Students Begin Registration; Get Acquainted Socially Is Planned

Dr. Graham, In each of these courses, students will have opportunities to develop skills that are valuable in many fields.

Instructor: A.Graham

Instructor: Betty R. Stirling, PhD

Instructor: Thomas A. Liston

Instructor: Dr. Prerau

Instructor: Robert E. Cleveland, PhD

Instructor: Dorothy H. Walter, Lora W. Welch (in absentia), and Norma G. White.

The class was introduced to Dr. Godfrey T. Anderson, PhD, president of the University, by Robert R. Cleveland, PhD, vice president for academic affairs, and presented for the opening of the event by Dr. Paul Staufer, PhD, dean of the graduate school.

A reception for the graduates will be held in the Griggs Hall patio following the commencement.

ELEVEN hundred students are expected to enroll in the various Loma Linda University schools and curriculums during fall registration September 13.

Registrar’s office records show that hundreds of students have already enrolled in the registrar’s office. The registration process will continue through the following day while students register for courses.

Registration stations for students include, among others, several locations within the university and consultations with students in their homes.

Classes begin for most students on September 14.

Also included in the opening was the presentation of the first week’s schedule of events for students.

Full-time Faculty Will Attend Annual Reception

The University will hold its annual reception for full-time faculty members, which will be held at the University dining hall on September 27, from 7 to 9:30 p.m.

The purpose of the informal occasion will be to welcome new faculty and renew acquaintances.

Goffrey T. Anderson, PhD, president, and Mrs. Anderson will serve as host and hostess for the event.

Computers for MD’s Topic of Course

The IBM Systems Research and Development Center in Los Angeles is sponsoring a course, "Computers for Medical Doctors," to run from 9 a.m. to noon Sunday, September 20, to noon Monday, September 21.

The course will be taught by seven IBM scientists, who will cover topics such as computer technology, data processing, and clinical decision making.

Anyone interested in more information about the course may call Dr. Evan B. Scott, extension 220, or the Scientific Computation Facility, ext. 596.

SEVENTEEN GRADUATE students received diplomas at September Commencement.

Mr. Prerau is the founder of the J. K. Lasser’s Tax Institute, for students in the School of Business of Columbia University and Columbia University Law School.

Engineering Plans For Roll Overhead Now Under Way

A four-lane roadbed overlap on Anderson street north of the campus is now in the engineering stage and should be complete by the time the Medical Center opens in early 1965, according to University and county officials.

In the meantime, pedestrians, including students, will be similar to those traveling the Southern Pacific tracks on Waterman, at the western edge of Loma Linda University.

Route of the project will take it just west of the buildings occupied by the University Printing Service, and purchasing, inventory, and maintenance facilities.

The southern terminal of the overlap will be at Stewart street and traffic moving directly into Anderson street at that point. The northern terminal will lead traffic into Anderson street north of the dairy.

Until the overlap is built, traffic congestion during rush hours on Anderson street will continue since the railroad tracks are a flashing,” they emphasize, “do not cross.”

LOMA LINDA UNIVERSITY COMMUNITY EVENTS

Event Classes, First Semester — 1965-66

Maxwell, PhD

Professor of English

Tuesday, 7-9 p.m.

Tuesday, 7-9 p.m.

Griggs Hall 210

Department of Sociology and Anthropology

“The Family”

Instructor: Betty R. Stirling, PhD

Assistant professor of sociology

Tuesday, 7-9:30 p.m.

Griggs Hall 1B

“Language and Culture”

Instructor: John W. Ellett

Assistant professor of anthropology

Tuesday, Monday and Tuesday.

Divinity Classes

“Righteousness by Faith”

Instructor: Rev. G. Graham

Maxwell, PhD

Professor of New Testament

Tuesday and Thursday, 7-9 p.m.

Griggs Hall 2A

“Theology of Righteousness by Faith”

Instructor: Fred H. Osborn

Assistant professor of applied theology

Tuesday and Thursday, 7-9 p.m.

Griggs Hall 28

“Mexico’s Golden Beaches,” film lecture by Col. John Craig, will be presented September 18 in the Loma Linda University 1965-66 schedule of events.

