School Provides Dentists, Clinic for 10,000 Indians

A School of Dentistry faculty member left here this week for Arizona-Utah's vast, colorful Monument Valley, where he will oversee the area's first regular dental health program.

He is Kenneth E. Wical, DDS, of Loma Linda, an associate professor at Loma Linda University School of Dentistry, with previous experience in the US Public Health Service Division of Indian Health. Dr. Wical also served on the faculty as an instructor in restorative-dentistry, 1963-65. He will oversee construction and remodeling of a dental clinic and training facilities for American Indians, which are being built on land donated by brothers students and teachers in the School of Dentistry under the direction of Dr. Wical. The 35-member group will serve a one-to-three month period in this capacity under Donald L. Cram, Mr. Cram and his wife LaVelle, a graduate nurse, are slated for arrival in Monument Valley October 1.

According to Charles T. Smith, DDS, dean of the school and administrative director of the monument Valley program, the service has been in place for several years. Titled "Monument Valley Community Oral Health Service," it was first announced publicly in August, 1965, when the Department of Health, Education, and Welfare allocated $129,217 for setting up the clinic.

BULLDOZER reads new construction sites at Monument Valley. A new four-family apartment building to house dental students and employees of a dental clinic director's house are the only new buildings to be added. Existing structures will be remodeled for the dental clinic.

Health Service," it was first announced publicly in August, 1965, when the Department of Health, Education, and Welfare allocated $129,217 for setting up the clinic. Continued on page 6

Health Service contributed to a new Japanese University library. University officials had requested any extra medical books and journals, with previous experience in the US Public Health Service Division of Indian Health. Dr. Wical also served on the faculty as an instructor in restorative-dentistry, 1963-65. He will oversee construction and remodeling of a dental clinic and training facilities for American Indians, which are being built on land donated by brothers students and teachers in the School of Dentistry under the direction of Dr. Wical. Bank of America contributes $1,000

Loma Linda University has received a $1,000 endowment gift from the Bank of America, San Francisco.

Loma Linda University to Japanese University, since none was available in Japan. The students in the curriculum schedules will all continue their studies in Los Angeles through the completion of the program. The Navy's "Operation Hand Clasp" delivers everything from medicine to medical books and journals. This is the seventh year the university has participated in the newly established worldwide project since 1963 when he was a Fulbright professor in Denmark. He will be leaving the University short-ly for the University of Iowa, long-term project will continue under the direction of Edwin N. Collins, DDS, professor of oral medicine and chairman of the department, School of Dentistry.

The medical books were picked up at Loma Linda by members of the San Bernardino Naval Reserve Training Center and transported at a ship cost of $481. The Navy's "Operation Hand Clasp" delivers everything from medicine to medical books and journals. This is the seventh year the University has participated in the newly established worldwide project since 1963 when he was a Fulbright professor in Denmark. Collins, DDS, professor of oral medicine and chairman of the department, School of Dentistry.

the new University Medical Center. The bank had placed no restrictions on uses to which the money might be put, he said.

The check was presented to Dr. Anderson by two regional vice presidents of the bank, W. H. Baughn and D. S. Pierson. Dr. Baughn is in charge of area administration for Riverside and San Bernardino counties and Mr. Pierson is manager of the Redlands branch of Bank of America.

Dr. Hayden has been involved in the world-wide project since 1963 when he was a Fulbright professor in Denmark. He will be leaving the University short-ly for the University of Iowa, long-term project will continue under the direction of Edwin N. Collins, DDS, professor of oral medicine and chairman of the department, School of Dentistry.

Dear Editor:

I am writing in response to the letter in the July 1, 1966 issue of "Mission" in which an anonymous writer said that the school's smoking policy was made with authority to implement. This is not correct, as the policy was implemented with the support of the students, not just with authority. We need to continue to work on reducing smoking on campus.

John Smith

Full-time academic or non-employee office workers in their offices for a period of three hours per week. The study also found that tobacco use had increased among students over the last three years.

The Weisner report, which surveyed students, found that students who used tobacco were more likely to have attitudes contributing to the location of physicians. If we want to improve the situation, we should consider implementing policies that encourage students to remain smoke-free.

In a story about the effects of smoking, we learn that cigarette smoke contains over 4,000 chemicals, including nicotine, tar, and hydrogen cyanide. These chemicals can cause harm to the body, leading to long-term illnesses.

