THE LOMA LINDA UNIVERSITY WEEKLY NEWSPAPER

1967: Goal for Completing University Medical Center

Countly Board Requests Vets' Loma Linda Medical Center

The Riverside County board of supervisors last week adopted a resolution supporting the establishment of a southern California veterans home and hospital and suggested that it be adjacent to Loma Linda University medical facilities.

Southern California veterans have requested the use of the former Corona Naval Hospital as a home and hospital, but Supervisor Norman Davis observed that Corona now is being used as a narcotics institution and there would be no point in suggesting its use for other purposes.

The county board of trade is working with legislators, veterans organizations and various individuals and groups in assembling supporting data for a veterans home and hospital in this area, according to George C. Garwood, general manager.

At a recent all-day session of a Senate Fact-Finding Committee on Labor and Welfare in San Bernardino, representatives of seven veterans organizations in southern California testified concerning the need for such a medical center.

Three of those representatives recommended the Loma Linda area as a site, contending there are no better medical facilities in the country than those at Loma Linda.

Findings of the committee will be presented to the Senate at its next session.

The Loma Linda area also has been proposed as the site for a federal veterans hospital in addition to the state institution.

Preliminary planning for construction of the new Loma Linda University Medical Center at Loma Linda is nearing completion, with Mervyn G. Hardinge as the date for final approval of plans.

Only two or three internal areas have not been definitely settled as to precise size and arrangement, according to Robert L. Cone, vice president for financial affairs and chairman of the planning committee for the proposed center.

Operational in 1967

Students entering professional curriculums at the university in the fall of 1967 will be the first to get their education largely within the walls of the new facility, says Mr. Cone. The final stage of a four-part construction calendar will be completed then, he says.

The first of the four stages begins within the period of several weeks immediately following the formal ground breaking June 7 of this year. Excavation and foundation work for the entire complex will be under way from July 1 or sooner until about March 1, 1965, according to the committee's calendar.

Structural framing of the eight-story hospital and related facilities will begin about that date (March 1965) and overlap into the initial construction stage. March 1967 is the goal for completing actual construction, Mr. Cone discloses.

The fourth and final stage of the construction timetable begins with completion of the actual building, the committee indicates. It involves the outfitting and equipping of the multi-million-dollar medical center for high-quality patient care and teaching programs.

The months between completion of actual construction in March and beginning of the academic year in September should allow ample time for equipping and staff training the facility to accommodate incoming students in 1967, Mr. Cone says.

Education Expansion:
We continue to look forward to the development of educational programs in many more areas of the arts, sciences, and humanities, and thereby to add to what we now have for the benefit of the people.—Walter R. McPherson

Foundation
Grants SM $194,280

The John A. Hartford Foundation granted $194,280 to Loma Linda University School of Medicine for experimental research in treating arteriosclerosis. Detailed in the $194,280 investigation is Lester M. Morrison, MD, assistant professor of medicine. With Dr. Morrison in the University's Los Angeles research laboratories will be Joseph J. Quilligan, MD, a research associate; Kattania Murista, MD, PhD, research fellow; Leon Freeman, PhD, fellow in arteriosclerosis and mutation; and Clea A. Schipke, PhD, research fellow in arteriosclerosis at UCLA Medical School.

Dr. Morrison describes the project as an effort to develop a new method of treating human arteriosclerosis. The two related arterial ailments and their complications are now the leading causes of death from disease in the United States, with no satisfactory method of treatment having yet been found.

A $353,040 grant from the Hartford fund for research in multiple sclerosis was announced by Loma Linda University earlier this month.

LLU Alumni In Troubled World Areas

Although the University has at least seven alumni in the troubled areas of Kenya, Tanganyika and Uganda, no report has reached SCRUB concerning the effect on them of the recent revolt of African troops in those areas.

Africans died in raging after the initial flareup in Tanganyika following the Communist-inspired coup that toppled the sultan of Zanzibar. Alumni in Tanganyika are Valair E. Rhippenstock, SM'45; Charles L. Wical, SM'46, and Charles L. Stafford, PT'70, who resides in and is active in the Loma Linda area.

Tanganyika. All three work at the Heri Mission Hospital in Kenya at the Kweni Hos- pital are E. Arthur Calkins, SM'55, and Dr. Byron E. Hall, nationally known San Francisco doctor, who were killed January 17 in a plane crash in the Mulea Mountains less than an hour after takeoff. The private craft apparently dived almost vertically into a narrow canyon.

