Three Areas Go Over the Top

First Day of DCS Campaign

Three areas were “over the top” in the University’s United Community Services crusade by late afternoon Wednesday.

First to announce 100 percent fair share giving was Dorothy L. Austin, team captain for the Animal Care Facility.

Peter D. Dunbar led 90 employees in the hospital, 90 percent fair share participation.

Students, 100 percent, on the district staff also reported victory for the department of antitrust.

“The example of these faithful people should inspire us all to action as we join this community effort,” said Maurice E. Mathisen, PhD, campaign coordinator.

Dr. Mathisen defined fair share giving as one hour’s pay per month for those earning less than $10,000 per year and 1 cent of earnings per dollar for those who desire may make a memorial contribution in his name.

SD Alumnus Killed In Redlands Crash

A University alumnus was killed early Monday when his single-engine airplane crashed and burned in a Redlands residential area Wednesday.

Frederick H. Dortch, Jr., MD, 24, was pulled from the wreckage of the plane a few minutes before it burst into flames. He died on the way to a hospital.

Dr. Dortch left Redlands Municipal Airport en route to Bakersfield and Fresno when the structure was used in a rising patient load and the need for more nurses.

North Pacific Union Recruiters Visit

Representatives from the North Pacific Union will be on campus, October 14-15, to recruit students. The campus recruiter is Dr. Dortch.

A few weeks ago a Navajo mother brought her desperately ill four-month-old child to the University.

The baby, under the care of Dr. Dortch, is now recovering.

Register for the色

to join the staff right now as

needs more nurses.

University Hospital Needs More Nurses

Loma Linda University Hospital is in need of nurses. With a rising patient load and a greater amount of activity resulting from an increasing number of women who are practicing in this area, there has arisen a definite need for more nurses to join the staff right now as well as in the near future, administrators state.

The new 500-bed Medical Center will be ready to accept patients in mid-1971. A large number of additional nursing personnel also will be needed in the staffing of this new hospital.

Nurses who find it possible to accept this challenge are invited to either visit the Personnel Office of Loma Linda University or write a letter.

Life-Death Drama in Desert

Frustrates, Challenges Student

By Herbert Ford

Senior medical student Gary Harding can tell you a thing or two about frustration.

He moved to the nation two weeks ago.

Gary’s father, who is a surgeon at the University hospital, was gulfed in flame.

The dentist’s body as a wing

as action as we join this com-

will be shown in the film "World Without Sun," next Saturday night. Produced by Commander Jacques Courtois, and combined with beautiful color, excellent photography, and narration, "World Without Sun" is instructive and entertaining, program planners state.

"World Without Sun" will be shown in the Auditorium to be erected next to the swimming pool.

Two senior University students – Dr. Mathisen, campaign coordinator, and John L. Mathisen, PhD, campaign chairman, performed the actual groundbreaking with the aid of a handshake-equipped tractor.

Dr. Mathisen surveyed the area, and spectators stood nearby... "just to look on," as one quipped nervously... while each student took a turn at the true-er’s controls.

Both succeeded in excavating satisfactory scoops of soft earth.

Male Use As Gym

The ball will be used principally as a gymnasium, with an 18,000-square-foot hardwood playing floor. Bleacher seats at the playing-floor level and at a second upper level, together with portable seats, will provide seating for up to 2,800 spectators. The roof, some 150-feet long, will be of aluminum geodetic design. Its site, north of Stewart Street and east of Campus Street, will make the structure the northers end of point of a mall stretching across the campus from the new medical center of the south.

Schoenfeld Trio Performance
Slated for Burden Hall Oct. 22

The second program in the 1966-67 University Artist and Lecture Series will be held October 22 in Burden Hall. The program will feature the Schoenfeld Trio, formed by three former child prodigies, and Jack Crissan, concert pianist. Born in Europe, the Schoenfeld siblings have made annual tours on that continent and from coast to coast in America, performing as soloists with leading orchestras, ensembles, and for radio and television. They have given over 2,000 concerts in 27 countries, performing to acclaim.

Jack Crissan, "one who was born to play the piano," made various successful concert tours in the United States during the past several years.

Contributing to the trio's singular blending and harmonious tone are the Guarnerius instruments which they play.

The program's offerings of the classical and the contemporary, the traditional and the modern, $1 for any member of students' and faculty of the University who is interested. All of these programs are sponsored by the University Scope, a profit organ.

continued on page 5
Sun., Sept. 24, 1967, has been set as the official opening date of the new University Medical Center, according to a recent action by the Board of Trustees. Some areas will, however, likely be occupied by the end of this year. It is expected that the contractors will complete their work by March or April, and some patients may be accepted by mid-'67. The official opening will thus come after all moves have been completed and all systems are "go."

An air-powered stapler is used for high-speed attachment of the rock-lath in most of the hall and room construction. Metal studs, plates and joints are used throughout, and are welded for strength.

FRED L. COLE, survey party chief, Ludwig Engineering, San Bernardino, surveys the off-site areas adjacent to the new University Medical Center, where new parking lots will be located. The lots are expected to be completed late next month.

