the miraculous changes she saw in the people's faces, especially their eyes. I designed BellaVita’s cleansing program for 10 days. I got the idea from Daniel Chapter 1 where the prophet asked Melzar, the prince of the eunuchs: "Please test your servants for ten days, and let them give us vegetables to eat [organic plant foods] and water to drink. Then let our appearance be examined before you, and the appearance of the young men who eat the portion of the king's delicacies [meat]; and as you see fit, so deal with your servants. So he consented with them in this matter, and tested them ten days. And at the end of ten days there features appeared better and fatter in flesh then all the young men who ate the portion of the king's delicacies [meat].” BellaVita's ten-day program is biblical, and in ten days or less we see incredible changes in people's countenances. Now watch for yourself!

10-Day BellaVita Program

HEALTH TIP OF THE WEEK

Thursday night, I finished my series of health lectures in Lodi. I pointed out that even with facts like the one below, people will keep eating over 1,000,000 chickens an hour. In 1967, one hundred million chickens died of leukemia or blood cancer. Antibiotics and growth hormones are added to the feed, the animals are debeaked, and their bodies dumped into chill tanks where they absorb the filth bathing in what federal inspectors call "fecal soup" that increases weight by 8-10% that you pay for at the supermarket. Oh, and do not forget the "Safe handling instructions" on the packages since the bird may contain bacteria, ecoli, and now arsenic!

FDA finally admits chicken meat contains cancer-causing arsenic!

One Final Note

I would greatly appreciate your prayers. Time is short and Jesus is coming soon. The signs are all around us.

Please help Modern Manna reach the world with the health message and the gospel. Donations can be made online at www.modernmanna or just drop me a note at danny@modernmanna.org or call 1-800-655-3228. Perhaps we can encourage one another.

God bless you,
Danny Vierra
The Lord is the Master Physician. The Bible says He is the One who “forgiveth all thine iniquities; who healeth all thy diseases.”
Ps.103:3
FDA finally admits chicken meat contains cancer-causing arsenic (but keep eating it, yo!)

by Mike Adams, the Health Ranger, NaturalNews Editor

(NaturalNews) After years of sweeping the issue under the rug and hoping no one would notice, the FDA has now finally admitted that chicken meat sold in the USA contains arsenic, a cancer-causing toxic chemical that's fatal in high doses. But the real story is where this arsenic comes from: It's added to the chicken feed on purpose!

Even worse, the FDA says its own research shows that the arsenic added to the chicken feed ends up in the chicken meat where it is consumed by humans. So for the last sixty years, American consumers who eat conventional chicken have been swallowing arsenic, a known cancer-causing chemical.

Until this new study, both the poultry industry and the FDA denied that arsenic fed to chickens ended up in their meat. The fairytale excuse story we've all been fed for sixty years is that "the arsenic is excreted in the chicken feces." There's no scientific basis for making such a claim... it's just what the poultry industry wanted everybody to believe.

But now the evidence is so undeniable that the manufacturer of the chicken feed product known as Roxarsone has decided to pull the product off the shelves. And what's the name of this manufacturer that has been putting arsenic in the chicken feed for all these years? Pfizer, of course -- the very same company that makes vaccines containing chemical adjuvants that are injected into children.

Technically, the company making the Roxarsone chicken feed is a subsidiary of Pfizer, called Alpharma LLC. Even though Alpharma now has agreed to pull this toxic feed chemical off the shelves in the United States, it says it won't necessarily remove it from feed products in other countries unless it is forced by regulators to do so. As reported by AP:

"Scott Brown of Pfizer Animal Health's Veterinary Medicine Research and Development division said the company also sells the ingredient in about a dozen other countries. He said Pfizer is reaching out to regulatory authorities in those countries and will decide whether to sell it on an individual basis."

Arсеній? Eat more!

But even as its arsenic-containing product is pulled off the shelves, the FDA continues its campaign of denial, claiming arsenic in chickens is at such a low level that it's still safe to eat. This is even as the FDA says arsenic is a carcinogen, meaning it increases the risk of cancer.

The National Chicken Council agrees with the FDA. In a statement issued in response to the news that Roxarsone would be pulled from feed store shelves, it stated, "Chicken is safe to eat" even while admitting arsenic was used in many flocks grown and sold as chicken meat in the United States.

What's astonishing about all this is that the FDA tells consumers it's safe to eat cancer-causing arsenic but it's dangerous to drink elderberry juice! The FDA recently conducted an armed raid in an elderberry juice manufacturer, accusing it of the "crime" of selling "unapproved drugs."
Which drugs would those be? The elderberry juice, explains the FDA. You see, the elderberry juice magically becomes a "drug" if you tell people how it can help support good health.

The FDA has also gone after dozens of other companies for selling natural herbal products or nutritional products that enhance and support health. Plus, it's waging a war on raw milk which it says is dangerous. So now in America, we have a food and drug regulatory agency that says it's okay to eat arsenic, but dangerous to drink elderberry juice or raw milk.

Eat more poison, in other words, but don't consume any healing foods. That's the FDA, killing off Americans one meal at a time while protecting the profits of the very companies that are poisoning us with their deadly ingredients.

Oh, by the way, here's another sweet little disturbing fact you probably didn't know about hamburgers and conventional beef: Chicken litter containing arsenic is fed to cows in factory beef operations. So the arsenic that's pooped out by the chickens gets consumed and concentrated in the tissues of cows, which is then ground into hamburger to be consumed by the clueless masses who don't even know they're eating second-hand chicken sh*t.