Both were members of the board of directors of the California Division of the American Cancer Society and had attended a meeting of the board at a hotel near Los Angeles International Airport. They took off in a twin-engined Cessna 310 from the Van Nuys Airport at 6:40 p.m. after the meeting ended.

A search for the plane was begun shortly after 7 p.m. when mountain residents reported hearing what they thought was a plane in trouble and then a crash. The wreckage was not found until daylight, however, when the pilot of a Sheriff's Air Squad plane spotted it. Rescue workers reached the site six hours later.

Dr. Blunden, SI, had been flying for 25 years and was a member of the Sheriff's Air Squad and the Flying Physicians.

In addition to the University he had attended Pacific Union College, Angwin, Cali-

He was a fellow of the International College of Surgeons and in 1962 was an American delegate to the (Continued on page 7)

Cost to Construct, Equip Medical Center Increases

Latest estimates by archi-
tects show the proposed Loma Linda University Medical Center will cost $177,650,000, reports President Godfrey T. Anderson.

The figure includes construction and equipment of the complex including a 366-bed hospital, research and teaching facilities, and outpatient clinics, Dr. An-

Mr. Cone says.

The first of the four stages begins within the period of several weeks immediately follow-
ing the formal ground breaking June 7 of this year. Excavation and foundation work for the entire complex will be under way from July 1 or sooner until about March 1, 1965, according to the committee's calendar.

Structural framing of the eight-story hospital and related facilities will begin about that date (March 1965) and overlap into the initial construction stage. March 1967 is the goal for completing actual construction, Mr. Cone discloses.

The fourth and final stage of the construction timetable begins with completion of the actual building, the committee indicates. It involves the outfitting and equipping of the multi-million-dollar medical center for high-quality patient care and teaching programs.

The months between completion of actual construction in March and beginning of the academic year in September should allow ample time for equipping and staff training the facility to accommodate incoming students in 1967, Mr. Cone says.

High degree of association of cigarette smoking with (and the justification for its) initiation and its continuation. It is to produce educated graduates who can do an important part of the world's work, meet its needs, and contribute to its progress that our schools and universities exist. A university with a roster of outstanding alumni can feel that it is doing its job well and feel a justifiable pride in its outpouring.

The alumni of any educational institution are of vital importance because they are the justification for its founding and its continuance. It is to produce educated graduates who can do an important part of the world's work, meet its needs, and contribute to its progress that our schools and universities exist. A university with a roster of outstanding alumni can feel that it is doing its job well and feel a justifiable pride in its outpouring.

The Loma Linda University alumni are such a group. We have often heard and read of the regard in which they are held, not only in this country but abroad. Their basic dedication to the ideals of their alma mater and to their activities is reflected in their activities in many ways and in many places.

We are additionally fortunate in having alumni who are not only a credit to their alma mater but who are an exceedingly loyal group, and who prove their loyalty in many ways. Many remember their school faithfully each year in a material way with gifts large and small. We also find our alumni willing to serve on our faculties and boards, on committees, and in other parts of our program.

This is just a word of appreciation to all of you who make up our list of loyal and helpful alumni. May each year's addition to your ranks continue in your strong tradition of loyalty and service.

Guest speaker for the award dinner at the School of Dentistry Alumni-Student Convention will be Louis T. Benevent, president of Claremont Graduates and University School and City University.

The dinner will be February 23 at the Amini House De Anza Hotel Club, Grand Terrace, at 2 p.m. Dr. Benevent will speak on the subject of "The Profession of Human Understanding."

All Seventh-day Adventist dentists are invited to attend the dinner, at which a award will be presented for the outstanding school and City University.

The dinner will climax a five-day convention of the School of Dentistry alumni and students. The convention will feature commercial exhibits, table, a scientific program and special religious program, in addition to the banquet and other entertainment.

Other speakers at the convention will include the chief dental officer of Walter Reed Army Medical Center and Col. Robert R. Sills, DDS, as well as Russell Haney, PhD, and alumni and University staff members.
“I haven’t smelled that in 25 years,” was the remark of a man who recently participated in the five-day plan to stop smoking conducted on the university campus.

Another was delighted at the smell of an onion field which he too had not smelled during his years of smoking.

