It is appropriate that we review occasionally the series of episodes leading to the birth of this medical-educational institution. We are inspired as we see how the Divine hand helped to make possible the purchase of land for the University in 1905.

We marvel at how the pioneers acted on faith to assure a large financial land in the debt purchase and at their extraordinary courage. While we have progressed to some points beyond the founders’ fondest dreams, we have not yet realized the fullness of their vision, which encompasses schools of theology and liberal arts, in addition to the work in the healing arts.

Past today await frontiers yet untamed, citadels yet unbuilt; todays and tomorrows that will be challenging, trying, exciting, disheartening, rewarding. Thus it was the founders© fondest dreams, we have not yet realized the theology and liberal arts, in addition to the work in the unbuilt; todays and tomorrows that will be challenging,

Titled "Asexual Multiplication of Tapeworms," the article reports the results of research conducted by Dr. Specht and Dr. Marietta Voge of medical microbiology and parasitology of the University of California, Los Angeles. While a student at La Sierra College, Mr. Specht accidently discovered the fact that the tapeworm, previously assumed to have a single life cycle, may have two life cycles. "In addition to solving life cycle," he states. An important aspect of his work was the development of a system for trapping and preserving the tapeworm for use in laboratories.

Sometimes when we Americans pride ourselves on being tolerant, civil, and law-abiding, we may well afford a moment of reflection on certain aspects of Reconstruction days.
