Humanitarian relates story of courage and peril

Every four days—a city the size of San Bernardino (160,000 population)—will be wiped out by starvation. This is the condition that will prevail in the small West Africa country of Biafra by Christmas unless a cease-fire can be arranged between the warring Nigerians and its breakaway province of Biafra, according to Sherman A. Nagel, SM '66.

Dr. Nagel, who is currently fulfilling speaking appointments in southern California, recently returned from Biafra where for the past four years he has been medical director of the Northern Ngwa County Hospital. He says the situation is so desperate that he is being asked to take sides in the dispute between Nigerians and Biafrans. He is appealing as a humanitarian. I can't go on seeing people dying. I speak as a priest, he says, without regard for any organization. I've seen pregnant mothers—they're eating for two—down to 80 pounds when they should weigh 120. I've seen a year-old child who should weigh 20 pounds down to five. When little children start to die, the schools are closed down by Nigerian gunners if they tried to make the flights in the daytime.

Dr. Nagel was able to have medical supplies sent in by planes from the United Nations, but the flying is dangerous. "It could have been by accident that all the casualties were civilian, but if so, then it was a strange accident. It looks as if there was a definite intent of actually cutting people down to size.

Recent reports say that Russian planes flown by Egyptian pilots are currently making it impossible for UN food salvos to reach the Biafrans population.

Dr. Nagel says he is not trying to take sides in the dispute between Nigerians and Biafrans. I am appealing as a humanitarian. I can't go on seeing people dying. I speak as a priest, he says, without regard for any organization. I've seen pregnant mothers—they're eating for two—down to 80 pounds when they should weigh 120. I've seen a year-old child who should weigh 20 pounds down to five. When little children start to die, the schools are closed down by Nigerian gunners if they tried to make the flights in the daytime.

The Los Angeles Philharmonic Orchestra pronounced Dr. Nagel medical director of the small Seventh-day Adventist hospital. "I can't go on seeing people dying. I speak as a priest, he says, without regard for any organization. I've seen pregnant mothers—they're eating for two—down to 80 pounds when they should weigh 120. I've seen a year-old child who should weigh 20 pounds down to five. When little children start to die, the schools are closed down by Nigerian gunners if they tried to make the flights in the daytime."

Until replaced by the Red Cross, the hospital was operated by Dr. R. Wilson, University Hospital, at Cedars, in La Monica Hospital, and had many nurses and doctors. "I can't go on seeing people dying. I speak as a priest, he says, without regard for any organization. I've seen pregnant mothers—they're eating for two—down to 80 pounds when they should weigh 120. I've seen a year-old child who should weigh 20 pounds down to five. When little children start to die, the schools are closed down by Nigerian gunners if they tried to make the flights in the daytime.

During this time, the staff of the school hospital had to serve for 90 patients at a time. Medical cases increased from 30 a day to between 250 and 300 a day.

Because of his foresight, Dr. Nagel was able to have medical supplies on hand that were indispensable.

The School of Dentistry honors
Monument Valley dental clinic

The School of Dentistry will commemorate the second anniversary of its Community Oral Health Service, Monument Valley dental clinic, at the center of the drama of students on the La Sierra campus.

School officers and students have organized a dental clinic to serve the Navaho and Hopi tribes. It is staffed by Kenneth E. Wical, DDS, assistant professor of restorative dentistry, and four senior School of Dentistry students; three resident dental assistants; and a secretary-receptionist. The clinic provides dental treatment for over 10,000 families scattered throughout a 14,000-acre area on the Arizona-Utah border.

Orders for the cachet and the "Chief Joseph" stamp may be placed with the School of Dentistry, Loma Linda University, Loma Linda, Calif. 92354. The "Chief Joseph" stamp may be placed with the School of Dentistry, Loma Linda University, Loma Linda, Calif. 92354. Bieber schedules progress report for University

The third annual President's Convocation will be held Tuesday, November 12, at 7:30 p.m. in Hoke Memorial Auditorium on the La Sierra campus of the University.

In his second major address on the state of the University, President David J. Bieber will report to the University and to general community leaders on the progress of the University since the merger between the Loma Linda University and the former La Sierra College.