Things Smell, Taste Better After Quitting, State Former Smokers

The rate of flow to breathe in and out in a 12-year-old is helping many smokers to quit the habit. The forced breathing rate was measured to find the maximum amount of air she could rid from her lungs in one second. Dr. Marin, an assistant professor of prosthodontics in the School of Dentistry, shouted his test in the program by assisting with tests. —Photo by Ellis Rich.

Now, write down on the slip of paper if you taste this. Sweet, sour, salty or what? This woman wonders if it is going to be as bad as... say a shot. She is one of the many who attended the five-day plan to stop smoking, which is helping many smokers to quit the habit. The program is being evaluated by the School of Medicine department of pharmacology through a series of tests made on course enrollees before and after they stopped smoking.

Orders Start Soon For Commencement

Regional building senators, who can order commencement stationary supplies at the registrar's office, Hopkins, information and order forms will be available there.

Degree candidates who are eligible to participate in the June commencements are advised to order promptly. Ordering closes February 21.

Graduate School students whose plans are not yet final may place their orders later.

Is she faking, or does it really taste that good?

Since the Surgeon General’s report on smoking, says Dr. Lonergan, the University has been receiving calls for speakers from clubs and organizations all over the valley.

This week Dr. Lonergan spoke to the Sigma Nu fraternity in Palm Springs.

The free sessions designed to help smokers break the habit will continue for five consecutive evenings on the University campus. The local program is part of a national effort by the church organization through the National Health Foundation and Loma Linda Institute, which it founded.

Fellows are never asked to order. Through the twofold advantage of keeping tabs on the enrollees before and after they have attended the program, the research is being conducted by the School of Medicine department of pharmacology.

The research is being conducted by the School of Medicine department of pharmacology.

Now, write down on the slip of paper if you taste this. Sweet, sour, salty or what? This woman wonders if it is going to be as bad as... say a shot. School of Medicine Alumni Evaluate Consolidation Plans, Financial Aid

Speaking on behalf of the School of Medicine Alumni Association, Leland R. House, SM’32, can look back at a year of healthy growth and progress for the organization that he is heading. With only two weeks left of his presidency, the University professor states that the past year has given a generous amount of success to the alumni. During the 1963-64 administration, financial problems have been straightened out and a gap has been bridged between Loma Linda University and its School of Medicine.

Expreses Faith in School
Dr. House told University SCOPE that “throughout the year I have tried to promote a spirit of optimism in which we (the alumni) are taking part.” He looks forward to loyalty to Loma Linda University and its School of Medicine alumni. We are happy that progress has been made in this direction. The administration has been appointed to work out a ten-year plan. Progress made this year has given us faith in the stability of the University.

How does this improved relationship benefit the School of Medicine?
An editorial in the ALUMNI JOURNAL bears out the fact that this improved relationship is an interest in achieving an environment of confidence and cooperation. As stated in the editorial, the new Walter E. MacPherson Society now is a reality, which indicates that the alumni are gaining a strong confidence in the administration. The loyalty that the alumni have been showing is an important factor in the development of the University.

The Alumni Association has increased its membership, and has pledged cooperation to help the School of Medicine. The Alumni Association and its officers have urged that our alumni consider SCOPE the paper of their alma mater. This is not in competition with our ALUMNI JOURNAL. The medical alumni are also participating actively in the University’s Alumni Federation. This through University-sponsored agency the common interests of all schools in the University are shared.

Aside from this new development, how do the alumni express interest in their alma mater?
Seven recent classes of the School of Medicine already have selected a plan of investment. This is a plus of investment for the betterment of the school. For the first time, young students of graduation, few students can afford to give any gift to the School of Medicine. So they devised the plan of investment. Each member of the class has given a small amount, say $5.

The Investments Grow
Each year the amount is increased. Some of the students have given more than $5. This is the ability of the alumni to support the investment plan. With 100 percent participation, the alumni have invested nearly $50,000 to the University. This is an important amount. It has been spent on various projects such as buildings, equipment, etc.

Do you feel that the University and its alumni have come closer?
I definitely do. Our loyalty and cooperation indicate that the administration lead us to expect high standards of excellence in education and research. The building of a stable administration is the key to the success of an organization. It is important that the administration maintain a long-range continuity in its planning and development. We are happy that progress has been made in this direction. The administration has been appointed to work out a ten-year plan. Progress made this year has given us faith in the stability of the University.

