A breakfast for department heads held in the campus cafeteria included this year's Arrowhead United Fund Drive at Loma Linda University last week.

"Loma Linda University led all participating schools last year," said Kenneth P. Faller, PhD, campaign chairman for the Fund, to the assembly. "We won't try to push you harder," he continued. "We'd be pleased if you equaled last year's giving." 

Oliver L. Jacques, director of University relations and vice president of the Fund, explained the campaign timetable and the schedule of dedications of gifts from employer paychecks.

The department heads were instructed in the use of campaign supplies by Dorothy A. Mathisen, community relations officer and campaign coordinator for the University. Supplies include the new Arrowhead United Fund film, previewed by the group, which is available for campus screenings by arrangement with the community relations office.

The Arrowhead United Fund, covering San Bernardino and Riverside counties, spent $785,000 in 1964 for youth guidance, services to the sick and handicapped, multipurpose services such as the American Red Cross, and aid to those in trouble.

Distributed to 39 agencies and organizations in Bloomington, Colton, Crest Forest, Grand Terrace, Highland, Loma Linda, Shasta, and San Bernardino, the funds served 100,000 people last year.

NEW DRUG HALTS ARTERY DISEASE; Report to Heart Association

A hormone-like agent derived from the tissues of cows has proved effective in preventing hardening of the arteries, experimental studies at Loma Linda University indicate.

The substance, called chondroitin sulfate A, was tested in South American squirrels maintained on a diet known to be susceptible to the symptoms of arteriosclerosis which clogs the arteries and may cause angina pectoris, a precocious start for heart attacks and strokes. Its experimental success was reported at the American Heart Association's Council on Arteriosclerosis meeting at Bal Harbour, Florida, this month by Lester L. Morrison, PhD, assistant professor of medicine at Loma Linda University; Leslie A. Lambert, SM'66, of the Radiation Laboratory, and Robert F. Sheldon, PT'66. The three Loma Linda University members were among 11 research staff of the department of medicine at the University who contributed to the study.

Mr. Sheldon, recipient of the first Alumni Scholarship Awards of 25430 State St., Loma Linda; 10750 Shedden, Loma Linda; and Dr. Carlsen, MD, assistant visiting professor of medicine, School of Medicine, University of California at Los Angeles, and instructor in medicine at the University of California School of Medicine, Loma Linda University; and Charles E. Strachan, MD, instructor in medicine, medical school of Loma Linda University, A $10 fee will be charged for the course, but enrollments will be guests of the Gandale School of Medicine.

The symposium, which begins at 8:15 a.m. and concludes at 5:45 p.m., is part of the program of continuing education in nuclear medicine offered by the University of California Extension, Los Angeles, and the University of California at Los Angeles School of Medicine.

One-day course offered at the Loma Linda school, the symposium is the first in a series of continuing education courses being carried on at Loma Linda University's Laboratory of Nuclear Medicine. The symposium, which begins at 8:15 a.m. and concludes at 5:45 p.m., is part of the program of continuing education in nuclear medicine offered by Loma Linda University.

The course, offered to licensed physicians, will be instructed by U. Alexis Johnson, de-
The Significance of Schweitzer

Last month the curtain closed on the career of one of the outstanding world figures of modern times, Albert Schweitzer.

At the age of ninety, he rests in the village of Lambaréné in the Gabon province of French Equatorial Africa, near the mission hospital he founded.

His fame was not due to having established a medical college or a university, but rather to the fact that he has been conferred with several doctoral degrees before reaching the age of 30.

The significance of his life lies in the full extent to which his exceptional inherited and cultivated gifts were dedicated.

At the age of 21 he determined that he should live for science and art until he was 30 and after that give his talents to the service of humanity. This he did.

On his thirtieth birthday he decided to study medicine and go to Africa as a physician and surgeon, despite protests. He had been resigned as principal of the Theological College of St. Thomas, in Strassburg, and plunged into the study of medicine.