It will be the first of nine programs to be presented throughout the school year. All programs will be presented on Griggs Hall at 8 p.m. Season passes, available from the registrar’s office, must be presented at the door.

A nominal fee is charged for the passes — $1.00 per series for student families, $2.00 for faculty and community families.

Other features include the Carl Detwelt Ensemble, performing October 2 University Talent Night under the direction of Pat Hicks, will be presented October 16.

On November 30, State Midgets, will be presented October 22.

On November 15, Band, will be presented October 23.

On December 2, orchestra, will be presented October 24.

On December 3, Band, will be presented October 25.

On December 4, Band, will be presented October 26.
The essential thought underlying nearly everything that one would want to say about the Christian concept of education is that God is the teacher. It is He who establishes all truth; it is He who wills that men shall know the truth and seize it and use it; He even allows us the supreme privilege of helping Him in partnership both to teach and to learn.

The individual person is His, just as the truth is His; and all teachers, administrators, trustees, students, ministers, and all the rest do what they do because God, first of all, does what He does.

But, in reality, teachers come to know very clearly what it means to say that God is the teacher as they pursue the difficult, the disappointing, and wonder how it is that when they clear away the underbrush, so to speak, and open the way, the mind of the student seems suddenly to be flooded with light far more striking, deeper, and more meaningful.

Yes, God is the teacher, and because this is so all teaching must lead on to the recognition of God. Teaching must be true and it must be whole. It must lead to the university schools, summer like this to take stock of the greatest enterprise on earth by many definitions, and many
t which one generation of men offers shape and substance to the next. This enterprise is driving urge to have more to the world, to have less and less to the uncommitted, to send out the uncommitted, to keep the peace when racial and problems. For example in the application to medicine, even the most recent edition of the American Medical Association's diagnostic manual is accompanied by a pamphlet of immunity and requiring the search for new measures of control. One could go on to describe the many resources, the many confusing problems calling for the attention of the mind and the creative minis to the record of the types which society expects education to nurture.

There are many different and creative people, each distinctly talented, and each in his field is needed, because through education there are traits common to the innovators, the men of originality, because there are elements of a disciplined cre from, the best and the brightest, are the men of program and battle, the war between the contending and underbrush, so to speak, and open the way, the mind of the student seems suddenly to be flooded with light far more striking, deeper, and more meaningful.

WANT A CHANGE of pace? Play a game of basketball on the courts next to the swimming pool.

ALMOST EVERYONE enjoys an occasional game of baseball. Though occupied most of the time with their classes, these students are no exception.

University Plans Varied Activities

In addition to the varied recreational activities available on campus, the University schedules a number of cultural and social activities each year. Guest artists and lecturers perform in a series of ten Saturday night programs selected for their interest and value to the students. Religious activities are planned for the students and include the fall and spring weeks of prayer.

Dean of Students Laverne E. McClain announced that the traditional University informal social, semiformal banquet, and field day will all be held again this year. The Dean of Students is a new office created to help the University serve the students more efficiently. All student activities are coordinated through the office and the dean of students also serves as liaison officer between the University and the students.

The schools within the University plan additional activities for their students such as the sophomore-freshman picnic sponsored by the Schools of Dentistry and Medicine.

Photos by Robert A. Kreuzinger

FOUR TENNIS COURTS on Stewart Street get a heavy workout every day. All University students are welcome to use these facilities.

PREPARING TO RACE across the swimming pool are (1. to r.) Ronald A. White, GS; James P. Barrett, PT '66; David L. Johnson, SD '69; and Walter J. Hasselbrack, PT '67. The pool is open Sunday-Friday from 11 a.m. to 8 p.m., and Friday from 11 to 4.

UNIVERSITY STUDENTS are entitled to use the two, new volleyball courts which have been installed on Stewart Street. The courts close one hour before sundown on Friday and open one hour after sundown on Saturday.
Two Medical Freshmen Return Following European Adventure

By John E. Crowder

The idea started me. "Take a trip to Europe? How could I do it?" But last spring when I was able to secure airline reservations at the last minute for the dates that I preferred, I decided to go. In June I left my post as managing editor of University SCOPE to make this dream travel come true. It was the ideal time to go, I thought, before beginning medical school in September.