Brought to you by the Alumni Association
It is important that the administration establish a system of cooperation and confidence in the administration. In the opinion of alumni, it is important that the administration cooperate with you, the alumni, in its planning and development with enthusiasm. I am looking forward to the new year of operation that this will be accomplished. With many encouraging signs of more cooperation, there are reasons to believe that 1964 will be a great year for the University and its alumni.

Medical Secretary To Visit Campuses
The School of Nursing will be visited in February by Ella Mae Stoneburner, SN’39, assistant secretary in the medical department of the General Conference of Seventh-day Adventists, Washington, D.C. She will be attending a workshop in Arlington, California. While at the University, she will study the school’s health education program. She is a former missionary to India.

Secretary to Call On Students Here
Students and medical personnel interested in serving overseas will be recruited by Claude R. Randolph, SM’33, associate secretary in the medical department of the General Conference of Seventh-day Adventists, during his stay at the University from February 7 to the end of the month. He will visit both campuses and may be contacted through the Placement Service office.

AMBASSADOR HOTEL will be the scene of the scientific assembly March 10-12 to be conducted as part of the 32nd annual Postgraduate Conference of the Alumni Association, Loma Linda University School of Medicine. The entire convention will be from March 6 to 12 in Los Angeles. —Courtesy Ambassador Hotel.
DONATED SUPPLIES collected in a drive by the School of Medicine Alumni Association were shipped aboard C97 cargo planes from Norton Air Force Base to Thailand. They will be used by two School of Medicine alumni, Drs. Samuel and Effie Jean Ketting, to establish a 40-bed hospital in Bhuket. The two are representatives of the classes of 1960 and 1954, respectively.

The equipment, which includes operating room furniture, a delivery table, wheelchair, beds, refrigerators and a two-million-dollar X-ray machine, was obtained through a drive conducted by the School of Medicine Alumni Association.

Loaded at Norton Air Force Base, near Loma Linda, the equipment went via the U.S. Embassy in Thailand to the Bangkok Sanitarium and Hospital. From there it went to Bhuket. - SUN TELEGRAM photo.

The equipment, which includes operating room furniture, a delivery table, wheelchair, beds, refrigerators and a two-million-dollar X-ray machine, was obtained through a drive conducted by the School of Medicine Alumni Association.

Loaded at Norton Air Force Base, near Loma Linda, the equipment went via the U.S. Embassy in Thailand to the Bangkok Sanitarium and Hospital. From there it went to Bhuket.

"Despite the unusual humanitarian aspect of this operation," said a release issued by the Office of Information at Norton, "for the employees of Norton's Air Terminal Branch the job was a routine one. Loading was expedited so the planes could continue... via Hawaii, Wake Island, Guam and Manila to Thailand with their erudition of mercy."
Academies to Be Visited By Teachers, PT Students

Schools to be visited are Fresno Loma Linda, Modesto Loma Linda, Monterey Bay and Armona Armona.

Four Faculty Members Will Attend Pastoral Conference

Four faculty members in the Division of Religion will attend the First General Conference and the 62nd annual Interdenomi- national Pastoral Conference to be February 4-6 at the Pacific Union College, Bee- kley, California.

They are A. Graham Max- well, director of the Division of Religion, Richard E. Lobert, associate professor of church history; Frank A. Moran, associ- ate professor of evangelism; and Daniel D. Balderis, instruc- tor in Christian theology.

Four of the five academies in central California in connection with a Pacific Union Conference-sponsored health week are (Lr.) C. William Habenicht, PT, as- sistant instructor; Elizabeth A. Rogers, DeEtta Eismann and Donald E. Berglin, all seniors.

Dr. Lomen will visit only the first three academies, where he will talk on the problems of smoking and tobacco in relation to health.

Last week he visited four other schools. They are Golden Gate, Rio Linda, Pacific Union College and Sacramento Union academies. Armona Union Academy was visited safely by Dr. Lomen.

Four of the five academies in southern and southeastern California will be visited by Richard T. Walden, associate professor of preventive medicine and public health.

Health weeks are conducted at academies throughout the state at different times. They are under the direction of Wil- liam H. Shephard, medical and health education secretary for the Pacific Union Conference.

Services, Firms Will Move Into New Center Next Week

Remodeling is nearing com- pletion on the Central Avenue building which formerly housed the Loma Linda Market.