Those seven years from 1905 to 1912 were the most strenuous of his life. In addition to his studies, he preached nearly every week and gave numerous organ concerts, including annual performances with the Paris Bach Society and the Orfeo Catala in Spain.

During his first year of medicine he published the French edition of his biography of Bach; this enormous work he then rewrote in German. In 1906 he published another major work, "The Quest of the Historical Jesus," which has become a standard influential book of theology published in this century.

Also during his student years, there came from his pen two volumes on the apostle Paul, a book on pipe organs and their construction, and an edition of Bach's organ works.

In 1911 he wrote his doctoral thesis, a psychiatric study, which was accepted as a joint doctoral degree.

His career was not without detractors. One may criticize his neglecting advances in pharmacology.

His seeming indifference to primitive conditions at the Lamasaré hospital, and the somewhat pantheistic orientation of his ethic did not do him credit.

Yet when all necessary allowances for personal aberrations have been made, his grandeur of character still towers like Everest over a backdrop of lesser contemporaries.

He was highly educated early in life. In young manhood he starkly evaluated his life potential. Before reaching his twentieth year his confidence in three majors a year of scholarship was widely recognized. Following any of them he could have commanded him a life of comparative ease and honor.

Instead, he relinquished their pursuit to a medical missionary to the distant continent. Thus he believed his God would best be honored.

"Reverence for Life. . . . does not allow the scholar to live for the life of the university, but rather to be very useful to the community in so doing. It does not permit the artist to exist only for his art, even if he gives inspiration to many by its means. It refuses to let the business man think that he is the only one who really pays the price of his business activities. It demands from all that they should sacrifice a portion of their own lives for others."

Thus Schweitzer's contribution is that the solemnly measured decision in the life of the greatest non-political figure of our age was the dedication of himself to lifelong medical mission service.

LOMA LINDA UNIVERSITY MEDICAL CENTER will be ready for occupancy the spring of 1967. Licensed to operate 369 beds when it opens, its capacity will be 500 upon completion of a final two stories. For communications efficiency in a building with more than half a million square feet of floor space the various use-areas indicated above will be in contact with each other by a pneumatic message transport system in addition to phones and intercom. For maximum earthquake protection, the building is separated into three separate entities. The walls do not touch. Pipes crossing between are jointed to withstand earth movement. Should a heavy quake occur, a large steel ball safety valve will instantly stop the flow of gas to furnaces with a capacity of 81,000 cubic feet per hour. Within the Center there are two teaching amphitheaters. Six main elevator shafts, a service lift and 12 stairways will accommodate vertical travel. Thousands of caissons were sunk 34 to 45 feet into the ground to support the eleven-story structure. —Photo by Ellis Rich

HEAVY STEEL bar reinforcement for fourth floor concrete beams are fabricated by workmen of the Soule Steel Company, subcontractors. Nearly 2000 tons of steel have gone into the building thus far. —Staff photo

WALLS BEING POSITIONED show circular pattern which is part of a patient-unit design permitting central nursing stations an unobstructed view of any room at any time. —Staff photo

CARPENTERS CONSTRUCT smooth-finish plywood forms used in pouring concrete walls. Forty thousand cubic yards of concrete have been poured to date. Pecus traveling crane (right) and climbing crane have kept progress up to schedule. —Staff photo

ON A PLATFORM high against the outdoor wall, men clean and fill exterior surfaces preparatory to painting. Beige and brown colors will blend with existing structures. —Staff photo
One-day Refresher Offered

Loma Linda University School of Dentistry has announced a one-day course in the continuing education series to be held Wednesday, November 10, from 9 a.m. to 5 p.m. at the School of Dentistry.

New techniques for studying the metabolism of human teeth will be discussed. Other subjects to be emphasized are the effect of anaerobic conditions on the release of organic and inorganic material from intact teeth and the practical application of nutritional knowledge to general and dental health.

Lecturers for the day will include U. D. Register, associate professor of biochemistry, School of Medicine; John D. DeVicenzo, DDS, instructor in oral medicine, School of Dentistry; and Ralph R. Steinman, DDS, associate professor of oral medicine, School of Dentistry.

