October Newsletter from Nicaragua

What's new in Nicaragua!!

Nutrition Program

Ilder turned 5 years old in August this year. He has been in the program since he was three. He has grown taller and gained weight. He has filled out and is not sick as often as he use to be.

This month as he celebrated his 5th birthday he also graduated out of the Nutrition program. The Lord has blessed him and we pray that he will continue to grow both "in stature and in favor with God and man."

Kitchen Project Completed

Recently we completed the 100 sq foot kitchen area for the village school. Now they can cook and serve the children food without getting rained out.

Thank you to all who helped with this project!

Bread Oven New

The current way of baking for most Miskito villages is inefficient and time consuming. We would like to build a new Baking Oven prototype.

We are opening fundraising for this project. If you would like more information about this project, please visit our project site for more information and pictures.

If you would like to donate please click on the "Donate Now" link at the top of the email.

Hello and greetings to all.

The month of September has been very unusual for us. We started off slow while still in Costa Rica finishing out time out of country for our Immigration visa requirements. After a long refreshment of body and soul, we were delayed two extra days to help fix a water...
leak in our friend's house. After a rushed couple days in Managua buying supplies, we returned home ready to hit the road running.

The first time that Clint was called for a transport the day after returning from Costa Rica, the plane would not start. It took four days working with the mechanics from Wings of Hope before they decided what was wrong. They sent out the parts to Willis Hankins who was coming down. Now they have the parts back on the plane and it is running, Praise the Lord. The second Praise the Lord comes for not letting the plane break down in Costa Rica or Managua, where Clint had no tools or Internet to communicate with the mechanics. Praise the Lord we were home!! It turned out to be a simple problem to fix.

Marilyn has been busy with sick babies this week. It seems a lot of people in the village are sick and it is hitting the babies especially hard. The saddest one is baby Ariela. She was born with a hole in her heart and has been sickly most of her 11 months of life. She caught the cold virus that everyone else has, and in her weakened condition, developed pneumonia very quickly and died on Sabbath afternoon. Our prayers go up for her family.

Currently we are working on a greenhouse. If it works well we will replicate it in the village.

Please continue to pray with us for

- the people of our village and area, that they might truly KNOW Jesus.
- The family of the baby that died.
- Safety for the people we transport in the airplane

We appreciate all your support and prayers as we daily continue on with the work the Lord has given us.

God Bless,

Clint and Marilyn Hanley