A powered "donkey" carries a load of "mud" down distant halls to the plasterers. The material is a special thin-wall type.

Plumbers must install miles of pipe and test it all carefully. Copper pipe being cut here is for one of the main water supply lines.

mer, a member of the councilors group.

University officials and others participating in the ground-breaking with the students were Howard E. Weeks, PhD, vice president for public relations and development; Robert D. Irvine, world president of the Seventh-day Adventist Church; Jerry L. Pettis, chairman of the University Councilors; Harry Settel, councilors plan committee chairman; Maynard V. Campbell, chairman of the University trustees; and President Godfrey T. Anderson.

Loma Linda University currently has no gymnasium, and no auditorium, except for churches seating more than 800, which have sports facilities limited to an outdoor swimming pool, tennis, basketball, volleyball, and baseball courts, a baseball diamond, and a recreation hall gym rooms.

EVPETING a deluge? No! It’s just sophomore School of Nursing students wearing surgical caps on campus during their inauguration week.

LowIncome?StudentBorrower?State May Pay Your Interest

Applications for guaranteed loans will be in the Student Aid and Finance Office this week, says Robert G. Mansel, director of student finance. Students interested in securing loans should contact the student finance office to secure an application. Applications will not be available at banks or other financial institutions.

Invitations to participate in the new State Guaranteed Loan Program were sent last month to the principal office of every bank, credit union, and savings and loan association in the state by the California State Scholarship and Loan Commission.

In this new student assistance program, the commission will guarantee loans to full-time college or university students made by participating financial institutions in California.

Loans of up to $1,000 a year will be available to students whose families have an annual income of less than $15,000 as defined in Federal regulations.

The six per cent interest rate, while the student is enrolled in college, will be paid by the federal government. The student borrower will pay three per cent interest after college and during the five to ten year repayment period.

Arthur S. Marma, executive director of the State Scholarship and Loan Commission, estimates that approximately $67,500 will be guaranteed by the commission. Although Federal student aid funds are very tight, it appears that many banks and credit unions will make loans to college students, Mr. Marma says.

Summer Public Health Program: Orientation for Missionaries

The twelfth summer mission orientation program in Tropical Public Health for missionaries will be held at Loma Linda University, July 17 to August 25, 1967. The University program, prepared for the first-time appointee and his wife, or a missionary home on leave, is designed to accomplish the following:

1. Lessen the “shock” commonly experienced by recent arrivals in a foreign environment.
2. Alleviate much of the fear and anxiety often felt by newcomers to an underdeveloped country.
3. Present basic instruction in health principles that can promote health and well-being anywhere.
4. Review common problems in interpersonal relationships and discuss the Christian philosophy of missions.
5. Present practical suggestions for relating to other cultures and societies, including approaches to the study of foreign languages.
6. Instruct and train participants in the basic principles of first aid and simple home nursing.

The orientation program is organized by the Division of Public Health and is presented on the University campus with the help and cooperation of the departments of sociology/anthropology, psychiatry, and the Division of Religion. The mission orientation program was first presented by the University in 1952.

Further information may be obtained by writing the Division of Public Health, Loma Linda University, Loma Linda, California 92354.

Five Audubon Wildlife Films Scheduled for '66-'67 Season

The first in a series of five Audubon films will be shown Monday, October 31, at Burden Hall. Mary Jane Dockeray of the Grand Rapids, Michigan, public film "These Things Are Ours." Other programs include Alan D. Cruickshank and his breath-taking trip across Utah, Wyoming, and Idaho along "The Bear River," December 1. Edgar T. Jones will narrate his film "Canada's Mountain Wilderness" the story of the inhabitants of the Canadian Rockies, on January 23. On February 27, Howard Orans will bring an in-depth report on the problem of expanding population and preservation of our natural resources in the color film "For Generations to Come." Concluding the Audubon series is Henry Pederson with his unusual film, "Village Beneath the Sea," featuring the many bizarre citizens who live cooperatively in a fascinating aquatic community, on March 23.

Tickets may be obtained from Muriel B. Wichman at the University Development Office. Season tickets are $3.50. Season tickets for students are $2, and children on the elementary school level are admitted free if accompanied by their parents. All programs are presented in Burden Hall.

Sage Advice from Monastery
Offered Students by Prexy

In his welcoming talk at the first chapel of the school year, President Anderson described an ancient institution's attitude toward conduct as an example worth the contemplation of twentieth-century university students.