Other topics scheduled for discussion by Dr. Bieber include evaluation of the University's priorities; the role of the University in the community; and the relationship of the University to the local churches.

Invitations to attend the event have been sent to government, business, and professional people in the area, as well as to University trustees, faculty, staff, and employees. The event is open to the public and is also invited to attend.

The dairy is part of a 25-year Convocation was held in 1965 on the University's 60th anniversary. In his report to the public last year, President Bieber discussed the future of the University, including specific problems such as federal aid to education versus private support, student unrest, capital improvement needs, and the future of the University.

The dairy has consistently won gold medals awarded this summer in county fairs from all of the counties served by the dairy. John E. Cutting, chairman of the department of agriculture, said last week.

Mr. Carr reported that the dairy, a part of the University's La Sierra campus, was awarded three gold medals in both of the dairy's best milk, half-and-half and cream. The dairy has consistently won gold medals since 1961.

The Los Angeles Philharmonic Orchestra conducted by Zubin Mehta will appear in concert at Loma Linda University on November 10. The orchestra founded in 1919, was the first major symphony in the western United States chosen by the State Department for a tour overseas on the International Cultural Exchange program.
Dental Students Association will present the Rock Island Trio in a program that will music tomorrow at 7:30 p.m. in Burden Hall.

The trio, under the direction of Richard D. Neufeld, SD '70, John E. Peter- son, Jr., SD '70, and Richard K. Harding, SD '71, whose programs have been together for several years, the trio has made numerous appearances on the campus.

Two skills and enrichment will complete the planned program, which is open to everyone.

Undergrad student state scholarship applications ready

Undergraduate college students who are in need of financial assistance to continue college should file a state scholarship application. Approximately $2,500 new state scholarships will be awarded in April 1969. Most of the new awards will be available to students who will graduate from high school in 1969. The number available for currently enrolled college students who are not in the state college grades will be determined. The awards range from $300 to $2,000 at independent colleges, $200 to $1,000 at the state colleges (approximately $120). In addition, students planning to attend junior college may have their grants held in reserve for them until such time as they transfer to the University. Applications for state scholarship awards must be submitted directly from the State Scholarship Commission to the Vernier Radcliffe Memorial Library, 1550 S. Indiana Ave., Los Angeles, California 90015. Applications must be in the State Scholarship Commission by midnight, December 10, 1968.

Wood show opens in library November 15

Versatile Radcliffe Memorial Library has started a new program of monthly art exhibits for the use of locals and personal collections.

The exhibit for this month will start November 15 and feature paintings of various types. Anyone interested in exhibiting art may contact the library.

THE ORIGINAL ANCHOR of the HMS Bounty, The Protest!

I Protest!

By David Douglas Duncan

The New American Library, Inc., 1968

THE ORIGINAL ANCHOR of the HMS Bounty is discovered! This world-famed island now joins the list of world treasures to be commemorated this fall. Captain Johnathan Johnson, who is now residing on the island, has written a new book, I Protest! which is being published by the New American Library. The book tells the story of the discovery of the original anchor of the HMS Bounty.

In the book, Johnson describes his search for the original anchor of the HMS Bounty, which he found on the island of Pitcairn. The anchor is a significant artifact, as it was used by Captain James Cook to secure the ship to the island in 1777. The anchor is now housed in the British Museum in London.

Johnson's book, I Protest!, is a fascinating account of his discovery and his efforts to bring the anchor back to the United States. It is a must-read for anyone interested in maritime history, particularly the history of the Bounty.

I Protest! is available now from your local bookstore or through the New American Library. Don't miss this exciting book-

The soothing tones of the Rock Island Trio will fill Burden Hall when the Dental Students Association presents the group in a music program Friday. The trio, under the direction of Richard D. Neufeld, SD '70, John E. Peterson, Jr., SD '70, and Richard K. Harding, SD '71, will perform their usual blend of folk songs and classical music.

The trio has been together for several years, and their programs have been well-received on the campus. Two skills and enrichment will complete the planned program, which is open to everyone.

University Security Patrol protects two campuses

Providing protection for the men and women on both Loma Linda University campuses is the University Security Patrol.