Censoring and structuring gender roles in the classroom is a complex issue. The use of gendered language in policies and practices can perpetuate stereotypes and marginalize non-binary and LGBTQ+ students. We need to ensure that our language and actions are inclusive and respectful.

The UN "Blue Helmets" come to Loma Linda University

A Brief History of Seventh-day Adventist Medical Work

1866 On September 5, patients were admitted to the first Seventh-day Adventist health institution, the Western Health Reform Institute, Battle Creek, Michigan. One month earlier, the first issue of a health journal, The Health Reformer, was published.

1867 John Harvey Kellogg, MD, named medical superintendent of the Institute, a position he held for 65 years.

1877 Western Health Reform Institute renamed Battle Creek Sanitarium.

1886-1931 First Adventist medical launch, built and operated by the church. Ellen G. White Memorial Hospital opened in Los Angeles in 1931.

1893 First charity medical service sponsored by Seventh-day Adventist medical institutions.

1896 The Western Health Reform Institute, Battle Creek, Michigan. When I arrived there, it was in good condition, being used as an annex at the rear of the first medical college.

1905 Dr. Kate Lindsay opened the first medical college in Battle Creek, Michigan. One month earlier, the first issue of a health journal was published.

1916 Ellen G. White Memorial Hospital opened in Los Angeles.

1921 First Adventist medical school opened in Chicago.

1931 First medical dispensary outside the US established.

1936 A treatise on Adventist health principles, written over 60 years ago, conforms to present health principles.

1947 The American Temperance Society organized as the church-based temperance organization. Chapters are located at all 80 secondary schools and 10 colleges in the US.

1953 School of Dentistry opened at Loma Linda University.

Pioneer Health Institution Spawns Progressive Leaders

In connection with the centennial anniversary of Seventh-day Adventist medical work, University SCOPE interviewed Ernest Lloyd, former editor and author, now retired, who personally knew and worked among some of the early pioneers of Adventist medical institutions.

Pastor Lloyd, how closely were you acquainted with the first Adventist health institution?

No. It happened that Dr. Kellogg and his associates provided every worker in the rapidly growing sanitarium should have health training appropriate to his work. Even office workers and callboys got first aid. That included me.

You were acquainted with Ellen G. White and her emphasis upon health education?

Yes, after 1890. In April of 1899, while attending the Eastern Conference sessions there, I spoke to the students of the sanitarium workers, and I was impressed for life. She was so understood, indeed happy when our first medical institution opened, for she had been lecturing and writing against the "harboring method of heredity, drugging, blood-letting, the lack of cleanliness" in the medical practice of the day. She had urged a place be established where rational methods of healing would be used.

It would be quite impossible to mention the beginning and developing years of our medical work without using the name of Ellen G. White. Under God, was the human founder of this phase of the Seventh-day Adventist movement.

When did Dr. Kate Lindsay join the faculty?

She connected with the sanitarium about 1891. She was one of the first workers of the Battle Creek Sanitarium.

The acquisition of the Loma Linda Sanitarium property in 1905 marked the shift of medical work emphasis from East to West.

John H. Kellogg, MD, James White, and Ellen G. White developed Adventist health work in its first half century.

The Western Health Reform Institute, first Seventh-day Adventist health institution, was founded 150 years ago.

U. D. Register, PhD, associate professor of biochemistry, left his work for Hamburg, Germany, to report to the International Congress of Nutrition on studies by University researchers of the comparative merits of meat and vegetarian diets.

"If the population explosion continues at its present rate," Dr. Register notes, "by the year 2050 the majority of the 10 billion people on the earth will have to agree to eat a diet coming mainly from vegetale sources."

Dr. Register will also deliver a lecture at a weekend camp meeting of the National Conference of Seventh-day Adventist Missionaries, on August 14, and speak at church services in Washington, DC, before returning.

His itinerary includes visits to the Medical Foundation, Inc., Incorporated, Boston, Massachusetts, and the William W. and C. L. Van Veltman Fund of the Research Corporation, New York, New York, to apply for research funds.

On the European leg of the trip Dr. Register will be accompanied by Merrit C. Hennings, MD, research associate of Dr. Register, the chairman of the Lassen Foundation, an organization which fosters and underwrites nutrition research.

Enrollment

Continued from page 1

School, which will include candidates for master of arts, master of science, and doctor of philosophy degrees in liberal arts, basic sciences, and professional fields.

