College Returning

The college students and College PAC groups will be trickling in over the weekend. Our small group in Belize are finishing up, while the group from Lebanon got back this morning.
The group that has been canvassing have also finished up and said farewell to the work they have been doing and learning so much in. Check out the new posts on the **pacmissions** site to see the exciting things happening in Lebanon and read about how the health work is grabbing people's attention!

**Quote of the Week**

"Let our people show that they have a living interest in medical missionary work. Let them prepare themselves for usefulness by studying the books that have been written for our instruction in these lines. These books deserve much more attention and appreciation than they have received. Much that is for the benefit of all to understand has been written for the special purpose of instruction in the principles of health.

Our Sabbathkeeping families should keep their minds filled with helpful principles of health reform and other lines of truth, that they may be a help to their neighbors. Be practical missionaries. Gather up all the knowledge possible that will help to combat disease. This may be done by those who are diligent students.

All can study our health literature and become intelligent on this important subject."