The purpose of the service organization, according to its chief B. Joe Cao, is to provide security for the campus, to insure protection for the safety of the men and women on the campus, to control disturbance and traffic, to guard against fire, and to keep the peace.

Officers for the patrol are selected from those who meet basic qualifications and show interest in applying for the position. Each applicant is interviewed to determine his ability to work with people, his personal traits, and his personality traits.

Interviews

Following the interview the applicant is given a psychological Minnesota Multiphasic Personality Inventory to check his sense of security, his reactions in face to face encounters with people, his honesty and trustfulness with himself, his ability to communicate, and the value he places on communication.

Interviewing the candidate includes time spent with law enforcement experts in the Beverly Hills Police Department, studying criminal law and laws of arrest, patrol and observation, and public relations.

The University Security is a private patrol under the authority of the University administration. It works closely with the California Highway Patrol and the San Bernardino County Sheriff's Department.

Citation issued

Citations issued by the patrol are under the regulation of the California Vehicle Code 2131. Persons receiving citations on the Loma Linda campus are subject to appear at the Loma Linda Mission Justice Court.

Sergeant Cervillo P. Paulson, and Officer M. William Pumhett, the two senior officers on the Loma Linda patrol, have completed training at the Federal Bureau of Investigation law enforcement school.

Head of the security patrol, Mr. Cao, AFSF, was an officer in the Beverly Hills Police Department for 13 years as a command officer in the patrol and traffic division as well as working in the detective division. When Mr. Cao resigned from the police force, he had achieved the rank of lieutenant.

Previously to his police work, Mr. Cao served in the United States Army Air Corps for five years. He resides with his wife, Olaha M., and son Kurt E., AFSF, in San Bernardino. He has another son, Jeffrey D., STFJ. Mr. Cao has been head of the La Sierra campus security patrol since 1963.

Through these doors pass the world's best excuses for not using safety belts.

SEVENTY-SIX SOPHOMORES medical students from Loma Linda University School of Medicine recently visited Riker Laboratories, Northridge, an pharmaceutical firm and division of Rexall Drug and Chemical Company. Hosted by the research division, the students received first-hand information on new developments in the pharmaceutical industry and were entertained at a dinner. Pictured at Riker are (from left) Dr. E. K. Han, physicist; Dr. D. L. Youngs, chair of research; Mr. C. H. Kett, chief of research; B. J. Heber, and class president Jay L. Neth. Mr. Heber is student representative for Riker at Loma Linda.

What's your excuse?
Students presented Anatomey atlases

One hundred and two Loma Linda University School of Medicine freshman students were each presented with a copy of Lederle Laboratories publication, "Atlas of Normal Anatomey," last month by San Bernardino area Lederle representatives William J. Johnson. The atlases, valued at $80 each, contain 48 full-color plates of the areas of the human body.

Lederle Laboratories, a division of American Cyanamid Company, is located at Pearl River, New York. Each year Lederle presents similar atlases to all freshman students throughout the United States.

Lung ashtray helps smokers kick habit, see inside self

A unique stop-smoking program is underway in Salt Lake City, Utah, according to J. Gordon Short, M.D., a physician at the Holy Cross Hospital in Salt Lake City, Utah. The stop-smoking project, originated approximately one year ago, is under the direction of W. R. Spence M.D., medical director of the Holy Cross Hospital.

"So far," Dr. Short says, "three items have been designed by Dr. Spence and are ready for marketing to professional people as well as to the lay public dealing with smoking." The stop-smoking project, located at P.O. Box 13787, Salt Lake City, Utah, is under the direction of the company named "Truth About Smoking," located at P.O. Box 6322, Salt Lake City, Utah 84110, to carry on his program against cigarette disease in a broader manner.

The Loma Linda University Church Choir Sings

with precision and brilliance, the voices sing solo, duets, and trios to a harmonious, full sound. Every constellation of good music will appreciate the imaginative presentation in these albums.