Enrollment in programs leading to the four-year bachelor of science degree is expected to reach 100 in dental hygiene, 10 in medical record administration, 10 in medical technology, 200 in nursing, 20 in occupational therapy, and 15 in physical therapy.

Loma Linda University has no tuition in its undergraduate programs. Students entering any of the schools must have first completed their studies at another college or university, according to Mr. Walls.

Eligibility requirements vary from one to three years, depending upon the school being entered at Loma Linda. For example, students of normal college age have completed one year of college studies, enter Loma Linda; students are those who have been finding it difficult to enroll in college, according to Mr. Walls.

A slightly greater restriction approved by University trustees last year anticipates that enrollment will reach 2,000 in 1974.

Missionary C. E. Schmidt (left) accepts gift of tape recorder from senior School of Dentistry students Robert P. Erickson (right) and Ernest S. Bleakley. Their class raised over $160 to make the donation.

**Missionary Given Recorder By School of Dentistry Class**

The 1967 class of the School of Dentistry recently presented a Concord 200 tape recorder to Pastor C. E. Schmidt, director of the Venezuela Vocational Academy.

Class president Ernest S. Bleakley and chaplain Robert P. Erickson presented the class gift to missionary Schmidt on his return from the Seventh-day Adventist General Conference sessions in Detroit, Michigan, where he was a delegate. The tape recorder is either operated by battery or electric power.

**Dietetic Interns Graduate Aug. 18**

Eleven dietetic interns will receive Loma Linda University certificates and American Dietetic Association pins in a graduation ceremony August 18, at 7:30 p.m. in the Campus Chapel.

The dietetic students will have successfully completed required courses, seminars, and required field experiences. They have been full fledged dietitians in all phases of dietetics for a year and have completed a supervised dietetic experience for the degree level. Students who qualify may receive 15 semester units of credit toward the master of science degree during the year of internship.

**Dyninger Receives PH Certification**

P. William Dyninger, MD, assistant professor of public health in the Division of Public Health, was recently certified by the American Board of Preventive Medicine as a specialist in public health education.

Dr. Dyninger is presently assisting Loma Linda University graduate candidates in Salt Lake City, Utah. He is giving nightly health lectures.

**WE ARTISTS KNOW**

that to achieve true expression in a painting we must first accomplish our specific objective. Then we use our ingenuity and creative ability to reach the proper balance and perspective. That's why we artists have such a high regard for Worthington Meat Loaf Mix. Worthington Meat Loaf Mix is the objective and creative ingredient the artists can use to create the perfect concoction of all Worthington products. They also exhibit a good balance of nutrition and flavor.

**LLU Division of Public Health Finds World-wide Challenge**

By P. William Dyninger, MD

Assistant professor of public health

From its beginning as the School of Tropical and Preventive Health, the Division of Public Health has grown in size and interest in international health as shown by the tropical disease research it has done, the mission orientation programs it has sponsored, and the public health services it has provided to third world countries. From the day in 1952, when the first of the mission-oriented programs was initiated, the Division of Public Health has continuously expanded in all directions. As it vos more and more international in scope, so has the definition of public health changed. It is now defined as all aspects of life and acceptance of all the principles of public health.

**College of Surgeons Adds OB-GYN OK**

**The combined residency training program in gynecology and obstetrics at the Loma Linda University Hospital and the Loma Linda University Medical Center has recently received approval by the American College of Surgeons and the American College of Obstetricians and Gynecologists.**

This approval is to complete the training within the past year. The residency training program has been approved by the American Board of Obstetrics and Gynecology and the American Medical Association.

**BIRTHS**

Miller, Michael Joe was born July 15 to the parents of Mrs. Betty Miller and Billie Joe Miller, SD766.

Wagner, Ira Vernon was born July 11 to Aduleah and Vernon Paul Wagner, SD153.

University SCOPE, Page 4 Friday, August 6, 1968
MR. WOOD checks the interior seal on the transfer lock of a new polyvinyl plastic isolator chamber he is assembling. Small corked tube openings at right end of the "bag" are used to introduce the initial sterilizing spray of peracetic acid. Gloves protrude from the other germ-free isolator units (right).

Germ-Free Research Mice

The term "germ-free mice" does not indicate biologic freaks. They are highly valued special-purpose animals used daily in research at Loma Linda University and many other centers.