The writer left New York and joined a friend, Paul John-son, also a freshman medical student, in Luxembourg. Paul completed the requirements for a Bachelor of Arts in history at La Sierra College last February and began his trip at that time. Two months visiting almost every country in Western Europe was of special interest to us because we were able to visit relatives and friends. While in Sweden we spent a Sabbath at the Adventist sanitarium in Bupuncture, near Goteborg.

Some of the persons there were associated at one time or another with Loma Linda University or the White Memorial Medical Center. They are Norman Bloomfield, MD, and his wife Lillian, SN '55; Anders Ottearson, MD, and Eila Carlsted. We had planned our trip so that we would be in the Northern-European Division Young People's Department with the ATEC in the First Memorial Be Phillips, secretary of the Missionary Department of the General Conference, a colored woman who is a native of Sweden, on our trip to Stockholm.

We especially enjoyed the musical and artistic creations provided by the Swedish people.

A Tour of Russia

The climax of the entire trip was a bus tour of several cities in eastern Russia. For 10 days we visited in Leningrad, Novgorod, and St. Petersburg, having the opportunity to gain an understanding of the culture and way of life of the Russian people. About half of our time was spent in trains, but we were free to travel on our own.

British Airways returned us to London where we were rehoused at the hotel and asked to buy your sports coat or shirt or trousers. Of course, you would do when a young Russian student studying in the United States? Though Paul had seen London at the beginning of his trip, the city was new to me and I appreciated his guide as a help. We were fortunate to secure inexpensive accommodations in a temporary youth hostel just two blocks from Buckingham Palace.

A Hosta Encountered

On our way to Belgrade, Yugoslavia, Paul stopped over for a few days at the Seminary Adventist Church in Belgrade.

Extensive Travel

Since Paul began his trip five months before I did, his 20,000-mile adventure took him to 37 countries in Europe, the Middle East and North Africa. We traveled 20,000 miles in 19 European countries.

During his first visit to London, Paul stayed at the Strand, Berkshires. It was a welcome sight for him to meet old friends from La Sierra College who were studying abroad for a year.

Artifacts such as the Morgan map and the Rosetta Stone in the British Museum held a special interest for Paul since he had studied about them at Loma Linda University.

Computer Facilily Adds New Services

The Loma Linda University Scientific Computation Facility has added several new services to those already available to University faculty members, personal and students. A computer programmer has been written for scoring objective examinations and assigning grades. Called the grad system, it is available to all departments.

A Cim Corp plotter has been purchased for the ICS computer to produce graphical and pictorial output. A number of standard statistical programs are now available as part of the program library. These programs can provide certain frequently used types of statistical analysis without any programming expertise on the user's part. Data can be processed for standard deviation, mean, correlation coefficient or t-test. Other routines will be added as the need becomes apparent.

For further information or demonstration of these services call the Scientific Computation Facility.

CONSTRUCTION IS UNDER WAY on facility to provide classroom space for 1300 children and youth of the University Seventh-day Adventist Church. The unit, adjacent to the church, will provide a youth chapel, 17 classrooms, and 3 offices. The builders are Nelson Bergwall and Ray Kneeney of Loma Linda.

LIMITED EDITION!

EDUCATIONAL BUILDING for the University Seventh-day Adventist church, as envisioned by Architects Donald and Robert Waldo. Two story structure will possbly centralization of Sabbath School departments now meeting at widely separated spots on campus, in addition to other educational and recreational uses.

Sierra College. For a beginning traveler there are few sights as inspiring as the Pan-Belgrade federal building, the changing of the guard at Buckingham Palace.

In Yugoslavia

Although Yugoslavia is a Communist country, it is not considered to be behind the "Iron Curtain." The language problem, however, proved to be the greatest barrier.

In Belgrade Paul found the address of the Adventist church in the Seventh-day Adventist Yearbook and then a proceeded to the proper direction. The man indicated he that he should ride a certain bus. As he passed Paul showed the ad-

New Science-Math Building In Use By Academy Students

Inauguration of a new science and mathematics building highlights the beginning of a new school year at Loma Linda Union Academy. According to Elmo J. Dogg, principal, the new structure is the first unit of a new group of buildings that will form the southern end of a new campus quadrangle. It was built at a cost of $125,000, including air conditioning, he said.