Advance registration fee is $20. No refunds will be made after November 3.

Reservation requests may be mailed to Loma Linda University School of Dentistry, Loma Linda, California.

The number of births in hospitals declined from 3,872,650 in 1962 to 3,784,666 in 1963, reflecting the continuing downward trend in the birth rate.

FOOD DIRECTOR

Food Service Director: Dr. W. C. King.

The food service department is an expanding and growing one, currently supporting a complex of 237 beds. A management position, preferably for a business graduate, or food department management experience, is desired.

WRITE ADMINISTRATOR, Shawnee Mission Hospital, Shawnee, Kansas.

Nursing Alumni News

PASTOR AND MRS. ED-WARD HERDER and their four children were guests at a small class get-together at the James home Sunday, September 11. Mrs. Herder, a gradu-ate of the class of 1950, has served nearly 20 years with her husband in Jamaica. They are under appointment to Es-ter, Nicaragua, Central Amer-ica, where he will be the busi-ness manager of our hospital and she director of nursing for the school of nursing. Classes present to enjoy the afternoon were Dorothy Tal-lendorf, Carol Tippet Hennes, Delores Anholm Schilling, Jus-tina Blayney, Edith Johnson, and Loma Mae Waters James. P. H. E. GUNDERSON, GRAVES, SN93, with her hus-band, Donald G. Lebed, SN93, went to Guatemala in 1959 to open a mission station and clinic five miles south of the Mexi-can border. There are no Seven-ties MVCs located in this area. They have treated hundreds of patients and or-ganized a church with a mem-bership of 124. The School of Nursing Alumni Association has supplied some of the urgent needs for their clinic.

The following 1960 graduate of the School of Medicine at Loma Linda University School of Nursing has joined the faculty of the Loma Lin-da University Hospital: JEFA-LYN H. BURGER, SN99. She and her husband, Howard L. Lebed, SN99, have supplied some of the urgent needs for their clinic.

WOOFTER, KATHLEEN L. NURSE of Roses. She is now head nurse of the intensive care unit at the Loma Linda University Hospital. Her husband, Joseph, a merchant in San Bernardino.

HELEN STEIN, SN10, of the Loma Linda University Hos-pital and her husband, Jerry, re-cently returned from a flying trip to Hawaii, where they spent their vacation.papers 547-570.

YVONNE I. BRYAN, MARI-ANNE WARD BUTTON, BERNICE WALTER, and GEORGE ELSIE H. ZIPRICK, SN41, are under appointment to Es-tede, Nicaragua, Central Amer-ica, where he will be the busi-ness manager of our hospital and she director of nursing for the school of nursing. Classes present to enjoy the afternoon were Dorothy Tal-lerendorf, Carol Tippet Hennes, Delores Anholm Schilling, Jus-tina Blayney, Edith Johnson, and Loma Mae Waters James.

HELEN M. KIRKBIN STUTTZ, SN73, is teaching an introduction to Nursing and Community Health at La Sier College.

EDWARD T. MOON, SN98, GS98, was on an extended trip to cover four conventions and workshops in Chicago and New Orleans. He attended the annual meeting of the Association of Teachers of Preventive Medi-cine October 17 and of the American Public Health Asso-ciation October 18 - 22 in Chi-cago.

Dr. Dysinger will teach health education at the October 29 - November 7 Physical Fitness Institute and will attend a con-cert of the American So-ciety of Tropical Medi-cine and Hygiene November 3 - 5, both in New Orleans.

Mr. W. S. Lee Speaks at Capping Ceremony

W. S. Lee, secretary of the Regional Department of the Pacific Union Conference of Seventh-day Adventist, speaks to sophomore students of nurs-ing at a capping cere-mony held October 10 at the University Seventh-day Adventist Church.

Grand prize in Loma Linda University's annual student talent competition October 16 was awarded to the New Frontiersmen, a folk group who sang "Bowling Green."

The group, first place winner in the light music division, was awarded to Sherrie Lee Summers, B.S. ’67, and Mary Sue Sumner for their vocal duo of "Indian Love Call."

