**Million-Dollar Fire Guts Risley Hall**

Forces Classes into Other Buildings

---

**Student, Faculty Courage Undaunted**

State Foresters will investigate the cause of a million-dollar fire at Loma Linda University that Wednesday destroyed the three-story Risley Hall, a classroom and laboratory building of World War II vintage. No person was reported injured in the blaze.

Fire Chief Kenneth Rairden of Loma Linda Volunteer Fire Department said it is believed that a defective ceiling light fixture caused the fire, adding that the State Foresters would be called upon to determine the cause.

The fire chief declined to estimate the damage but indicated that the building is a total loss.

**Animals Saved**

University President Godfrey T. Anderson reports that the structure contained thousands of animals used in research for the University School of Medicine. They were all saved from the fire. He valued the structure itself at about $900,000 and the elaborate research equipment also destroyed by flames at more than $150,000.

The fire was first reported in the basement of the building at about 11:30 a.m. by two School of Medicine professors, Grant White, PhD, and lan M. Fraser, PhD. The fire chief stated that the fire seemed to begin in the basement, where Drs. White and Fraser sought to extinguish the fire with available equipment. For a while it seemed as though the fire was limited to the basement spot.

When flames broke through the roof, fire departments at San Bernardino, Colton, Redlands and Ontario were called to the scene. The blaze soon spread to the other floors of the structure in spite of efforts of local volunteer firemen and crews from 23 separate firefighting units.

About 100 teachers and students were occupying the building.

---

Howard B. Weeks to Head LLU Public Relations, Development Dept.

Loma Linda University Trustees have named Howard B. Weeks to fill the post of vice president for public relations and development.

The new head of the public relations and development office succeeds, at the age of 40, Jerry L. Pettis, who resigned the University vice presidency January 9 to seek election to the United States Congress.

Mr. Weeks was director of public relations for the General Conference of Seventh-day Adventists in Washington, DC, from 1956 to 1961.

At the present Mr. Weeks is writing a thesis for the Doctor of Philosophy degree in speech from Michigan State University. He graduated from La Sierra College, Riverside, and also attended Pacific Union College, Angwin, California.

In announcing the appointment of Mr. Weeks, Dr. Godfrey T. Anderson, University president, said the vice president assumed his new responsibilities Monday.

A native of Arizona, Mr. Weeks is married to Dorothy Mae, nee White, a registered nurse. Mrs. Weeks presently is a student at the University Graduate School, where she is enrolled in a nursing program which leads to the Master of Science degree. Mr. and Mrs.

Weeks have four children.

Among Mr. Weeks' professional credits are the authorship of numerous articles on public relations and communications, and of Breakthrough, a book on church public relations published in 1962.

Mr. Weeks is a member of the Public Relations Society of America, the American College Public Relations Association and the American Alumni Council, and is affiliated with Sigma Delta Chi, a professional journalism fraternity.

A School and its Alumni

By HUGH C. LOVE, DDS
School of Dentistry Alumnus President Elect

(Editor's Note: Dr. Love's article appeared in the Loma Linda University Dental Magazine, Winter 1964, which deals with the fourth annual alumni-student convention scheduled for February 19-23 at the Loma Linda campus. The outgoing alumni-president, Clifford E. Vixie, DDS, SD'57, writes about the convention in a short, practical note. His comments about alumni affairs and policies will appear in next issue of SCOPE.)

Today man lives in a material world that would hardly be recognizable to man of two hundred, or even sixty years ago. But man's heart and spirit are much the same as ever. Modern man is no better equipped internally than man of two hundred years ago. And man's heart and spirit are much the same as ever. Modern man is no better equipped internally than man of two hundred years ago.

As a student I was mindful each day of the privilege of attending the University; of my obligation to members of the Seventh-day Adventist Church the world around who have sacrificed to maintain this professional training center; and of my obligation to honor and respect the men and women who day by day have made this University a Christian center and challenge in the classroom, the laboratory, and place of worship.

Let me share with you some recollections that deepen my gratitude and lengthen my appreciation. There is balm for the "feverish ways" in the short devotional talk and prayer that is part of the day's schedule in the classroom, the constant and faithful summarizing of how truly and wonderfully we are made by a Father who created and cares for all His children; the personal dedication of the teachers who hold the opportunity to contribute to Christian education worth any sacrifice of emoluments coveted by professional men of the world; the many petitions reiterated through four years of school by those students who have shared the "hearts and burdens of the day" in time and money with us, in order to present another professional man to the world and to God for service.