CHRISTMAS MUSIC FROM LOMA LINDA UNIVERSITY
LP $12.99-$4.50 ST $12.99-$4.50

Under the direction of Patrick H. Hicks, the University Choir is composed of students, faculty, and friends of the university, a division of the Pacific Press Publishing Association, Loma Linda, California.
Simplified computer system improves KSDA's broadcasts

A simplified computer system rigged by two students has made it possible for KSDA-FM, the Loma Linda University radio station, to increase its time on the air by more than one third and to improve broadcast quality.

Murray Stanford

The electronic computer system, affectionately dubbed "Murgatroyd," was the result of a $17,000 FM station (88.7 on the dial) one of the pioneer educational stations in the field of automated programming. Ronald W. Bowes, station general manager, said that to his knowledge only Brigham Young University among universities of educational stations throughout the United States has anything like it. Automated programming, coming among commercial stations, is just beginning to find its way into the educational station arena.

The two students, both sophomore physics majors, are Robert Groves, SM'70, and John Warren of Long Beach. As amateurs they were "hacking around" out of yet of the feasibility of fabricating a system to automate KSDA. They decided to try it.

With materials costing less than $250 they built a system equal to commercial systems costing up to $1,000. A working prototype of the system was put together with a cost that will be $250. That model was actually put to use for several hours of preplanned programming when the students of KSDA's staff put a farewell party last spring for Donald Dick, PhD, then general manager of the station.

The system detects inaudible errors from music and voice tapes that signal the control panel to switch to the next musical selection or announcement. That control panel is an array of switches.

"Not so," says Dr. Nagel. They are fighting with a tenacity like Santa Claus.

"Strange bedfellows like Santa Claus."

It out to these dear people. . .

Mrs. Nagel recalled, "We would give it out to these dear people... the children hadn't seen a stockfish for a year... we felt like Santa Claus."

A son James, 14, was with the Nagels until the middle of May when he was evacuated by the International Red Cross.

One of Dr. Nagel's long-time acquaintances, Samuel Adamu, a Seventh-day Adventist—last five of his six children to starvation.

Strange bedfellows

"We would go into a village for food; in "scrounge" enough food; in

The war is currently being extended by "strange bedfellows," at Dr. Nagel explains—Belgium and the Soviet Union, each selling arms to Nigeria.

Biafra is receiving arms indirectly from France. The French are supplying arms to their former colony, Gabon, and Gabon supplies them to Biafra.

"The Biafrans lack support in other African countries," Dr. Nagel says, "because if the Biafrans succeed, minority groups in other African countries may be encouraged to revolt."

Is your child ready for piano?

If you are wondering about piano lessons for your child, ask for the free booklet, "She Shall Have Music" and "He Shall Have Music." These booklets will help you make this important decision.

Hard-to-place malpractice insurance

Placing hard-to-place malpractice insurance has developed into a specialty for us. It has grown out of the specific financial planning services we offer to the legal professions. Defensive driving can be an excellent way to reduce hard-to-place insurance rates. As with all lines of insurance, the key is good communication with your client. Good communications will help you place insurance that is not only competitive, but also in the best interest of your client. If you are interested in learning more about this specialty, we would be happy to provide you with more information.

LSD to be topic at noon meeting

Conversations at Noon will feature Jack V. Fromm, professor of philosophy of religion and Christian ethics, speaking on the moral implications of mind-manipulating agents such as LSD at noon November 19 in the campus cafeteria, Loma Linda.

What is it like to be on the staff of a small mission hospital in a country caught in the middle of a civil war? Donald R. Wilson, MD, resident in surgery at Loma Linda University Hospital, who is currently in Biafra, will discuss this in a one-month term as relief physician recently reported his findings in a letter to The Loma Linda University Hospital, MD, professor of surgery. His report is intended to provide a more accurate picture of the war situation.

“LSD is话题 at second week in Biafra,” Dr. Wilson reported to the General Conference of the Seventh-day Adventists, speaking: 7:30 p.m. November 19.

“The hospital was designed a 30-bed institution but presently has about 80 patients. One expects a small mission hospital to be somewhat limited in facilities, but we feel that under the war conditions prevailing at the present time..."

Placement

The southwest Chicago suburban DuPage County Board of Health changed its meeting night from Friday to Wednesday so that a Seventh-day Adventist doctor, Charles L. Anderson, BVM, could be a member.

