Memorial services pay tribute to dental school’s first dean

Funeral services were held Tuesday, September 23, in the church members at a memorial service for Dr. Prince. Dr. Prince graduated from the University of Michigan School of Dentistry and died September 18. He was 83.

Dr. Prince, while still practicing in Michigan, was formed among those for whom the need for another dental school in the west and spearheaded the campaign for organizing the School of Dentistry at Loma Linda University.

The establishment of the school, Dr. Prince believed, would not only help to ease the nationwide shortage of dentists, but also benefit the Seventh-day Adventist Church.

Loma Linda University School of Dentistry was opened in 1953 with 14 students. The first graduating class of 29 members was graduated in 1957. Currently, there are 21 students in the dental school program.

Dr. Prince is survived by his wife, Ann, of Redlands; a son, Robert W. Prince, DDS, of Lewisville, Texas; and a grandson, Robert.

Flying club plans increase in pilot training instruction

The Loma Linda Flying Club is offering instruction in all single-engine airplanes to students, according to club president, Elvis B. Rich, who also directs the aviation program at the university.

The flying club owns two planes, a 1956 model 170 and a 1958 Cessna 182, which is fully equipped to carry the maximum flight rule (IFR) standards of the Federal Aviation Agency.

Two flight instructors teach classes to the members at a meeting, Elmer W. Rich, director of aviation services for Loma Linda University.

The club is open to all students and faculty members of the community. Loma Linda University has produced more than 50 licensed pilots.

Flying out of Redlands Municipal Airport, the club specializes in flight training. However, ground schools for private, commercial, and instrument ratings are available through the school and not affiliated with Loma Linda University.

The flying club is supported by club members. To fly the Cessna 182, members must pay a $400 initiation fee. They are also charged $14 per hour to operate the plane.

If official action to incorporate a腾飞是 taken, the procedure may take from 6 to 15 months, depending on the time it takes to procure the necessary government permits.

The report examines the feasibility of incorporating the school for the purpose of establishing a medical school in Los Angeles, in consultation with public health and dental care for those who had access to health care through the school.

The committee set October 7 as the date for a public meeting on incorporation. The session will be held at 7:30 p.m. in Gentry Hall, Loma Linda University.

Two specific finds of the committee were that residents of Loma Linda could enjoy the benefits derived in having their own local government and that incorporation would be in the best interests of all Loma Linda residents because of the significant savings in property tax dollars.

Committee’s ok to incorporate Loma Linda

A special committee of Loma Linda citizens has recommended incorporation of the community’s almost 10,000 residents.

The Joint Committee on Loma Linda Community Government, composed of ten individuals representing three organizations — Loma Linda University, Loma Linda Chamber of Commerce, and the Citizens’ Committee on Incorporation — concluded that incorporation would be in the best interests of all Loma Linda residents because of the significant savings in property tax dollars.

The committee set October 7 as the date for a public meeting on incorporation. The session will be held at 7:30 p.m. in Gentry Hall, Loma Linda University.

Medical-dental team conducts Guatemala mission endeavor

A dental and medical team from Loma Linda University spent three weeks in Guatemala last summer, conducting clinics in remote areas of that country.

Objectives of the trip were to encourage development of a deeper understanding and interest in public health and welfare, and missionary work in the members of the group and the lives of those who affect social contact; (2) to cooperate with the educational, medical, and missionary personnel of the local community, in providing medical and dental care for those who had access to health care through the school.

The committee set October 7 as the date for a public meeting on incorporation. The session will be held at 7:30 p.m. in Gentry Hall, Loma Linda University.

The group was self-supporting in all respects and purchased food and supplies from local markets, so as not to be an additional burden to the mission.

In Guatemala City the team split into two groups to cover more territory and began the three-week tour which would eventually produce 28 clinics. The smaller unit of seven people was led by Dr. Peters, and the larger group of 14 was led by Melvin E. Lund, DDS, professor of restorative dentistry. The one group was kept small so it could be flown into the remote areas of the country, according to Dr. Peters.

The trip began for group II, the larger group, down the coast through Pueblo Nuevo, Hecapet, Palmar, San Felipe, and into the mountains to the Loma Linda in the Quetzaltenango Valley, the town where E. Charles Hackett, SM’69, and his wife, Janice K. Hackett, SM’69, have established a medical mission clinic. They hope to eventually set up a hospital in San Cristobal.

The smaller team, Group II, held clinics on the way from Puerto Barrios the first week and then on to the town of Tikal, where they worked with the Guatemalan Air Force. Peters can be reached only by air from Guatemala City to the present time; however, a government agency, FYDEP, is in the process of building a highway from Guatemala City to Tikal.

**Week of Devotion speaker chosen**

Richard C. Nies, PhD, a clinical psychologist in Los Angeles, has been selected as speaker for Loma Linda University's Fall Week of Devotion, according to Dalton D. Baldwin, assistant professor of psychology.