November winner was "In My Merry Model T©©" performed by Sherrie Lee Summers, DH ’67, and Richard L. Sheldon, SM ’68; Robert F. Sheldon, FT ’66; and Mrs. Gerald W. Whitehouse.

Scholarships Awarded

Continued from page 1

The foundation supports medical education through freshman-year scholarship programs which are available to students with high scholastic standing and personal merit who would be unable to enter medical school without such assistance.

This is the second year scholarships have been awarded by the foundation.

Audubon Wildlife Film Schedule Set

The seventeenth season's presentation of Audubon Wildlife Films will offer five 16mm color motion picture dramas, each narrated by the narrator. Some will be shown in Bendon Hall at 7 p.m.

The first program of the 1965-66 season, on Thursday, October 28, is "Nature Plans and Puzzles" by Chester P. Lyons, depicting wildlife in a panorama of British Columbia.

On December 2 conservationists D. J. Nelson's film, "Save the Wild," will show an intimate study of wildlife habitats, such as an eagle tending its nest, an alligator building a nest and laying eggs, and a mammal stuffing its food into its mouth with its whiskers.

Alaska's spectacular scenery and its unusual species of animals, including caribou in migration, will be featured by cameraman Walter H. Bellet in "Northwest to Alaska" on January 13.

The fourth program, "Essence of Life," February 17, by Clark Gray, uses close-up photography to show viewers how different plants and animals depend upon the unique physical properties of water for their existence.

On the final weekend of the Pacific Ocean and their wildlife population, will be the theme of the closing Audubon program March 17, "Sleeping Steens to Australia."

Season tickets for the five films are $3.00; students, $2.00. Single admission, $1 and 50¢.

Tickets are obtainable at the Box Office in the Administration Building, the lingerie shop and at the Student Union.

Office for Rent

Medical office in modern building, office in heart of Fa- lada with plenty of parking. Close to hos- pitals. Practice goes with $2,500 down. Contact Dr. W. Farrier, MD, 132 South Hebrew, Pasadena, 2-5450.

Brooks Appointed To LLU Foundation

Chester A. Brooks, a recent graduate of the University School of Medicine, has been appointed chairman of the Board of Trustees of the Loma Linda University Medical Center. He attended the University of Washington School of Medicine and graduated in 1945. Brooks has been a practicing physician in the Inland Empire area since 1946. He is a member of the California Medical Association, the American Medical Association, and the Riverside County Medical Association.

Brooks has been involved in the community through his medical practice and has been active in various civic and social affairs.

For the past eight years he has served in pastorial capacities in the Southern California Conference of Seventh-Day Adventists.
Michigan members of the Loma Linda University School of Medicine Alumni Association met for a family outing Sept. 28-30 at a Michigan state park in the Wolverine Re-creation area.

Weekend features included rides and costumes from the South African Division presented by Mr. and Mrs. John M. Hnatyshyn of Lansing and slides of a scientific expedition to Peru presented by Asa C. Thoresen, PhD, associate professor of anthropology at Andrews University.

Loma Linda University can provide YOU with a LIFETIME INCOME

From birth to death, through happiness and sorrow, many look to Loma Linda University for inspiration and guidance in the principles of higher Christian education. Its graduates now are found around the world doing their utmost to uplift fallen humanity. Their goal is "To Make Man Whole."

Loma Linda University stands ready at all times to accept the responsibility of receiving and educating young people whose lives they can contribute to their service in God and their fellow man.

The Loma Linda University Foundation offers an ideal solution for those desiring income from their capital during their lifetime,

1. VARIABLE INCOME from a participation in the pooled investments of the University's endowment funds. (The current rate is 5.9%)
2. GUARANTEED INCOME at a fixed rate of return, depending on age, ranging from 3% to 7.4%. Income is largely tax-free.
3. TAX-FREE INCOME from a separate investment in state and county municipal bonds.

WRITE TODAY for information to help you select the plan which best suits your need.