Dr. Anderson, psychiatrist at Hinsdale Sanitarium and Hospital, Hinsdale, Illinois, accepted the appointment to the nine-member board only after the quarterly meetings in Wheaton were shifted away from the Sabbath.

When Dr. Anderson was first approached about the appointment, he recommended several other psychiatrists as good candidates. But the county's representatives returned to press the appointment to the nine-member board only after the quarterly meetings in Wheaton were shifted away from the Sabbath.

When Dr. Anderson was first approached about the appointment, he recommended several other psychiatrists as good candidates. But the county's representatives returned to press the appointment to the nine-member board only after the quarterly meetings in Wheaton were shifted away from the Sabbath.

The son of Dr. and Mrs. A. N. Anderson, who were missionaries to Japan and later the Philippines, Dr. Anderson was born in Tokyo. Before joining the Hinsdale Sanitarium staff in 1957, Dr. Anderson served as clinical director of Harding Hospital in Ohio, as psychiatric consultant at the Veterans Administration Hygieia Clinic in Columbus, Ohio, and as chief of the Section of Mental Health with the Alaska Department of Health in Anchorage.

Hindu and Buddhist doctors, Charles L. Anderson, BVM, could be a member.

The south west Chicago suburb of DuPage County Board

The above map displays the hospitals and needs for personnel in South America. The Seventh-day Adventists operate 15 hospitals, 15 launches, five dispensaries and clinics, and seven planes. The planes and launches make it possible to reach the heretofore inaccessible areas of the Andes and the Amazon region.

In this area there is need for two field physicians (general practitioners) in Juliana, Peru, for a term of one year.

Other positions available include calls for 32 physicians, 20 general practitioners, (eight for the Far East, one for Inter-America, seven for Africa, two for South America, and two for South Asia). Twelve specialists are needed: six surgeons (one for the Far East, one for the Middle East, one for Africa, and two for South Asia); two internists for the Far East; two gynecologist-obstetricians (one for the Far East and one for the Middle East); two orthopedists for the Middle East; and one psychiatrist-educator for South Asia. There is a call for one dentist for Nigeria, and for eight nurses (one for the Middle East and seven for Africa).

JMA starts party catering service

Need help with entertaining? The School of Medicine Junior Medical Auxiliary has the answer, according to Mrs. Kenneth W. Hart, JMA catering chairman.

The Junior Medical Auxiliary provides catering services for such occasions as Halloween, Thanksgiving, Christmas, New Year's, birthdays, or other general occasions. They will do the work so you can enjoy your party.

Further information may be obtained by phoning 796-6681. Proceeds from catering services are used for Junior Medical Auxiliary mission projects.

OPPORTUNITIES
Excellent opportunities in British Columbia for physicians and dentists.

Conference eager to assist. Kindly contact medical secretary, Renken Matthews, MD, Box 16, Mission City, BC, Canada.
Edna York, GS ’58, Kansas City Hospital, Kansas City, Mo. She plans to accept the position for the $30 received from the student organization with which she is buying books for her school of nursing.

Kathle Beizer Blinder, STHN, who is director of nursing service and of the school of nursing in Nicaragua Adventist Hospital, La Trinidad, Esteli, Nicaragua, writes: "We feel so blessed to have received something personally from our alumni association. Our children were delighted to receive the books as well as some lovely coloring books and Bible games. We are all so very thankful.

"We have a large branch Sabbath School program here. In the mountains I have been conducting classes in the making of vital aids, with some dirty, grungy but very appreciative children in attendance. Property has been given to us to build a church in that area. This we hope to do as soon as funds ($1000) are available for piping in water and doing electrical work. Then we plan to conduct hygiene and home nursing classes.

Debra Davis Gilman, SN ’59, Agana, Guam, writes: "We have recently received word from our RepLAB legislation that they desire a religious group from their island to establish medical work. The island is about 250 miles north of Saipan, and it is not an Adventist family living there. We hope to work with them to open work there. Two dentists are interested in working in this field and we hope to open a dental clinic. We are looking for nurses who are interested in this project as well as a teacher for the students. We will attempt to titrate value material to each individual, the mission committee is soon to be established to coordinate the effort.