These mice are actually free of all bacterial contaminants, both external and internal, yet are normal in all other ways. Some laboratories even use "germ-free" dogs, sheep, and pigs in a similar fashion.

First-generation gnotobiotic (germ-free) animals are obtained by caesarean section. Meticulous bacteriological checks of the animals and their environment ensure continual freedom from contaminants through successive generations.

The gnotobiotic research program has been operational here since 1964. It assures laboratory animals with no contaminants for experiments where uncontrolled bacteria would adversely affect results.

The breeding and care of the germ-free colonies are under the direction of Cyril G. Wood, microbiology research assistant.

NO EXCEPTIONS—every item introduced into the chambers must be sterile. Basic are food pellets, specially fortified to take high autoclave temperatures; bedding (ground corn-cobs); and distilled water. Even the vitamin supplement in the water is a sterile type.

GRADUATE STUDENT M. Joyce Ramsay observes a mouse used in research on the carriers of Listeria monocytogenes, one of the causes of infant meningitis. Filtered air under constant pressure changes the enclosure's atmosphere 12 times per hour. The air exhaust filter is seen at right, the round transfer air-lock in front.

FOOD, WATER, bedding, etc., are pre-sterilized by autoclaving in a metal cylinder (left) and attached to the larger plastic isolation chamber via its air-lock. By reaching in with the long black gloves, the researcher is then able to transfer the items into the main chamber, finally resealing the transfer air-lock.

THESE C3H-TYPE baby mice and their mother are a special cancer-susceptible germ-free strain being used in current research on the effect of diet on the incidence of tumors in mice. The project is directed by Robert L. Nutter, PhD, associate professor of microbiology, Donald L. Peterson, MD, assistant professor of pharmacology, and Russel J. Thomsen, SM '68.
Monument Valley

and operating the program. The Utah Indian Affairs Commission had estimated a minimum of $232,000 in tribal funds, providing for the service's first five years of operation. And, according to Dr. Smith, it is hoped that these funds will be self-supporting from patient fees, which are to be introduced during that period.

The main dental clinic will occupy a building adjacent to the Brigham Young University Hospital in Rock Door Canyon. Mobile dental equipment will be on call in any of the outlying areas of Aneth and Navajo Mountain, Dr. Smith says.

Remodeling Job

An existing hospital outpa-
tients clinic, which is a part of the Federal grant, will include five operat-
ing units, a processing area, waiting room, and an administrative office area.

Construction has begun on five comfortable housing units to accommodate the dental pro-
dr program and students. A

more (next year's sophomores)

about their summer plans.

Photo Comparison

Standard conditions for the test administration and for the photography of the tests have been worked out so that the results can be compared and combined, Dr. Walden states. The students will also assist in other duties in the clinic.

The Southern California Chap- ter of the Tuberculoses and Health Association will pay a stipend of $150 plus transportation for each student enrolled to take part in the test. In return those students will submit a written report of their findings, according to Dr. Walden.

All students applying for the program this year were granted appointments. The department of preventive medicine and pub-

lic health has supervised sum-
mer monomer fellow for several years.

University SCOPE asked last week of School of Medicine fresh-

of the patient and give a new multiple-needle test in the other arm. Color slides will be made showing the results.

A dental hygienist, cook, and dental assistant are wanted in California. The position is for a dental clinic in Los Angeles, near a church, school, and hospital. Compensation is not specified, but the job requires a minimum of two years of experience, good communication skills, and the ability to work well with others.

For more details, contact the University Placement Service at 24887 Taylor St., PY 7-6011, W. W. Stuart, Broker.

The same job posting is also available in Texas and Arkansas. The job offers a good opportunity for someone who is looking to move into the healthcare field.

In California, there is a housing opportunity available. A duplex is available for $27,000, and four houses can be purchased on one large lot for $31,500. The location is near the university, and the area is safe and secure. A good opportunity for those looking to start a family or invest in real estate.

For more details, contact the University Placement Service at 24887 Taylor St., PY 7-6011, W. W. Stuart, Broker.

A dental hygienist, LVN, and aides are needed in SDA hospitals in Texas, Arkansas, and California. The positions are in need of a physician to work with patients and provide care. The positions are available to qualified candidates who are willing to work in a team-oriented environment.

For more details, contact the University Placement Service at 24887 Taylor St., PY 7-6011, W. W. Stuart, Broker.