One day I happened to be in the dental supply room at the School of Dentistry when a representative of a dental supply company was talking. Someone had just asked him a question concerning another school. Promptly he had volunteered that the students and faculty were very grateful for the privilege of attending Loma Linda University. He said there was no comparison to be made with other schools. Just what he had in mind I may never know for sure. But since, I have enjoyed conjecturing what he had in mind. Could he have had intimations of such memorabilia in the life of this alumnus as . . .

The teacher on the clinic floor who helped me to complete a difficult "first"—a fixed partial prosthesis whose response to my heartfelt gratitude was, "It's been a pleasure."

The gruff-sounding professor who roared in me a hasty reaction which was answered to something lighter when I later heard him humbly plead in the pulpit at church, "Lord, give us gentle hearts to know Thee better."

The many petitions reiterated through four years of being with us, "Dear God, help us to be better examples to the students and to those about us."

All of these things bring this "old grads" to the continuous sense of obligation we alumni should cherish in our own minds and hearts and which we should foster, in the minds of our successors, in the classrooms, clinics, laboratories, personal interviews, and times of worship. Let us tell of our appreciation for our former instructors, examples to the students and to those about us.

All University Hosts Fire Victims

Fire Guts
Risley Hall

Continued from page 1

ing when the fire was discovered in a basement room used as a storeroom. All of them left the building without any inci-
dent, according to Dr. Anderson. He added that many re-
inhabited the building to help in using valuable equipment and research records.

Our thousand mice, at least 900 rats, 300 dogs, many birds, and a number of other re-
search animals were rescued from the burning building the first few minutes when it ap-
ppeared that the smoldering fire would not reach such major proportions.

Like Crowded Market

As the efforts to salvage equipment, books and invaluable research material pro-
gress, the quadrangle north of Risley Hall took on the ap-
ppearance of an overcrowded market. A strong wend carried
smoke and ashes into the surrounding buildings and a heavy mist from fires hoses filled
the air.

Students and faculty mem-
bers at every point of the build-
ing waited in the firefighting
crew and the building was left
burning out to the wet lawn fire
service. Once the fire was con-
quered, the stud-
ents and faculty of Risley Hall (now dormitory) lounge and stay with the sawdust
material.

Among the many faculty members who hastily watched the walls crumble under the
fire was Raymond A. Morten,
Professor and chairman of the department of biochemistry. He told SCOPE, that a $1000 spect-
rometer which was ins-
ulted recently was too long
to leave the building. The fire, thick with smoke, also consumed $4000 turbine centrifuge and $3000 spectrograph.

Research in Jeopardy

Although much research wasrohit by the blaze, some faculty and students were
searching for papers which were salvaged from the flames and
shocks of intense heat.

Among them were Edward R. Belo,
Professor, associate clinical profes-
sor of anesthesiology; Thomas S. Mitchell and Lester
Reynolds, SM©59, associate clinical
professor of biochemistry; and Eunice J.
Stevens, assistant professor of biology.

Bloomquist Speaker

An all-university photo con-
test open to all employees, stu-
dents and faculty of the Uni-
vation. The institute is catalogued by the University
nary and Laboratories of Medi-
cine. (See History on page 1.) Risley Hall housed classrooms in laboratories which were large as well as research areas.

The structure itself, which covered 3,900 square feet of floor space, is insured at its re-
placement value, and the lab-
atory equipment at its de-
partment value, according to the University.

Research and laboratory equip-
ment worth thousands of dol-
ars was saved by the teach-
ing staff who bravely rushed to fire safety to salvage the
research.

Students from the University of Loma Linda Union Aid

organized lines, too, and
also rescued the animals from a building adjoining Risley Hall.

The staff veterinarian, Dr. Charles Hunter, had high
esteem for the students from all schools and the teaching
staff were happy to have the

One of the ostriches died
for they were rescued from a smoke-filled animal quar-

ter. Its death was due to asphyxiation by smoke.

During the four-five hours of intense outdoor, the water pipes were fully suitable...

Would-be spectators became scurrying salvage crews as it grows apparent fire is more
serious than first believed.

Hospital Invites Photogs

For Color Slide Contest

An all-university photo con-
test open to all employees, stu-
dents and faculty of the Uni-
vation was announced this week.

All entries in the contest, the pur-
pose of which is to establish a library of 25 mm color slides, must be delivered personally to the office of Richard G. Ub-

bark, assistant hospital admin-
istrator, from February 17 to 28.

Each contestant must limit
his number of entries to 20.
Slides which have already the pro-

perty of the University are not eligible for entry.