"Wanda Jean Clark, last year destroyed 56 percent of the island’s corn crop. Our RepLAB students have pollinated the corn, and we greatly appreciate the help. We hope to put this into a fund and use it for sterilizing and other projects.

"Mrs. Marian B. Fox, Grant, Minn., has passed away. We extend our deepest sympathy to her family and friends.

Edith Lorraine Gillham, GS ’59, Malawi, Africa, writes: "We have received the box of cut-outs for sand table use in Sabbath School and are very happy to have them. We recently started a Sabbath School at the hospital and are thrilled with the 40 children in attendance.

Bettie Wareham, GS ’59, Loma Linda University, Loma Linda, Calif., writes: "Thank you very much for the $30 sent for our school of nursing. I shall add it to a fund to which we hope to buy a Chase doll. We are sadly lacking in teaching aids, and this will be helpful in our four-year program, and when the Chase graduate is expected to do everything, including the client, the office of difficult maternity patients. Due to the distance, African and students are not permitted any proper experience before they graduate.

WANTED

Registered lab technicians for N.T.V. and some therapy experience. Full time. Salary open. GIF office, Warren P. O. Box 220, Norco, California, Telephone (714) 630-0764.
First meeting of Adventist historical society scheduled

The first meeting of Seventh-day Adventist historians is scheduled for November 17 and 18, according to Robert E. Cleaveland, PhD, vice president for academic affairs.

Invitations are being sent to the history teachers of Pacific Union College, Angwin; Loma Linda University; and to other historians as well.

Highlight of the meeting will be a lecture by Ray A. Billington, PhD, senior research fellow at the Henry Huntington Library, San Marino. He will present a paper on Frederick Jackson Turner, who was noted for his writings on the significance of the frontier in American history.

Professor of political science Alonzo L. Baker, PhD, will speak at an evening banquet, November 17.

A luncheon meeting will host the Los Angeles British Consul General A. A. B. Franklin, who will speak about the role of Great Britain in the world today.

FINANCIAL SALES CONSULTANT

Professional career opportunity in financial planning for medical and dental students and physicians and dentists. Excellent salary to start. Most advanced career guidance and training program in the financial sales field. La Sierra graduate preferred. Send background information or call for confidential interview.

How Do You Use Worthington 209. Anyway? Any Way You Want to, Partner!

Worthington 209 has caused the fancy of folks everywhere.

209 is a savory new protein food unlike anything you may have tried before. Thousands already have tried "209" slices and come back for more. Delicious served over toast points or as an entree with vegetables, Worthington 209 also makes exciting meals when barbecued as in the recipe below. You've likely already tried "209," but in case you haven't, why don't you get some soon—partner! (Photo by Harold Wynne)

Barbecue "209"

6 tablespoons lemon juice, 3 tablespoons brown sugar, 1-1/2 cups chopped onion or more, 1/2 teaspoon salt, 1/2 teaspoon paprika and 1/2 teaspoon Worcestershire sauce per 4-6 servings. Combine all ingredients except for orange juice. Place 4-6 servings in a casserole dish or roasting pan. Pour orange juice over top of meat.

A UNIVERSITY OF CALIFORNIA at Riverside extension service group of farm advisers hosted by Donald Bell (third from right), poultry farm adviser, recently visited the Loma Linda University dairy and poultry departments to observe production methods.

Socialism?

Will hens lay more eggs if their social structure is kept intact from an early age?

That question is under study at the Loma Linda University farm adjacent to the La Sierra campus. The experiment, conducted for the extension service of the University of California at Riverside, takes into account the well-known fact that every flock of chickens has its "pecking order." Each bird pecks another low on the social scale without fear of retaliation but submits in turn to pecking by a bird higher on the scale.

"One girl is boss and the others fall in line," says John Krychaw, assistant professor of agriculture and poultry business manager at Loma Linda University.

So well recognized is this social pattern among hens that it is common practice among poultrymen to blunt the beaks of chicks with a hot blade that cuts and cutenudes simultaneously. The characteristic pecking process continues, but the social order is maintained with a minimum loss of life among the chickens.

