

To find out the question that goes to the answer (see the title), figure out the length represented by the letter in each circle below to the nearest tenth. Then match that letter with the length in the coded question below.

$\frac{4}{9}$   $\frac{6}{5.1}$   $\frac{3}{10}$   $\frac{6}{11}$   $\frac{4}{6}$   $\frac{.9}{10}$

$\frac{10}{8}$   $\frac{2.6}{6.8}$   $\frac{8}{4.8}$   $\frac{4.5}{7.3}$   $\frac{5.1}{5}$

$\frac{5}{8}$   $\frac{6.8}{8}$   $\frac{2.6}{8}$   $\frac{8}{6}$   $\frac{5.1}{8}$   $\frac{5}{?}$
