Sending healing & hope around the world

Dear Center for Adventist Research,

Picture yourself as a refugee in Haiti, a nation that’s still reeling from last year’s massive earthquake, not to mention its long history of poverty. Like nearly one million other Haitians, you live in a huge refugee camp. Open sewage runs right outside your tent. Diseases like cholera and typhoid are all around you.

Urgently needing surgery, you head to Port-au-Prince’s Adventist hospital to talk things over with the surgeon and staff. After a few moments they quote you a price of just $5 to do the surgery!

Offering affordable or even free medical services is a powerful witness, opening hearts to the gospel in ways that few other things do. Plus, sincere believers of other faiths who would never set foot in church often have no problem visiting a Christian hospital.

This is an incredible opportunity to heal the sick and win souls for Christ
In order to provide vital care, Adventist hospitals in Haiti, Trinidad, Malawi, Zambia and Cameroon rely on shipments of donated medical supplies from the United States. Your help is all that’s needed to send these supplies into the mission field.

Your gift’s impact is literally tripled!
Your gift today of just $34 will ship more than $100 in medical supplies and equipment. Just think, the impact of your gift is literally tripled!

Will you help bring healing and hope to Haiti, Trinidad, Malawi, Zambia and Cameroon?

Your partner in bringing Christ’s healing touch to the entire world,

Bill Tucker
President and Speaker