In the University study, 20 to 25 birds are started out together by the brooding, growing, and laying stages. Egg production is compared with that of birds mixed at random, as is the case under normal circumstances, when ever they are moved. Each time a bird finds herself in a new social environment, there is an endeavor to re-establish a pecking order. The experiment is conducted to determine how costly that procedure may be in terms of egg production.

Loma Linda's pecking order study is one of several experiments conducted from time to time by the poultry business for the UCR extension service.

The poultry operation occupies eight of the 350 acres of the Loma Linda University farm. Its hens produce an average of 25,000 eggs each day. The population includes 60,000 birds, of which 10,000 are broilers, 10,000 are growers, 40,000 are layers.

All of the chickens are fed vegetable proteins instead of animal proteins, their eggs marketed as "Vegeta Pro." The poultry business continuously conducts its own testing to improve quality and production through the use of vegetable food supplements such as synthetic amino acids.

UCR farm advisers visit the poultry facilities periodically to observe the methods and to see the experiments in progress.
Have you a white elephant?
It could aid education

An old dress, trays racket, dish, or pair of shoes may aid a nursing student's education or help a nursing alumna serving overseas as a missionary, when it is donated to the House of Thrift.

Operated by the Loma Linda University School of Nursing Alumni Association, the House of Thrift has an annual income of over $8,000. This money is used for scholarships or mission projects. The shop is run entirely by volunteers who gather donations from the drop boxes located in Lindsay and Danville halls and in front of the Loma Linda Market.

Several hundred pounds of clothing and other articles are deposited in the boxes each week. Volunteers take the things to sorting and storage rooms maintained in the basement of Nichol Hall. From there they are displayed at the House of Thrift located at 20876 Redlands Boulevard, Loma Linda. The shop has received a State of California license for operation on a regular basis rather than as a rummage sale.

Scheduled to begin soon is solicitation of surplus merchandise by the Loma Linda Kodak Image Firms. A leaflet describing the operation of the House of Thrift is currently in production.

The alumna association does not depend on the shop for operating expenses. All the money earned is used for scholarships or mission projects.

Those responsible for maintenance of the shop are: Jeannine Mitchell, SN '60, chairman; Ethel Bader, SN '36, co-chairman; Lilian M. Joseph, SN '53, in charge of sales; Ther T. Schenkel, SN '59, in charge of volunteer help; and Irene F. Arnold, SN '47, in charge of publicity.

The House of Thrift is open Sundays from 9 a.m. to 4 p.m. and Tuesdays and Wednesdays from 2 to 5 p.m.

University alumni join Hinsdale staff

Two Loma Linda University alumni have recently joined the staff of Hinsdale Sanitarium and Hospital, Hinsdale, Illinois. They are Delbert R. Brown, SM '58, and Charles E. Michaels, SM '53.

Dr. Brown has joined the staff as an associate of Charles L. Anderson, SM '41, chief psychiatrist.

Dr. Michaels just completed a year's neuropsychology residency at the White Memorial Center, Los Angeles, before joining the Hinsdale staff.

### Placement

**Continued on page 6**

**EXETER:** City serves area with population of approximately 1,000 in east end of Ventura County. Only two family physicians in area. Hospital building would be expanded. Patients would be transferred to new office building to open early in 1969. Staff: elementary school and academy in area.

**FRIDED:** Two GPs seeking a general partner in this central city of 30,000. Position available now. One partner leaving for specialties training. Salary plus percentage. youngsters welcome. One medical staff doctor open staff hospitals within 5 miles

**FULLERTON:** GP established nine years seeking GP associate. Salary open. No investment and 40-over worked.

**HOLSTEIN:** Solo practice seeking GP associate in small community. Salary plus percentage. Young medical school graduates welcome. One medical staff doctor open. Staff: small hospital, school, community.

**LAYTOWNVILLE:** Excellent opportunity for semi-retired physician. Younger in the group.

**LODI:** Two GPs desire associate 25-45 years of age who has comprehensive medical office and is open to working in a semi-retired capacity on a regular basis in a medical staff hospital. Excellent hospital facilities.