A technician, 25-40 years of age, is needed in a SDA convalescent home in California. The position requires a high level of expertise and experience in the field.

For more details, contact the University Placement Service at 24887 Taylor St., PY 7-6011, W. W. Stuart, Broker.

In New Jersey, a pharmacist is needed in a 75 bed, fully accredited hospital. The position requires a high level of expertise and experience in the field.

For more details, contact the University Placement Service at 24887 Taylor St., PY 7-6011, W. W. Stuart, Broker.

A secretary is needed for the SDA church in Arkansas. The position requires excellent communication skills and the ability to work in a team-oriented environment.

For more details, contact the University Placement Service at 24887 Taylor St., PY 7-6011, W. W. Stuart, Broker.

The national average cost of one year at state schools, $1,044. Both are expected to increase 50% in the next ten years. So much has been said and written about the necessity of a college education these days that we will realize its importance in years to come.

The average cost of one year of college is now $2,049. The value of an advanced degree cannot be overstated. The liberal fringe benefits that come with a college education are well worth the investment of time and money.

**Physical Therapy**

The annual conference of the American Physical Therapy Association held July 10-15 at the Los Angeles Biltmore Hotel attracted over 1,700. Eighteen Loma Linda University alumni, representing every class from 1941-66 attended, with the exception of classes 1943-4, 1944, and 1946-A.

At the opening session the alumni participated in a parade of flags with the presentation of the colors by the US Air Force color guard.

The class of 1965 had the largest number in attendance, 16. Alumni came from Hawaii, Washington, California on the East Coast, to Washington, DC, Virginia, South Carolina, and Florida on the East Coast.

Donald K. Berglin, '64, emceed a get-together on the evening of July 11. Ronald A. Horsley, director of the Division of Physical Therapy, presented news of school activities.

Donna Gray Schamberg, '63, is now employed with the Orange County Visiting Nurses Association. She gives home physical care and instructs in physical therapy care.

Elisabeth A. Fransma, '63, is now Mrs. McHugh and lives in Redlands. She is doing physical therapy at Kaiser Foundation Hospital, Harbor City.

Billie S. Harmon, '60, contracts physical therapy services for three hospitals in the Los Angeles area. Alvin E. Haunch, '63, is assisting him.

Indirectly we hear that Larry D. Bennett, '64, provides services for physicians and hospitals in Falmouth and Lancaster and is busy.

William D. Bogard, '53, contracts physical therapy services for several hospitals in Orange County and also has a home service program. William D. Cox, '63, and Dale R. Hammarholz, '63, are associated with Mr. Bogard. Just recently, wedding bells rang for Nancy A. Stanfield, '63, of Alpine who is on the staff of Riverside Community Hospital's physical therapy service.

Richard W. Wertberg, '65, and his wife, Foly, of Sonoma, have a son, Steig Gunnar, born June 34 at St. Helens Sanitarium. Rick and Foly are contemplating a call to the mission field.

**New Assistant for LLU Reivews**

Richard A. Schaefer, a 1966 graduate from La Sierra College, recently named assistant in University Relations, according to Dr. Jack C. Weeks, vice-president for public relations and development.

Mr. Schaefer assumed his reponsibilities July 15. Among his duties is leading University tours and giving briefings for the University's speaker service.

**New Snack Shop Will Open Soon**

A new restaurant, the King's Palace, was scheduled to join the growing group of the same specials offered in the University Arts Building on Taylor Street.

**Some of the heavy cooking will be done in Redlands,** enabling the restaurant to serve some of the same specials offered in the Redlands smorgasbord, says Dr. Willis, manager.

**Supervising the food preparation will be Andre Gerich,** French-trained chef at the Redlands family. Mr. Garfield, who has 41 years of experience in food preparation, was hired from 1963 by the US Government to train cooks in Japan for the Olympic Games.

**Looking especially to students' interests, the shop is tentatively planning to offer a credit card plan whereby students with charge purchases. A 10 per cent discount will be given to those paying their bill through the following month.**

Mr. Willis hopes to employ some student's in the establishment, the current needs for two part-time waitresses, a part-time cook, a barkey dishwasher, and a full-time waitress. The snack shop will be open from 8 a.m. to 7:30 p.m. except on Friday, when it will close at 6 p.m. to clean.
Fijian Doctor Here to Study Describes Hebrides Practice

Performing surgery by kerosene lamp with a temerarious generator refuses to produce electricity is all in a day's work for Dr. Joeli Taoi, medical director of the New Hebrides Mission Hospital.