The one-story building houses four classrooms and two laboratories. Demonstration tables and project alcoves are included in the classrooms. The physics laboratory provides equipment for 20 students at one time and the chemistry laboratory for 30 students in five sections of 6 each.

The biology project area contains an aquarium and a growing area, and eventually will include an orchard and humidity and temperature control.

The new facility also features a photographic dark room and three teacher's offices. Conduit has been included to provide for future installation of closed-circuit television for classroom instruction.

Two Social Workers Renew Degree Work

A send-off breakfast was held August 31 for two student social workers who have been spending the summer at Loma Linda University Hospital in social service. Paul Rollins has taken the first year of work toward a Master of Social Work degree at the University of California at Los Angeles and he will complete requirements for the degree this year.

Lorna Altmiller, also a Pacific Union College graduate, will take work toward a Master's degree in social work at the University of Southern California, sponsored by the hospital.

The breakfast was held at the home of Amy E. Errion, director of social service at the University hospital.

School of Dentistry Offers Course in Letter Writing Art

The continuing education office of the School of Dentistry will present a communication course in letter writing taught by guest lecturer Fred Kirschner September 26.

The course will include instruction in letter layout, a review of letter appearance principles and basic techniques of letter writing.

Mr. Kirschner is vice president of the national business division of Creditors Service, Inc., in Detroit, Michigan, and is in charge of west coast operations of California Collection Agency, Inc., in San Francisco. Experienced in the collection field for over twenty years, Mr. Kirschner has taught courses (particularly relative to collection letters) at Southern Illinois University, Purdue University and Long Beach City College.

Enrollment in the course will be limited and the $5 fee must be paid before the reservation deadline September 12. Instruction will be from 9 a.m. to 5 p.m. in the School of Dentistry.

The average cost to the short-term general hospital for each day a patient spends in the hospital is $59.50. For that sum, the hospital provides the complete treatment, food, and nursing service around the clock.

A good tax shelter program may often sound rather far out. But a little looking into the equipment in an almond ranch? Additional tax advantages and more profits? There are no management problems in acquiring this equipment. A purchase and lease-back agreement. Your lease payments are tax deductible; you gain an lump sum when the property is re-depreciated. A new tax deduction program in the various schools, divisions, and curriculums for the 1965-1966 school year. They are:

Graduate School
Walter T. Sand, PhD, assistant professor of psychiatry from Doctoral program at University of Maryland.

School of Dentistry
Donald Peters, DDS, instructor in oral medicine, from Mansfield, Ohio.

Edwin Shroyer, DDS, instructor in restorative dentistry; from part time teaching, Aravelle College, DDS, instructor in restorative dentistry; from Long Beach, California.

School of Medicine
Dick Koons, MD, PhD, assistant professor of pharmacology; from Doctoral program at UCLA.

J. Mullen Kootsey, PhD, instructor in pathology and radiology; from Doctoral program at Brown University.

L. Burton Parker, MD, associate professor of physical medicine and rehabilitation; from Orlando, Florida.

Willie J. Swan, PhD, assistant professor of biochemistry; from University of Florida.

K. Bruce Wilson, PhD, assistant professor of biochemistry; from research fellowship in biological chemistry at Harvard University.

Allen Stratzer, PhD, assistant professor of pharmacology; from research fellowship in biological chemistry at Harvard University.

William H. Taylor, MD, assistant professor of surgery; from mission service in Tanzania.

Walter L. Taylor, MD, FACS, associate professor of surgery; from internship in Swedish Hospital, Seattle.

School of Nursing
Geoffrey Durczek, instructor in nutrition, from University of Tennessee health department.

Jeanette Earnhardt, instructor in nursing, from Orange County health department.

Barbara Frasier, instructor in psychiatric nursing; from Master's program at University of Maryland.

Elise Hinn, instructor in psychiatric nursing; from Iota Pi Delta, Philadelphia, Pennsylvania.

Miriam Kier, instructor in medical-surgical nursing; from Southern Medical College.

Beverly Randolph, instructor in medical-surgical nursing; from Master's program at Loma Linda.

Mary Fronko, instructor in medical-surgical nursing; from Master's program at Loma Linda.

Ruth White, professor of nursing; from leave of absence.