**ASTORIA:** Town of 2,100. Trades area 8,000. One physician age 62 and semi-retired. Population 3,250. Hospital facilities excellent. Trade area 8,000. One physician age 62 and semi-retired.

**OSKALOOSA:** Seeking two GPs for a growing community of 7,000. No hospital facilities available. Population 1,250. Hospital facilities excellent. One medical staff doctor open.

**PERRYVILLE:** GP interested in group practice in this area of 8,000. Salary plus percentage. Younger in the group. One physician in community.

**WALLIS:** Community of 45 miles from Houston seeking physician for the next six months. Population 1,200. Hospital 10 miles away. Populations: 1,250.

**SACRAMENTO:** GP needed for partnership in a group of four. Population 10,000. Salary plus percentage. Young medical school graduates welcome. One medical staff doctor open. Staff: 15 physicians in this hospital.

**WASHINGTON:** Area physician would serve 31,000. No hospital facilities. No insurance. Population 1,200. Hospital 10 miles away. Populations: 1,250.

**CORPUS CHRISTI:** City serves area 8,000. One physician age 62 and semi-retired.

**FRESNO:** Two GPs seeking a GP for this city of 250,000. No hospital facilities. Willingness to travel. Populations: 1,250.

**FILLMORE:** City serves area with population of approximately 1,000 in east end of Ventura County. Only two family physicians in area. Hospital building would be expanded. Patients would be transferred to new office building to open early in 1969. Staff: elementary school and academy in area.

**LYONS:** City of 12,000, trade area 8,000. One physician age 62 and semi-retired.

**HOLLISTER:** Solo practice seeking GP associate. Salary open. No investment and 40-over worked.

Four teachers join department of modern languages

Four new professors have joined the department of modern languages of the College of Arts and Sciences. They are Lindsey Thomas, Jr., PhD, associate professor of modern languages; Thomas H. Hamilton, assistant professor of modern languages; Jacques Benzakein, assistant professor of modern languages; and Leon Gambetta, assistant professor of modern languages.

Dr. Thomas, a graduate of Boston University, Boston, Massachusetts, received his doctor of philosophy degree in French from the University of Southern California at Los Angeles. After receiving his doctorate, he spent two years teaching at the Ivy Coast School (College Adven- titiate), Poinville, Ivory Coast, in West Africa, with his wife, Evelyan, a 1962 graduate of the School of Medicine. A 1965 graduate of Loma Linda University, Mr. Hamilton received a master of arts degree from the University of California at Riverside. One of the charter Year Abroad stu-
dents at the Seminaire Adventiste du Saultex, College- scosan, Saultex, France, he has also studied in Lausanne, Switzerland, and at the Sorbonne in Paris.

Mr. Benzkein, a native of the Belgian Congo, received his master of arts degree from the University of Wisconsin, Madison. A graduate of Andrews University, Berrien Springs, Michigan, Mr. Gambetta will continue to work toward his doctorate while teaching. Joining the department to teach Spanish is Mr. Gambetta, who comes from Pacific Union College, Angwin. Born in Ar-

geativa and Oscar Hammerstein, will be shown November 23, sponsored by the Dental Students Association and the School of Dentistry class of 1970 at 5:30 and 9 p.m. in Lurline Auditorium or the campus of Riverside City College, Riverside.

Advance tickets for the 174-minute color 20th Century-Fox film may be obtained from the Dental Students Association and the School of Dentistry class of 1970 at 5:30 and 9 p.m. in Lurline Auditorium or the campus of Riverside City College, Riverside.

The Sound of Music to be shown by dental students

"The Sound of Music," from the stage musical with music and lyrics by Richard Rodgers and Oscar Hammerstein, will be shown November 23, sponsored by the Dental Students Association and the School of Dentistry class of 1970 at 5:30 and 9 p.m. in Lurline Auditorium or the campus of Riverside City College, Riverside.

Advance tickets for the 174-minute color 20th Century-Fox film may be obtained from the Dental Students Association and the School of Dentistry class of 1970 at 5:30 and 9 p.m. in Lurline Auditorium or the campus of Riverside City College, Riverside.