"I recently ran across a rule of conduct," he said. "First posted in a monastery in the sixth century, this seemed very appropriate for our institution here in the twentieth century. This was set forth by Benedict of Nursia, for the Mt. Cassino monastery, which he founded south of Rome on a mountain. There he also started an organized home care service. Miss Christian explains, is based on the philosophy that: (1) top quality medical care can be given in the home setting if the hospital is used chiefly for periods of diagnosis, biologic crises, supplementary laboratory work, or detailed physical evaluations; (2) long hospital stays might be shortened if a medical team could provide needed services to patients, both in their homes and on an outpatient basis; (3) home care reverses the trend toward the inability to have a normal life within the family circle; (4) "going home" to some patients means lifting a "death sentence" or lifting depression, leading to a healthier psychological effect on their illness. For the purpose of therapy, teaching, and evaluation, many home calls are already being made by Lawrence R. Johnson, physical therapist, Sara A. Sullivan, occupational therapist, Amy E. Ertos, director of social services, and Marilyn J. Christian, public health nurse and coordinator of the home care service. Additional nursing services are contracted through the local health departments and visiting nurse associations of the area being served in an approximate 25 mile radius of Loma Linda. Martha M. Miller, of the University medical complex, says Marilyn J. Christian, coordinator of the new service. This program, she states, will meet the twofold demand for better services to patients and increased educational opportunities for conduct; "he said, "first and foremost, the order of Benedictine, which is devoted to piety and the preservation of learning. Benedict decreed: "If any pilgrim comes from distant parts with wish as a guest to dwell in the monastery, and will be content with the customs which he finds in the place, and do not perturb

OCCUPATIONAL THERAPY PICNIC

Two committees have been appointed this year to guide in planning and shaping the new program. The home care service advisory committees represent the major schools of the University, community physicians, and hospital services. The two committees, one an educational group, the home care research committee, is composed of R. Maureen Maxwell, EdD, director of the graduate nursing program and chairman of the committee, Richard T. Walden, MD, chair of the social services, Ruth M. White, chairman of the department of public health, and Marilyn J. Christian, coordinator of the home care service. This group is working on research and evaluation of the program.

Medical Director Needed

The greatest present need, the coordinator says, is for the appointment of a medical director for home care service. The medical director would not only direct in evaluating patient eligibility and care needs, but would also serve as an effective liaison between his colleagues in the medical profession, and the home care team itself. Services are given only at the order of the patient's private physician. Many physicians, she says, are not aware of the breadth of services now being made available to their patients.

Loma Linda Area Considered For Veteran's Hospital Site

The growing population of veterans in the Southern California area has heightened prospects that a $20 million Veterans Administration hospital may be built near Loma Linda within the next five years. Cyril F. Frickefield, deputy administrator for the VA, revealed that a five year projec-
tion includes construction of at least two new medical facilities in Southern California. The government executive from Washington, DC, said that the Veterans Administra-
tion "is very favorably impres-
sed" with the area. Mr. Frickefield headed a delegation of VA executives who flew from the nation's capital to look over the area.

The Loma Linda area was first inspected from the air. The officials then were brough-
to of the School of Medicine. Thereafter, preliminary nego-
tiations were discussed.

The Veterans Administration has a policy of building new hospitals near existing medical schools because both the VA and medical research and teaching are mutually beneficial. Of the 89 medical schools in the US, the VA is affiliated with 84.

The visitors expressed appro-
val of the new Loma Linda University medical center and its emphasis on medical re-
search. Mr. Frickefield declined to spec-
ulate as to when a decision
would be reached. He stated that "our interest may be ex-
pressed as a hope — not a promise.

Additional outlooks were discussed.

The annual fall buffet dinner of the Physical Therapy Alumnae Association will be held October 30, 7 p.m., in the University dining hall according to William Habenicht, PT©66.

Fall PT Buffet
Planned Nov. 3

The occasion, which will honor the physical therapy graduates of 1966, will feature a horseshoe game at the outing. There is the communica-
tion barrier, of course, since few of the Navajo communica-
cite well in the English lan-
guage, but that obstacle is just one of the challenges of prac-
ticing good medicine in this place.

”Too Busy to Miss Things”

Harding, his wife Onida, and children Valley©s 10,000 residents, most of whom have been at the hospital for years. “Until you treat them yourself, you cannot understand this kind of thing,” he was told. “Although the year is 1966, the problem is the same, just more pronounced.”

Despites the frustrations, Harding obvious finds his mis-
sion hospital stint stimulating, “Harding’s routine isn’t all

Dental Care, Too

Dental care for prominent Valley’s 10,000 residents, most of whom have been at the hospital for years. Next, dental stu-
dents, directed by a full-time resident professor, will join medical students in service at the colorful mission outpost. Resident professor, will join medical students in service at the mission hospital, Harding describes his medical practice as “highly rewarding from a medical standpoint. ‘You do procedures here you wouldn’t come across in a regular hospital,’ he explains. ‘Natur-
ally, as a student you’re always supervised, but you’re the one helping the patients—you aren’t just watching supervision.’”

Fred W. Black
Manager, Loma Linda Market

How do you make a sandwich spread that looks like mayonnaise, tastes like mayonnaise, but isn't mayonnaise? No problem at all, according to Fred W. Black, manager of the Loma Linda Market. "Right now we have researchers working on a "mayonnaise" that doesn't contain vinegar or eggs, and we should have it ready for the customer in a few months."

Fred W. Black places an order for Kraft Foods from Fred Coleman, sales representative.