He, as he is known to his patients, is presently taking a two-month postgraduate course in surgery at Loma Linda University Hospital. He is a graduate of Fiji Medical College, a government school on the island of Fiji, where he was born.

Medical practice in the New Hebrides, 50 miles west of Fiji, differs considerably from practice in the United States, Dr. Joeli notes.

"For instance, most of my patients are islanders, not hospital patients," he explains, and most patients come free when referred by a missionary.

The majority of cases treated at the 18-bed mission hospital are medical rather than surgical, the physician says. Common problems are malaria, tuberculosis, and parasitic-caused intestinal diseases.

Little Heart Disease, Cancer

"We see very little heart disease or cancer here among the islanders," he adds.

The small mission hospital supported by the Seventh-day Adventist Church, however, is always full. In addition to hospital patients, Dr. Joeli sees 30 to 40 outpatients every weekday and twice as many on Sundays.

"Sunday is the only day many islanders are allowed to leave their villages," he explains. The island's economy centers around the production and export of copra, dried coconut meat valued commercially for its oil content.

Aside from treating more than 7,000 outpatients and 700 inpatients at the hospital each year, Dr. Joeli makes regular clinical trips into the mountainous back country to treat villagers reluctant to come to the hospital. It is a five-hour walk from the coast to the remote mountain villages, and Dr. Joeli spends the night with one of the tribes he is treating.

FOB LEASE —

"The inhabitants of the villages weren't at all friendly on my first visit," he smiles, omitting reference to the bravado required to enter the territory of fierce tribes uninvited and unarmed. "But now they're very hospitable, inviting when night falls that I share their sleeping quarters.

"It's very nice except for the pigs, who enjoy the same hospitality," he says with a wry grin. Dr. Joeli has begun training islanders to assist in patient care. "The five practical nurses on our staff, in our first class graduated in April, and three are still in training," he says proudly.

The staff, comprising Dr. Joeli, a single full-fledged nurse, and the newly trained teenage helpers — "who have to take it in stride the erratic behavior of the generation which supplies all the hospital's electric power," more serious was a recent five-month drought, which threatened to close the hospital for lack of the generator required for drinking and for medical and surgical care.

The mission hospital was established by Dr. Joeli in 1963, and plans to enlarge the building and add more equipment are underway. The Fiji physician will complete his postgraduate course at Loma Linda University and return to the mission hospitals in September.

STORE HOURS:

SUN. - WED. 8-7; THURSDAY 8-8; FRIDAY 8-4
The John Mordaunt Prize is awarded to Dr. Jorgensen for his outstanding work in the advancement of anesthesia in dentistry. Since 1947 he has produced eight films on anesthesia, one of which won the grand prize in the medical section at the 1963 Paris International Film Festival. Dr. Jorgensen lectured and gave demonstrations to the Royal College of Surgeons and to the dental faculty of the University of Edinburgh.

Student Doings

Continued from page 6

NIELS B. JORGENSEN, DDS, receives the John Mordaunt prize from Dr. John Buxton, president of the Society for the Advancement of Anesthesia in Dentistry, at University College, London, England. Dr. Jorgensen was awarded a Canon FX 1/2 camera for his outstanding work in dental anesthesia.

An investigation of kainic acid effects on auditory transmission is being carried out by Barrie S. May and sponsor Bernard D. Briggs, MD, professor of anesthesiology. Stanley A. Rouhe is studying the effect of chemical perfusion of the brain on neuron transmission of the brain on neuron transmission.

Computer Design

Working at the University of Southern California this summer is Marshall A. Rockwell.

The John Mordaunt Prize is awarded every four years (or as determined by the committee) to a student who was killed in the Inns of Court while studying law. The purpose of the prize is to aid those who just dislike the thought of dental work.

We have cooked it for hours so you can serve it in seconds.

You'll love this superb combination of colorful pinto beans, rich tomato puree, wholesome VegeBurger, pimiento, paprika and other seasonings. It's a complete meal-in-itself that's quick, delicious and convenient.

Just heat and serve.

GREAT IN TACOS!

Heat contents of can — or any quantity desired. Mash beans.
Serve Loma Linda Chile in Tacos with shredded lettuce — cheese — and all the trimmings!
