

# PHARMACY SAVINGS PROGRAM

Andrews University is pleased to provide a Pharmacy Savings Program administered by Health Plan Advocate (HPA).

HPA assists with your prescription drug needs by identifying available manufacturer assistance coupons to save you money on your non-specialty drugs and by helping you better understand your prescription drug options.

Here's how it works:

- The program is available to employees and dependents enrolled in our medical plan.
- All members with non-specialty prescription drugs that (1) cost \$400 or more and (2) have a manufacturer assistance coupon available (a “program-eligible drug”) will automatically be included in the program. For all other non-specialty prescription drugs, the plan’s standard co-pays as outlined in the Schedule of Medical Benefits will apply.
- If you or one of your dependents are taking a program-eligible drug, HPA will contact you to assist you with program enrollment.
- For those who respond to HPA, your final cost for your program-eligible drug(s) will be \$0. Depending on the prescription drug, a small “point-of-sale” co-pay might apply, but this will be reimbursed to you by the plan.
- For those who choose not to respond to HPA, a co-pay of up to 50% will apply for your program-eligible drug(s).
- If you or your dependent has been identified as eligible for the program, be sure to respond to HPA so you can avoid the 50% prescription drug co-pay and take advantage of the cost-savings and advocacy benefits of this program.

HPA looks forward to assisting you. For program-related or general questions, contact them directly.