School of Nutrition and Dietetics
Patricia Black, clinical instructor in nutrition and dietetics; from Master's program at Loma Linda.

Division of Public Health
Edna Johnson, PhD, assistant professor of public health; from division of Creditors Service, Inc., in San Francisco.

A local office for your Real estate and Insurance problems.

University Greets New Additions
To Full-Time Faculty Ranks

Twenty-six new members have joined the full-time faculty in the various schools, divisions, and curriculums for the 1965-1966 school year. They are:

Division of Religion
Kenneth Perry, assistant professor of applied theology, from Andrews University.

School of Physical Therapy
Harold Shull, instructor in physical therapy.

Dietetic Interns Begin Program
With Orientation

The new class of eleven dietetic interns has just completed two weeks of orientation prior to beginning their internship.

During this period the students were given a view of various fields open to the qualified dietitian, and tours were arranged to acquaint the student with University life and the hospitals participating in the internship.

Lectures, panel discussions, role playing, and field trips highlighted the importance of ethics and interpersonal relationships of the dietitian to the physician, administrator, co-workers, patients, and students.

Guests at a welcoming luncheon included the importance of dietitians and dietetics and the great need for dietitians in the developing countries.

The names of the dietetic interns are:

2. Sharon Ulrich, Andrews University.
3. Mary Shuff, Andrews University.
4. Susan Black, Andrews University;
5. Bennett Chilson, Union College;
6. Harri Joan Hohensee, Union College;
7. Edna Johnson, instructor in nutrition, from University of Southern California; and
8. Shirley Brown, La Sierra College.

They will include animal cages and equipment in on an almond ranch? Additional tax advantages and more profits? There are no management problems in acquiring this equipment. A purchase and lease-back agreement. Your lease payments are tax deductible; you gain an lump sum when the property is re-depreciated. A new tax deduction program in the various schools, divisions, and curriculums for the 1965-1966 school year. They are:

Five Will Receive Radiologic Awards

Five students will receive radiologic technology certificates from Loma Linda University in presentation ceremonies to be held September 15 in Chapel Village, Los Angeles.

Speaker will be Dr. J. Lansing Toshmich, associate professor of radiology and chief of radiologic and diagnostic services at White Memorial Medical Center.

Certificates will be awarded by Robert R. Cleveland, PhD, University vice president for academic affairs; Walter L. Stiles, MD, professor and chairman of the department of radiology, School of Medicine, who will present the awards; and Dr. Thomas Shilton, who is also medical director of the radiologic technology curriculum.

A reception in the church fellowship will follow the 4 p.m. presentation ceremony, according to George Mikami, acting education director of the school.

Students who will receive certificates include Glenn W. Ewing, James Fleming, Luz S. Lauter, Darrell C. Tobe, and Udom Valasathan.

The radiologic technology curriculum is organized as a two-year college program leading to the certificate. Instruction is conducted in cooperation with Loma Linda University School of Medicine, and is approved by the Council on Medical Education and Hospitals of the American Medical Association.

MADISON: Excellent opportunity for new graduate.

Unique benefits.

TENNESSEE:

PATHOLOGIST: Rumford, Maine. Partnership available. If desired.

CONTACT: Mr. D. C. Cates from Loma Linda University.

MALDEN: Excellent opportunity for new graduate.

Contact: C. G. Byson, 8110 San Juan Drive, Redlands, California.

BALE: Desires radiologic technologist for new hospital. New hospital.

CARRINGTON: Community would like to add another physician. Office available due to failing health. Would sell both.

POLAND: Death of two physicians.

Greater opportunity for new graduate.

Next medical practice. Will build new office and this is not a buyout situation. Trade area of 5,000 miles.

Bushton: Community has need for part-time dentist and this is not a buyout situation. Nearest dentist 30 miles.

S.D.A. dentist.

DENTISTRY: Lawton, Oklahoma. Practice goes out of business.

Contact: C. G. Byson, 8110 San Juan Drive, Redlands, California.

Next medical practice. Will build new office and this is not a buyout situation. Trade area of 5,000 miles.

The radiologic technology program is offered under the direction of J. W. White Memorial Medical Center.

dress to the doctor who nodded this was probably a fact.

After several minutes of riding the bus stopped and the driver spoke to another passenger.
The person noticed to Paul to follow him.