Suggested categories are: Personale, campus buildings, general campus activities, hos-

pital activities, work situations or any combination of these.

A panel of judges will eval-
utate each entry to determine
graphic quality and com-

position. First, second and third prizes, which have not yet been
determined, will be awarded.

A payment of $5 will be
made for each slide kept for

the library. Each will become property of the University and all

others will be returned up-

on request.

Decisions of the judges will be

final.

Florida Hospital

Erects LLU Alumni

Medical staff officers for 2004
at Florida Student and His-

top, Orlando, include three

alumnus of the University of Medicine.

They are Ernest J. Stewart,
SM©41, president; Carol C. Stan-
ford, SM©73, secretary; and

Warren L. Fielding, SM©55, vice

president.

President-elect is L. P. Bra-

div, MD.

Painting at World Fair

To Depict Christ's Return

Artist Howard Sanden of the Billy Graham Evangelistic As-
sociation has completed a plan-

tive oil painting which will pro-

vide the backdrop for a unique

illuminaria presentation in the Protestant and Orthodox Cen-
ter at the New York World's Fair.

Measuring 22 feet long by 10 feet high, the painting will be
depict the theme of the Seven-

venth-Day Adventist exhibit, "Je Is La Creaon."

Other elements in Illumina-

ria include stereoscopic sound-

moving light and a three-di-

mensional treatment.

These will be coordinated to
create a vivid presentation of

events foretold in Scripture to

place at the end of the world.

The active presentation will be
brief — not longer than three and a half minutes with

approximately a half-minute in-

terval between performances. The Scriptural message, Ad-

ventist officials say, will be un-

diluted.

University administrators lost no time in taking steps to continue an uninterrup-
ted class schedule for stu-
dents. They called a meeting only a few hours after the

blaze was extinguished to determine where students would meet for teaching. It was

determined that Risley Hall would be used for teaching.

Other departments and

schools are making room for classes by moving classes on the science,

chemistry and physics lab-

oratories until rearrangements can be made.

The only appointments

that will not meet at regular time are several laboratory sessions.

The students are now starting to study many other classes on the campus and will use the labs in other buildings to accommodate their stu-
dent programs.

At the committee which reviewed the fire damage, Chairman John E. Peter-
son, MD, assistant dean of the School of Medicine; Geoffrey T. Anderson, Phd, University President; Robert

L. Con, vice president for finance, and Howard W. Weeks, newly ap-

pointed assistant dean for public relations and develop-

ment, met in the Library of the School of Medi-

cine and the Graduate School.

Mr. Con says he will not be possible to determine damage or to determine the extent of any part of the building is usable until after inspec-

tion.

How to evaluate hymns and

hymn tunes is discussed and illustrated in "Protestant Hymnody," by

Reynolds in A Survey of

Christian Hymnody, (New York: Holt, Rinehart

and Winston, 1963). The

hymns and tunes used as illus-

trations are from the cathedral and the camp meet-

grounds, the Lyceum, and the home or personal choic-

e, thought from the previ-

ous period of American hymnody; and (5) American hymnody.

The development of Christian hymnody through five major areas: (1) early

church songs; (2) the Lutheran church's chorale; (3) psalmody; (4) English hymnody; and (5) American hymnody procedures.

The author states that there have been more well-edited hymnals published during the past thirty years than in any other period of American hymnody. Beachley among them is The Church Hymnal published by the Seventh-day Adventist church in 1951.

The "Note to the Student" explains material about the hymns and hymn tunes of examples of the most frequently used hymnal common, long and short — so the reader may have a deeper appreciation of the poetic ex-

pression of hymn.

University Fire Covered by Many

Photographers were in abundant supply at the scene of last Wednesday’s fire. The entire SCOPE staff was involved in gathering information which poured in for the story of the fire in cooperation with the University Public Information Officer John Parrish.

Credit for SCOPE pictures of the disaster is due Ellis Rich and Everett L. Mason, photographers of the University Audiovisual Service; Oliver L. Jacquez, director of public relations; Jerry Wiley, manager of new publications; Mr. Parrish and Tor Lider, editor of SCOPE.

Mr. Jacquez, with his ever-ready polaroid camera, braved a precarious climb to shoot the scene of devastation on the third floor of Risley Hall. The page one photo was taken by the SCOPE editor from the top of the anatomy building for an all-encompassing view of the situation. The lead story on page one was written by the editor.
Flames persist and penetrate roof.

Registering one of the many who helped fight fire is Gertrude M. Williams from the personnel office.