New occupants will begin moving into the University- owned building shortly after February 3. They will include the Univer- sity mail service, a dress shop to be operated by Evelyn Cop- pen, a Grand Terrace, La Loma Employee Federal Credit Uni- ion, a watch repair shop to be operated by O. B. Averd of Loma Linda; First Federal Savings and Loan Association of San Bernardino and a repre- sentative of the Loma Linda Water Department.

The water department office will be under the management of Carl Therp, who should be contacted for repair work. Wa- ter bills, however, are still to be paid at Loma Linda Market courthouse desk.

Officers of the Senior Class in the School of Physical Therapy are (Lr., front row) Donald E. Berglin, vice president; Elizabeth A. Rogers, secretary-treasurer; (Lr., back row) Leslie R. Reynolds, chaplain; Ed. J. Ashley, sports activities director; Juanita W. Funk, secretary-treasurer; and C. William Habenicht, class sponsor and assistant instructor in physical therapy.

Survey Team Visits University Hospital

A survey team representing the Guidelines Principles for Physi- cian-Hospital Relationship was on visit Loma Linda Sanitarium and Hospital last week.

The survey program was established by the California Medical Assor- ciation and the California Hos- pital Association.

The team was Robert D. Mitchell, SM'C73, assist- ant and clinical professor of medi- cine.
Lodi SM Auxiliary Hears Entomologist

The San Joaquin County chapter of the Woman's Auxiliary to Lodi Loma Linda University conducted its first meeting of the year last week in the home of Dr. and Mrs. Clarence L. Leroy Jr., Lodi.

Dr. Leeary is a 1946 School of Medicine graduate.

A San Joaquin County entomologist talked about the group on the topic of "General and Current Pest Problems."

The auxiliary chapter takes its name from the professional Stockton and Lodi areas.

Sundin Attends Placement Meet

Loma Linda University was represented by Carl Sundin, director of the College Placement Council's Los Angeles area office, at an Alumni Association conducted its first meeting of the year last week in the home of Dr. and Mrs. Clarence L. Leroy Jr., Lodi.

Sundin also attended an Alumni Association meeting at the University of California at Los Angeles, Los Angeles, California.

Office To Close At Noon In LA

Beginning February 1 the University Business administration will close the Student Activity Center and the main campus will be closed from 12 noon to 2 p.m. during the regular work week.

This includes the offices of the business administrator, personnel, accounting, payroll and duplicating, according to Harold Ermisch, assistant campus business administrator.

Auxiliary To Serve Foods From Many Lands at Linda Hall

An international dinner will be served February 2 in Linda Hall in observance of the Woman's Auxiliary to Loma Linda University Alumni Association and their hostesses in Alpha Xi Delta.

It will feature exotic foods from many lands, says Mrs. Beulah Pentz, president, and a social hour will begin at 6 p.m.

During the direction of Dr. Walt, professor of physical therapy at Portland University and school of occupational therapy will be in charge.

Ode to Linda Hall

This column is open to Linda Hall students and any interested free of charge.

3 of 50 Faculty Attend Workshop

Three School of Nursing faculty members last week attended a workshop sponsored by the Loma Linda University and the campus of the San Joaquin County.

A nursing school seminar was attended by Barbara Stimson, instructor in nursing.

Crane Plane Crash

Andrews University Professor To Speak Here

**Speaker for the February 3** University convention will be Charles E. Weniger, PhD, administrator of the extension schools of the Seventh-day Adventist Theological Seminary at Andrews University.

His topic will be "The Incurable Mystery." The convention will begin at 8 a.m.

The extension school in southern California currently has about 100 students enrolled, all of whom are graduate students and most of whom are ministers. They are working toward Master of Arts and Bachelor of Divinity degrees.

Dr. Weniger counsels students on curricula and advises them in regard to degree. Extension school classes are conducted in Los Angeles and Riverside.

In addition to his position in the extension schools, Dr. Weniger also holds the title of professor of philosophy at Andrews University.

Washington, D.C.

Master of Arts and Doctor of Philosophy degrees were awarded Dr. Weniger by the Beddoes California Conference.

He received a Bachelor of Arts degree from Pacific Union College.

Listed in the 1959-60 volume of Who's Who in America, Dr. Weniger is a member of the Speech Association of America, Phi Delta Kappa and Phi Lambda Phi.

He and his wife live at 1406/7 San Bernardino Street, Loma Linda.