Paul followed the man through the streets and he

asked, "Do you speak French?"

"Touch," was the man's only reply.
The person finally came to a house and the boy was knocked on a

door. The gentleman who an

swered the knock introduced himself as the Seventh-Day Ad

ventist and Paul's
guide departed.

"Why, no. We've never seen him before," the pastor replied.

On Sabbath, Paul was asked to speak in the church and he

willingly obliged.

The Mediterranean Lands

The first five months were filled to the brim with visits to

such interesting places as the Acropolis in Athens, Jerusalem,

in, the Louvre in Paris, and the Colosseum in Rome.

One city that held important meaning was Damascus, Syria.

It was here that Saul of Tarasus was healed as Ananias laid

his hands upon Saul in a house on the street called Straight (Acts 9:10-12).

His first day in Damascus was drawing to a close when Paul
declined to leave his hotel to take a walk. At a first

glance the city appeared to be very similar to the modern
"villes" of many Islamic mosques rising gracefully above the

streets. No one could observe, however, the streets were

narrow and crowded with people.

Paul passed all kinds of little alleyways of the business district and eventually he was

attracted to a small bookshop. While he was window shopping, the clerk, a young

urchin about 30 years of age, came outside and

invited him to come inside to browse.

Paul was glad to find someone who actually talked to him.

When the clerk, Tony Dov, learned that Paul was accepted in

the University of California, he asked if he would attend the University of California.

"No," Paul said, "I will attend Loma Linda University." This statement

made Tony asked, "Are you a Seventh-Day Adventist?" Paul

and, of course, Paul answered affirmatively.

Tony was also a Seventh-day Adventist.

After several minutes of riding the bus stopped and the

driver spoke to another passenger.
The person noticed to Paul to follow him.

University Personnel Participate In American Hospital Meeting

Loma Linda University personnel were among more than 10,000 hospital representatives attending the 67th annual meeting of the American Hospital Association in San Francisco August 30 - September 2. Charles W. Gooch, president, University hospital administrator, and the assistant hospital administrator, Richard G. Ubbink, Miss M. King and Gary J. Rood, were among those who attended from Loma Linda.

Also included were Helen B. Austin, director of hospital nursing service; Faye F. Brown, director of hospital records administration and the records administration curriculum; Dorothy F. Beltz, director of volunteer service; Dean Montal, purchasing agent; and Dorothy A. Mathisen, University community relations office.

Robert H. Dunn, MD, division of public health, attended as former administrator of the Rangemont Seventh-day Adventist Hospital.

Robert B. Mull, commissioner of the Social Security Administration, was the principal speaker at the opening general assembly session. Later in the week the group heard other government officials and experts in the field speak on the administrative aspects of the Social Security Administration and the voluntary hospital systems.

Annually the AHA convention is the world’s largest gathering of hospital and health care personnel.

Faculty Retreat Is Scheduled at Pine Springs Ranch

A retreat for full-time faculty is planned for October 1 and 2 at Pine Springs Ranch, announced Robert E. Clevely, PhD, vice president for academic affairs.

For those arriving Friday afternoon, other recreational facilities including horseback riding and swimming will be available.

Theme of the retreat, Christianity, will be carried through the Friday evening family vespers in the lodge at 8, the Saturday morning meeting 9:30 - 12, the Saturday afternoon meeting at 3:15 and Saturday sunset worship.

Planning committee for the retreat includes Fr. Gerald, chairman; Harold White, Los Angeles campus business administrator; Oliver L. Jacobs, director of University of Southern California; A. Graham Maxwell, PhD, director of Public Health; Gayle H. Nelson, PhD, associate professor of anatomy, School of Medicine; George J. Nelson, PhD, associate professor of chemistry, School; Lydia M. Simonen, administrative assistant, University hospital; Richard Austin, director of hospital administration, University hospital.

TREES HUGE BOILERS are installed in the new central heating and cooking plant which will serve the University Medical Center and other principal campus buildings. The Wright high pressure boilers show the attractive structure now being completed (below) with two Carrier chillers with a combined cooling capacity of 3,300 tons. These chillers will be installed later, bringing total capacity to 6,600 tons, according to J. J. Norell, registered engineer for the University.
