## DISABILITY DOCUMENTATION FORM: BRAIN INJURY

The office of Disability Support Resources (DSR) strives to ensure that qualified persons with chronic health conditions are accommodated, and if possible, that their accommodations do not jeopardize successful therapeutic interventions. The office does not modify requirements that are essential to the program of instruction or provide accommodations for persons whose impairments do not substantially limit one or more major life function.

Andrews University is required by Section 504 of the Rehabilitation Act and the Americans with Disabilities Act to provide effective auxiliary aids and services for qualified students with documented disabilities if such accommodations are needed to provide equitable access to the University's programs and services. Federal law defines a disability as "a physical or mental impairment that substantially limits one or more major life activities." Major life activities are defined as the ability to perform functions such as walking, seeing, hearing, speaking, breathing, learning, working, or taking care of oneself. It is important to note that a chronic health condition in and of itself does not necessarily constitute a disability. The degree of impairment must be significant enough to "substantially limit" one or more major life activities.

This form is designed to allow us to achieve these goals. Persons who wish to receive accommodations due to a chronic health condition need to have this form filled out by a certified physician. The physician completing this form must have first-hand knowledge of the person's condition, must have experience diagnosing and treating condition, and will be an impartial professional who is not related to the patient. **NOTE:** This form may not be used as documentation for Assistance Animals. Please complete all blanks on this document. If any information is left unanswered, this documentation will not be accepted.

The Americans with Disabilities Act (ADA) defines disability as "a physical or mental impairment that substantially limits one or more major life activities, a record of such impairment, or being regarded as having such an impairment." Disabilities involve substantial limitations and are distinct from common conditions not substantially limiting major life activities.
