## Algebra 2

10-06 Modeling with Trigonometric Functions

- Trigonometric functions are $\qquad$
- Useful for modeling $\qquad$ motions or $\qquad$ patterns
- Period (T)
- Time of $\qquad$
- Unit: $\qquad$
- Frequency (f)
- Cycles per $\qquad$
- Unit: $\qquad$

$$
T=\frac{1}{f}
$$

Find the frequency
$y=2 \cos 3 x$

$$
y=\sin 3 \pi x
$$

## Write Trigonometric Models

1. Find the $\qquad$ ( $\qquad$ of max and min)
2. Find the $\qquad$
3. Find the $\qquad$
4. If the situation starts at zero, use $\qquad$
a. If starts increasing $\qquad$
b. If starts decreasing $\qquad$
5. If the situation starts at a maximum or minimum use $\qquad$
a. If starts at max $\qquad$
b. If starts at min

An audiometer produces a pure tone with a frequency $f$ of 1000 hertz (cycles per second). The maximum pressure $P$ produced by the tone is 20 millipascals. Write a sine model that gives the pressure $P$ as a function of the time $t$ (in seconds).
$\qquad$

Write a function for the sinusoid shown.

Two people swing jump ropes. The highest point of the middle of each rope is 80 inches above the ground and the lowest point is 2 inches above the ground. Each rope makes 2 revolutions per second. Write a model for the height $h$ (in inches) of one of the ropes as a function of the time $t$ (in seconds) given that the rope is at its lowest point when $t=0$.

The tables show the average monthly low temperatures $D$ (in degrees Fahrenheit) in Erie, Pennsylvania, where $t=1$ represents January. Write a model that gives $D$ as a function of $t$ and interpret the period of its graph. Use technology.

| $t$ | D | $t$ | D |
| :---: | :---: | :---: | :---: |
| 1 | 21 | 7 | 64 |
| 2 | 21 | 8 | 62 |
| 3 | 28 | 9 | 56 |
| 4 | 38 | 10 | 45 |
| 5 | 48 | 11 | 37 |
| 6 | 58 | 12 | 27 |

568 \#1, 3, 5, 7, 9, 11, 12, 13, 15, 17, 19, 20, 21, 23, 25, 32, 33, 37, 45, 47 = 20