The theme of Dr. Nies' talks will be 'Between Man and God: Man in the light of the history, philosophy, and psychology of religion.'

Mr. Baldwin states that all class and club organizations should keep open the weekend of October 31- November 3, the date of the Week of Devotion.

**MOUNTAIN CLIMBER Luther G. Jerstad, PhD, rappels a steep cliff in a scene from his adventure movie, "Americans on Everest." Dr. Jerstad's film is the second University Art and Lecture Series program, scheduled for October 11.**

---

**Prior to their visit to the Loma Linda team's clinic, often the villagers received their only dental care from the village chief. Though some of the village headmen have a little training (one even had a portable dentist chair), their methods for the most part are quite primitive. The main dental problem facing Guatemalans is caries and poor oral hygiene.**

---

**Search for mountain guide continues**

Dr. Jerstad, author, lecturer, and college professor, received his doctorate degree in Asian culture from the University of Oregon, Eugene. He has also worked as a professional mountain guide. In 1963 Dr. Jerstad was awarded the Hubbard Medal for exploration by the late President John F. Kennedy.

Admission to the film will be by a season pass, a University student identification card, or a one dollar ticket which will be sold at the door.
According to Mrs. Beem, a hospital has three types of services. The hospital does provide some basic services and some volunteers are named by the administrator to perform these jobs. Some of these volunteers are employed by the hospital. They are known as aides. However, most of these jobs are done by volunteers. The hospital has three types of services.

There are 110 volunteers in University Hospital, swelling to 500 during the summer as high school "pink ladies" volunteer. More could be used, according to Mrs. Beem.

One project she would like to initiate is a visitor control desk on every floor. But until more volunteers are available, that plan will have to wait.

Sports program to offer extra athletic activities this fall
The department of physical education, health, recreation is planning a full program of extracurricular athletic activities as well as several clinic schedules for credit, according to Gerald K. Case, assistant director of volunteer service administration.

National Fastball scheduled to be played on the campus of the University of Montana, from October 3-6.

The National Fastball competition will be held on the campus of the University of Montana, from October 3-6. The competition will include teams from various states and regions.

Volunteer service league

Volunteers range in age from 15 to 80. To maintain membership in the University Service League, they must put in two hours of volunteer work every week. They may work only as much as time as paid employees, on a part-time basis. And they are not allowed to work in the same field or position in which they are already employed. But what hours they can pick are fully utilized.

Dorothy L. Beem, director of the University Hospital, is the director of the Volunteer Service League. The league has three types of services.

One project she would like to initiate is a visitor control desk on every floor. But until more volunteers are available, that plan will have to wait. This may be a more difficult task than it seems, as the hospital has three types of services: the "pink ladies," the "white uniform" volunteers, and the "barefoot" volunteers.

The "pink ladies" are volunteers who work in the hospital's gift shop. They are paid two dollars an hour, and they have other responsibilities as well. They are responsible for making beds, handling wheelchairs, and helping with the general operation of the hospital.

"The girls actually have more responsibilities than the "white uniform" volunteers," says Mrs. Beem. "They can empathize with their patients."

There are 300 candy strippers in University Hospital. They have to bring a specially prepared gift to each patient. The hospital has three types of services. The hospital does provide some basic services and some volunteers are named by the administrator to perform these jobs. Some of these volunteers are employed by the hospital. They are known as aides. However, most of these jobs are done by volunteers. The hospital has three types of services.

"I want to know what kind of work a nurse has to do," writes one volunteer.

"Being an opportunity to learn the responsi - bility of a steady job and what it takes to run a hospital," says another.

The Volunteer Service League was started by Lorna Lindel in 1967. It is designed entirely to serve inside the hospital, as opposed to external auxiliary which has money-making projects outside a hospital. Lorna Lindel is president of the volunteer league, and Mrs. Beem is assistant director.

"We have a special responsibility to help someone else less fortunate," observes Mrs. Beem. "They add a great deal of human compassion to the work that is being done in the hospital."

As the president of the University, Mr. Jacques, in his capacity as the representative of his personal life and of his official position as president of the University, would probably not think of his presentation as a manifesto. Nevertheless, he articulated his views on the responsibility of the University.

In this editorial, Mr. Jacques emphasizes the importance of leadership in guiding the University towards its high mission. He stresses that the opinions of others, whether students, faculty, or alumni, must be heard and considered.

The president concluded with a call to action, urging everyone to work together to fulfill the University's mission. He reminded the readers that while there may be disagreements, the goal should always be to make the University a better place for all who are associated with it.

Mr. Jacques's editorial reflects the values of the Seventh-day Adventist Church, which emphasize the importance of education, service, and personal development. He exhorts the community to be proactive in promoting these values and to support the University as it continues to strive for excellence in education and service.