Dr. Hayden Lectures At Universities In Norway, Sweden

Jess Hayden Jr., DDS, PhD, assistant professor of anatomy, recently has completed a lecture tour of dental schools in Sweden and Norway, including the Eastman Dental Institute in Stockholm. The tour was by invitation of the schools and the United States Educational Foundations in Sweden and Norway.

A Fulbright-Hays visiting professor at the Royal Dental College, Aarhus, Denmark, Dr. Hayden is on a leave of absence from the University.

The subject of his lectures was the "Anatomical Basis for the Administration of Anesthesia in Dentistry for Children." His presentation included the film "Local Anesthesia in Dentistry for Children," which was produced by Niels B. Jorgensen, DDS, Loma Linda University professor of oral surgery.

The remainder of the presentation was based on research done by Dr. Jorgensen, studies related to Dr. Hayden's doctoral thesis and further investigations carried out at Loma Linda University.

Dr. Hayden also gave a report on investigations concerning mechanisms of pulp healing and pulp reactions to medications. It was based on histologic investigations carried out by Clinton C. Emmerson, DDS, University professor and chairman of the department of pedodontics, research by Dr. Hayden and some recent research performed at the University of Michigan.

The staff at Aarhus, says Dr. Hayden, "savors"ly received at a preliminary showing a color sound movie, "Jet Age Pedodontics."

Circumstances twist meaning of once promising sign into irony as students carry valuable equipment to safety.

Association Opens Loma Linda Branch

Dedication ceremonies Tuesday at 10 a.m. will mark the official opening of First Federal Savings & Loan Association offices in Loma Linda at 24885 Central Avenue.

"Everyone is invited to visit our new offices during the opening. To make sure everyone has an opportunity to come in, we are making a two day affair of it with refreshments being served by the Loma Linda Business and Professional Women's Club Tuesday and Wednesday," J. W. Snyder, president of the association announced.

Free educational gifts will be given to those who stop in any day during opening week.

"We are extremely anxious to bring this full-service office into being for the convenience of the many First Federal customers in the Loma Linda area," Snyder added.
The University Trustees added two men to the institution's governing body at the January meeting. The trustees, Ethel E. Gillis and Frank N. Spangler, were accepted the appointment.

The Trustees also introduced William M. Kostad, acting La Sierra College president, as an ex officio member of the board, said Robert E. Osborn, secretary of the Trustees.

The appointment of these two new Trustees brings the membership of the Trustees to 38, Chairman Karl T. Buhler, of Camp Pendleton, a vice president of the General Conference of Seventh-day Adventists.

The manager of Voice of Prophecy, Mr. Gillis has previously held the position of Assistant Trustee, in which capacity he was the chairman of the Trustees' development committee and a member of the finance committee.

Born in Oakland, California, 1903, Mr. Gillis is married to Reba C., nee Thruston. They have one son, Walter Jack Gillis, who was born in Seoul, Korea, while his father was the secretary-treasurer of the Korean Union. He held a 3-year position in the Korean Union and for ten years at the Voice of Prophecy.

Mr. Gillis is a graduate of Washington State University and an undergraduate of Pacific Union College. He is a member of the Glendale Rotary Club.

Frank Spangler, a private investor, was born in New Jersey. He says of himself that 'I have enjoyed most of my life, both in the lumbering and milling business and farm.' He is a member of the executive committee of Southeastern California Conference and the Pacific Union Conference committees. Mr. Spangler lives in Hemet, California, where he has a farm. He has three children, one of whom is an entomologist.

Dr. Landeen was named acting president of La Sierra College after the resignation of Police A. Meier, PhD, the college president and member of the University governing body. He has been professor of history and chairman of the Graduate School department at Loma Linda University since 1963.

Acting President Landeen is a veteran of over 30 years in teaching and education administration. Formerly, he was president of the Institute of Technology in the history department of Walla Walla College in Washington Place, Washington, in 1933, he joined the board of directors of Marquette University School of Dentistry, where he has been on the faculty since 1966.

Kostad, graduated from Marquette University Dental School and did graduate work at the University of Southern California Dental School.

He was professor of public health dentistry at the University of California School of Public Health, Berkeley, from 1948 to 1958. During this time he also served as chief of the division of dental health in the California State Department of Public Health.

In 1949 and again in 1950 he was a representative to the World Health Conference on Childhood and Youth. At Loma Linda he will write articles for lay and professional journals, lecture to various groups, numerous societies, including the American Association of Public Health Dentists, the Federation Dentura International, and the American Dental Association.

Kostad is a member of several societies, he is a member of the Kern Philharmonic Society, the Rotary Club of Bakersfield, the Medical Society of Los Angeles and was for four years a Boy Scout Master.

Staff Member To Address University Sponsored Meeting

"Eye Muscle Problems" will be the topic of a lecture presented by George K. Kambara, MD, clinical professor of ophthalomology, February 20 at the Agnes Hines Country Club, Grand Terrace at 8 p.m.

Arranged by the lecture is one of nine sponsored by the Loma Linda University School of Medicine, Division of Continuing Education, in association with the Friends of the Fernside chapter of the American Medical Student General Practitioner.

A reception hour at 6:30 and a dinner at 7:15 p.m. will precede the lecture.

All lectures in the series are scheduled for the third Thursday of each month.

Alumni Featured At Nevada PTA

A question and answer period was held recently by Lois B. Trew, SMFA, obstetrician and gynecologist, at a meeting of the Battle Mountain, Nevada Alumni Student Association.

The session followed the showing of two films on the subject.

Born in China of medical missionary parents, she served a residency at Los Angeles County General Hospital after graduating from Loma Linda University.

In addition to running a private practice, she is on the board of directors of the American Cancer Society, Washoe County unit, and is a member of the Reno Business and Professional Women's Club.

Richard Beltz, PhD, associate professor of biochemistry, and School of Medicine physicians Thomas S. Mitchell and Lester L. Mohr examine scorched remains of research data.

Roy Garn to Conduct Course

The School of Dentistry has announced a continuing education course on "Emotional Appeal" to be conducted March 2 and 3 by guest lecturer Roy Garn, editor, author, educator and executive.

The course is open to all interested persons and will be conducted each day from 9 a.m. to 12:30 p.m. and from 2 to 4 p.m.

Mr. Garn, executive director of the Emotional Appeal Institute in New York City, is author of "The Magic Power of Emotional Appeal," now in its eighth printing and the result of more than 17 years of research.

CHRCH CALENDAR

FRIDAY, FEBRUARY 11
ROY GARN - University Church - MV evening, Mrs. Ernest von Pohle, of Tempe, Arizona,' wife of 1936 School of Medicine graduate, "How to Have a Happy Marriage." 8:30 and 10:45 a.m.

WHITE MEMORIAL CHURCH - Campus fellowship, A. Graham Maxwell, PhD, director of the Division of Religion, "Why I am a Seventh-day Adventist." Oliver Chapel, 7:30 p.m.

LINDA HALL - MV meeting, "Serve God, Missions," a play. 7:30 p.m.

SUNDAY, FEBRUARY 14
HILL CHURCH - Hour of worship. Pastor Wilbur K. Chapman, "Meditations of a Good Man." 8:30 and 10:45 a.m.

UNIVERSITY CHURCH - Hour of worship. James M. Bond, associate pastor. 8:30 and 10:45 a.m.

WHITE MEMORIAL CHURCH - Hour of worship. Pastor Donald O. Reynolds, "Children's Question Without an Answer." 10:45 a.m. - 11: Vincent Alfond, 7460, minister of music, "Bands Before and After Creation." 1 p.m.

COMMITTEE MEETING - School of Dental executive committee, LL: 7 a.m.

HARRISON S. EVANS, MD, (right) was the guest of Art Linkletter on nationwide CBS radio and television this week. The University professor of psychiatry explained for the "House Party" program's vast daytime audience factors of habit and human nature that combine to make cigarette smoking hard to stop. Unshakable determination to end the dangerous habit was foremost among his suggestions for those who would like to quit.

Events Calendar

ROY GARN Visiting Professor

A former editor of Parents Magazine Press and the recipient of many awards, he holds a Presidential Citation for the use of emotional appeal techniques in helping to rehabilitate the physically handicapped.

His lecture engagements include appearances before many dental societies. In addition, he has been a frequent consultant before the American Academy of Dental Practice Administration.

Topics to be discussed at the two-day session include "Self-Preservation and Money as Activating Emotional Appeal," "Romance as an Emotional Appeal," "The Amazing Benefits of Questions in Professional Relationships" and "The Six Ways to Use Questions in Professional Relationships."

Persons wishing to take the course should contact the School of Dentistry, Continuing Education Division.

No Citation for Hospital Visitors, Only Employees!

Plant protection officers will not issue citations to Loma Linda University visitors for violations of parking regulations on the hospital grounds.

Only courtesy notices will be given. Ira L. Law, superintendent of the plant protection department, explained that without the patronage of these persons the administration would not issue citations to Loma Linda University Hospital visitors.
